COTTON.

FRIDAY, P. M., Feb. 10, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening February 10. From the figures thus obtained it appears that the total receipts for the seven days have reached 161,095 bales against 154,482 bales last week, 150,800 bales the previous week, and 146,887 bales three weeks since, making the total receipts since the first of September, 1870, 2,510,651 bales against 1,933,834 bales for the same period of 1869, showing an increase since September 1 this year of 576,817 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	67,669	51,801	Florida bales.	814	536
Mobile	19,762	7,395	North Carolina	1,879	1,933
Charleston	9,588	5,960	Virginia	12,913	6,521
Savannah	27,007	11,469			
Texas	8,680	6,050	Total receipts	161,095	98,544
Tennessee, &c	12,786	7,379	Increase this year	62,551	....

The exports for the week ending this evening reach a total of 95,982 bales, of which 68,309 were to Great Britain, and 27,673 to the Continent, while the stocks at all the ports, as made up this evening, are now 661,594 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Week ending Feb. 10.	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans	21,968	13,393	35,361	31,601	260,249	224,727
Mobile	8,580	....	8,580	12,452	80,200	69,283
Charleston	6,090	4,307	10,597	9	86,674	24,261
Savannah	8,811	3,782	12,593	....	96,727	68,606
Texas	6,398	3,604	9,402	10,112	61,744	40.706
New York	14,336	2,987	17,323	6,094	93,000	79,559
Other ports	1,626	....	1,626	2,980	33,000	30,000
Total	68,309	27,673	95,982	63,188	661,594	538,085
Total since Sept. 1	1,246,785	266,280	1,503,905	1037,914	....	....

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 32,794 bales, while the stocks to-night are 128,506 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Feb. 3, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1. 1870.	1869.	EXPORTED SINCE SEPT. 1 TO— Great Britain	France	Other Foreign	Total.	Northern Ports.	Stock.

The market for the past week has not been satisfactory—the business has been small and prices have gradually weakened, the close to-night being about ¼c. off from last Friday—with, however, some improvement in tone. This depression in the earlier days of the week was almost entirely due to the extremely large receipts at the ports leading to a very general acceptance of larger estimates of the total crop, and causing depression and lower prices at Liverpool. Saturday last there was an advance of ¼c., and the market closed firm, but Monday this improvement was lost. Tuesday and Wednesday there was a further decline of ⅛c. each day, but since then there has been no change in prices, and the feeling on the market has become better as the belief has gained strength that the present armistice in Europe will lead to peace. Offerings have been equal to the demand, but the assortment is poor, good grades being scarce, and to obtain an even running line of fine quality something over present rates would probably have to be paid. For forward delivery the decline during the week has been about the same as for spot cotton, with the sales large. To-day at the opening there was an advance of 1-16c., which was, however, subsequently lost, and the close was, for February, 14⅜; March, 14⅝; April, 14⅞; May, 14 15-16; June, 15. The total sales of this description for the week, (including 1,600 bales free, on board, but not including bales "Exchanged") have been 57,700 bales. For immediate delivery the total sales foot up this week 19,580 bales, including 2,008 bales to arrive, of which 4,327 bales were taken by spinners, 1,088 bales on speculation, 14,065 bales for export, and 69 bales in transit. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	12⅜@....	12¼@....	13¼@....	13⅜@....
Good Ordinary	13⅜@....	14⅜@....	14⅜@....	14⅜@....

The following exchanges have been made during the week:

⅝c. paid to exchange 100 Feb. for 100 May.

WEATHER REPORTS BY TELEGRAPH.—Our telegrams to-night indicate continued rains over the South during a portion of the past week. At Mobile it has rained more than half the week. At Selma and Montgomery of the same state, and Savannah, Columbus, Macon and Augusta, Georgia, and at Charleston and Nashville it has rained from two to three days. The thermometer has averaged at Charleston 52, Mobile 59, Montgomery and Macon 53, Columbus 54 and Memphis 49. Our correspondents at Memphis say that about three-quarters of the crop in that vicinity has been marketed.

COTTON PLANTING IN THE SOUTH AND COTTON SPINNING IN EUROPE.—We give in our editorial columns a valuable communication from a contributor whose initials are well known to the trade, and whose opinion will always carry with it great weight And yet there are some points with which we cannot entirely agree.

First. We do not believe that it is good advice to the planters to tell them to put as much land into cotton this year as last year. If they can plant and raise it so that they will be able to accept 5½@6d. per pound in Liverpool, and still secure a profit, then we would certainly feel that they were safe in taking that course. But if they hire their labor at the same rates given the last season, and pay as much for the other expenses of cultivation, and find next September that they have raised 4,000,000 bales of cotton, at a cost of 5½d. on the plantation, and they can only get 5½d. at Liverpool, the consequence clearly is they are ruined, and the commission merchants who made the advances go down with them. We illustrated the result of an over supply of cotton, in the table we gave last week, and which we repeat below, showing the *average* price of middling uplands at Liverpool for a series of years before the war:

1845.....4⅜d.	1849.....5⅛d.	1853.....5⅝d.	1857.....7¼d.
1846.....4⅞d.	1850.....7¼d.	1854.....5⅝d.	1858.....6¼d.
1847.....6⅜d.	1851.....5⅝d.	1855.....5¼d.	1859.....6¼d.
1848.....4¼d.	1852.....5⅝d.	1856.....6d.	1860.....5½d.

This table shows us that we must expect low figures to rule if the market is oversupplied. The consumption of cotton cannot be largely increased next year over the *capacity* of this year, except by building new mills, and that is the work of months at least, and in the meantime the planter has sold his crop at a loss. Hence we think it is the part of wisdom both for the planters and the commission merchants to let the extent of planting depend upon the price of labor, keeping in mind always that they must not expect to market the next crop, if a large one, at a higher figure than 5½@6d. at Liverpool. It is a very good idea to drive out foreign competition with low prices, but if we ruin ourselves in the operation, it does not seem to us desirable.

Second. Nor can we give entire assent to the proposition that the consumption of Great Britain *cannot exceed* 12 per cent increase over last year. We look for 16@18 per cent increase *if the goods can be disposed of;* that is to say, we think Great Britain's capacity is equal to that figure, and that her mills are now running at that increased rate. The weak point in cotton now is the accumulation of goods in India and China, and the doubt which exists whether, even at the present low rates, they will be distributed. But this question of consumption is becoming one of minor importance, in view of the large crop which has been raised. If prices have reached a low enough point to prevent free shipments from India, then the inquiry as to the possible consumption of Europe will come in with much force.

GUNNY BAGS, BAGGING, &C—There has been a better feeling in the cloth market the past week, the trade having shown more disposition to stock up, but the close is again very quiet. The sales since our last are 150 bales to arrive per "Stratton Audly," and 250 per "Tantalon Castle," both at 12½c. gold, in bond. Holders ask 12½c. gold in bond to arrive, and 18½@19c. currency, duty paid, for native, and 19c. for domestic. Bags are dull and nominal at 16@17c. currency. Hemp is quiet; no sales of Manila are reported; in coin the quotation is about 10½@10¼; 600 bags Tampico sold on private terms. Jute is dull and without change in price. Jute Butts continue in active request, and sales are reported of 600 bales on spot here at 4c., and 1,000 bales to arrive at 3¾c. In Boston early this week 1,000 bales were sold to arrive at 3¾; later, 511 bales per "Remington," 625 bales (exchanged) per "Flying Foam," and 500 bales per "Prince Patrick," all at 3¾c., currency; 350 bales to arrive per "Prince Patrick," at 3¾c., gold, 650 bales per "Manchester," on private terms, and from store 500 bales at 4c., currency, duty paid.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	Week ending Feb. 10, 1871.			Week ending Feb. 10, 1870.		
	Receipts.	Shipments.	Stock.	Receipts.	Shipments.	Stock.
Augusta.....	6,131	5 301	21,368	3,093	2,288	22,795
Columbus.....	1,837	2,221	13,205	1,066	2,306	13,460
Macon.....	2,604	2,168	16,667	1,156	1,330	17,165
Montgomery...	2,995	3,102	10,498	1,897	2,041	12,925
Selma.....	2,885	2,555	10,775	1,015	984	7,835
Memphis.....	18,979	16,422	48,969	10,836	5,761	29,491
Nashville.....	4,116	3,045	7,584	2,895	2,035	5,165
	39,547	34,814	129,066	21,958	16,745	108,836

Our telegram from Nashville last week was incorrect—the receipts should have been 4,447 bales and the shipments 4,608 bales, and the stock the same as we gave it.

These totals show that the interior stocks have increased during the week 4,756 bales (being now 20,230 bales more than for the same period of last year), while the aggregate receipts are 17,589 bales more, and the shipments 18,069 bales more than for the corresponding period of 1870.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons:

	1871.	1870.
Stock in Liverpool.....bales.	610,000	352,000
Stock in London.....	75,322	106,593
Stock in Glasgow.....	300	300
Stock in Havre.....	44,700	85,450
Stock in Marseilles.....	6,600	6,100
Stock in Bremen.....	5,500	4,500
Stock rest of Continent.....	25,000	35,000
Afloat for Great Britain (American).....	379,000	177,000
Afloat for France (American and Brazil)..	1,318	32,149
Total Indian cotton afloat for Europe.....	89,107	103,399
Stock in United States ports.....	661,594	533,088
Stock in inland towns.....	129,066	108,836
Total.....	2,027,479	1,544,415

These figures indicate an *increase* in the cotton in sight to-night of 488,082 bales compared with the same date of 1869.

The exports of cotton this week from New York show an increase since last week, the total reaching 18,909 bales, against 14,027 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since Sept. 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 81 638 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night:

	Total bales.
NEW YORK—To Liverpool, per steamers City of London, 1,254....Holland, 3,119....Russia, 1,019....Manhattan, 2,867....City of Antwerp, 1,031...Minnesota, 3,022...Tiber, 2,186....per ships Escort, 1,569.... Walter Bain, 450....per bark Santon, 1,209	17,726
To Hamburg, per steamer Holsatia, 522	522
To Antwerp, per barks Erna, 31....Seaman, 630	661
NEW ORLEANS—To Liverpool, per steamers St. Louis, 3,913....per ship Blackwell, 3,576	7,489
To Cork, for orders, per bark Marblehead, 1,707	1,707
To Bremen, per ship Meggie, 2,542	2,542
To Barcelona, per brigs Maria Angela Sensat, 630....Maria Rosa, 460..	1,090
To Vera Cruz, per steamer Tabasco, 515...per brig J. M. Burns, 402... per schooner Veloz Veracruzana, 500 half bales	1,167
MOBILE—To Liverpool, per ships Ronochan, 3,496....Harmonides, 4,121. ....Oxford, 2,588	10,205
To Amsterdam, per schooner A Elwood, 1,360	1,360
CHARLESTON—To Liverpool, per ships Eliza Everett, 2,358 Upland and 346 Sea Island....John O. Baker, 3,415 Upland, and 178 Sea Island..	6,297
To Gibraltar and a market, per schooner Nancy Smith, 1,450 Upland..	1,450
To Barcelona, per brigs Prudente, 475 Upland....Pronte, 312 Upland..	787

Total	66,785	2,666	3,980	1,877	1,167	2,530	1,450	81,688

Included in the above are 522 bales from New York to Hamburg and 661 to Antwerp.

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 111¼ and 112½, and the close was 111¾. Foreign Exchange market is firmer. The following were the last quotations: London bankers', long, 109¾@109¼; short, 110¼@110¾; Commercial, 109@109½. Freights closed at ¼@7-16d. by steam and 5-16@⅜d. by sail to Liverpool.

BY TELEGRAPH FROM LIVERPOOL.—

LIVERPOOL, Feb. 9, 4:30 P. M.—The market has ruled steady to-day, with sales footing up 10,000 bales. The sales of the week, ending Feb. 3, were 66,000 bales, of which 16,000 bales were for export and 50,000 bales on speculation. The stock in port was 578,000 bales, of which 255,000 bales are American.

	Jan. 16.	Jan. 20.	Jan. 27.	Feb. 3.
Total sales	79,000	86,000	95,000	66,000

BREADSTUFFS.

FRIDAY P. M., February 10, 1871.

The market for Flour and Grain the past week has been variable, and closes quite unsettled. Flour has arrived but sparingly. An accident on one of the Trunk railroads has kept back supplies. There were large purchases of Shipping Extras on Wednesday and Thursday at $6 80@7 00—mainly at $6 85@6 90—but at the higher figures the demand was freely met, and no decided improvement could be quoted. Holders, though firm, were more disposed to sell when their limits were met, and not, as heretofore, advance prices as bids were advanced. The medium and better grades of State and Western Flour, $7 and upwards, have been dull and, with prices irregular and drooping. Southern flours of the low grades have been more active, and are a shade firmer. Rye Flour and Corn Meal continue dull. To-day the whole Flour market was less active, and the demand for Shipping Extras partially subsided, but on the large movement of the preceding days holders were not disposed to give way, but rather to ask more money, and the close was firm.

Wheat has been excited; shippers reported their limits greatly reduced, and millers did very little, while the pressure to sell increased. Speculators stepped forward to support the market but prices gradually yielded until Red Spring sold at $1 51@1 53; but at this point the speculative purchases were increased, and some exporters began to bring moderately forward by lower freights. There is consequently a reaction, and new Spring sold to-day at $1 54@1 56; Liverpool, by the absence of published advices, being privately reported better, but it is thought the movement is part of an effort to advance prices in the Chicago market.

Corn has declined under dull accounts from Liverpool which left the market in the hands of the trade, but the depression has been most decided in Mixed and Yellow, White having been pretty well supported.

Rye has been dull and drooping. Barley moved off pretty freely at about steady prices; two rowed State, 87@92c.; Western and Canadian, $1@1 15. Barley Malt steady.

Oats have been active at a steady advance, and to-day prime boat-loads of Chicago and Toledo sold at 66½@67c. afloat. Stocks are comparatively light, and receipts small, at all points.

The following are the closing quotations:

Flour—		Wheat, Spring, bush	$1 44@1 56
Superfine	$ bbl. $6 00@6 60	Red Winter	1 52@1 55

GROCERIES.

FRIDAY EVENING, February 10, 1871.

There has been no very decided increase of the demand for any class of goods and in some instances a slight falling off is noticeable, with the general tone of the market for groceries hardly so firm as heretofore. The concessions allowed, however, have been light in all cases and holders appear to lose little if any confidence, the modifications of values frequently arising merely from the necessity of realizing on odd parcels from landing cargoes, the arrivals of some goods showing an increase. Another quieting influence is the fact that the January purchases and withdrawals of invoices are now pretty well distributed and it will require some little time to start up the fresh demand. Most foreign advices are construed as favorable to the selling interest whether received from producing districts or points likely to call upon our market for supplies. A small commission house is reported to have failed during the week.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black	9,220 pkgs.	Laguayra	1,440 bags.	Sugar, Brazil	bags.
Green	7,057 pkgs.	Other	1,597 bags.	Manila, &c.	7,741 bags.
Japan	3,335 pkgs.	Sugar, Cuba	8,909 bxes.	M'las'es, Cuba	1,338 hhds.
Various	3,892 pkgs.	Cuba	2,451*hhds.	Porto Rico	158*hhds.
Coffee, Rio	13,743 bags.	Porto Rico	103*hhds.	Demerara	369*hhds.
Java	3,224 mats.	Other	1,865 hhds.	Other	16*hhds.
Maracaibo	739 bags.				

*Hhds. include bbls. and tcs. reduced.

Imports this week have included 2 cargoes of tea, 19,397 bags Rio, 24,325 mats Java, and 22,859 bags of other kinds of coffee, and good receipts of sugar and molasses, including 18,384 bags Manila sugar.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1871, are as follows:

		Stocks in New York at date.		Imports at leading ports since January 1.	
		1871.	1870.	1871.	1870.

Molasses	hhds.	7,498	16,127	6,639	26,946

TEA.

The very liberal movement reported in our last gave the trade a fair supply, and this, in connection with a desire among buyers to await the result of the public sale has contributed to keep the market in a comparatively quiet condition. Still there was some call throughout, and a pretty good business transacted, the wants of buyers as before requiring Oolongs mostly. Prices are still quoted as quite firm and uniform, and it undoubtedly would be a difficult matter to gain any positive concession, but the assortment is larger, pretty well distributed, and would-be purchasers have a better opportunity for shopping around in making selections, which gives them rather more advantage than previous to the recent arrivals. The line trade has been a little dull, though a few goods were distributed every day by most of the leading brokers. The invoice sales embrace 6,180 Greens, 7,250 Oolongs, 700 Sonchongs and 5,000 Japans. The auction sale on Thursday was well attended and on the whole satisfactory. The fine grades of Japans hardly sold up to expectations, but the low qualities brought comparatively full prices. The balance of the offering contained nothing particularly attractive.

Imports this week have included 29,747 pounds Black, 742,901 pounds Green; and 31,093 pounds Japan, per "Lady Elizabeth," from Shanghai; 734,215 pounds Green, and 70,649 pounds Japan, per "Dilpussund," from Shanghai, and 1,762 packages.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871	2,053,858	4,350,447	2,804,386	9,208,691
1870	1,520,333	1,639,214	33,543	3,193,095

The indirect importations, including receipts by P. M. Steamers via Aspinwall, have been 4,283 pkgs. since January 1, against 3,735 last year.

COFFEE.

The market for Brazils has been rather more active, and though at one time developing slight indications of weakness, the tone subsequently became strong again and importers generally seem fully as confident as during the month of January. All calls are met, to be sure, without any positive demands for advanced figures, but the stocks keep at a pretty low figure, and the private accounts from Europe are said to encourage the belief in a probable demand from that quarter, while our own jobbers must soon begin to make good the supplies distributed during the period they have been awaiting fresh arrivals. Latest accounts from Rio Janeiro are also considered strong, and there is said to be very close calculations to find a margin on goods laid down here at current values. Ordinary roasting stock, or a nice prime bright quality are still the favorites, though medium grades meet with a fair outlet. The other leading coastwise markets have shown a fair degree of animation and extreme prices were obtained, in some cases relatively higher than at this point. The stock of Java in first hands has been increased somewhat by recent arrivals, but is not large by any means, and holders remain pretty firm in their views, insisting that full figures be bid before entering upon negotiations. Buyers, however, appear quite as indifferent and the call has not been very sharp, except for the ordinary lots from second hands. West India descriptions are in a somewhat doubtful state, scarcely any business doing in large invoices, and indeed no great demand appearing except for the St. Domingo suited to European markets. Holders, however, express themselves full as confident as before, and few can be found placing their samples on the market in search of an outlet. Sales of 21,428 bags Rio; 1,239 bags Santos; 2,000 bags Maracaibo; 1,350 bags Savanilla; 200 bags Costa Rica; 200 bags Curacoa; 1,750 bags St. Domingo, and 5,000 bags the latter shipped from first hands. At Baltimore 15,362 bags Rio; at Philadelphia 3,350 bags Laguayra, and at Boston 15,125 mats Java.

Imports of Rio this week have included the following cargoes: "Ludwig," 5,000 bags; "Matchless," 4,469 bags; "Alpha," 4,800 bags; "St. Ursula," 5,128 bags. Of other sorts the imports have included 23,302 mats Java, per "Wallace;" 15,348 do. per "Knight of Snowden"; 4,198 bags St. Domingo, per steamer "Gulf Stream;" 190 bags do., per "E. H. Hatfield;" 1,200 bags do., per "F. Jameson;" 900 bags do., "per Village Belle;" 913 bags do., per "Isaac Oliver;" 880 bags do., per "Alfred," and 14,628 bags of sundries.

The stock of Rio Feb. 9, and the imports since January 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.
Stock	10,046	...	21,979	11,007	4,967	3,000	53,499
Same date 1870	46,201	....	14,175	9,000	8,000	2,000	79,376
Imports	84,350	3,550	30,554	15,000	7,500	8,000	148,954
" in 1870	78,991	....	42,694	31,095	10,800	3,045	166,605

Of other sorts the stock at New York, Feb. 9, and the imports at the several ports since January 1, 1871, were as follows:

In bags	New York—stock.	New York—import.	Boston Import.	Philadel. Import.	Balt. Import.	N. Orle's Import.	Total imports at all the ports
Java and Singapore	† 200	*24,235	*8,310	....	....	....

* Includes mats, &c., reduced to bags. † Also, 51,168 mats.

SUGAR.

The market for raws since our last has been rather slow, and lost tone considerably, with prices lower and generally lacking strength. Some few holders still feel confident, and are to a certain extent indifferent operators, but there is enough willing to realize to keep all outlet supplied, and the advantage for the time being is with the buyer. An absence of any further very stimulating advices from Europe and a general contraction of the home demand both from refiners and the trade have had a slightly weakening effect, but the main cause of the depression is the appearance of the new crop from Cuba, which has come to hand with considerable freedom, and naturally induces caution among those who have stock to secure, and the policy has been to regulate purchases as closely as possible to actual wants. Importers have developed no desire to force business on their fresh receipts, but were willing to entertain any reasonable bids. Quotations have been somewhat irregular of late, owing to the difference in the qualities, the old crop being dry and hard, and commanding about 1-16@⅛c. more than the new sugars, which are wet and heavy. Domestic goods are still on the market to a moderate extent, and find a fair sale at about the former average of prices. On refined goods there has been some irregularity in price, with hards doing a little better than other grades, but on the whole the tendency was rather downward. The general demand proved fair, and as the production was moderate, stocks did not increase, though with few exceptions refiners were enabled to meet most calls. The transactions in raws include 1,400 hhds. Cuba, 550 hhds. Martinique, 600 hhds. Demerara, 600 hhds. New Orleans, 200 hhds. British clarified, 150 hhds. various grades, 13,460 boxes Havana, 6,000 bags Manila, 3,800 bags Pernambuco, and 945 hhds. Melado.

Imports at New York, and stock in first hands, Feb. 9, were as follows:

	Cuba, bxs.	Cuba, *hhds.	P. Rico, *hhds.	Other *hhds.	Brazil, bags.	Manila, &c, bags.	Melado hhds.
Imports this week	11,184	2,098		1,928		3,076	1,954

" " 1869	6,883		15,376			55,246	41

MOLASSES.

The market for foreign goods has been a little more active, but not to any unusual extent, and there is still a lack of interest on the part of buyers. The old crop presents no attractions whatever unless offered at ruinously low rates to present owners, and the receipts of new crop thus far have either came direct to refiners or been held at rates far above bids for the quality, which was mostly a Muscovado not required by either the trade or refiners just at this season.

Digitized by Google

The only outright and positive demand is for choice and fancy grocery goods, the more so since all the best domestic has disappeared and as soon as anything acceptable comes on the market a good trade at full prices may be looked for. Some high testing clayed Cuba would also be acceptable, and probably command extreme rates. Domestic has been only moderately active, the supply larger, and receivers pretty free sellers, both from pier and store, at declining prices, as the quality is poor and the desire quite general to quit stock at once. We are now receiving mostly frosted lots, and they must be sold low if at all. The transactions embrace 925 hhds Cuba Muscovado (old crop), 100 hhds English Island, &c., and 2,000 bbls New Orleans.

The receipts at New York, and stock in first hands, Feb. 9, were as follows:

	Cuba, *hhds.	P. Rico, *hhds.	Demerara, *hhds.	Other *hhds	N. O. bbls

Including tierces and barrels reduced to hhds.

SPICES.

In the way of invoices the market has been very dull, and we learn of nothing sold worthy of notice. The jobbing trade has also been a little slow but in small lots a fair amount of stock still goes out and dealers appear to retain confidence on most goods, though Cassia if anything is again easier, and other grades are without buoyancy. Nutmegs and Pepper are probably the strongest in price, and few holders of these offer supplies with any freedom, but the majority meet bids at full market figures without any great amount of hesitation.

FRUITS, &c.

The speculative demand noticed at the date of our last has subsided, and the market is quite dull. For Layer Raisins only a light jobbing trade is going on; prices, however, rule very firm at the advance, and most holders are confident of a further increase in value. Dealers are generally well stocked up for the present, and most of them have goods to arrive which will be here before their present supply is exhausted. Currants have met with a fair sale, both on spot and to arrive, and rule about steady, but, with free offerings, are no higher. Turkish Prunes are firm and meet with a steady but not large business; remaining firm at former quotations. Sardines are quiet but are held confidently, especially quarter boxes. Nuts sell moderately well to arrive, but are rather quiet on the spot; prices for all kinds are firm.

Foreign Green are in good demand and firm in price. The supply of West India is not over abundant, and these sell at higher prices. We quote: Porto Rico Oranges, $7@8 00 per bbl; Havana, $8 00; Baracoa Cocoanuts, $38@40 00 per thousand; Lemons, $3 75@4 00 per box for Palermo and Messina, and Malaga at $2 75@3 per box; Palermo and Messina Oranges, $2 75@3 per box, and Valencia $7 50@8 00 per case.

Domestic Dried have met with an active demand for Apples, and prices are higher than at the date of our last report. There is a good demand for both pared and unpared Peaches, but transactions are restricted by the small stocks. Sales of Eastern shore pared have been made as high as 26½c. for a lot. Old are selling better if of very good quality, and are largely mixed with new. Blackberries have again become quiet, but have lost none of their firmness, 11c. is bid for prime. Pitted Cherries have met with fair sale, and full prices have been obtained for prime dry, but lots of sugared have been sold at 16c. Raspberries are in demand and rule steady as formerly quoted. Plums sell well. Peanuts have ruled steady and moderately active; stocks are not accumulating. Pecans are quiet but remain as formerly quoted; last sale we noted was at 14c for prime. Domestic Green Apples are selling freely and are still higher, the best selections bringing $5 50 per bbl. in lots. The South are the largest purchasers, but the city trade is also good; fair selections sell at $5 00, and mixed lots $4 75@5 00 per bbl. Russetts begin to move and bring about $4 75@5 25, as to quality. Cranberries continue slow of sale and prices are easy, $9 00@10 00 per bbl. for fair quality.

ADVICES FROM PRODUCING MARKETS.

Tea.—The following shows the quantity of Tea afloat for the United States at late dates (not including San Francisco), and which has not yet arrived:

† At Bermuda, discharging, January 11.

Cuba Sugar.—HAVANA, February 3d.—The *Weekly Report* says: The market has continued very firm since the date of our last, owing principally to the still moderate arrivals of new sugars from the country. The demand has been fair, but curtailed to some extent by the above mentioned cause. There are buyers for Europe as well as for the United States on the market, who, however, meet with the firmness of holders. Some of these would not sell freely even at present prices, although the small decline reported per cable from New York last night may modify their pretensions. Prices for No. 12, current class, have ruled at from 10¾@10⅞ rs. per arrobe, closing firm.

Shipments this week from Havana and Matanzas have been as follows:

To	Boxes.	Hhds.
New York	3,280	1,151
Boston	1,404	117
New Orleans	2,188	50
Total export of the week to all countries	9,327	1,490

The general movement at both ports has been as follows:

	Rec'ts this week Boxes.	Rec'ts this week Hhds.	Exports since January 1. To U. S. Boxes.	To U. S. Hhds.	To all Ports. Boxes.	To all Ports. Hhds.	Stock at date. Boxes.	Stock at date. Hhds.

THE DRY GOODS TRADE.

FRIDAY, P. M., February 10, 1871.

There has been no notable improvement in the Dry Goods trade during the past week, but the market has developed a better tone, with more inquiry toward the close. At the beginning of the week there were only a few buyers in the market, and these represented the heavy trade, buying chiefly full packages. Later, however, there have been more arrivals of smaller dealers, and the demand for goods from jobbers has materially increased. The movements are light, and are still confined almost wholly to domestic cotton goods, but there is decidedly more animation in the trade, and the prospects are said to be favorable for an earlier opening of the jobbing trade than jobbers have, for some time past, expected. A majority of the arrivals, and the bulk of the orders received thus far, have been from the South, though a few Western package buyers are purchasing cotton goods. The high rates for freight over the trunk lines running to the West, are delaying the trade with that section, as, in view of the facilities for rapid transportation, dealers there are deferring their purchases in the hope that by the time goods are actually needed to supply the wants of consumers' rates will be lower. The Pennsylvania road, although combined with the Erie and New York Central in the advanced charges, are, we are informed, "cutting" their rates in some instances, and as a similar course has always resulted in breaking up the combination, in the past, hopes are entertained by dealers that the present agreement will be annulled soon.

Trade in the interior is at a stand-still at the moment, and dealers generally are preparing to open their spring stocks. The city retail trade is as quiet as usual at this stage of the season. The sale of winter fabrics is over, and it is yet too early for any trade in Spring goods.

DOMESTIC COTTON GOODS.—The market has been animated, in consequence of an advance in several prominent makes of bleached fabrics and a prospective rise in the entire list. Heavy sales of unbroken packages have been made, both by agents and jobbers, and the light stocks held by the former at the time of our last report have been considerably lessened. Brown and bleached goods have been advanced in several instances and the tendency of prices is still upward. Colored cotton goods have not begun selling very freely as yet, but there is some improvement in the general trade and certain fabrics are in good request. Prices rule steady on all lines, but are always subject to a more or less general revision at the opening of a season, and at present quotations are in some instances nominal. Prints are selling more freely, and the offerings of light colorings are liberal. Prices are steady at our quotations, the only change being Lodis, which were opened at 10½c, in an extensive assortment of styles.

WOOLEN GOODS.—The demand for light weight woolens is only moderate at the moment, and is somewhat less than is usual at this season of the year. The sales of this class of fabrics were unusually heavy during January, and the large buyers seem to be well stocked up. These dealers are consequently purchasing very small amounts at present, while the trade with small dealers has not begun. The Western trade is kept back by high freights, and the Southern trade is confined to the large dealers, who are taking fair amounts. The stock of woolen goods in the market is small in the aggregate, as compared with the amount usually held at this season of the year, but the assortment of styles is varied, and buyers find no difficulty in obtaing samples for selections. The production continues light, and a few weeks of active trade would, it is said, cause a scarcity of many prominent makes.

FOREIGN GOODS.—The trade in foreign goods is confined almost wholly to first hands, and is light in the aggregate. Package buyers from other cities are in the market, and are buying moderate amounts of fabrics suited to the early trade. There is still an absence of any demand for fancy fabrics or goods, especially adapted to the late trade, and the aggregate trade is by no means heavy. Ginghams are reported as selling moderately from first hands at about the same prices as were current at the opening of the Spring season last year. There is no notable variation in the prices of any British fabrics as compared with those of a year ago but in some French fabrics, it is said, prices may open a trifle higher. Woolens meet steady sale, but are not especially animated at the moment, the heavy trade being well supplied, while the smaller dealers are not purchasing, as yet, to any extent.

The exports of dry goods for the past week, and since January 1, 1871, and the total for the same time in several previous years, are shown in the following table:

	FROM NEW YORK.				FROM BOSTON
	Domestics.		Dry Goods.		Domestics.

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of leading Joblers:

BROWN SHEETINGS AND SHIRTINGS are in relatively fair demand, and prices are stiffer, but remain without important advance. Amoskeag A 36 12½, do B 36 12, Atlantic A 36 13, do D 11, do H 12½, Appleton A 36 13, Augusta 36 11½, do 30 10, Bedford R 30 8½, Boott O 34 10½, Commonwealth O 27 8, Grafton A 27 8, Great Falls M 36 11 do S 33 10, Indian Head 36 13, do 30 10½, Indian Orchard, A 40 13, do C 36 11, Laconia O 39, 12 do B 37 11, Lawrence A 36 11, Lyman C 36 11, do E 36 12½, Medford 36 12, Nashua fine O 33 11½, do 36 13, do E 40 15, Newmarket A 36 11, Pacific extra 36 12½, do L 36 11½, Pepperell 7-4 22½, do 5-4 25, do 9-4 27½, do 10-4 32½, do 11-4, 37½, Pepperell E fine 39 13, do R 36 12, Pocasset F 30 8½, Saranac fine O 33 11, do R 36 13, Stark A 36 12½, Swift, River 36 9, Tiger 27 8.

BLEACHED SHEETINGS AND SHIRTINGS are in good request, and the movements are heavy, while prices tend upward. We quote as follows: Amoskeag 46 16½, do 42 15, do A 36 15, American A 36 12½, Androscoggin L 36 15½ Arkwright WT 36 13, Ballou & Son 36 13, Bartletts 36 14½, do 33 13½, Bates XX 36 16½@18, Blackstone AA 36 14, Boott B 36 13½, do O 30 11, do R 28 9, Clarks 36 17½, Dwight D 40 13, Ellerton 10-4 45, Forestdale 36 15, Fruit of the Loom 36 15, Globe 27 7, Gold Medal 36 12½, Great Falls Q 36 16 Hill's Semp. Idem 36 15, Hope 36 13, James 36 15, Lonsdale 36 15, Masonville 36 15½@16, Newmarket C 36 12½. New York Mills 36 21 Pepperell 6-4 22½, do 10-4 37½, Tuscarora XX 36 13, Utica 5-4 25 do 6-4 32½, do 9-4 47, do 10-4 52½, Waltham X 33 11½, do 42 15 do 6-4 22½, do 8-4 27½, do 9-4 32½, do 10-4 37½ Wamsutta 36 20.

PRINTING CLOTHS are moving less freely, and prices are a point lower. Orders for 64x64s, deliverable later in the season, have been placed at 6½c. Transactions in spot goods are very light at 7@7½c.

PRINTS are in Letter demand, though the trade is light for the season. Prices are firm, as follows: American 11, Albion solid 11, Allens, 11, do pinks 12, purples 12, Arnold 9, Atlantic 6, Dunnell's 11, Hamilton 11, London mourning 10, Mallory 11½, Manchester 11, Merrimac D 11, do pink and purple 13½, do W fancy 12½, Oriental 11, Pacific 11, Richmond's 11, Simpson Mourning 10½, Sprague's pink 11½, do blue and White 11, do shirtings 10, Wamsutta 7½.

Cotton.

COTTON.

1,000 Tons Arrow Ties for baling Cotton.

For Sale by

SWENSON, PERKINS & CO., AGENTS,

P O. Box 5,724. 80 Beaver street, N. Y.

These Ties have been used more extensively than any others, and last year for more than one-half of all the cotton baled in the United States, and received the premium at several State fairs.

VIBBARD, FOOTE & CO.,

AND

CHARLES G. JOHNSEN,

PROPRIETORS AND MANUFACTURERS OF

COTTON TIES,

ENGLAND, NEW YORK AND NEW ORLEANS

SELF-FASTENING BUCKLE TIE.

This is for the planter, the compress and the ship; the best and most convenient Tie manufactured. It is recommended by all of the dealers in New Orleans after a thorough investigation as to the merits of the various ties in use. They are made of the best quality of English iron, nicely painted, put up in bundles of uniform weight and are sold under a guaranty to have entire satisfaction.

WILLIAMS, BIRNIE & CO.,
65 Beaver street, New York.
Sole Agents for the Atlantic States.

THE Commercial AND Financial Chronicle

HUNT'S MERCHANTS' MAGAZINE,

A Weekly Newspaper,

REPRESENTING THE INDUSTRIAL AND COMMERCIAL INTERESTS OF THE UNITED STATES.

VOL. 12. NEW YORK, FEBRUARY 18, 1871. NO. 295.

Advertisements.

Advertisements will be inserted at the following rates per line for each insertion:

If ordered less than 4 times.....20 cents per line.
" 4 " 13 " .....16 " "
" 13 " 26 " .....14 " "
" 26 " 52 " .....12 " "
" 52 " ..... 10 " "

If the advertisement occupies one column or upwards, a discount of 15 per cent on these rates will be allowed.

Space is measured in agate type, 14 lines to the inch.

Advertisements will have a favorable place when first put in, but no promise of continuous insertion in the best place can be given, as all advertisers must have equal opportunities.

Advantages.

1. The CHRONICLE has much the largest circulation of any financial publication issued.

2. Its circulation extends to business men in BOTH the FINANCIAL and COMMERCIAL branches, and also to a very numerous class of retired merchants, moneyed men and investors, who are not engaged in regular business.

3. It is preserved on file by subscribers, and thus possesses a great advantage for advertisers, over those publications which are habitually thrown aside after perusal.

WASHINGTON, February 4, 1871.

Public notice is hereby given, that books will be opened on the sixth day of March next, in this country and in Europe, for subscriptions to the National Loan, under the Act approved July 14, 1870, entitled "An Act to authorize the Refunding of the National Debt," and the Act in amendment thereof, approved January 20, 1871.

The places at which subscriptions may be made, and the names of the authorized Agents of the Government, will be announced hereafter. The proposed loan comprises three classes of Bonds, namely:

FIRST. Bonds to the amount of five hundred millions of dollars, payable in coin, at the pleasure of the United States, after ten years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of five per cent per annum.

SECOND. Bonds to the amount of three hundred millions of dollars, payable in coin, at the pleasure of the United States, after fifteen years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of four and a half per cent per annum.

THIRD. Bonds to the amount of seven hundred millions of dollars, payable in coin, at the pleasure of the United States, after thirty years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of four per cent per annum.

Subscribers to the Loan will have preference in the following order, namely:

FIRST. Subscribers for equal amounts of each class of bonds.

SECOND. Subscribers for equal amounts of bonds bearing interest at the rate of four and a half per cent and of bonds bearing interest at the rate of five per cent.

THIRD. Subscribers for five per cent bonds.

When a subscription is made the subscriber will be required to deposit two per cent of the amount thereof, to be accounted for by the Government when the bonds are delivered; and payment may be made either in coin or in bonds of the United States known as FIVE-TWENTY BONDS, at their par value. The coin received in payment will be applied to the redemption of five-twenty bonds.

The bonds will be registered or issued with coupons, as may be desired by subscribers. Registered bonds will be issued of the denominations of $50, $100, $500, $1,000, $5,000, and $10,000; and coupon bonds of each denomination except the last two. The interest will be payable in the United States, at the office of the Treasurer, any Assistant Treasurer, or Designated Depositary of the Government.

The bonds of the several classes aforesaid, and the interest thereon, are exempt from the payment of all taxes or dues of the United States, as well as from taxation in any form by or under State, municipal, or local authority.

After maturity, the bonds last issued will be first redeemed, by classes and numbers, as may be designated by the Secretary of the Treasury.

GEO. S. BOUTWELL,
Secretary of the Treasury.

SAFE INVESTMENT.

The attention of Capitalists is called to the

FIRST MORTGAGE

SEVEN PER CENT BONDS

OF THE

PEORIA, PEKIN & JACKSONVILLE RAILROAD COMPANY,

Issued in sums of $500 and $1,000, redeemable July 1st, 1894, with coupons for semi-annual interest, payable on the first days of January and July, in the City of New York, and secured by a Mortgage for $1,000,000 upon the Railroad, its franchises and all equipment, on the well protected basis of about $12,000 per mile.

This Road, with its 88 miles of main, and over 8 miles of side track, is completed and in successful operation between the cities of Peoria and Jacksonville, in the state of Illinois. At Peoria, the third city in the state in respect to business and population, it intersects four prominent Railroads, with connections for Chicago, Rock Island and other points North, East and West but having its principal connection with that of the Chicago, Rock Island and Pacific Company. At Jacksonville it connects with three Roads forming, with the Jacksonville Division of the Chicago and Alton Road, the shortest line between Peoria and St. Louis.

Its rental receipts from other Roads, whose trains pass over less than ten miles of its track, are $40,000 per annum, being more than one half of the amount of the annual interest on its First Mortgage Bonds, otherwise amply provided for by its existing business.

A portion of the $1,000,000 of First Mortgage Bonds, aforesaid, the high character of which for investment will be observed, are now offered for sale by

W. T. HATCH & SON, Bankers,

LEBBEUS CHAPMAN, Jr. 33 Wall st.
JAMES F. KELSEY, Havana, Ills.

Winslow, Lanier & Co.,

27 Pine Street,

OFFER FOR SALE

THE SEVEN PER CENT 1ST MORTGAGE BONDS

OF THE

Grand Rapids and Indiana Railroad Co.,

Principal and interest payable in Gold, free of government tax; interest, coupon or registered, payable in January and July, in New York. These Bonds are secured by a First Mortgage on the Road, and by a Mortgage on a LAND GRANT of

Eleven Hundred and Sixty Thousand Acres

of the best Lumber Lands of Michigan. These Lands are worth more than the amount of the Bonds. The Bonds are further secured by a guaranty of the principal and interest by the

PITTSBURG, FORT WAYNE AND CHICAGO RAILROAD CO.,

AND

The Pennsylvania Railroad Co.

The road extends northerly from Fort Wayne into Michigan. More than 200 miles are completed and in operation.

Large numbers of these Bonds have been taken by careful investors, and the most rigid investigation is invited.

Price 92½ per cent and accrued interest in currency.

OLD AND NEW ROUTES FOR COMMERCE.

That the old channels of commerce are not easily disturbed and turned aside from their course is a fact attested by all history. Yet it seems as if we were on the eve of a great revolution in the course of the vast trade which is carried on with China, India and Japan. The suggestive announcement was made by telegraph yesterday that the steamship Great Republic had just landed at San Francisco 5,700 packages of tea to be sent by railroad to Chicago, 1,140 packages for Boston, with 1,000 packages of tea and a large quantity of silk for New York. This is but one of a multitude of indications of the revolution to which we have referred and of the rapidity with which new bonds of commercial union between the Orient and this country are developing by means of the Pacific railroads. The monopoly so long enjoyed by the old great routes for the rich commerce between Asia and Europe is disputed. Several new routes are attracting commerce from its ancient currents, and disturbing their settled flow. The enlightened policy of this country is obviously to multiply by all possible means the forces which will attract over the route across this continent the vast Oriental trade that has so greatly enriched every nation through whose territory it has ever heretofore passed.

It is not a little singular that on the day of the arrival of the Great Republic at San Francisco, the contract of the Government with the Pacific railroads was up in Congress. The difficulty between Mr. Boutwell and the companies can scarcely fail to embarrass the railroad people, and the whole subject is now fully referred to the Judiciary Committee of the Senate, who it is hoped will report without delay. The merits of this controversy are well understood by the public and need not receive more than a brief recapitulation. It is well known that Mr. Boutwell insists on interpreting the law so as to compel the railroads to repay promptly in cash the interest on their subsidy bonds. This demand they reply is not in the law as heretofore interpreted. For the last six years the understanding has been acted upon both by the Treasury and the companies that the Government should be reimbursed for this interest, not in cash, but in services. And it is claimed that the provision in the law of 1864 appropriating one-half of all monies earned for such services was made with the mutual expectation that the extent of the Government business would be such that before the expiration of the thirty years lifetime of the subsidy bonds, the whole amount due would thus be paid. But in any case the Government agreed to forbear until the maturity of the bonds all demands for any other payment than such as might arise from the half of the earnings of the road for the transmission of mails and military supplies, and for other Government services. The argument, as we understand it, is as follows in support of these positions: First, the companies say that at the time the contract was made between them and the Government, a military road across the continent was a strategic necessity. We were in the midst of the darkest gloom of our civil war, foreign intervention was threatened, the Pacific States were supposed to be, if not disaffected, at least in danger, the troops we could spare for service on the plains were not enough for the protection of our vast interior territory without a railroad to increase our power of mobilizing and concentrating our armies on any given point. The military situation required the road to be built with unexampled rapidity. To secure this rapid construction when gold was wildly fluctuating at 200 or above, and when iron and other requisites had to be sent around Cape Horn, when the freight of a single locomotive cost $6,000, when insurance was at war rates, amounting to as much as 17½ per cent., and when rails cost 140 dollars a ton, involved such risks that the most adventurous of our engineers and financial potentates shrunk from the undertaking as certain to bring ruin on whoever put their money into it. It was then an almost impossible task to raise funds amid the

Digitized by Google

universal disrepute and disfavor with which the enterprise was at first greeted in Wall street.

Secondly, The companies say that in view of these facts the Government decided that the road must be built, and entered into a contract with them running over thirty years, at the close of which period all Government moneys advanced to the Company were expected to be repaid with interest. On these conditions subsidy bonds were donated to the Company to an amount equal to about one-fourth or the expense of equipping and building the road. The Government was also to have control of the new route at all times for military purposes, and over it were to be sent all the military stores and mails transported between the Missouri and Pacific Coast.

Thirdly, The companies say that the military stores have been sent by sea and otherwise, either from routine or caprice or negligence, and still that the low rates for freight have already caused a saving to the Government of four or five millions a year. They add that if the whole of the Government business were allowed to pass by this route that the half earnings prescribed in the law would pay speedily all that Mr. Boutwell demands. And they claim that this ought to be done because their tariff of rates is as low as that of other routes, and because, having completed their road six years earlier than was required by law, they equipped it at vast expense, and with a special view to affording all needful facilities to the Government without interfering with the business traffic of the line.

Fourthly, it is urged that the express terms of the law of 1864 deny to Mr. Boutwell the right to withhold, as he has done, the whole of the moneys earned by the railroads, and that he is bound by the terms of the law to pay one half in cash. This is the only argument of the railroad companies which the Treasury has yet answered. Mr. Attorney-General Ackerman's argument on this point was briefly reviewed in THE CHRONICLE some time ago. He leaves wholly out of view the fact that a contract has been made between the companies and the Government, that this contract must be faithfully performed, that the faith of the Government is pledged to it, that the road has been built in reliance upon it, and that the development of the Pacific Railroad is essential to the commerce and other material interests of the country. In illustration of this last point we are told that, but for the economies introduced by the Pacific Railroad, our production of gold and silver would have fallen off 25 per cent, and we should have lost to that extent the immense advantages in regard to the balance of trade and to the adjustment of our foreign exchanges, which are confirmed by our large annual production of the precious metals. Moreover, it is officially reported that in the last five years 1,184 miles of railroad have been constructed in the State of California alone. During the current year 500 miles more are expected to be opened there, and it is not easy to see how rapidly the resources of the Pacific slope will develop as they receive the quickened stimulus of the new streams of European commerce with the Orient, as they flow across our territory, enriching and paying tribute to it in their course.

MERCANTILE FAILURES AND NATIONAL PROGRESS.

It has often been remarked that we have in this country a larger proportion of failures in mercantile business than occur in any other great commercial nation, and if this was so before the war it might reasonably be supposed that with the legacy the war bequeathed to us of an irredeemable currency, a defective financial system, and a heavy fiscal burden, we have not reduced but rather multiplied the perils which threaten with shipwreck the more venturesome of those who navigate the troubled ocean of American industry, commerce and finance. In the human body, especially in youth, where there is rapid growth, we are told that there is an equal rapidity in the processes of disintegration and decay. Something analogous to this is seen in the mysterious national life and growth of this young American nation. And hence we need not be surprised that as no nation in the world can compare with us in the amazing activity of national growth and expansion of material wealth, so there should be some corresponding activity in those destructive forces which cause individual failures. Arguing on these premises a year ago, we called attention to the increase in the number of mercantile failures and to the morbid apprehension hence arising in the minds of a considerable number of thoughtful observers lest a general panic and commercial hurricane might wake up at some unexpected moment and send destruction and terror over the whole financial horizon. The hopeful opinions we ventured to express have happily been verified by the extent of the mercantile disasters during the past year. In an elaborate report, just published by the Mercantile Agency of Messrs. Dun, Barlow & Co., we have the following table of last year's failures in the several States, comparing them with those of the previous two years:

FAILURES FOR 1868, 1869 AND 1870.

States.	1868. No. of Failures.	1868. Am't of Liabilities.	1869. No. of Failures.	1869. Am't of Liabilities.	1870. No. of Failures.	1870. Am't of Liabilities.
Alabama	33	$554,000	16	$101,000	31	$788,000
Arkansas	11	270,000	7	53,000	4	22,000

Minnesota	29	169,000	35	567,000	43	568,000
Mississippi	29	421,000	11	383,000	24	296,000
Missouri	59	776,000	65	1,968,000	115	2,281,000
Montana	2	31,000	..	.....	..	.....
Nebraska	13	190,000	15	199,000	8	152,000
New Hampshire	25	283,000	39	717,000	40	261,000
New Jersey	43	512,000	65	1,038,000	93	1,121,000
New York (except N. Y. city)	258	2,410,000	309	7,135,000	388	5,692,000
North Carolina	52	277,000	23	368,000	31	738,000
Ohio	203	4,034,000	221	4,663,000	266	7,956,000
Pennsylvania	287	3,884,000	306	7,844,000	418	10,982,000
Rhode Island	18	499,000	18	849,000	23	958,000
South Carolina	25	521,000	19	209,000	21	315,000
Tennessee	42	1,338,000	15	378,000	31	821,000
Territories	..	.....	12	519,000	5	150,000
Texas	24	465,000	19	720,000	28	1,007,000
Vermont	21	163,000	37	313,000	35	537,000
Virginia	91	685,000	59	1,406,000	76	1,178,000
Wisconsin	35	475,000	61	1,047,000	74	1,107,000
	2,191	$32,120,000	2,381	$53,684,000	3,121	$67,669,000
N. Y. City and Brooklyn	417	31,654,000	418	21,370,000	430	20,573,000
Total	2,608	$63,774,000	2,799	$75,054,000	3,551	$88,242,000

It is to be regretted that this table gives us no hint as to how much of these vast sums was lost in foreign commerce and how much in our domestic industry, but in this point of view it is certainly gratifying to see the limited extent of the failures in this city. The heavy fall in gold and the derangements caused by the war in Europe must have put a heavy pressure at times on the resources of a large part of our mercantile firms, whose business is connected more or less directly with the foreign trade of this greatest seaport of the United States. We have here a new illustration of the strength and stability of our industrial system. The weaker members of that system must have been severely shaken out, as is indicated by the number of industrial failures, which is larger than those of 1868 or 1869, although their magnitude is less than that of last year, and only two-thirds as much as the aggregate of 1868. Here we have, also, a new proof of the increasing disadvantages of small capital. Formerly it was the boast of this country that a man whose capital was not large had in most departments of business much less to fear from his wealthier rivals

Digitized by Google

than in England. In this superiority lay one of the safeguards of our popular institutions. Since the war, however, gigantic wealth has been concentrated in few hands, and the national proclivity to organize has infected the larger capitalists in almost all kinds of commercial and manufacturing industry. The few who are strong in monetary power are easily able to confederate, to form cliques, and to carry out schemes for crushing and absorbing competitors who are less opulent and more exposed to dangers from the commercial disorders and spasms which now and then develop themselves. The shortsighted combinations and strikes among workmen are also inflicting heavy losses on those employers who have small capital and who cannot, therefore, afford to wait events, as richer men can do. These strikes of workmen would be less frequent if the mechanics could only see that it is to their interest to have a free course and a fair prospect of success for small capitalists, rather than that the small establishments should be swallowed up in the larger ones. The democratic institutions of this country require for their free growth and development that the wages-class of our producers should not be inordinately augmented while the capital-class dwindles down to the shrinking exclusiveness of a privileged opulent few. In a political point of view then, as well as in other respects, one sees with regret the indications in the table before us that the process of annihilation among the establishments of small capitalists is going on with a swiftness which justifies apprehension and demands a remedy.

It is true that failures occur chiefly as the result of rashness and of indiscretion and are often the penalty of overtrading and mismanagement. But much of what is blamed as a ruinous make-shift policy in embarrassed merchants and struggling traders is usually the result of embarrassment, and to find fault with it is often but little less wise than to blame for defective grace the violent contortions and convulsive struggles of a drowning man. The point for the statesman to examine is whether by oppressive taxation, or a mischievous financial system, or a meddlesome Treasury policy, we are multiplying the hazards which surround commercial and financial business; and if so by what fiscal and administrative reforms greater security can be given to the trading community. It is no argument to say that when all has been done which is possible there will be failures; and that under the wisest laws disasters will overtake both the honest and the dishonest. This is true. But it is the business of the statesman to take measures to avert such calamities as can be averted, and we must certainly include in the category of preventable disasters many of the failures caused by the numerous financial fluctuations which a defective tax system and a spasmodic Treasury policy have caused during the past few years.

There are two important facts about these commercial failures which the tables before us do not touch. The first is the amount of actual losses after the assets of the insolvents were exhausted, and secondly the amount of capital destroyed by the aggregate failures. A singular theory has been put forth by some of the newspapers in discussing the foregoing list of mercantile losses. We are told that except to the individual creditors these failures are of little account. To the nation at large there is no loss whatever inasmuch as what one man loses another man gains and the aggregate wealth of the nation is undiminished. A leading morning paper is bold enough to apply this novel principle to our national debt. If we should repudiate this debt, hints this wise teacher of financial strategy, what a few bondholders lose forty millions of American citizens would gain, so there would really be no general loss, but only an individual loss from this summary process of annihilating 2,000 millions of the national obligations. This sophistical plea for plunging the country into the abyss of dishonor, bankruptcy and commercial ruin is unworthy of a serious answer. In regard to the commercial failures the argument is also absurd. It overlooks the fact that a nation suffers injury in its organic life whenever an honest debt is not honestly paid. And besides this, the failure of any merchant or trader is always attended by a destruction of much of the capital invested in his business. The capital thus annihilated and destroyed every year is a dead loss to the nation, and probably diminishes the aggregate wealth and productive power of the country by an amount greatly exceeding the aggregate sum of the liabilities which are not paid by the insolvents themselves.

Taking the whole country through, it is computed that the failures last year extend to about one per cent of the persons engaged in business. This small proportion of disasters, while it is far below what some of our prophets of evil prognosticated a year ago, is sufficiently large to justify anxiety; and while it is not at all to be accepted as a proof that the national wealth is not growing with the multiplication of our railroads, our telegraphs and other aids to commerce and trade, still it marks the past year as one of undue risk and unnecessary loss to the mercantile and industrial wealth of the country.

We must not omit to notice the fact that, from obvious causes, in Alabama, Georgia, Louisiana, and some other Southern States the proportion of failures has been augmented over the more prosperous year, 1869. There is here, however, and in the other forebodings about the financial condition of the South, nothing to awaken serious distrust, and much to stimulate hope for the future. This will be seen more distinctly from the following table, which separates the Northern failures and shows that a smaller amount of the aggregate losses have recently occurred in the South than the average of several previous years before and since the war:

AGGREGATE NUMBER AND AMOUNT OF FAILURES FROM 1857 TO 1870.

	—In Northern States only.—		—In all the States.—	
	No.	Liabilities.	No.	Liabilities.
1857	4,257	$265,818,000	4,932	$291,750,000
1858	3,113	73,608,747	4,225	95,749,000

RAILROAD EARNINGS IN JANUARY.

It is quite auspicious that the first month of the new year should exhibit returns of railroad traffic which are decidedly favorable. The confidence in railroad property is strengthened and the numerous holders of stocks have reason to be gratified with the prospect that, under good management, the payment of dividends is almost certain on every well located line of road.

A number of the roads commenced the year with considerably increased mileage, having built or leased additional lines in 1870 to complete their connections, and for this reason the earnings for the last month can not in all cases be exactly compared with the same month of 1870. On the other hand the economy of management has in some cases been so greatly improved that the net earnings show an increase while the gross receipts were less. It is apparent from this that a statement of both receipts and expenses is necessary to show the actual financial condition of a company from month to month; and it is to be regretted that more companies do not make their reports in such a shape.

Several important changes have recently been made in

Digitized by Google

the way of contracts or leases. Since the completion of the bridge of the Baltimore and Ohio Railroad over the Ohio River at Parkersburg, making a short route from Baltimore to Cincinnati, an arrangement has been made with the Ohio and Mississippi Road to change their gauge, so as to conform with that of the former, and thus make a very direct and unbroken route between Baltimore and St. Louis. The lease of the New Jersey companies by the Pennsylvania Central, which will probably be consummated soon, will make a close connection with New York and Chicago by this route; and a further important arrangement is reported though it does not appear as yet how correctly, for a lease or contract between the Lake Shore and New York Central party and the Cleveland, Columbus, Cincinnati and Indianapolis Company, to give the former a direct route to Cincinnati and Indianapolis. The tendency of railroad management is continually toward consolidation; and while it is a bad policy for any Government to make severe restrictions upon the rights of corporations, or legislate with any spirit of hostility toward them, it is quite important that the operations of companies controlling $100,000,000 or more of capital, employing perhaps 25,000 men and drawing $20,000,000 a year from the pockets of the people, should be carefully watched, for in these cases the capital required, for any healthy competition is so great as to make it practically out of the question.

THE GERMAN EMPIRE.

William I. has already assumed the title and the powers of hereditary Emperor of Germany; and his subjects are discussing the question where and when he shall be crowned. To us at a distance, who care to see chiefly the substantial and permanent elements in European history, and not the imposing trappings and varying forms of them, the interesting inquiry just now is a very different one: it is, what is the new Germany of which this new Emperor is the head?

To understand this, we must first look at the leading statistics of the countries included in it. These countries consist of—

1. Prussia, as it was, before 1866, already one of the great powers of Europe, but inferior in resources and strength to Russia, Austria, and France.

2. The territories added to Prussia at the time of the Austrian war in 1866, including the Kingdom of Hanover, nearly all the "Electorate" of Hesse and the Grand Duchy of Nassau, the "free city" of Frankfort-on-the-Main, the Duchies of Schleswig and Holstein, and certain districts of Bavaria and of the Grand Duchy of Hesse.

3. The twenty-one States besides Prussia which joined in the "North German Bund" of 1867, under the military leadership of Prussia: including Saxony, Mecklenburg, Oldenburg, Weimar, all the Saxon Principalities, the free cities of Hamburg, Bremen and Lubeck, and nearly half of the Grand Duchy of Hesse.

4. The South German States, which have united with the late North German Bund in establishing the new Empire, in consequence of the French war of 1870. These are Bavaria, Wurtemburg, Baden, the southern half of the Grand Duchy of Hesse, and the little Principality of Lichtenstein.

These four classes make up the new German Empire which thus includes the whole of the territory occupied by the German race in Europe, except the German part of the Austro-Hungarian Empire. This exception is less important than is generally supposed. Less than one-fourth of the subjects of Austria are of German stock—not quite nine millions of them, according to the census of 1869—and the strictly German provinces of the empire cover an area of but 22,500 English square miles, or little more than one-ninth of Germany. They are, however, the neucleus of Francis Joseph's Empire, and could not be severed from it without dissolving the whole. Their future is a problem of the deepest interest. A large "German party" among the people look forward steadily to a union with the rest of their race, regardless of the fate of the Hapsburg monarchy; while all the statesmanship of the Vienna Court is diligent in the effort to consolidate the new Constitutional Empire of Austria, by permanently incorporating its German subjects with those of Eastern races. For the present, the contest is one of domestic policy only, and we shall not include them in this discussion.

First, then, and before 1866, when the war began for leadership in Germany, Prussia was a thoroughly consolidated nation, with an area of 108,136 square miles, equal to that of New York, New Jersey, Pennsylvania and Maryland together, and a population (December, 1864) of 19,304,843, or almost exactly half as great as the present population of the United States. The great drawback to the complete consolidation and military organization of the Kingdom was that it was completely divided by the Kingdom of Hanover and the Electorate of Hesse, which lay between the Eastern or old Prussian Provinces and the Rhine Provinces; and that the districts upon the Rhine thus cut off from the larger part of the nation, differed from it in religion, being preponderatingly Catholic, and were attracted to France and to South Germany by the influence both of the Church and of trade.

At the same time the area of France was 209,420 square miles, and its population (1866) 38,067,094, or, in both, France was nearly twice as great as Prussia. Why then did French statesmen already insist that the leadership of their nation in Europe was imperiled by the growth of Prussia? For many reasons, chiefly these: that the growth of population in Prussia was four times as rapid as in France, having doubled, while that of France has increased less than one-third; that the military organization of the Prussians was complete, enabling them to bring into active service a larger proportion of the nation as trained soldiers than any other civilized people ever levied; and yet this organization could not possibly be equalled in France without unsettling all industry and society and provoking revolution; but, above all, because the ambition and influence of Prussia were rapidly gaining ground in Germany, so that there was already reason to suspect that a war against her might unite the whole German people under the leadership of the Hohenzollerns. Yet neither in France, nor even in Germany itself, was the extent to which the foundations of a mighty and united military Empire had been laid suspected by any one.

II. The year 1866 told the whole story. By overthrowing the power of Austria in Germany, Prussia was able at once to grasp the lands she most coveted; to make her own territory continuous; to extend her military system over the whole of North Germany, and to assume the representation of the desire of the whole German race for union. She actually annexed in that year the Kingdom of Hanover, with 14,848 square miles and 1,923 492 people; the Electorate of Hesse, with 3,673 square miles and 737,823 people; the Duchy of Nassau with 1,810 square miles and 466,014 people; Frankfort, with its little tract of 39 square miles, but with 89,837 inhabitants; Schleswig-Holstein, with an area of 6,808 square

Digitized by Google

miles and 960,996 inhabitants; and the several slips of territory taken from Bavaria and the Grand Duchy of Hesse to "round off" the Prussian monarchy, together including 637 square miles and 108,078 inhabitants. Thus at one stroke Prussia acquired, as part of her territory, 27,810 square miles of land, with 4,285,700 new subjects, or a district larger than Massachusetts, Vermont, New Hampshire and Rhode Island together, and containing just twice their present population. It gained continuity of surface, the control of some of the principal centres of trade and finance, and of the navigation of the Elbe and Weser, with a position on the North Sea; and stood, at the end of 1866, the foremost military State in Europe, with France as its only rival. Its territory was nearly as large as New York and the Middle States together; its population was 23,590,543, or almost the same as that of all the States which adhered to the Union when our Rebellion broke out in 1861. Nor was this alone what alarmed the French; but the neighboring divisions of Germany were brought almost as completely under Prussian control as those actually annexed, while the perfection of the military machinery of Prussia in calling her trained citizens in a fortnight from their homes to the battlefield was found so wonderful in the Bahemian campaign as to leave no doubt that, even alone, she would be a formidable antagonist to any nation.

III. The annexations of 1866 were followed at once by a reorganization of North Germany, under the name of a Bund or alliance, with Prussia at the head, which gave her, for all military purposes, almost the same control of the other States as of her own provinces. Of these States, Saxony is the most important, including an area of 5,776 square miles, and a population in 1867 of 2,423,586. All the twenty smaller States of the Bund together cover but 18,560 square miles of land, and have a population of but 3,313,116; so that Prussia alone contains more than four-fifths of the entire people of North Germany, and her influence with the whole is preponderant and irresistible. In declaring war against Prussia last July, France was well aware that the whole North German Bund, at least, would be united against her, and that she was attacking not Prussia, with her twenty three and a half millions, but North Germany, with her population, in 1867, of 29,906,217, and amounting in 1870, at the average rate of increase for many years past, to 31,200,000 souls; and, by their superior military system, fairly equal in the field, under ordinary conditions, to the French nation of 38,000,000.

IV. But the war threatened to wrest German territory from Germans, and at once the whole people of Germany were united by it. A secret treaty of alliance, offensive and defensive, was three years ago concluded between Prussia and the South German States, and 1870 found them ready to carry it out. In doing so they became irrevocably bound together with North Germany, and they have now joined together in re-establishing the empire. The extent of these States is as follows:

	Square miles, area.	Population.
Bavaria	29,330	4,824,421
Wurtemberg	7,528	1,778,396
Baden	5,909	1,434,970
Southern Hesse	1,669	854,475
Lichtenstein	62	7,994
	44,518	8,610,256

or a territory almost equal to the State of New York, and a population twice as large.

Thus the German empire, as now reinstituted, possesses a country about equal in extent to New England and the Middle States to the Potomac, including Ohio, and a population which amounted in 1867 to 38,767,142, and is now about 40,300,000, or at least 1,500,000 more than the present population of France, which, according to the best estimates, is almost exactly the same as that of the United States by the census of 1870; 4,000,000 more than the Austro-Hungarian monarchy, and is exceeded in number by the subjects of no single government in Europe, except the Emperor of Russia.

The statistics of population will enable us to understand the actual strength and position of the new empire in the family of nations only when regarded in connection with other elements of power. Thus, in numbers, as well as in extent and fertility of territory, there is still little to choose between Germany and France. Alsace and Lorraine, it is true, are now claimed as German conquests. They contain together 12,520 square miles of territory, and had, in 1866, 2,720,450 inhabitants; so that, if they be transferred to the new empire, Germany will contain 44,000,000, and France not quite 36,000,000 of inhabitants; a disproportion, however, still far less, in this respect, than has often existed between nations equally matched in the field. And when the wealth, trade, and industrial resources of the two countries are compared, it will be seen that the disproportion in population would be greatly qualified by these, and the two countries might fairly stand as rivals in influence and power, were it not for the one great peculiarity of Germany, the Prussian military system.

We have no means of forming even an approximate estimate of the actual wealth and productiveness of the two nations, and have to rely upon general statements. But these leave no doubt whatever that France is the richest country on the continent of Europe, both in the aggregate and in proportion to its numbers. The budgets of the governments are not a final proof of this, yet they are a strong confirmation of it; and when we find that the total revenues of the French Empire for a series of years before the war averaged $330,000,000 per year, while the aggregate revenues of all the German governments for the same years were, upon the average, but two-thirds as much, or $217,000,000, we have one test of the comparative financial resources of the two. In railroad mileage they are almost exactly equal, each company having nine thousand miles in operation in 1867; but the French railroads were more costly in construction, better equipped, and did a larger business; while they were constructed wholly by French capital, which also contributed largely to many of the German lines. The aggregate receipts of the French railways in 1866 were $120,670,000; those of the German lines in 1864, $75,900,000. In 1866 the telegraph lines of France exceeded in length of wire those of the States in the present German Empire by more than sixty per cent, the official returns giving the two nations, respectively, 61,700 and 37,000 English miles of wires. In 1865 the post-offices of France distributed 275,285,920 newspapers; those of all Germany, including Austria, 212,458,399. The number of letters posted in France, was, in 1865, 313,506,797; within the present Empire of Germany, 301,005,712. The merchant tonnage of the two nations upon the sea was, in 1866, almost the same, but the steam tonnage of France was 108,328, and that of Germany but 53,881. In 1865 the aggregate trade of France, including the whole of the exports and imports, was estimated at $1,522,000,000; that of the entire German Zoll-Verein, including all of the States of the present empire, has never reached much more than half this sum.

These facts all point in the same direction, and together they show convincingly that France is a richer land than Germany; enough richer to compensate, in a great measure, for the difference in population, in an equal struggle between their resources for leadership in Europe. But the German Empire, with Prussia for its centre, is essentially a military society. Every man is a soldier; and a larger percentage of trained men can be at once called to arms than in any other country. France will not submit to such an organization; and

Digitized by Google

without it she necessarily falls, under any form of government, to the second place; and Germany is the foremost of the great Powers. It is for this reason, above all, that European statesmen in general are inclined to believe that for a long time to come the new nation just building will be as potential in the affairs of Europe as France has ever been in the zenith of her strength. But the continuance of her power, and whether it will, on the whole, be a benefit to herself and to the world, depends upon other considerations than its nature and sources—upon the use she will make of it: and this can not now be foreseen. The spirit and purposes of the Hohenzollerns are not the most hopeful feature of the new Empire. They are narrow; borrowed from the traditions of an absolutism characterized by a genius that is only military, and by an ambition that is unscrupulous. But Germany is a nation that cannot be moulded, we may hope, by any such influences; and the people may be willing to use the Prussian monarchy in order to work out their own unity, and yet unwilling to be enslaved. There is reason to believe that the unity of Germany is the accomplishment of great historical tendencies, and is henceforth an accomplished and permanent fact; while the Empire and its military system are the creatures of an ambition and a will which are the accidents of to-day. If this prove to be true, Germany may yet outgrow the guidance and control of the men who, for their own lower purposes, have led the way to her union; may renew herself in social and political freedom as well as in strength; and may yet take her place as the vanguard of Europe in the way to the general happiness of the people, and to a higher civilization, instead of becoming a terror to the nations around her and the vain and reckless instrument of a monarchy that seeks aggrandizement and glory.

RAILROADS OF OHIO.

By the courtesy of George B. Wright, Esq., Commissioner of Railroads of the State of Ohio, and of Mr. Dynes, his chief clerk, we are enabled to present our readers with an abstract of the railroad reports of that State for the year ending June 30, 1870. Although this statement is published some time after the date of the returns, it is still much in advance of the regular report containing the same information, and has been prepared at much labor and expense for exclusive use in the CHRONICLE.

Mr. Wright has just issued the first volume of his annual report containing a full review of the constitutional and legal provisions of the State in regard to railroad corporations, together with the charters of each, and the various leases and contracts which have been made between them, and we have no hesitation in saying that it is the most complete State report that has yet come under our notice. The figures showing the several items of importance in regard to a company's material and financial situation, to which the State reports have heretofore been substantially limited, are very useful so far as they go, but they are entirely insufficient to furnish any comprehensive or satisfactory information as to all the details which any person interested in the affairs of a company wishes to obtain. Mr. Wright has labored most faithfully for several years in his official position to enlarge and improve the character of the Ohio reports, and we think that the result of his exertions this year proves his labors to have been a most gratifying success.

ABSTRACT FROM REPORTS OF RAILROAD COMPANIES OF OHIO, AS MADE TO THE COMMISSIONER OF RAILROADS AND TELEGRAPHS, FOR THE YEAR ENDING JUNE 30, 1870.

Names of Companies.	Length of road laid with iron, single main track and branches.	Cost of road & equipment.	Amount of capital stock paid up.	Amo'nt of funded and floating debts.	Earnings for the year—Passengers.	Earnings for the year—Freight.	Earnings for the year—Total.	Operating expenses for the year.	Net earn'gs for the year.	Interest paid on bonded debt during the y'r exclusive of tax.	Div. on st'k rate per c't—Preferred.	Div. on st'k rate per c't—Common.

* Where two or more companies are inclosed with brace, the roads are operated under one management, the first company named, respectively, being the lessee of the road or roads of the one or more companies following.

a Includes both roads embraced.

b Paid from rental received for lease of road.

c New road; proposed length, 28 miles.

d This is all double gauge, the broad gauge (6 feet) track being used for cars of the A. & G. W. Railway.

e The paid up stock of this company is all accounted as preferred.

f From report of 1868.

g Includes only cost of construction.

h This is a newly organized company. It purchased the road of the Cincinnati & Zanesville RR Co. at judicial sale; stock and debt of old company sunk; no report from new company.

i Cost as purchased at judicial sale.

k Length laid with iron; proposed length, 45 miles.

l Road sold at judicial sale; cost as represented by stock and debt prior to sale. Stock and debt of new company not reported.

m Length laid with iron; proposed length, 133 miles

n This is a new company. It purchased the Cleveland, Zanesville & Cincinnati Railroad; cost as purchased by the company.

o New road, leased; no separate report from company.

p Of this, 68 miles, in Indiana, is leased from the Muncie & Fort Wayne RR Co.; but the cost given includes this, it having been constructed by the Junction RR Co., under contract of lease.

q In addition to the 37 miles laid with iron, the company has 37 miles of graded roadway. The cost, stock and debt represent the whole 74 miles. The proposed length of the road is 175 miles.

r Deficit of $158

s As represented by stock and debt.

t In addition to the length of road of this company given, the company owns and operates an undivided half of 38 miles of the Central Ohio Railroad, between Columbus and Newark, in Ohio.

u The road of this company is leased to the Pennsylvania Railroad Company.

v This is almost exclusively a passenger road, and no earnings from any other source reported.

w This includes the total length of the roads named within and out of the State. The length in Ohio (single main track and branches) is 33.74 miles.

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS

The following are the changes in the Redeeming Agents of National Banks since the 9th of February, 1871. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency.

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
Michigan—Mason	The First National Bank	The Importers' and Traders' National Bank of New York, approved.
Michigan—Charlotte	The First National Bank	The First National Bank of Detroit, Mich., approved.
New York—Mount Vernon	The East Chester National Bank	The Ocean National Bank of New York, approved.
Indiana—Seymour	The First National Bank	The Third National Bank of New York, approved.
Missouri—Pleasant Hill	The First National Bank	The St. Louis National Bank, St. Louis, approved.
Michigan—St. Clair	The First National Bank	The Importers' and Trader's National Bank of New York and the First National Bank of Detroit, approved.
Pennsylvania—Tamogua	The First National Bank	The National Bank of the Republic, New York, approved in addition to the City Nat. Bank of Philadelphia.
Massachusetts—Holliston	The Holliston Nat. Bank	The National Park Bank of New York, approved in addition to the Suffolk National Bank of Boston.

New National Banks.

List of National Banks organized since the 9th February, 1871 :

Official No.

1,788—The Merchants' National Bank of Dayton, Ohio. Authorized capital, $300,000; paid in capital, $101,000. John Powell, President; A. S. Estabrook, Cashier. Authorized to commence business Feb. 11, 1871.

1,789—The First National Bank of St. Clair, Mich. Authorized capital, $100,000; paid in capital, $50,000. William B. Barron, President; G. S. Holbert, Cashier. Authorized to commence business Feb. 14, 1871.

1,790—The Madison National Bank of Richmond, Ky. Authorized capital, $200,000; paid in capital, $100,000. Thomas Moberly, President; Silas T. Green, Cashier. Authorized to commence business Feb. 15, 1871.

Erie Railway.—The Stock Exchange has been officially notified that the Erie Railway Company has executed a new consolidated mortgage of $30,000,000, the object of which is to provide a fund for taking up the several existing mortgages as they mature, thus reducing the bonded debt of the road to a uniform character. The sum required for this purpose is $24,000,000, leaving a surplus of $6,000,000, which, it is suggested, may be applied to the laying of a third rail between New York and Buffalo, and the purchase of additional equipment for a narrow gauge connection with the Great Western of Canada, and Michigan Central railways.

[From our own correspondent.]

LONDON, Saturday, February 4.

Considerable agitation has been witnessed this week owing to the partial re-opening of Paris, the arrangement of an armistice and the possibility of peace. Great efforts have been made to send provisions to the famished city, but as the routes open are few, some delay has been occasioned. By this time, however, it is probable that the worst has been overcome, and that food is arriving sufficiently to meet the pressing wants of the population. The French Government have given notice that the most direct route to Paris from London is via Newhaven and Dieppe, and that supplies of flour and other edibles forwarded to that port will be immediately purchased by the authorities, and paid for either in French bank notes or in drafts payable in ten days. Large quantities of provisions, especially of flour, have been sent away on private account by the Lord Mayor's Committee, and also by Messrs. Rothschild, and, probably, if the truth were known, the railway companies were fully employed.. As a matter of course, the primary object is to relieve the starving city, and when that has been accomplished, political affairs will again assume a supreme importance.

At the commencement of the week, the greatest hope was entertained that the amistice would lead to peace. Much satisfaction was expressed at the manner in which the conquerors were treating the famished city, and the desire they had shown to spare it any unnecessary humiliation. Later in the week, however, came the announcement from Berlin of the alleged German terms of peace, which, although discredited, caused much anxiety, inasmuch as, if insisted on, peace would be simply impossible. After seven months of warfare, during which the German losses have been very great, and a large proportion of the best blood of the nation has been sacrificed, it cannot be to the interest of Germany to insist on that which is impossible, and to provoke a continuance of the war. Neither can it be to her interest to conclude an uncertain peace. Germany now requires rest as well as France, and her people cannot desire that her energies and resources should again be taxed to so great an extent as they had been during the last seven months, because her rulers wish to exact humiliating conditions from their fallen foe. The German people, on the other hand, begin to ask why the war is continued, and we may be sure that it is resumed because the demands of the German rulers are such that no country can accept them. Extreme regret will be felt in Germany at the opportunity which has been lost. Notwithstanding the many disasters which have overcome the French people, and the fearful lesson they have been taught, there are some who still call for war. It comes, however, from those quarters where the scourge has not yet been felt, but when they come to realize the position more calmly, they will no doubt perceive the necessity of coming to terms.

The effect of the prospect of peace has been to depress the value of securities, and since a statement of the supposed German demands as the price of peace have been made known, the uncertainty has been so great that a suspension of business was the result. The leading cause of the existing flatness has been a fear that the Bank would raise the rate of discount, and that money would be sent away in large quantities. It was soon ascertained, however, that as security was wanting in France, it would be impossible for capital to be transferred to any extent; and that in order to attract capital hence, France must make peace, and decide upon a form of Government which shall be suited to the people and be looked upon as permanent by Europe at large. All this, we trust, will be accomplished in time, but until considerable progress has been made, France cannot be a borrower on advantageous terms in this market. An anticipated rise in the price of food in this country, caused by the waste and loss of production in France, also contributed to the heaviness of the funds. That France will require large supplies of food is evident; but so far as cereal produce is concerned, the war seems to be closing at an opportune moment, for there will yet be time, if labor and the necessary appliances can be obtained to sow largely the spring crops. With regard to animal food, however, the effects will be serious and more permanent. In the invaded districts a large proportion of the breeding stock has been consumed.

Under an impression that the Bank rate of interest would be advanced to 3 per cent, the demand for money has been active, but far from excessive. The Bank of England return shows that a good inquiry has been experienced, but the position of the Bank with regard to the advances made is very different to that of last year. At the present time all is doubt and uncertainty, but in 1870 commerce and general enterprise were rapidly improving, and money showed every indication of advancing in value from the legitimate demands of trade. It may be said that there is a similar tendency now and the assertion is a true one. But the causes affecting money at the present time are different and far less satisfactory. Last year it was in a large measure required to develop what had been commenced and what was proving remunerative. This year it will become dearer by the borrowings of a foreign nation repairing the losses of a disastrous war. It is unquestioned that France will require large sums, both on government and private account, but at the same time the resources of France cannot have been exhausted in a war of seven months duration. No doubt when confidence has returned there will be numerous lenders even in France. The quotations are now as follows:

	1870. Per cent.	1871: Per cent.		1870. Per cent.	1871. Per cent.
Bank minimum	3 @	2½@ ..	4 months' ba'k bills	3½@3¾	2¾@2⅞
Open-market rates:			6 months' ba'k bills	3½@3¾	3⅛@3¼
30 and 60 days' bills	2 @	2¾@3⅛	4 and 6 trade bills	3½@4	3½@4
3 months bills	3 @	2¾@2¾			

The rates of interest allowed by the joint stock banks and discount houses for deposits are subjoined:

	1870.	1871.
Joint stock banks	2	1½
Discount houses at call	2	1½
Discount houses with 7 days' notice	2¼	1¾
Discount houses with 14 days' notice	2½	2

The following are the quotations at the leading continental cities:

	B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.		B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.
At Paris	3½	6	2½	—	Brussels	3½	4	2½	3¼
Vienna	5	6	5	5	Madrid	5	5	5	5
Berlin	5	5	4½	4	Hamburg	—	—	4	4
Frankfort	4	4	3¼	3½	St. Peters burg	5	8	5¼	7
Amst'rd'm	5	4	5	3½					
Turin	5	6	5	6					

As money shows a tendency to improve in value the demand for continental bills of exchange has been less active and the quotations are rather more favorable to this country. Gold continues in demand for export and about £600,000 has been sent away this week. The silver market, however, is quiet, the continental demand having abated. The following prices of bullion are from Messrs. Pixley, Abell, Langley & Blake's circular:

GOLD			s.	d.		s.	d.
Bar Gold	per oz.	standard	77	9	@	—	—
do fine	do		77	9	@	—	—
do Refinable	do		77	11	@	—	—

South American Doubloons	do		73	8	@	—	—
United States gold coin	do		76	3	@	—	—
SILVER.							
Bar Silver Fine	(last price)	per oz. standard.	5	0⅛	@	5	0 9-16
do do containing 5 grs. gold		per oz. standard	5	0⅛	@	—	—
Fine Cake Silver		per oz.	no price.				
Mexican Dollars		per oz.	4	10⅛	@	4	10¾
Spanish Dollars (Carolus)		per oz.	—	—	none here.		
Five franc pieces		per oz.	—	—	none here.		

Quicksilver, £11 to £12 per bottle; discount 3 per cent.

Nearly all classes of securities have receded in value, and in addition to the causes to which reference has been made, it may be noticed that the markets have been unfavorably affected by a fear that as soon as communication with Paris has been resumed the French will be large sellers of foreign stocks, in order to meet their pressing wants for home affairs. The highest and lowest prices of consols and the principal American securities on each day of the week have been:

Illinois shares ($100)	-110½	110½-.....	109½-110	110	109½-110	109 -110

Subscriptions have been invited for $2,000,000 consolidated mortgage 7 per cent. currency bonds of the Lake Shore and Michigan Southern Railway Company, at a price to yield a little over 7 per cent. interest.

The prospectus has appeared of the Glasgow and Cape Breton (Nova Scotia) Coal and Railway Company, limited with a capital of £100,000 in £10 shares. The object of the company is to construct a railway from Sydney Harbor to Cow Bay, via Bridgeport, in the island of Cape Breton, for the purpose of aiding the development of the mineral resources of the district.

In the corn trade the chief feature has been an active demand for flour for immediate shipment to France, and a rise of 2s.@3s. per 280 lbs. has taken place in the quotations. Wheat is about 2s. per quarter dearer, and all descriptions of Spring corn are firm in price.

The following statement shows the imports and exports of cereal produce into and from the United Kingdom for last week, and since the commencement of the season, compared with the corresponding periods in 1869–'70:

	1870. Imports.	1870. Exports.	1869. Imports.	1869. Exports.
Wheat.....cwt.	278 242	11,760	555,622	4,761

The following relates to the trade of Manchester:

The impression that the announcement of the armistice between France and Germany would have an immediate influence upon prices proved quite evanescent, and the market has been more than usually quiet and inanimate since Tuesday. Both spinners and manufacturers advanced their prices on Monday, but buyers did not respond, and the flatness of the Liverpool cotton market speedily induced producers to modify their demands. The advance in prices has consequently been abandoned in most departments. Quotations show some irregularity, and those yarns and goods which are made from the superior qualities of cotton are steadier than those composed of the inferior sorts. Merchants appear resolutely to set their faces against paying an advance; but there is still a fair inquiry going on, which indicates that there would be a renewal of business were prices to give way a little. Considerable uncertainty still exists as to the immediate future of the continental struggle. A resumption of hostilities on a large scale is not generally believed in, nevertheless the alleged enormous demands of Germany have produced a very unpleasant feeling that peace may not be established without developing further complications. Yesterday some relief was felt on the announcement that the Bank of England Court of Directors had separated without advancing the rate of interest, and buyers for the great Eastern markets seemed to be rather more disposed to make offers. There has, however, been very little increase of business to-day, and prices of some qualities of cloth and yarn are with difficulty sustained. Producers are still well engaged, most of them having orders on hand which will last them over the present month, and others being in possession of still more extensive contracts which extend over two or three months.

The large receipts of American cotton at the ports continue to attract much attention on the part of consumers. The shipments to this country also continue on a most extensive scale, and American cotton is rapidly accumulating at sea. It is known that there upwards of 400,000 bales afloat at the present moment, so that the minds of spinners are kept quite easy upon that head. This induces them to sell readily enough for distant delivery whenever they meet with favorable opportunities.

The public sales of colonial wool have been commenced this week. The arrivals amount to 77,311 bales. Compared with last November the tone of the market is decidedly more satisfactory, and scoured wools have realized an improvement of 1d. per lb. The chief export business doing is for Belgium.

English Market Reports—Per Cable.

The daily closing quotations in the markets of London and Liverpool for the past week have been reported by submarine telegraph, as shown in the following summary:

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show a large increase in both dry goods and general merchandise. The total imports amount to $7,622,798 this week, against $4,651,876 last week, and $9,705,704 the previous week. The exports are $4,281,530 this week, against $4,651,876 last week, and $2,636,581 the previous week. The exports of cotton the past week were 17,475 bales, against 18,909 bales last week. The following are the imports at New York for week ending (for dry goods) Feb. 10, and for the week ending (for general merchandise) Feb. 11:

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
Dry goods	$1,278,902	$1,887,590	$2,936,004	$5,502,786
General merchandise	2,758,918	2,738,248	3,439,481	4,120,012
Total for the week	$4,037,820	$4,625,838	$6,375,485	$7,622,798
Previously reported	18,552,617	20,586,534	20,295,335	25,588,906
Since Jan. 1	$22,590,437	$25,212,362	$26,670,820	$33,211,704

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports, for the week ending February 11:

EXPORTS FROM NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
For the week	$3,686,417	$3,228,065	$2,247,559	$4,281,530
Previously reported	19,256,893	17,437,506	18,136,556	26,068,147
Since Jan. 1	$22,943,310	$20,665,571	$20,384,115	$30,349,677

The value of exports from this port to different countries (exclusive of specie) since January 1, compared with the corresponding time of last year, is shown in the following table:

To	Since Jan. 1, 1871.	Since Jan. 1, 1870.
Great Britain	$18,178,788	$10,472,165
France	2,325,900	720,378

Savannah and Charleston Railroad.—The annual report of the Savannah and Charleston Railroad for the year 1870, makes the following showing:

Gross earnings for the year	$147,345 29
Operating expenses for the year	89,989 94
Excess of earnings	$57,355 35

A comparison of operations during 1870 with those of 1869, shows the following results:

	1869.	1870.	Increase.
Receipts from freight	$29,643 21	$47,712 87	$18,069 66
Receipts from passengers	17,594 60	87,096 13	69,501 53
Receipts from mails, &c	4,596 32	12,536 99	7,989 97
	51,834 13	147,345 99	95,511 16
Operating expenses	$46,777 56	$88,989 94	
	5,056 57	57,355 35	
Excess of income for 1870			$52,298 78

GENERAL CONDITION OF THE COMPANY.

The whole debt is		$1,365,849 05
Of this amount there is already funded in 6 and 7 per cent. bonds	$1,112,400 00	
Unfunded after applying the available credits	253,409 05	

Besides this there are ascertained liabilities for claims for rights of way, unfunded coupons, &c., which it is not possible to state with accuracy, though they are known to be not very large. The difference between these debts and liabilities and the true value of the Company's property, will show their true condition. This appears by the books, as follows:

Construction, equipment and right of way		$2,288,966 14
Due by contractors for over-payment and liable to be charged to construction and equipment		49,326 10
Cost of road		$2,238,292 24
Deduct amount of debt		1,365,849 05
Value of stock, as per books		$972,443 19

But it does not follow that the cost is the true and actual value of the property. I have, therefore, caused a correct inventory and a careful appraisement of the actual value of all the property to be made, and it is appended to this report:

The result shows the actual value to be	$2,094,300 00
Deduct amount of debt	1,365,849 05
Difference	$728,450 95
For greater certainty and to provide for the contingency of the outstanding claims and liabilities deduct the very liberal allowance of 30 per cent	218,535 28
Total	$509,915 67

The following resolutions were adopted by the stockholders:

Resolved, That the direction is hereby authorized and directed to issue $800,000 of this Company's bonds, payable twenty years after their date, with semi-annual interest—coupons at the rate of eight per cent per annum attached, to be distributed to the stockholders rateably, according to the number of shares of each, upon payment of seventy per cent of the par value thereof; and thereupon each stockholder shall be entitled to have certificates of his, her or their stock free from the power of the direction to hypothecate the same.

Resolved, That the stockholders shall have the privilege of receiving and paying for said bonds in four equal monthly instalments from this date, and shall have certificates of stock accordingly corresponding to the receipts and payments of bonds.

Resolved, That in case any stockholder shall neglect or refuse to receive and pay for his portion of said bonds according to the foregoing resolutions, the direction shall thereupon raise, by borrowing on account of each such stockholder in default, the amount in default, and, for security to the lender, shall hypothecate by way of mortgage not only his, her or their stock, with the certificates thereof, but also therewith the bond or bonds he, she or they may be entitled to, and has or have neglected or refused to receive and pay for.

Portland and Kennebec.—The directors' report presented at the annual meeting of the Portland and Kennebec Railroad, on the 18th instant, shows satisfactory results, notwithstanding severe losses by fire and flood the past year. The freshet a year ago on the Kennebec river was especially disastrous, carrying away the Augusta bridge, which has been replaced with an elegant and durable iron one costing some $19,000. Extensive repairs have been made along the whole line, and valuable additions have been made to the rolling stock. The total earnings of the road were $64,506,405, and the total running expenses, $479,541 92. The city and town loans issued twenty years ago, in aid of the Kennebec and Portland Railroad Company, to the amount of $800,000, matured on the first day of November last. Six hundred and fifteen thousand seven hundred dollars of this loan have already been paid and cancelled by this company, and the funds have been provided to pay the balance on presentation. This road, which was leased last May to the Maine Central Railroad Company has been operated since then by the latter company, for convenience, to the old organization and separate accounts, however, being kept up to the close of 1870. Since the 1st of January the two companies have been operated practically as one, the Portland and Kennebec, however, continuing its organization, for the purpose of preserving its corporate existence. No change was made in the board of officers.

—The North Missouri Railroad has become temporarily embarrassed, and some of its bills payable have recently gone to protest, which we understand has been occasioned by the very large expenses for construction and improvements during the past and previous years, resulting in the accumulation of a floating debt amounting to about $2,500,000. It is stated that the road will probably obtain an extension from its creditors and arrange its affairs so as to meet all liabilities, but whether this proves to be the case or not, the value of the first and second mortgage bonds can hardly be affected as the road has probably cost over $20,000,000, and we have the opinion of a party well informed on the subject that it would sell for $12,000,000 on foreclosure. The first mortgage is $6,000,000, the second mortgage $4,000,000.

—Messrs. E. Rollins Morse & Brother stock brokers No. 28 State street, Boston, have issued a small pamphlet giving a detailed account of a number of 7, 8 and 10 per cent. bonds of various railroads forming the connections of the Chicago, Burlington and Quincy Road, and to parties desiring information in regard to these, a copy of the pamphlet will be found most valuable.

—The attention of capitalists is called to the first mortgage 7 per cent. bonds of the Peoria, Pekin and Jacksonville Railroad Co., secured by a mortgage for $1,000,000, upon the railroad, its franchises and all equipment, on the basis of about $12,000 per mile. This road, of 88 miles, is completed and in successful operation between the cities of Peoria and Jacksonville, Illinois. The mortgage is a first and only lien upon this property, which has been brought to its present condition by the efforts and contributions of the directors, among whom are Messrs. John Allen (President), of Saybrook, Conn., late of Hopkins, Allen & Co., New York; Richard Arnold, James M. Constable, of Messrs. Arnold, Constable & Co., New York; Lucius Hopkins, Edwin L. Trowbridge, of Messrs. Hopkins, Dwight & Trowbridge, New York. Messrs. W. T. Hatch & Son, 34 Wall street, New York, are the financial agents.

—Messrs. Winslow, Lanier & Co., 27 Pine street, now offer for sale the first mortgage bonds of the Grand Rapids and Indiana Railroad Company, secured by mortgage on the road and on a land grant of 1,160,000 acres of lumber lands in Michigan. In addition to all this lien the bonds are further secured by a guaranty of the Pittsburg, Fort Wayne and Chicago Railroad and the Pennsylvania Railroad Companies. We are not aware of the precise terms of this guaranty, but if they are unconditional it would appear

Digitized by Google

that the security would be a good one without a dollar of value in the road or lands either.

BANKING AND FINANCIAL.

—BANKING HOUSE OF HENRY CLEWS & CO., 32 WALL ST., N.Y.—Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed upon all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make telegraphic transfees of money to any distant point, and transact every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upwards on

The Imperial Bank,
Messrs. Clews, Habicht & Co., } London.
The Provincial Bank of Ireland, Dublin and branches.
The National Bank of Scotland, Edinburgh and branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Governments and other investment securities; also Gold and Exchange.

Advances made to our dealers at all times on approved collaterals at market rates of interest.

Collections made in any part of the world.

HARVEY FISK. A. S. HATCH.

FISK & HATCH,
Bankers and Dealers in Government Securities,
No. 5 Nassau street,
New York, Feb. 16, 1871.

The Six Per Cent. Gold Bonds, of the Central Pacific Railroad Company have an established character which renders them especially desirable for investments.

They are based on one of the most important and valuable railroad lines in the world, fully completed, amply equipped, and already earning large revenues, which must increase enormously with the growth of the country it traverses and the development of trade with Japan, China and Australia, a large portion of which must find its way across the American continent.

Holders of Five-twenty Bonds (which are liable to be funded at a lower rate of interest within a short time) may exchange them for Central Pacific Bonds, bearing the same rate of interest, and save from 15 to 18 per cent. for reinvestment, while their security remains as reliable as before.

They are dealt in at the New York Stock Exchange, and at several of the more important Bourses of Europe. We have introduced them into our regular business upon the same basis as Government Bonds, and buy and sell them as freely at current market rates, and are prepared to furnish them to investors or others at daily quotations.

We buy and sell Government Bonds, Gold and Coupons, execute orders in miscellaneous Securities at the New York Stock Exchange, make collections, receive deposits subject to check at sight, allow interest on balances, and do a general Banking business.

FISK & HATCH.

The Bankers' Gazette.

DIVIDENDS.

The following Dividends have been declared during the past week:

COMPANY.	PER CENT.	WHEN P'ABLE.	BOOKS CLOSED.
Railroads.			
Chicago & Alton, pref. and com.....	5	Mar. 6.	Feb. 16 to Mar. 7.
Miscellaneous.			
Manhattan Silver Mining Co. (gold).....	5	Feb. 20.	Feb. 17 to Feb. 20.

FRIDAY EVENING, February 17, 1871.

The Money Market.—The general tendency towards monetary ease in consequence of the accumulation of funds at this centre has continued since our last report, and the difficulty in placing loans to-day, was probably greater than at any previous time. Five per cent. on call loans could hardly be obtained, and four was the ruling rate at the close of business.

An additional evidence of the confidence in a very easy market for several weeks to come is shown in the action of the banks in offering to loan on time at unusually low rates, some of them having offered money for forty or fifty days as low as 5@6 per cent. —a remarkably low rate for any time engagement. The principal causes of this notable ease seem to be in the usual accumulations of funds at this period of "between-seasons" in business, and also in the decline of speculative operations in stocks which causes much less demand for money in Wall street.

National Bank Notes have again been in large supply, and have been offered by banks for four or five days free of interest, on condition of the loans being repaid in legal tenders, or checks which are equivalent.

The last bank statement was favorable to continued ease in money, showing an increase of $1,585,899 in legal tenders and a decrease of $1,327,720, in deposits, against a decrease in specie of $1,327,720, the result being to leave the banks $1,338,464 stronger in their excess over legal reserve, the whole excess above the 25 per cent. legal requirement being $19,971,247.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	Feb. 11, 1871.	Feb. 12, 1870.	Feb. 13, 1869
Loans and discounts.....	$271,271,345	$265,864,653	$264,380,461
Specie.....	25,660,714	33,072,184	25,854,98
Circulation.....	31,790,164	33,703,572	34,263,45
Net deposits.....	214,060 875	213,192,740	192,0.7,362
Legal Tenders.....	55,773,292	56,603,000	52,534,957

For the best class of commercial paper there has been a good demand at rates almost unchanged. Notwithstanding the ease in money, the city banks are not inclined to take the best class of 3 and 4 months paper at less than 7 per cent., though we have heard of choice acceptances being taken by a country bank at 6 per cent. There is comparatively little paper offering of any class. At this date last year best 60-day notes were quoted at 6@8 and in 1869 at 7½@9.

" " domestic.....3 to 4 months.	7 @ 8

United States Bonds.—The market has been comparatively dull during the most of the week, with a decline in prices of ¼ per cent on 1867s—the standard bond of the market—as noticed in the difference between the quotations of Saturday, 11th inst., and yesterday. To-day (Friday) there was a little more animation and a partial recovery in prices, so that the closing rates are only ¼ below those of our last report. This temporary weakness in Governments seems to be merely a reaction from the movement of the previous week, which was too sudden to be steadily continued, and was also based to a considerable extent upon the "discounting" or anticipation of events which must take some time to be fully developed, as, for instance, the funding operations of Mr. Boutwell. There have been no new influences to act upon the market, and with the customary desire of some purchasers to realize the advance, a temporary pause in the previous activity has been the natural result, followed by a slight decline as above noticed. Prices in London have been tolerably firm, but are still below our own market. At the Treasury purchase of $2,000,000 on Wednesday the offerings were only $4,596,200, a comparatively small amount on so large a purchase, particularly as it had been expected that Mr. Boutwell might direct the acceptance of a larger amount of bonds than had been advertised for—an expectation which contributed to the support of prices, but was not fulfilled in the result. It has been noticed that the opposition of the Secretary of the Treasury has been shown very decidedly to the reduction in taxation proposed by Congress, supposed to arise from his desire to see the credit of our Government improved abroad, so as to enable him to negotiate a 5 per cent. loan at par, in gold. While it is possible to differ very widely with Mr. Boutwell in regard to the policy of continuing heavy taxation, it is hardly possible to controvert his idea that the improvement of United States credit abroad since our war has been largely due to the determination shown to pay off the debt promptly, and to submit to heavy taxation for the purpose of reducing it annually by a large amount.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, Feb. 11.	Monday, Feb. 13.	Tuesday, Feb. 14.	Wednesd'y Feb. 15.	Thursday, Feb. 16.	Friday Feb. 17.

* This is the price bid and asked, no *sale* was made at the Board.

State and Railroad Bonds.—The market has been somewhat variable with the principal activity in Virginias Tenessees, North Carolinas and South Carolinas. Prices are generally ¼@½c. lower than a week ago, but North Carolinas have reacted about 1@1½ per cent from the advance then noted. Central Pacific Bonds having sold up to 95@95½ have reacted slightly and close to-day at 94½@94¾. Union Pacific first mortgages close at 81½@83¾; Land grants at 70¾@71¾ and Incomes at 71¼@71½ showing an advance of from 1¼ @2¼ per cent. on the week. No definite action has yet been taken at Washington, but those parties most intimately acquainted with the progress of affairs and the prevailing sentiment in Congress are entirely confident that no further action will be taken against the interest of the roads.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

	Saturday, Feb. 11.	Monday, Feb. 13.	Tuesday, Feb. 14.	Wednesd'y, Feb. 15.	Thursday, Feb. 16.	Friday, Feb. 17.

Railroad and Miscellaneous Stocks.—Speculation has been dull and prices tolerably firm on a limited business. The princi-

Digitized by Google

pal dealings have been in New York Central and Hudson River, Lake Shore, Reading, Rock Island, the Northwest stocks, Union Pacific, Pacific Mail and Western Union Telegraph. The tone of the market is healthy, and any marked change in prices would probably be on the side of a rise, though we have to note the same lack of any strong speculative movement to carry prices upward, which has now so long been the characteristic feature of stock operations. The Reading and other coal-carrying roads have made an advance in coal freights so large that it amounts to a practical prohibition of business in this line for the present; such a tariff, however, will probably continue only a short time, until a compromise with the miners can be effected. The gauge of the Ohio and Mississippi Road will be changed as soon as the necessary arrangements can be perfected. Reports of a lease or contract between the Lake Shore Company and the Cleveland, Columbus, Cincinnati and Indianapolis have caused some activity in the stock of the latter company. Union Pacific stock was dealt in largely on Wednesday upon the usual Washington rumors; the fluctuations of the week have been about 2 per cent. Pacific Mail was strengthend by the reports of favorable contracts to be made with the Central Pacific Railroad for freight and passengers, and the prospect of additional subsidy from Congress. Earnings of leading roads for January are generally large, as will be seen by the statement given on another page.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

	Saturday, Feb. 11.	Monday, Feb. 13.	Tuesday, Feb. 14.	Wednesd'y Feb. 15.	Thursday, Feb. 16.	Friday, Feb. 17.

The Gold Market.—Gold has not fluctuated more than about 1 per cent. in the week, although the transactions on several days were large. The principal movement was in the direction of lower prices by large sales on the part of a prominent "bear," who was not connected, however, with the clique previously manipulating the market. It was reported that over $1,000,000 had been privately sold by the government, as the interest on bonds held in the sinking fund; but this report was apparently without foundation. The advance on bonds in London also assisted the decline in gold, and the price was at one time 110¾. To-day, on the advance of ¼ in bankers' sterling, gold was firmer and closed at 111⅛ against the opening price of 111. The carrying rates which have ranged in the week from 5 to flat, and to-day from 4½ to 3, and 1 per cent. do not indicate a large short interest. We heard to-day reports of an engagement of $500,000 coin for shipment to-morrow, but were unable to ascertain that it was positively correct.

The following table will show the course of the gold premium each day of the week past:

	Quotations. Opening.	Lowest.	Highest.	Closing.	Total Clearings.	Balances. Gold.	Currency.
Saturday, Feb. 11	111¼	111¼	111¼	111¼	$28,270,000	$1,547,393	$1,720,020
Monday, " 13	111¼	111¼	111¼	111¼	51,277,000	1,236,261	1,462,243
Tuesday, " 14	111¼	111	111¼	111¼	31,842,000	1,041,305	1,267,494
Wednesday, " 15	111¼	110¾	111¼	111¼	49,657,000	1,844,976	2,201,011
Thursday, " 16	111¼	111¼	111¼	111¼	45,069,000	1,592,991	1,789,909

Foreign Exchange.—Rates have been very firm during the week, and to-day the best bankers 60-day sterling was advanced to 109⅞, and short-sight to 110½—a point which warrants the shipment of specie. The market is apparently sustained by the positive strength of the situation, there being scarcely enough exchange offered to meet current demands. Commercial bills are in small supply and selling so near the price of bankers that the latter cannot afford to buy them. The large exports of cotton as heretofore shown, have not produced as much gold as the export of last year, in consequence of the low prices which have ruled; the export of securities has also been much less than last year, when exchange was quoted (February 19th) at 108¾@109 for bankers 60-day sterling.

Quotations are as follows:

	60 Days.	3 Days.
London prime bankers	109¼@ 109¾	110⅜@ 110½
" commercial	109¾@ 109¾	..... @ .....
Paris (bankers)	@	@
Antwerp	5.13¾@5.12½	5.07½@5.05¾
Swiss	5.11¼@5.12½	5.06¼@5.04¾
Amsterdam	41¼@ 41¼	41⅝@ 41¼
Hamburg	36¼@ 36¼	36½@ 36¼
Frankfort	41¼@ 41¼	41⅝@ 41¼
Bremen	79 @ 79¼	79¾@ 80
Prussian thalers	71¼@ 72	72½@ 72¾

The transactions for the week at the Custom House and Sub-Treasury have been as follows:

	Custom House Receipts.	Sub-Treasury. Receipts. Gold.	Receipts. Currency.	Payments. Gold.	Payments. Currency.
Saturday, Feb. 11	$802,000	$1,016,891 29	$1,285,005 12	$886,951 08	$1,612,210 72

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3 The Table of Railroad, Canal and Other Stocks; on the next page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column x=*extra*; s=*stock or scrip*.

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J & D.=June and December Q —J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of United States and State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name.

The Financial Reports of Railroad and other Companies are published in the CHRONICLE as soon as issued, and indexed in the table of stocks on the next page, as stated above in Note 3. A complete record of these reports is thus obtained in a file of this paper.

Washington Despatches Feb. 16.—NEW YORK CENTRAL SCRIP DIVIDENDS.—The question involving the payment of $1,151,000 by the New York Central Railroad Company as tax on scrip dividends, came before the Commissioner of Internal Revenue, with the Solicitor of the Bureau present, this morning, according to prior arrangement. Mr. Elmore opened the argument for the Company, which he insisted was not liable for the tax, because there are no scrip dividends but interest certificates, which are not binding on the Company, and which it is optional with the Company to pay. Therefore it was not such an obligation as is subject to taxation. And, further, that these certificates merely represent the earnings of the Company which accrued prior to the passage of the Internal Revenue law. He presented various papers in support of these and other incidental points. The case was postponed until next Thursday, when Horace F. Clark will make the closing argument.

PACIFIC RAILROAD.—Mr. Thayer, of Nebraska, offered a resolution instructing the Judiciary Committee to inquire and report as to the right of the Treasury Department to retain all compensation for services rendered for the United States by the Union Pacific Railroad and its branches, to apply on the interest of the bonds issued by the United States to aid in the construction of said road.

Mr. Trumbull, of Illinois, Chairman, said the Judiciary Committee had been considering the question for some time on a similar resolution of the Senate.

Mr. Howard, of Michigan, thought the question entirely distinct from that embraced in the former resolution.

The resolution was then agreed to without objection.

The Missouri Pacific Railroad—Controlling Interest.—ST. LOUIS, Mo., Feb. 15.—The reports which have been circulated here for a few days past that Mr. Joy and Mr. Parson, backed by the Atlantic and Pacific, Pennsylvania Central, and Baltimore and Ohio Railroad Companies, have purchased Mr. Bridge's interest in the Missouri Pacific Railroad, are untrue. Mr. Bridge does not design to sell his stock, nor allow the management to go out of the hands of St. Louis and Missouri men. He will, however, divide his large interest so that the burden of carrying the floating debt of the company will be borne equally by other parties, but the control and management of it and the road will remain in his hands.

Pennsylvania Railroad Bureau.—The Cincinnati *Commercial* says: Under recent Pennsylvania legislation, Messrs. Scott, McCullough, and five or six others have formed a corporation known, or to be known, as the Pennsylvania Railroad Bureau, which is to control the leased roads of the Pennsylvania Central west of Pittsburg, being the Fort Wayne and Chicago and its leased roads, and the Pan Handle, with its leases. The stock of this corporation is nominally $12,000,000, $8,000,000 of which is to be paid the Pennsylvania Central for its interest in these leases, all of which have from ninety-five to ninety-eight years to run, and which are to be turned over to this corporation and its successors. It is further said that Mr. Scott is to be President of the "Bureau," and Mr. McCullough General Manager.

Tennessee Debt.—The Nashville *Union* of February 12 has the following in regard to the receipt of the overdue coupons on the State Debt. The holders of the bonds, upon which default of interest was made two years ago and since continued, are denied, it seems, even the poor privilege of selling their overdue coupons to pay taxes, which taxes should have been made sufficiently ample to cover the whole expenses and interest of the State:

"On Friday last a report was quite extensively circulated in the city that Attorney-General Heiskell had given it as his opinion that coupons on State bonds were receivable at the Treasurer's office in payment of taxes. The report, as we understand, spread rapidly, and quite a large number of persons sold their Tennessee money at 74 cents, and bought coupons at 54 cents. This had the effect to some extent of depreciating Tennessee money in the market. Dr. Morrow had been absent from the city, but returned in time to correct the impression that prevailed. We may state that the whole excitement grew out of the fact that Attorney-General Heiskell had stated that perhaps the time would come when the law, which is somewhat ambiguous, would be thus construed. But the Treasurer soon corrected the impression, and stated that coupons were not received in payment of State taxes."

☞ For other Railroad Items, see COMMERCIAL AND MISCELLANEOUS NEWS, on a previous page.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, February 17, 1871.

There has been during the past week a pressure to sell the leading staples, which has led to some decline in prices, without, in all cases, producing activity in trade. Dull accounts from Europe, with large receipts, and stocks have been operating against domestic products, while in foreign goods many circumstances conspire to produce dullness.

Cotton has further declined, and Middling Uplands close at 15½, although receipts at the ports show a considerable falling off. Flour has declined 10@25c per bbl., shipping extra closing nearly nominal at $6 70@6 90. Of Grain, Wheat is lower, New Spring closing at $1 50@1 54. Corn also lower, with fair Western mixed closing at 83c; but other grains are firmer, Oats closing at 65½@66½c for Western and Ohio in Store. Groceries show little change.

Tobacco has rather favored buyers. The new crop, both of Kentucky and Seed Leaf, is expected to come forward in large quantities during the coming month. In Kentucky Leaf, this week, there has been rather more doing, but at some decline. The sales of the week have been 600 hhds., of which 200 hhds. for export and 400 for home use. The sales for export included new lugs at 6@7c, and for home use to manufacturer's of plug Tobacco, new wrapping leaf at 9½@10½c. In Seed Leaf, we have no settled market to quote pending the arrival of the new crop, and but little has been done. The sales embrace 387 cases new Pennsylvania on private terms; 57 cases new Connecticut 17½c; and 150 cases various lots, including seconds and common wrappers at 25@4Cc. Spanish Tobacco has moved fairly at full prices; the sales include 213 bales New Yara, one and two cut, at 95c; and 250 bales Havana, at 87½c@$1. Manufactured Tobacco is in fair request, and at the reduced prices rules firm.

Hides at some decline have been active, large sales having been made at 23c, gold, for Dry Montevideo, and at 24c, gold, for Dry Buenos Ayres. Skins and Leather have also declined, and Tallow has been barely supported at 8¾@9c.

Provisions, though not without activity, have been declining for some days, and close dull, with a downward tendency. The prodigious quantities which have been shipped to Europe do not fully represent the increased production, and now, the export demand having fallen off, or continued only at reduced limits, the market is left without an adequate trade to dispose of supplies. New Mess Pork closed dull at $22 50, and prime mess not salable over, $22; Prime Steam Lard, 13½c; Bacon, 11c for Cumberland and 12c for Short Class. In Beef, we notice considerable sales of Prime Mess from Texas at $23 per tce., and the whole market has been weak. Cheese has ruled dull, but Butter has done rather better.

East India Goods have been quiet and unchanged. In Metals, the movement has not been important, but we notice rather more doing in Scotch Pig Iron at $29 50 for Glengarnock.

Clover seed has declined to 11⅜@11½c. Hops firm at 8@15c for New. Hay, dull. Whiskey dull and declined to 93c.

In foreign dried fruits, the chief feature has been the sale of about 1,000 casks Turkish Prunes at 6½@6½c gold, in bond; though a considerable movement in Sardines is reported at 17¾@18c, gold, duty paid. Sicily fresh fruits are in large supply and selling low. The demand for Domestic dried apples for export to Germany continues at 5@7c, or in quality, which is firmer. Fish has been selling fairly.

Wool has had a pretty free sale at full prices. Manufacturers are busy, and stocks considerably reduced. The sales have embraced about half a million pounds Mestiza fleece at 26@32c.

The chief item of interest in Naval Stores has been a movement in Rosin, at $2 50@2 60 for strained. Linseed Oil has been advanced 2c. by the crushers. Petroleum has been unsettled and weak.

Freights have become dull; shipments of Breadstuffs and Provisions have fallen of materially and rates tend downward. To-day's engagements embrace 27,000 bush. grain to Liverpool by steam at 7½d, and 2,000 bales cotton by sail ½@5-16d.

Imports of Leading Articles.

The following table, compiled from Custom House returns, shows the foreign imports of certain leading articles of commerce at this port for the last week, since January 1, 1871, and for the corresponding period in 1870:

[The quantity is given in packages when not otherwise specified.]

COTTON.

FRIDAY, P. M., Feb. 17, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening February 17. From the figures thus obtained it appears that the total receipts for the seven days have reached 141,957 bales against 161,095 bales last week, 154,483 bales the previous week, and 150,800 bales three weeks since, making the total receipts since the first of September, 1870, 2,653,339 bales against 2,032,786 bales for the same period of 1869–70, showing an increase since September 1 this year of 620,533 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	57,790	47,409	Florida bales.	494	891
Mobile	16,548	9,121	North Carolina	2,733	1,899
Charleston	7,675	5,298	Virginia	13,501	5,770
Savannah	22,4 0	9 979			
Texas	8,936	9,009	Total receipts	141,957	96,424
Tennessee, &c	11,880	7,067	Increase this year	45,533	....

The exports for the week ending this evening reach a total of 75,185 bales, of which 51,386 were to Great Britain, and 23,799 to the Continent, while the stocks at all the ports, as made up this evening, are now 709,033 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Week ending Feb. 17..	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans	12,112	18 174	30,286	32,357	285,504	227,177
Mobile	8,958	451	9,412	2,869	81,671	69,277
Charleston	4,005	2,207	6,212	8 545	35,127	15,618
Savannah	6,691	1,354	8,255	8 067	109 214	63,110
Texas	6,806	....	6,806	4,740	61,317	45,000
New York	12,914	1,400	14,314	7,784	107,000	89,395
Other ports	....	....	....	500	85,000	80,000
Total	51,386	23,799	75,185	64,596	709,033	546,577
Total since Sept. 1	1,294,483	281,650	1,576,133	1103,510	....	....

Digitized by Google

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 10,639 bales, while the stocks to-night are 162,805 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Feb. 10, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1.		EXPORTED SINCE SEPT. 1 TO—				Northern Ports.	Stock.
	1870.	1869.	Great Britain	France	Other Foreign	Total.

Total last year	....	1936,352	687,708	162,769	189,719	1040,196	560,080	542,683

We have had another week during which the tendency of prices has been continally downward. This has been due to an entire absence of any favorable feature. Liverpool has been lower; the snowy condition of the streets has interfered with business so that spinners, even if they desired, could do but little; but above all the receipts at the ports have continued so large and the stocks have increased so rapidly that holders have been compelled to yield the belief having become more general that there is too much cotton, more than is needed for consumption. Even the anticipated relief through the renewed demand for the continent has been counterbalanced by this feeling of an over supply and the market has been depressed and irregular. To-day at a decline of ¼c. on all grades below Middling and with the receipts at the ports footing up less than anticipated early in the week and more favorable private advices from Liverpool there was a rather better feeling and more doing the sales reaching 5,333 bales the close being at 15½c. for Middling Uplands and 14¼ for Low Middling. For forward delivery the transactions have been large with a decline during the week of about ¼c., and the close was, for February, 14⅜; March, 14½; April, 14½; May, 14 11-16; June, 14⅝. The total sales of this description for the week, (including 3,100 bales free, on board, but not including bales "Exchanged") have been 59,150 bales. For immediate delivery the total sales foot up this week 22,592 bales, including 1,730 bales to arrive, of which 3,609 bales were taken by spinners, 1,361 bales on speculation, 17,322 bales for export, and 300 bales in transit. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	12¼@....	12¼@....	12¼@....	13 @....
Good Ordinary	13½@....	13½@....	14 @....	14½@....
Low Middling	14¼@....	14¼@....	14¾@....	15 @....
Middling	15½@....	15½@....	15½@....	15½@....
Good Middling	16 @....	16¼@....	16¼@....	16½@....

Below we give the total sales of cotton and price of *Uplands* at this market each day of the past week:

	Total sales.	Ordinary.	Good Ordinary.	Low Middling.	Middling
Saturday	1,543	12⅜@....	13¼@....	14⅜@....	15¾@...
Monday	5,966	12⅜@....	13¾@....	14¾@....	15¾@ ..
Tuesday	2,615	12¾@....	13¾@....	14½@....	15¾@...
Wednesday	4,403	12¾@....	13¾@....	14¾@....	15¾@....
Thursday	2,727	12¾@....	13¾@....	14¾@....	15¾@....
Friday	5 818	12¾@....	13¼@....	14¾@....	15¾@....

For forward delivery the sales (including 3,100 free on board,) have reached during the week 59,150 bales (all low middling or on the basis of low middling), and the following is a statement of the sales and prices:

For February.		For March.		For April.		For May.		For June.		For July.		For August.	
bales.	cts.	bales.	cts.	bales.	cts.	bales.	cts.	bales.	cts.	bales.	cts.	bales.	cts.

200	14 19-32												
6,300	14¾												

The sales during the week of free on board have reached 3,100 bales. The particulars of these sales are as below:

500	f. o. b. Galveston p. t.	550	f. o. b. Charleston p. t.
700	" New Orleans p. t.	1,100	" Mobile p. t.
200	" Savannah p. t.		

The following exchanges have been made during the week:

1,000 February for 1,000 March, equal terms.
½c. paid to exchange 200 March for 200 July.

WEATHER REPORTS BY TELEGRAPH.—The past week appears to have been, like its predecessor, rainy. At Mobile, Montgomery and Selma it has rained more than half the week. At Savannah, Augusta, Macon, Columbus, Charleston and Nashville it has rained three days, but since then has been pleasant again. At Memphis it has rained one day, and been cloudy during the rest of the week. The thermometer at Mobile and Charleston has averaged 56; at Montgomery, 55; at Macon, 52; at Columbus, 54, and at Memphis, 43.

RECEIPTS.—We have in the receipts of cotton this week the first clear evidence that the supply is running short. It is not to be supposed, however, that all the cotton is marketed, or that there is to be a sudden stoppage in the movement. Undoubtedly there will be days of return to large figures, but the highest point is passed, and we are clearly on the ebb-tide. This is seen in the week's total but partially—more clearly in the daily movement and in the arrivals at the interior ports. There is cotton still on the plantations, but we think at present prices, much of it will be kept there. We collect together the following approximate daily arrivals for two weeks to illustrate the extent of this falling off in the receipts. The first column under each day is for this week and the second column last week:

Ports.	Saturday.		Monday.		Tuesday.		Wedn'sd'y.		Thursday.		Friday.	
N. Orleans	3,120	4,999	24,266	18,868	6,043	10,844	4,416	12,635	7,246	4,377	10,663	15,165
Mobile	6,113	3,703	5,195	3,463	3,785	5,591	273	3,566	972	1,865	210	1,584
Charleston	830	1,355	1,276	2,035	1,959	1,561	1,089	1,534	1,514	2,189	1,000	1,515
Savannah	3,845	5,424	5,786	4,852	3,077	4,000	2,924	5,124	3,363	4,129	3,465	2,956
Galveston	2,426	1,523	1,074	1,640	1,959	1,561	1,709	1,830	1,721	1,272	1,500	1,168
Norfolk	2,275	1,333	3,260	2,840	1,922	1,995	1,455	1,982	1,823	1,435	1,546	2,454
Other Points	2,008	2,991	2,930	2,887	2,996	2,810	3,111	2,902	2,506	2,503	3,656	3,908
Total	20,617	21,328	43,787	36,568	21,741	28,862	14,927	29,013	19,145	17,769	21,740	28,080

The above table shows that for the first two days the receipts this week reached 64,004 bales, against 57,891 bales for the same days of last week; for the next two days 36,068 bales, against 57,385 bales the previous week; and the last two days the total has been 40,885 bales, against 45,819 bales last week. At the same time, the interior ports show a falling off in the receipts of 8,766 bales, and the stocks a decrease of 5,169 bales since last Friday. In fact, if we leave out Memphis the receipts have been only about equal to the movement at the same points last year.

THE NEXT CROP AND THE COST OF RAISING COTTON.—There continues to be much speculation with regard to the probable extent of planting for the next crop. A large party claim that low prices will not result in making it any the less; the experience of former seasons, they say, proves that a decline in the quotations has never been followed by a decrease of land under cotton cultivation.

First—Even granting that this last statement is true, it must be admitted that there may now be facts not existing in anti-war times which will produce a different result. One of these facts, and a very important one, is, we think, the changed condition of labor. In former times the planters had the slaves to support whether they made a crop or not, or whether they received paying or losing prices for it. We can readily see, therefore, that there was no option left them as to cultivating crops; the necessity was upon them—their labor must be supported and what they produced, whether it brought them little or much money, was the only bridge that carried them over. Now they have simply their own families to look after. If they raise enough for food and clothing for themselves they are indepent of all the world, and how much better off (it requires but little arithmatic to see) than if they produced 100 or more bales of cotton at a loss of ¼c. per pound. Each planter is, therefore, now in a position to look at and freely answer this practical question—will it pay me under such circumstances to hire labor and raise cotton and sell it at 5½@6d. per lb. in Liverpool? If he knows that such a business will pay, why then he is safe; but if it will not pay, the natural result would clearly be he would keep out of it—at least if the planter is not unlike the rest of mankind.

Second—What it costs to raise cotton now, we do not undertake to say. One thing however is very certain, the outlay is much greater on poor lands where fertilizers must be largely used than it is on some of the rich low lands where the soil requires but little preparation. An indication of the cost of the last crop in the Atlantic States may be gathered from the present pecuniary condition of the planter in that section. He has raised a very large crop, but what is the result—*debt*. It may be claimed that this was on account of the injudicious use of fertilizers—a point we do not care to decide. The fact is still the same, he begins the year in debt. Whether he will be more "judicious" this season depends upon whether he sits down first and counts the cost. We trust he will make all the cotton he can make at a profit—*and no more*.

IMPORT, STOCK, AND CONSUMPTION OF COTTON IN EUROPE.—We take the following figures from the annual circular of Messrs. Stolterfoht, Sons & Co., showing the stock, import, and consumption of cotton in Europe for the years ending December 31, 1869 and 1870:

EXPRESSED IN 1,000s OF BALES.

Of the exports, those marked (*) were to France, Holland, Belgium, Trieste, Genoa, and Spain, and are comprised in the imports to those places, and include likewise 137,000 bales re-exported from France, chiefly to Great Britain; and those marked (†) were to the Baltic, &c. The following statement gives the general import, stock, and consumption of cotton reduced to bales of the uniform weight of 400 pounds.

IMPORT.

GUNNY BAGS, BAGGING, ETC.—There is an increasing business again in cloth and holders are very firm in their views, while the tendency of prices is upward. Sales are 250 bales, to arrive, part Borneo, at 12¼c., gold, in bond; 100 Borneo at 12½c.; 550 bales cloth, on spot, at 12½c., gold. Domestic rolls are in fair demand; 1,800 sold at 19½c., currency. Bags are quiet; we only hear of the sale of 500 bales, to arrive in Boston, per "Mystic Belle," at 11c., gold, in bond. We quote: 16½@17c., currency. Hemp is quiet, but held pretty firmly at 10½@10¾c., gold. Jute is rather quiet at the close; sales during the week are 500 bales poor quality on private terms, 500 bales medium grade at 5¾@6¼c. and 500 bales "M. C.," in Boston, at 6¼c., gold. Jute Butts move fairly at a slight advance in prices; sales are 400 bales, here, at 4c., 250 bales at 4¼c., and 1,000 bales in Boston at 4c., currency.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	Week ending Feb. 17, 1871. Receipts.	Shipments.	Stock.	Week ending Feb. 17, 1870. Receipts.	Shipments.	Stock.
Augusta	4,501	8,876	21,993	3,399	2,577	23,617
Columbus	974	1,809	12,370	1,233	2,473	13,460
Macon	1,343	2,096	15,914	1,200	2,702	16,668
Montgomery	1,873	2,356	10,015	1,847	4,325	10,447
Selma	1,363	2,217	9,921	790	768	7,857
Memphis	17,224	20,520	45,673	10,501	11,900	28,092
Nashville	3,504	3,077	8,011	2,934	2,835	5,264
	30,781	35,951	123,897	21,904	27,580	105,400

These totals show that the interior stocks have decreased during the week 5,169 bales (being now 18,497 bales more than for the same period of last year), while the aggregate receipts are 8,877 bales more, and the shipments 8,371 bales more than for the corresponding period of 1870.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons:

	1871.	1870.
Stock in Liverpool.....bales.	750,000	316,000
Stock in London	76,291	91,088
Stock in Glasgow	300	350
Stock in Havre	44,330	77,700
Stock in Marseilles	6,850	5,200
Stock in Bremen	4,800	5,900
Stock rest of Continent	25,000	32,000
Afloat for Great Britain (American)	305,000	217,000
Afloat for France (American and Brazil)	1,318	42,134
Total Indian cotton afloat for Europe	118,845	97,356
Stock in United States ports	709,033	546,727
Stock in inland towns	123,897	105,400
Total	2,165,664	1,537,055

These figures indicate an *increase* in the cotton in sight to-night of 628,609 bales compared with the same date of 1869.

The exports of cotton this week from New York show a decrease since last week, the total reaching 17,475 bales, against 18,909 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 83,434 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in THE CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night:

	Total bales.
NEW YORK—To Liverpool, per steamers China, 1,536....Idaho, 3,400....Batavia, 1,419....City of Cork, 535....City of Brussels, 898....Tripoli, 1,140....per ships James Foster, Jr., 2,050....Ontario, 1,816....Tyro, 2,093	14,887
To Bremen, per steamer Donau, 600	600
To Antwerp, per ship Therese, 100	100
To Rotterdam, per bark Grace, 137	137
To Gottenburg, per bark Iron Age, 1,711	1,711
To Bilboa, per bark A. Skalle, 40	40
NEW ORLEANS—To Liverpool, per steamer Mexican, 2,181....per ships Austria, 4,078....William Ross, 2,631....May Flower, 3,000....Friga, 3,334....per barks Albino, 2,358....Charles Auguste, 1,831....Lebanon, 2,560	21,968
To Bremen, per ships Shakespeare, 3,400....Hermine, 1,717	5,117
To Hamburg, per steamer Allemania, 1,993	1,993

BY TELEGRAPH FROM LIVERPOOL.—

LIVERPOOL, Feb. 17, 11:30 P. M.—The market opened a shade firmer. The sales of the day are estimated at 8,000 bales. The sales of the week have been 61,000 bales, of which 10,000 bales were taken for export and 3,000 bales on speculation. The stock in port is 750,000 bales, of which 400,000 bales are American.

	Jan. 27.	Feb. 3.	Feb. 10.	Feb. 17.
Total sales	95,000	66,000	59,000	61,000

BREADSTUFFS.

FRIDAY P. M., February 17, 1871.

The markets, though generally ruling weak for Flour, Wheat and Corn, are without material decline in the past week, while Rye, Oats and Barley have been doing better.

The receipts of Flour continue moderate, and holders have generally been pretty firm in their views, but the export demand has been much reduced, and the local trade has purchased only to supply immediate wants. The better grades of extras from Spring Wheat have declined 25c. for some brands, but there being no probability of stimulating business even at this decline, many holders are disposed to await the movement of buyers at old prices. There is consequently little change to note in the range of quotations. The late purchases by shippers for arrival promise to occupy their attention for some time, but will also prevent much of the fresh receipts coming upon the market. Old Flours are held very firm.

The Wheat market has been more active, both for export and milling. The stock is in few hands, and the offerings have been limited. Winter Wheats have improved, but Spring Wheats, with frequent fluctuations, have ruled in favor of buyers. Liverpool reports have latterly been unfavorable, and gold has declined, but the prospect of a decline in ocean freights, and the anticipation of a better demand from Europe as the Spring opens, induce holders to part with their stocks very sparingly, especially as the receipts by rail are as yet quite small. At to-day's markets there were sales of 30,000 bush. prime new No. 2 Spring at $1 51@$1 51½, in store, being the lowest prices since the fall of Paris.

In Indian Corn the movement has been very steady. Receipts have been fair, with just enough shipping and export demand to dispose of the supply. The close, however, was rather weak at 83c for fair mixed afloat.

Oats have been in speculative request and several boat loads of Chicago and Toledo sold at 65½@67c in store. The transactions of the week are nearly half a million bushels, but at the close speculation subsided and prices became weak.

Rye in fair milling demand, and since the stock of Barley is now considerably reduced, while the malting demand continues good, upon which holders have been able to realize a slight advance; State, two rowed, 90@95c; Canadian, West, &c., $1 10@1 17. Malt and Peas unsettled.

The following are the closing quotations:

Flour—		Wheat, Spring, bush	$1 44@ 1 55

*Estimated. †187,500 bush. wheat and 688,000 bush. corn afloat. The stock of malting barley in New York in store and afloat is about 800,000 bush.

GROCERIES.

FRIDAY EVENING, February 17, 1871.

Additional snow-storms to block up our streets, and the rivers and harbor full of ice, have again contributed to check the transportation of goods, and retarded business to some extent. The actual demand, however, has in no case been sharp, and the market generally presents a quiet tone, with few features of more than the ordinary interest, and no very important changes in values. Stocks increase slowly, though with the prevailing outlet there is enough here in quantities and assortments to satisfy all calls. Holders in most cases appear to feel confident of a very good Spring trade, and manifest no inclination to force the movement or to accept concessions beyond such as may be necessary to get rid of odd parcels on a dull market.

The steamer "Great Republic," just arrived at San Francisco, brings for shipment overland to New York, 919 chests of tea; to Chicago, 5,300 chests of tea; to Boston, 1,144 chests of tea.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black	10,999 pkgs.	Laguayra	1,222 bags.	Sugar, Brazil	7,191 bags.
Green	8,777 pkgs.	Other	1,851 bags.	Manila, &c.	6,466 bags.
Japan	4,962 pkgs.	Sugar, Cuba	9,458 hxes.	Mas'cs, Cuba	1,490 hhds.
Various	2,315 pkgs.	Cuba	3,258 *hhds.	Porto Rico	47 *hhds.
Coffee, Rio	12,379 bags.	Porto Rico	*hhds.	Demerara	298 *hhds.
Java	1,380 mats.	Other	978 hhds.	Other	*hhds.
Maracaibo	100 bags.				

*Hhds. include bbls. and tcs. reduced.

Imports this week have included 4 cargoes of tea, 34,841 bags of Rio, and 3,935 bags of other kinds of coffe; good receipts of sugar and fair receipts of molasses.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at date.		Imports at leading ports since January 1.	
	1871.	1870.	1871.	1870.

Digitized by Google

TEA.

The transactions reported since our last are quite liberal, but they include movements for some time under negotiation, while the actual business for the week has in reality been moderate. Buyers are in daily attendance certainly, but they are slow and cautious in their operations, and show little inclination to take goods for which an early resale is not almost certain, or the quality is such as to make the carrying a matter of assumed safety. Blacks are apparently handled with the greatest confidence, and good chops command full figures, but other styles, if not actually lower, have an inclination that way, and are to some extent nominal for the present. In fact, the best that can be said of the market as a whole is to call it steady, with an average trade demand and a very fair assortment available. The business in lines has been moderate throughout. Sales in invoices of 7,100 Greens, 12,000 Oolongs, 2,500 Souchongs, and 1,000 Japans.

Imports at New York this week have included the following cargoes from Shanghae: "N. B. Palmer," 1,073,207 lbs Green and 1,640 lbs Japan; "Lizzie Iredale," 34,634 lbs Black, 706,510 lbs Green, and 41,994 lb Japan; "Union," 7,580 lbs Black, 219,075 lbs Green, and 29,231 lbs Japan; "Morro Castle," 884,416 lbs Green; "Min," from Yokahoma, 423,382 lbs Japan; and 24 pkgs. At Boston, 269,479 lbs Black, per "Louisa," from Foo Chow, and 223,963 lbs Black, per "Eleanor," from Foo Chow.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871	2,523,337	6,350,447	2,804,386	9,478,170
1870	2,916,261	1,689,214	358,548	4,914,023

The indirect importations, including receipts by P. M. Steamers via Aspinwall, have been 4,307 pkgs. since January 1, against 3,735 last year.

COFFEE.

The general market has been void of any unusual amount of activity, and there is no doubt that this is largely due to the fact that the liberal distribution of January has now reached consumers, and for the time being checks the call upon jobbers, though the difficult and expensive transportation has a tendency to somewhat curtail the demand. Holders, however, remain confident that our home wants must increase as the Spring advances, and the hopes of a larger European outlet have not been abandoned. On Brazils the week opened very quietly and void of interest, but with an increased and more desirable offering in part by steamer, the trade were stimulated to operate with rather greater freedom and a very fair demand prevailed, especially as a later telegram at hand from Rio Janeiro was generally considered as of a favorable tenor. Buyers were not over anxious, however, the very extreme views of holders inducing caution, and the actual amount of goods changing hands proved somewhat moderate, purchases being based solely on positive necessity. The stock available in first hands is still comparatively moderate, however, and importers insist on full prices with much tenacity. At the outports the movement has also been very fair, and the markets as a rule quite firm. Java has remained dull in first hands and the sales by jobbers not very heavy, but all things considered the movement was fair and former prices realized with prime brown styles still the favorites. West India grades have developed no new features, the business proving quite light and mostly in odd broken lots. Prices ruled pretty steady, but the offerings of stock fair, and dealers, though refraining from pressure or the exhibition of any desire to realize, seemed rather more inclined to meet the outlet than heretofore. The sales during the week embrace 17,100 bags Rio, 300 Costa Rico, 800 Maracaibo, and 1,200 St. Domingo.

Imports of Rio this week have included the following cargoes: steame. "Donati," 12,791 bags; "Even," 5,363 bags; "Peter C. Warwick," 4,203 bags; "Freya," 4,100 bags; "Hitterdahl," 2,800 bags; "E. H. Eaton," (from wreck of "Emma Sophia") 1,227 bags; "Alexandria," from Santos, with 4,357 bags. Of other sorts the imports have included 3,985 bags of sundries.

The stock of Rio Feb. 16, and the imports since January 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.

SUGAR.

The demand for Raws has not improved to any extent during the past week; and though prices were without decided depression the tone was soft, and in buyers' favor. The wants of the trade required only a few odd lots from day to day, and purchases were regulated accordingly; while refiners, with prices on their product still shrinking and business quite dull, seemed rather inclined to contract than to enlarge operations. Some additions were made to the stock, but nothing very large, and importers were rather inclined to assume an air of confidence, but could hardly counteract the influence of the light prevailing demand, and the buyer gained most of the advantage, especially on odd broken parcels offering from pier. Among the new crop there is the usual parcels of wet heavy grades, but as a rule the samples show a very fair average of quality, and sales are made without much difficulty, both on the refining and grocery styles. The condition of the streets and the harbor has probably interfered with the movement of sugars more than any other goods, but these difficulties are being gradually overcome. Refined have sold to some extent, though without any freedom, and the market has been in a pretty dull condition. The production in the meantime continued, and the result was a slow but sure accumulation of stock, and finally an increased desire to realize, bringing prices down somewhat on all grades, though the depression was probably most marked on soft qualities. The offerings of Clarified sugars still have a tendency to check the demand for Refined. The sales of Raw are 1,560 hhds. Cuba, 100 hhds Guadaloupe, 525 hhds. Demerara, 1,100 hhds. New Orleans, 6,448 boxes Havana, 578 baskets Batavia, and 532 hhds. Melado.

Imports at New York, and stock in first hands, Feb. 16, were as follows:

	Cuba, bags.	Cuba, *hhds.	P. Rico, *hhds.	Other *hhds	Brazil, bags.	Manila, &c. bags.	Melado hhds.

MOLASSES.

For old crop foreign the market has remained very flat, buyers still refusing to enter into negotiations of moment, indeed seldom condescending to make a bid, and values continuing in a doubtful state, though most of the supply could undoubtedly be bought very low. The new crop, however, has been quite active, and most of the first arrivals closed out. This was not altogether the result of an increased demand, as refiners have been willing from the outset to take the parcels coming to hand on reasonable terms, but may be attributed to the concessions granted by importers a very material modification of views in this quarter, from the prices originally asked, having taken place. The position is not by any means a settled one as yet, as to values and quotations are somewhat nominal, but as indication we may state that most of the sales were of Cuba clayed at 33c., testing 44@46 degrees of polarization. Domestic has been in fair supply but met with better and more general demand prices becoming more steady on the low grades, and for prime to choice qualities advancing decidedly, closing with a strong uniform tone and holders inclined to withdraw their best parcels. Sales of 1,950 hhds. Cuba; 325 hhds. Demerara; 480 hhds. Barbadoes, and 1,900 bbls. New Orleans.

The receipts at New York, and stock in first hands, Feb. 16, were as follows:

	Cuba, *hhds.	P. Rico, *hhds.	Demerara, *hhds.	Other *hhds	N. O. bbls

SPICES.

The wholesale market has not been excited, as there is no stock available here or to arrive to get excited upon, but the tone has very decidedly improved, and holders have in many instances withdrawn their samples entirely for the present. This is particularly the case on Nutmegs and Peppers influenced by very encouraging advices from abroad, and though no positive advance can as yet be quoted, it would be difficult to obtain any of the really desirable parcels except at an increased cost over former figures. Cassia has favored the buyer to some extent but in sympathy with other styles begins to show a little more steadiness. The jobbing trade without decided activity is good, and a fair amount of supplies are being distributed. Sales here of 6,000 mats Cassia by auction, at 85@86c, and 3,000 mats at private sale at 85c currency; at Boston about 200 cases nutmegs on spot, and 800 piculs Pepper to arrive.

FRUITS, &c.

The market for foreign Dried has generally been quiet since the date of our last, except for Prunes, which have ruled active and very firm. Currants were quite dull until yesterday, dealers having purchased to arrive, and were awaiting the arrival of the bark "Udola," which was due the first of this week, with a cargo of some 3,000 bbls. Yesterday the news came that the vessel and cargo were both lost in the storm last Tuesday at Barnegat, and this caused considerable buying by the parties who expected to replenish their stocks from this cargo, and the movement embraced some 2,000 bbls. on spot, at an advance of about one-half cent per pound. Raisins are dull, and although former prices are quoted, dealers would be very willing operators, probably, at a slight decline. Sardines early in the week met with some trade, but the close again is very quiet. Nuts have met with only a jobbing inquiry, at about former prices.

THE DRY GOODS TRADE.

FRIDAY, P. M., February 17, 1871

The severe storm of Monday delayed trade somewhat, but toward the close of the week there have been more buyers in the market and the inquiry for goods has been decidedly more animated, while the movements have also shown a material improvement. The West and South are well represented by dealers here, and those from the last named section are buying freely. Western merchants delay their purchases in consequence of the high freights, but with the prospect of easier rates before many days, they have been buying more heavily during the latter part of the week, but are shipping very small amounts.

The tone of the market has improved somewhat, and prices are more settled, while holders are firm in all fabrics. The manufacturing streams are still too low to admit of any material increase in the production and the stock of cotton fabrics remains very light. Woolens are in relatively better supply, and we hear of one or two mills having been put on heavy work. The stock of spring weights is much lighter than is usual at this season of the year, and there is little likelihood of an overstock.

The finances of the trade generally are in a very healthy condition, and payments are made promptly. We hear complaints from various sections of an effort on the part of buyers to obtain long credits, but there seems to be no probability that wholesale dealers here, or in other cities, will grant this privilege, as the rule. The short credit system has been found to work much more satisfactorily, and we believe dealers generally are inclined to adhere to it.

DOMESTIC COTTON GOODS.—There has been much firmness in the market for domestic cotton fabrics, with an improvement in the general trade. Package buyers have been buying freely, and during the latter part of the week the jobbing trade has been more animated. The stock has been considerably lessened, and prices again tend upward. This is especially the case with bleached goods, which are very buoyant, and several makes have been marked up. The greatest advance has been on "Fruit of the Loom," which are up about 1c. on the 4—4 goods and hundreds. Jobbers still sell the first named goods at 15c., but will probably advance at an early day. Several other brands are sold by agents "at value," and as soon as a supply is received from the mills, it is thought prices will be higher. Prints are steady and continue in good request, but are not likely to advance in view of the decline in cloths.

DOMESTIC WOOLENS.—The demand for fine, fancy cassimeres is moderate, but scarcely equals the expectations of dealers. Dealers from the West and Southwest, who formerly made their purchases early in January, are enabled to get their goods home in from ten days to two weeks now, and consequently delay their purchases until as near the opening of their own trade as possible. The high freights have also kept back trade, and many dealers are said to be only waiting for lower rates, before making heavy purchases. Cloths are in fair request for this season of the year, and are selling at better prices. Shawls suited to the Spring trade move moderately, but the trade has not become very active as yet.

FOREIGN GOODS.—The trade with both importers and jobbers has improved materially during the week, and at the close is fairly active, especially in dress goods. The excitement in domestic goods, is calculated to stimulate traffic in all departments of the market, and the tone of late foreign advices is such as would naturally stiffen the market and induce a more liberal distribution. The Bradford market has hardened considerably since the capitulation of Paris, and prospective early close of the war, and holders of French fabrics in European markets are also firmer. Prices on British dress fabrics are in some instances 10@15 per cent. lower than at the opening of the season a year ago, but importers state that a few weeks of active trade would have a tendency to advance nearly all lines.

The exports of dry goods for the past week, and since January 1, 1871, and the total for the same time in several previous years, are shown in the following table:

	FROM NEW YORK.				FROM BOSTON
	Domestics.		Dry Goods.		Domestics.

THE Commercial AND Financial Chronicle

HUNT'S MERCHANTS' MAGAZINE,

A Weekly Newspaper,

REPRESENTING THE INDUSTRIAL AND COMMERCIAL INTERESTS OF THE UNITED STATES.

VOL. 12. NEW YORK, FEBRUARY 25, 1871. NO. 296.

Advertisements.

Advertisements will be inserted at the following rices per line for each insertion:

If ordered less than 4 times		20	cents per line.
" 4 times or more		16	"
" 7 "	"	14	"
" 13 "	"	12	"
" 26 "	"	10	"
" 52 "	"	8	"

If the advertisement occupies one column or upwards, a discount of 15 per cent on these rates will be allowed.

Space is measured in agate type, 14 lines to the inch.

Advertisements will have a favorable place when rst put in, but no promise of continuous insertion in he best place can be given, as all advertisers must ave equal opportunities.

Advantages.

1. The CHRONICLE has much the largest circulation of any financial publication issued.

2. Its circulation extends to business men in BOTH the FINANCIAL and COMMERCIAL branches, and also to a very numerous class of retired merchants, moneyed men and investors, who are not engaged in regular business.

3. It is preserved on file by subscribers, and thus possesses a great advantage for advertisers, over those publications which are habitually thrown aside after perusal.

WM. B. DANA & CO.,
PUBLISHERS,
79 & 81 William St., N Y.

Treasury Department.

WASHINGTON, February 4, 1871.

Public notice is hereby given, that books will be opened on the sixth day of March next, in this country and in Europe, for subscriptions to the National Loan, under the Act approved July 14, 1870, entitled "An Act to authorize the Refunding of the National Debt," and the Act in amendment thereof, approved January 20, 1871.

The places at which subscriptions may be made, and the names of the authorized Agents of the Government, will be announced hereafter. The proposed loan comprises three classes of Bonds, namely:

FIRST. Bonds to the amount of five hundred millions of dollars, payable in coin, at the pleasure of the United States, after ten years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of five per cent per annum.

SECOND. Bonds to the amount of three hundred millions of dollars, payable in coin, at the pleasure of the United States, after fifteen years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of four and a half per cent per annum.

THIRD. Bonds to the amount of seven hundred millions of dollars, payable in coin, at the pleasure of the United States, after thirty years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of four per cent per annum.

Subscribers to the Loan will have preference in the following order, namely:

FIRST. Subscribers for equal amounts of each class of bonds.

SECOND. Subscribers for equal amounts of bonds bearing interest at the rate of four and a half per cent and of bonds bearing interest at the rate of five per cent.

THIRD. Subscribers for five per cent bonds.

When a subscription is made the subscriber will be required to deposit two per cent of the amount thereof, to be accounted for by the Government when the bonds are delivered; and payment may be made either in coin or in bonds of the United States known as FIVE-TWENTY BONDS, at their par value. The coin received in payment will be applied to the redemption of five-twenty bonds.

The bonds will be registered or issued with coupons, as may be desired by subscribers. Registered bonds will be issued of the denominations of $50, $100, $500, $1,000, $5,000, and $10,000; and coupon bonds of each denomination except the last two. The interest will be payable in the United States, at the office of the Treasurer, any Assistant Treasurer, or Designated Depositary of the Government.

The bonds of the several classes aforesaid, and the interest thereon, are exempt from the payment of all taxes or dues of the United States, as well as from taxation in any form by or under State, municipal, or local authority.

After maturity, the bonds last issued will be first redeemed, by classes and numbers, as may be designated by the Secretary of the Treasury.

GEO. S. BOUTWELL,
Secretary of the Treasury.

Drexel, Winthrop & Co.,

18 WALL STREET,

OFFER FOR SALE,

Houston and Texas Central Railway Company

FIRST MORTGAGE LAND GRANT SINKING FUND

7 Per Cent Gold Bonds.

Secured by a First Mortgage upon 6,400 acres per mile, and upon the whole and entire line of road, its franchises and property of every description.

RECEIPTS IN GOLD COIN.

OPERATING 141 MILES. 1869.	OPERATING 166 MILES. 1870.
$1,047,827 65.	**$1,538,420 00**

The receipts for January, 1871, were $213,000, gold.
The net earnings for the year 1870 were more than sufficient to pay the interest upon $13,000,000, or over three times the present issue of Bonds.
The affairs of this Company have been examined by many capitalists, who have invested largely in the Bonds, and we are confident that a careful scrutiny will prove them to be the best and safest scrutiny now offered in this market.

FOR SALE AT 90 AND ACCRUED INTEREST, BY

DREXEL, WINTHROP & CO.,
18 WALL STREET.

SAFE INVESTMENT.

The attention of Capitalists is called to the

FIRST MORTGAGE

SEVEN PER CENT BONDS

OF THE

PEORIA, PEKIN & JACKSONVILLE RAILROAD COMPANY,

Issued in sums of $500 and $1,000, redeemable July 1st, 1894, with coupons for semi-annual interest, payable on the first days of January and July, in the City of New York, and secured by a Mortgage for $1,000,000 upon the Railroad, its franchises and all equipment, on the well protected basis of about $12,000 per mile.

This Road, with its 88 miles of main, and over 8 miles of side track, is completed and in successful operation between the cities of Peoria and Jacksonville, in the state of Illinois. At Peoria, the third city in the state in respect to business and population, it intersects four prominent Railroads, with connections for Chicago, Rock Island and other points North, East and West but having its principal connection with that of the Chicago, Rock Island and Pacific Company. At Jacksonville it connects with three Roads forming, with the Jacksonville Division of the Chicago and Alton Road, the shortest line between Peoria and St. Louis.

Its rental receipts from other Roads, whose trains pass over less than ten miles of its track, are $40,000 per annum, being more than one half of the amount of the annual interest on its First Mortgage Bonds, otherwise amply provided for by its existing business.

A portion of the $1,000,000 of First Mortgage Bonds, aforesaid, the high character of which for investment will be observed, are now offered for sale by

W. T. HATCH & SON, Bankers,

DRAINS ON THE MONEY MARKET.

Wall Street several times in the last fortnight has been perturbed by sensitiveness as to the probable action of the Bank of England. This is somewhat noteworthy, as for several years our money market has been independent of foreign influences, and the movements of European finance have ceased to reflect themselves here to the same extent as formerly, This improvement results of course from the suspension of specie payments, and is one compensation for the evils of an irredeemable currency. Formerly when our banks were compelled to pay specie to note-holders and depositors their scanty reserves of coin were liable at any moment to be depleted by some severe and sudden demand for gold for exportation. And as with a view to lessen as much as possible their dead assets the coin reserve was always kept down to a point barely sufficient for an efficient basis for their business, the banks were compelled by any foreign drain to protect their solvency, to raise the rate of interest, to deny the usual accommodations to their dealers, and to contract their operations as swiftly and as extensively as they could; in short, to diminish their liabilities in all directions, to curtail the facilities of business men, with a view to afford which banks exist. These movements have been sometimes described as a war of the banks on one another and on business. This description is too severe for those events which, as many of our readers will remember, were formerly the too frequent result of a foreign drain on the banks. Still the effect was dangerous, although if it developed itself at a time when our interior business was quiet, no very serious harm resulted to the general trade of the country. But sometimes it was far otherwise. The foreign pressure on our banks often occurred during the height of our busy season. At such times trouble was the inevitable result in the money market and diffused itself thence throughout the industrial and commercial circles. At rare intervals it happened that such a foreign drain occurred at the very moment when our credits were unduly expanded and when by the multiplication of railroads and other improvements our floating capital had been converted with undue rapidity into fixed capital so as to deplete the reservoir of loanable money, and place our financial machinery in a condition of moderate sensitiveness and danger.

It is easy to see that when the banks and the country are in such an unhealthy state of expansion, the perils of a foreign drain of gold are greatly increased, and they were the more dreaded because they came without warning and their recurrence, originating from without, could not be easily foreseen or provided against. Such was the tribute we paid, as a debtor nation, to England, the great banker, who held always a vast aggregate of claims against us, and whose own monetary system was so rigid, harsh and unexpansive in its movements as to be sometimes, in danger of letting loose a disastrous monetary hurricane by its efforts to prevent a temporary slight gale from sweeping the financial ocean. Now it is easy to see that the method on which financial trouble was caused by a monetary drain was this, the export of gold depleted the reserves of the banks, and disorder was thus introduced into the circulating currency of the country.

Now, however, the trouble is not in the currency. It is not because our interior circulating money is carried out of the country that a foreign drain of gold would cause monetary trouble. Our interior currency no longer consists of coin. Hence we can export as much coin as we wish without lessening the volume of our circulating active money. Under these circumstances how can we account, then, for the general and growing anxiety as to a foreign demand for specie, especially as our money market is easy at present and the gold crop is one of our most prolific and most valuable products, while moreover we can produce every year 25 or 30 millions of the precious metals more than we need for any valuable utility or productive purpose?

To answer this question we must remember that from

Digitized by Google

other causes may disturbances arise in the money market, besides the trouble in the currency which we have just discussed. The first of these is a loss of general confidence, and the second a loss of floating capital from the reservoir of the loan market. It is from the latter cause that trouble is apprehended now. In England, because of the war and the resulting depression of business, money has been able to earn so low a rate of interest that in the last few months vast sums have temporarily floated hither in quest of temporary employment. When the Transatlantic war is over the old channels of European investment may open again, and the capital may be attracted thither which we have temporarily enjoyed the use of. The drain which is feared from these changes, then, is not a drain of currency, but a drain of capital, and especially of floating capital, the adequate supply of which is indispensable and very difficult to keep up in a young, rapidly growing community, where internal improvements march forward and consume the available funds of the country with such rapid avidity.

Secondly, we have in this country rendered ourselves peculiarly sensitive to the perils of such a loss of foreign capital by our undue activity in the construction of railroads and other permanent works, some of which are scarcely beginning as yet to be productive and to pay back their cost. The progress we have made in this direction may be seen from the fact that the completed working railroads of this country have increased since 1866 by more than 12,000 miles, or at the rate of 3,000 miles a year.

It is computed that there are now more than 15,000 miles of railway contemplated, of which 7,500 miles are actually in progress. The European war exerted a chilling influence on our railroad finances, as it suddenly closed the German markets to our new railroad bonds, which were beginning to be absorbed there with an eagerness which had for three or four years been increasing. The thrifty frugal Germans have made large gains on the government six per cent bonds which during our war they bought from 35 to 65 and can now sell again at almost par. Their experience in the past has inclined them to look favorably on United States investments, and some very large negotiations of our railroad bonds were actually on the point of completion at the outbreak of the war. The trouble, however, was of short duration, for, as we have said, vast compensative streams of capital from England and elsewhere came over here seeking investment on call, so that the money market has been abundantly supplied. It is these funds that the over plethoric money markets of Europe have sent in for temporary use which are now causing some apprehension. The result is of course uncertain, and depends on contingencies beyond human foresight. We must confess, however, that the situation is not improved by the fact that Mr. Boutwell has chosen the present unfavorable crisis for offering his new loan. Still there are not wanting indications which render it probable that beyond an advance in the existing low rates of discount there will be very little change in the loan market till the monetary movements of Spring begin to make themselves visible a few weeks hence.

THE BRITISH INCOME TAX.

The attempt of the Central and Hudson River Railroad Company to escape the payment of a million and a half of revenue tax due on their scrip dividend has attracted attention to the British Income tax arrangements under which the excuses of the railroad company would have had little chance of so patient a hearing as they have received here. These excuses are virtually to the effect that in the first place this immense scrip dividend was not earned during the year in which it was divided, but represented the capitalized earnings partly of the past and partly of the future; and secondly that the scrip certificates can be dishonored by the company and constitute simply a claim for future interest. This is an ingenious but unavailing plea. For the purposes of the tax dispute we only need to say that the income tax is due on all dividends; that the scrip in question is a dividend; and that the value of this scrip dividend is not simply the value of the annual interest it draws. This last point is shown by the fact that the scrip can be sold in the market. Equall with bonds or shares, it is a security, every day dealt in at the Stock Exchange. It sells as readily, and almost at as high a price, as the full paid stock of the company. An allotment of scrip is virtually therefore a negotiable document equally with stock; and a dividend of scrip for the purposes of the income tax is to be treated just the same as if it had been a dividend of stock. The controversy will doubtless be settled on this basis; and as the claim is made that the existing dispute would scarcely have arisen under the British tax regulations it may be of some interest to us to examine those arrangements, especially as it seems that our own income tax is not to be repealed at this session of Congress.

Twenty-eight years ago Sir Robert Peel proposed the imposition of the English income tax on account of a deficit which, in the troubled state of the manufacturing districts, was creating some alarm, especially as for a year or two several other fiscal expedients had been adopted without the expected increase of revenue. The crisis was formidable. The operatives and the other less opulent classes could bear no heavier taxation. It was therefore inevitable that the wealth of the nation must bear the burden. Some new tax must be tried. After long discussion, on the 22nd June, 1842, the income-tax bill finally became a law. It is a mistake, however, to regard it simply as an income tax. It is a real estate tax also. But it differs from our American taxes on real estate in that it is not levied on capital. It is only chargeable on the profits arising from property, professions, trades and offices. And several circumstances have made this tax the most useful and timely expedient ever contrived by British fiscal sagacity and skill.

The services the income tax has rendered to England are invaluable. Not the least of these is the amazing elasticity with which it has responded to the demand of war finance or of any other extraordinary strain upon the government expenditure. To illustrate this we give the annual product of the income-tax since it was first imposed:

REVENUE FROM THE BRITISH PROPERTY AND INCOME TAX.

Year ending March 31.	Total Revenue.	Rate on £1 of Income * Small Incomes.	† Large Incomes.

Long experience has proved the income tax to be at once the most uniform, unfailing, expansive and the most responsive to control of all the British fiscal imports. It was at first imposed for three years only, but again and again has it been renewed, because no substitute of equal efficacy could be found. It has been attacked by a host of enemies. Select committees of the House of Commons investigated and reported upon it in 1851, 1852, and 1861. Yet it has survived till now, and though far from popular, use has caused it to be borne with more equanimity, especially as it exempts the turbulent and dangerous classes; and presses most on the intelligent and superior orders of society who have something to lose. Moreover, it was no small advantage that for eleven years no change had to be made either in the rate or incidence of the tax. Immediately after the discovery of this new impost, the rapid development of the railroad and telegraph system of England gave a wonderful impulse to her productive forces and stimulated the previously sluggish growth of wealth. Hence the hungry, discontented masses of England were quieted and well-fed. The repeal of the corn-laws, the discovery of gold in her Australian colonies, and the subsequent large accessions to the international supply of the precious metals—all these movements, each one containing the germ of a great financial revolution—acted with conspicuous force on the interior condition of Great Britain, and postponed indefinitely that upheaval and convulsion which some, both of her friends and enemies were confidently expecting. When these reviving causes had well operated came the Crimean war. In 1854 and the three following years the taxes had to be increased, especially the income tax, which yielded for four years twice as much as before. The tax was extended so as to cover smaller incomes, and in 1857 the highest point was reached, when England's share was £13,574,000, Scotland's £1,276,000, and Ireland's £1,181,000. The respective wealth of the three members of the British Empire appear from this to be distributed in the ratio of 85 per cent to England, 8 per cent to Scotland and 7 per cent to Ireland.

Such a fiscal basis for comparison of the respective wealth of different peoples must fail, however, and be almost useless, when the conditions of the taxation are not the same in each case. Forgetting this some persons have attempted to compare our relative wealth with that of the English, by means of the product of the income tax. Accordingly our contemporary, the London *Economist*, has attempted to do this in a recent issue.

It would be very interesting if we could argue from the premises thus laid down. But this is next to impossible for several reasons. For instance, we have always allowed heavy exemptions from the income tax. First $1,000 and by the recent law, $2,000 of annual income was wholly exempted to every taxpayer, but in England every taxable was obliged to pay the tax on his whole income without deduction; and every man was taxable who had a yearly income of 750 dollars from any source whatever. This harsh regulation was not softened till 1863, when one of our principles of exemption was partly adopted; and since that time all persons with less than 1,000 dollars a year have an abatement made to them in respect to $300, which sum they enjoy untaxed.

This is the only concession made under the income-tax in England, where our formidable list of exemptions would be regarded with surprise that anything taxable is left. In their system, for example, no deduction is made for taxes paid during the year, nor for the actual rent of a homestead. On the contrary, there is a special provision in the law (§ 167) that no owner occupying his own house shall claim exemption from tax until to his report of income from other sources has been added the full annual value of the house he occupies, together with one-half of this value in England and one-third in Scotland. In other words, he is assessed, first, as a real estate *owner* on the full value under schedule A, as it is called; and secondly, as *occupier* of his house he is assessed on the half of its value under schedule B. To make this apparent duplication clear, we must understand that the British income tax is assessed, as with us, by means of printed forms. These papers divide the taxpayer's liability under five heads. The first is schedule A, which charges the owners of real estate with five pence in the pound on the annual value. Secondly, schedule B charges the occupier of real estate (whether his own or not) with 2½ pence on the annual value of the house and land he occupies. Thirdly, schedule C applies only to income from the public funds or government securities. Schedule D and E correspond to our income tax. The former exacts fivepence in the pound on the annual profits and gains from property, trades and professions; the latter charges the same rate of duty on the salaries of government officers and on all pensions paid out of the public revenue.

It is foreign to our purpose to give any elaborate details of the English system. Enough has been said to show that the income tax returns of that country offer data which cannot easily be used for a comparison of the relative wealth of the various classes of individual citizens here. Such a use of the figures, if we had them in sufficient detail, is perhaps not absolutely impossible if we make the requisite correction for variations of the two tax-systems. For it is said that the proportion between the real estate assessment and the income assessment is in a tolerably constant ratio. This will be seen from the subjoined table which comprises the only period in which a long series of years of unchanged tax arrangements has offered an opportunity for the comparison we wish to make:

Year ending March 31.	Schedule A. Ownership of lands and houses.	Schedule B. Occupation of lands and houses.	Schedule D. Profits from trades and professions.
1843	£2,501,000	£335,000	£1,682,000
1844	2,472,000	328,000	1,582,000
1845	2,486,000	324,000	1,579,000
1846	2,587,000	332,000	1,717,000
1847	3,605,000	324,000	1,768,000
1848	2,658,000	322,000	1,754,000
1849	2,755,000	332,000	1,585,000
1850	2,728,000	326,000	1,571,000
1851	2,726,000	321,000	1,606,000
1852	2,767,000	310,000	1,669,000
1853	2,783,000	305,000	1,700,000

It will be observed that immediately after the gold discoveries there was a gradual rise in the taxable value of real estate, though the profits of trade show little increase till later. Still the aggregate product of the income tax was kept up, notwithstanding the severe mercantile crisis of 1847–8, when, as Sir Stafford Northcote tells us, "within a few months no less than 220 mercantile houses of the higher class fell, besides many of inferior importance." The liabilities of 85 of these 220 firms are estimated to have amounted to $60,000,000, and the total loss occasioned by the whole failures is said to have been thirty millions of pounds sterling or $150,000,000. The same productive efficiency seems to have been kept up, though somewhat impaired, during the terrific panic of 1866, when the credit of England was so shaken that consols fell to 84, and Lord Clarendon wrote a special circular to the foreign ministers of Great Britain to reassure the public mind abroad. If, as is probable, these two severe panics, with the minor troubles of a similar character, might have been wholly prevented had the Bank of England been competent to foresee the storm, and to use previous precautions against it, it is hoped that that institution will be held to a very strict account in case of like future misfeasance. In times of panic or the outbreak of war and in any other public emergency, the

Digitized by Google

income tax has so far proved an unfailing resource to the British Exchequer. This wonderful elasticity and usefulness compensate for the numerous evils of the income tax and have perpetuated it till now. It has prevented the necessity for imposing other taxes, and it has further improved the English tax system by enabling many worse imposts to be taken off. Since Sir Robert Peel's day it has not only replenished sometimes a failing Exchequer but has gradually removed many of the fetters which weighed on British commerce and productive industry.

DEBT AND FINANCES OF MAINE.

The debt of the State of Maine dates from the year 1820, when Maine was separated from Massachusetts and became an independent Commonwealth. The debt of Massachusetts at that time had been contracted mainly for the purpose of aiding the Federal Government in the last war with Great Britain, 1812–15, and amounted $678,062, of which Maine, at the time of separation, assumed one-third, or $226,120. This entire sum was voted by Congress to Massachusetts on July 8, 1870, in satisfaction of a claim for that amount, and one-third of the sum was devoted to paying the claim of Maine. Both these States assigned their interests in this claim to the European and North American Railway Company, of Maine, to aid it in constructing its line of road. The rest of the State debt was created in pursuance of a constitutional provision which empowers the Legislature to authorize loans whenever they are deemed essential to the welfare of the people, and was issued chiefly for the expenses of the Aroostook war and for war purposes during the late rebellion.

On the last day of 1869 the total debt of Maine was $8,100,000. During 1870 it was decreased by $33,000. During the current year there will become due $840,000 of the debt, $15,000 of which will be payable March 1; $250,000 May 10; $300,000 July 1; $250,000 August 1; and $25,000 on October 5. Of the total to be paid this year, $624,000 must be paid in coin, or its equivalent in currency, according to a resolution passed by the Maine Legislature March 23, 1870, in pursuance of the decision of the United States Supreme Court, which affirmed that all debts or loans contracted prior to February 25, 1862, are payable in coin. To meet the war loans the sinking fund of 1865 was established. On January 1, 1870, this fund amounted to $972,530. The receipts to the fund during last year were, from taxation, $129,325; from interest, $74,039; and from discount on bonds purchased, $2,782. This made a total of $1,178,677 61 as the amount of the sinking fund of 1865 on January 1, 1871. This fund is wholly invested in the bonds of the State, except $30,000 in United States 5-20's.

The Treasurer will find it necessary to avail himself of the provisions of an act approved January 28, 1865, which authorizes him, with the approval of the Governor, to sell or dispose of such portion of the bonds belonging to said fund as may be necessary to meet the bonds as they mature, and apply the proceeds to their payment.

The sinking fund established by an act of March 7, 1868, for the payment of the municipal war debt loan, now amounts to $92,048, invested in registered Maine bonds due in 1889. Of this total $84,969 were received from taxation, $5,244 from interest, and $1,835 from discount on bonds purchased during 1870.

Acting under authority of the resolution of March 23, 1870, already noticed, the Treasurer has paid all maturing obligations of the State that came within the scope of the resolution, in coin or its equivalent in currency. These obligations amounted to $68,760 in coin. He paid, therefore, in premium, $9,585, or about 13 15-16 per cent, exceeding the legislative appropriation for the purchase of coin by $3,085. The language of the resolution of March 23, 1870, contemplates a possible reversal of the decision of the United States Supreme Court, and an expectation that the judgment would be reversed has been generally entertained in Maine; but until the resolution be rescined or the decision be revoked an appropriation will be required to execute the act. In lieu of $639,000 in coupon bonds, the Treasurer has issued the same sum in registered bonds, represented by seventy-six certificates. Municipal War Debt coupon bonds to the amount of $3,352,000 were received during 1870, and of this total $3,022,100 were issued to cities, towns and plantations, with $62,300 worth of these bonds ready for delivery to others on the first of the current year; while $267,600 of this particular debt had been redeemed and bonds to that amount destroyed. During 1870, 16,320 acres of "land-scrip" were sold at 84 cents per acre, netting $13,690. The Agricultural College Fund of the State amounts to $118,394.

The *ordinary demands* upon the Treasury for the current year, will require the assessment of a State tax of five mills (or ½ per cent.) on the dollar of the valuation, being a reduction of one-sixth per cent. from last year. With the exception of ½ per cent. on the valuation, it is not officially intimated that any other tax will be levied this year. The latest valuation assesses the amount of property in the State at $224,812,900 and 6 mills on the dollar, the tax due January 1871 was $1,350,413.

The laws relating to the raising of revenue in Maine must, by constitutional provision, be specific in their character, and may be framed only on evidence of absolute necessity for them. The principal sources of revenue are taxation, and from sales of the public lands, or from timber therefrom sold. Of these three sources, taxation yields very much the larger portion. The total amount of revenue raised last year was $4,924,164 12. The cash in the Treasury on the first day of 1870 was $235,930 63. The total of payments made in 1870 was $5,041,846 64, exceeding the receipts by $117,682 52. The cash in the Treasury on December 31 last was $118,248 11.

DETAILED STATEMENT OF DEBT OF MAINE, JANUARY 1, 1871.

Description.	Date of Authorizat'n.	Denomination or par value.	Amount now outstanding.	Interest. Rate per ct.	Interest. When payable.	Where payable, and by whom.	Principal when due.
Purchase of Massachusetts lands	Sept. 28, 1853.	$25,000.	$50,000.	5	October 5.	Bost., Suffolk N. B'k.	1871-72, Oct. 1.
Renewal of loan of 1840—Aroostook war..	Jan. 23, 1856.	1,000.	130,000.	6	March 1, Sept. 1.	" "	*
Current expenses	Apl. 14, 1857.	1,000.	30,000.	6	Jan. 1, July 1.	Augusta, Treasurer.	1875, July 1.

DEBT AND FINANCES OF MASSACHUSETTS.

The State Debt of Massachusetts was originally created for the purpose of establishing certain public works of which the Commonwealth stood in need, such as public buildings, and it was subsequently and at different dates augmented to increase the number and value of these public works; also for aiding railroad enterprises to develop the resources and the carrying trade of the State which could not have been as well and as rapidly developed without the State's aid, and to assist the General Government in suppressing the late rebellion. The finances of Massachusetts have always been comprehensively and skillfully managed, and this fact accounts for the high standing of the State's credit, both at home and abroad—a credit which probably ranks higher than that of any other State in the Union. During the past year there was a reduction of the amount of the State debt outstanding by the payment of more than $2,000,000; and the increase of the various sinking funds, which are virtually equivalent to an extinction of the debt, amounts to about one million more. Nearly every funded debt of the State has a sinking fund provided, through the operation of which the payment of the debt at maturity is secured.

The valuation of property in the Commonwealth for 1870, as compiled from the returns of the Assessors of the several cities and towns, the report of the State Commissioner of Savings Banks, and the returns made to the tax Commissioner's department, is as follows:

Assessor's aggregate of real and personal property, May 1, 1870	$1,417,127,376
Savings Banks' deposits, Jan. 1, 1871	138,232,271
Corporate excess over real estate and machinery, May 1, 1870	92,063,976
Total	$1,647,423,623
The same aggregates for the corresponding periods of the year previous were	$1,548,456,164
Last year's increase in taxable values	$98,967,459

The revenue of Massachusetts is largely derived from tax on savings bank deposits, the corporations tax, taxes on shares of non-resident stockholders in national banks, insurance premiums, coal and mining companies, on receipts from alien passengers, correctional institutions, licenses and commissions, and interest on deposits. Any deficiency in receipts from these sources is raised by the annual State tax. The taxes during 1870 were paid with more than usual promptness; and although the item of interest, already, as has been seen, a very large one, must increase so long as the debt will be increased by work upon the Hoosac Tunnel, there is still no doubt—in view of the constitutional and legal provisions for raising all necessary revenue from State taxation—of either the good will or the ability of Massachusetts to pay the interest on her debt, and the principal thereof as fast as it matures.

The total of the receipts of the State Treasury during the year 1870 were $15,628,446 51. The disbursements on account of the ordinary expenses of the Government were $5,659,406 72, which includes the sum of $1,659,380 21 for interest on the public debt and the premium on gold. In aid of railroad enterprises, and for interest due on scrip of Norwich and Worcester Railroad (part of which is to be repaid in gold by the N. & W. R. Co.), there were paid $800,000 52. Of the State funded debt $249,000 10 were paid; and temporary loans to the amount of $2,641,245 25 were repaid. The total payments on account of ordinary revenue and temporary loans were $9,349,652 49, and on account of several sinking and trust funds $5,726,682 18

Digitized by Google

were paid. The cash on hand on the last day of 1870 on account of all the funds was $514,062 69, and the amount of cash available to meet the ordinary demands on the Treasury was $38,049 15; and with this surplus sum the books of the Treasurer balanced for the year.

Concerning the power to create debt, the State Constitution provides that the Legislature shall authorize the negotiations of loans whenever, in the opinion of the people, the necessity or the welfare of the Commonwealth demand such action.

The debt of the Commonwealth in the following statement includes not only the civil and war debt, but also the entire amount of scrip issued on account of the construction of the Troy and Greenfield Railroad and the Hoosac Tunnel, and in aid of all other railroad enterprises now outstanding, and the unfunded debt and temporary loan. There is no other indebtedness of the State except the amount of unpaid warrants in the Treasury, for the payment of which there is about a corresponding amount of uncollected taxes. The total amount of the debt thus stated was, on December 31, 1869, $30,823,380 02. The total on December 31, 1870, was $28,270,881 93; thus showing, during 1870, a reduction of the debt amounting to $2,552,498 09. The funded debt, on the last of December, 1869, was $29,397,260. On the last day of 1870 it was $27,128,164; having been reduced during the year by $2,269,096. During last year State scrip was issued to the South Boston Harbor Land Improvement Loan, to the amount of $230,000, and to the Boston, Hartford and Erie R. R. Co., as a loan, in the sum of $206,184. The unfunded debt and temporary loan, on the last day of 1869, was $1,426,120 02, and on December 31, 1870, it was $1,142,717 93, showing a reduction during the year of $283,402 09. During 1871 the funded debt will be further reduced by the payment of the balance of the loan to the Western R. R. Co., on April 1 next, amounting to $716,816; the balance of the loan to the Eastern R. R. Co., on July 1 next, amounting to $50,000; and of the first instalment of the Union Fund (war) loan on the same day, of $200,000, the aggregate payments of which will be $1,011,816. There are no existing provisions of law for increasing the funded debt except for defraying the expense of completing the Hoosac Tunnel, and to reimburse the treasury for moneys advanced in the prosecution of that work.

VALUE OF SINKING FUNDS.

A Committee of the Executive Council, appointed under a law of 1862 "to examine into the value of the notes and securities in charge of the Treasurer of the Commonwealth," submitted the following report Nov. 15, 1870:

"The number of funds is sixteen; one less than last year; one having been added, and two having been abolished during the year. Those abolished were the "School Fund for Indians," and the "Essex Bridge Fund;" the former having been distributed to certain towns in the counties of Barnstable, Dukes County and Plymouth, under the provisions of chapter 350 of the Acts of the year 1870; and the latter to the city of Salem and the town of Beverly, in the county of Essex, under the provisions of chapter 27 of the Resolves of the year 1869. The fund added during the year is the "Boston, Hartford and Erie Railroad Sinking Fund," created by chapter 284, section 3, of the Acts of the year 1867, and chapter 450, section 4, of the year 1869.

The amount of the funds now in the Treasurer's hands is $13,624,077 05, as shown by the tabular statement in this Report, being $424,394 78 more than one year ago.

Each fund is represented on the books of the Treasurer by the securities in which its money was invested, charged at what was paid for them. A great part of these securities are now worth more than they cost, and, computed at their currency value on the 23d day of August last, the day the examination was made, exceed, in the aggregate, the amounts invested by $1,371,343 86.

TABULAR STATEMENT OF THE CONDITION OF THE FUNDS, AUGUST 23, 1870.

Name of Funds.	1870.	1869.	Currency value, Aug. 23, '70.	More than original inv'stm't.	Less than original inv'stm't.

Total.....	$13,624,077	$13,199,683	$14,995,420	$1,382,858	$11,515

By the 82nd Chapter of the Acts of 1862, still the law of the State, the principal and interest of the public debt, with the exception of the war loan, which is a 6 per cent. 5-20 currency loan, and the temporary loan, amounting to $1,142,717 93 in all, of which $356,989 77 are in gold, are required to be paid in coin.

The following statement exhibits in detail the several issues of bonded debt:

DETAILED STATEMENT OF THE DEBT OF MASSACHUSETTS, FEBRUARY, 1871.

Description.	Date of Bonds.	Denomination or par value.	Amount now outstand'g	Interest. Rate p.ct.	When Payable.	Where payable and by whom.	Principal, when due. Year.	Month.

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS

The following are the changes in the Redeeming Agents of National Banks since the 16th of February, 1871. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency.

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
New Jersey—Hightstown.....	The Central Nat'l Bank.....	The Importers' and Traders' National Bank of New York, approved.
Iowa—Washington....	The Washington National Bank...	The Ninth National Bank of New York, approved.
Michigan—Lowell.....	The Lowell Nat'l Bank.....	The American National Bank of Detroit, approved in addition to the Ninth National Bank of New York.
North Carolina—Raleigh.....	The Citizens' National Bank.....	The Farmers' and Merchants' Nat'l Bank of Baltimore, approved in addition to the First National Bank of Washington, D. C.

New National Banks.

List of National Banks organized since the 16th February, 1871:

Official No.

1,791—The Farmers' National Bank of Bushnell, Ill. Authorized capital, $50,000; paid in capital, $50,000. Charles Wilson, President; John B. Cummings, Cashier. Authorized to commence business Feb. 18 1871.

1,792—The Union National Bank of Aurora, Ill. Authorized capital, $125,000; paid in capital, $125,000. John R. Coulter, President; Henry C. Paddock, Cashier. Authorized to commence business Feb. 18, 1871.

1,793—The First National Bank of Kankakee, Ill. Authorized capital, $50,000; paid in capital, $50,000. Emory Cobb, President; H. O. Clarke, Cashier.

1,794—The First National Bank of Saint Peter, Minnesota. Authorized capital, $50,000; paid in capital, $50,000. William Schimmel, President; Frederic A. Donahower, Cashier. Authorized to commence business Feb. 23, 1871.

1,795.—The First National Bank of Charleston, West Virginia. Authorized capital, $78,000; paid in capital, $78,000. Isaac N. Smith, President; John Claypool, Cashier. Authorized to commence business Feb. 23, 1871.

1,796.—Union National Bank of New Orleans, La. Authorized capital, $600,000; paid in capital, $600,000. C. Kohn, President; George A. Freret, Cashier. Authorized to commence business Feb. 23, 1871.

1,797.—The Central National Bank of Baltimore, Md. Authorized capital, $200,000; paid in capital, $200,000. James O'Connor, President; Henry Clay Carter, Cashier. Authorized to commence business Feb. 23, 1871.

☞ The dispatches from Washington to-day (Friday, Feb. 24) in regard to the reports of the Judiciary Committee and Pacific Railroad Committee of the Senate, upon the Pacific Railroads, will be found in the "Bankers' Gazette" on a following page, as they were received too late for insertion in the department of Railroad news.

[From our own correspondent.]

LONDON, Saturday, February 11.

With the exceptions of the re-opening of the Parliamentary session very little of interest has transpired during the present week. The Royal speech, however, contains several clauses of great importance, and it is quite evident that in the course of a few days a new army bill, to meet the requirements of the times, will be submitted to the consideration of Parliament. On matters of home and foreign interest questions of great and serious importance have arisen of late, and the present session of Parliament will have to discuss therefore important and intricate topics. The ministry appear to be somewhat sanguine that the armistice agreed to by the belligerent powers, and which has just been prolonged for a week, is but preliminary to the settlement of the terms for peace, and it is hoped that a secure peace will be arranged. Of this, however, there are many doubts, for Prussia or Germany seems to be bent on occupying Metz, which cannot but agitate France, and which will agitate her still more when she shall have recovered somewhat from the effects of the war. On the question of our defenses the country is undoubtedly in earnest, and it is hoped that the advisers of the Crown are like minded. A new army bill, equal to the changed aspect of the times, even if entailing additional taxation, will be supported by all parties, and the leader of the conservatives will offer no opposition if he considers the measure complete.

Respecting American affairs the speech is by no means silent. The fisheries dispute has engaged the attention of the Ministers, and another attempt is to be made to settle the Alabama claims. The clause in the speech relating to these matters is as follows:

At different times several questions of importance have arisen which are not yet adjusted, and which materially affect the relations between the United States and the territories and people of British North America. One of them in particular, which concerns the fisheries, calls for early settlement, lest the possible indiscretion of individuals should impair the neighborly understanding which it is on all grounds so desirable to cherish and maintain. I have therefore engaged in amicable communications with the President of the United States. In order to determine the most convenient mode of treatment for these matters, I have suggested the appointment of a joint commission, and I have agreed to a proposal of the President that this commission shall be authorized at the same time and in the same manner to resume the consideration of the American claims growing out of the circumstances of the late war. This arrangement will, by common consent, include all claims for compensation which have been or may be made by each Government, or by its citizens upon the other.

This paragraph has revived the hopes of the Confederate bondholders, and yesterday and to-day Confederate bonds have been more inquired for at £8 per £100 bond.

The belief in an immediate rise in rates of discount has partially subsided. At the same time, however, it is unquestioned that as soon as a peace is arranged, large sums of money will be required, and our own market will be perceptibly affected. But an advancing or improving money market and a dear one are two very different matters. The official *minimum* in London is now only 2½ per cent., and the quotations at the principal financial centres on the Continent are only 3½, 4, and 5 per cent., the highest rate being at Paris, where it is nominally 6 per cent. Such quotations as these, with trade quiet and with the absence of any drain upon us for gold or silver to remit either to the United States or India and China to pay for breadstuffs, cotton, or other products, will admit of considerable pressure being put upon us before money can become dear. The effect of peace will undoubtedly be to cause the price of money to assimulate itself to that current at Paris, Berlin, Brussels, Hamburg, and Amsterdam, but with the close alliance which now exists between these markets there cannot in times of confidence and peace be much difference between cash. That money will not be withdrawn so rapidly as has been supposed may be ascertained from the fact that even the slight improvement which has taken place since the capitulation of Paris has already influenced the exchanges and checked the export demand for gold. And it may be asserted that so long as trade remains quiet, money will not become actually dear. France itself is not so impoverished by an eight months' war as to be unable to raise funds in her own country, and as capital cannot serve two purposes at the same time, capital which would, had no war taken place, be fructifying in other departments will be devoted to the repair of the material disasters of the campaign. The following are the quotations:

	1870. Per cent.	1871. Per cent.		1870. Per cent.	1871. Per cent.
Bank minimum....	3 @...	2½@ ..	4 months' ba'k bills	3⅛@3½	2¾@3
Open-market rates:			6 months' ba'k bills	3⅛@3¾	3⅛@3¾
30 and 60 days' bills	2⅝@...	2⅝@...	4 and 6 trade bills..	3½@4	3½@4
3 months bills.....	2⅝@3	2¼@...			

The rates of interest allowed by the joint stock banks and discount houses for deposits are subjoined:

	1870.	1871.
Joint stock banks	2	1½
Discount houses at call	2	1½
Discount houses with 7 days' notice	2½	1¾
Discount houses with 14 days' notice	2½	2

At Hamburg the rate for money is rather lower, but at other continental cities there are no material variations. The following are the quotations:

	B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.		B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.

Quicksilver, £11 to £12 per bottle; discount 3 per cent.

In the stock markets business has been extremely quiet, and Turkish securities have been greatly depressed, owing to the difficulties recently experienced in the payment of the dividends. The fluctuations in consols have been trifling, but British railway shares have continued in demand. United States 5-20s are firm. American railway securities have been dull. The following have been the highest and lowest prices of consols and the principal American securities on each day of the week:

	Monday.	Tuesday.	Wed'sy.	Thu'sy	Friday.	Sat'day.
Consols.....	91⅞-92⅛	91⅞-92⅛	91⅞-92⅛	91⅞-92	91⅞-92	92 -92⅛

In the cotton trade, owing to abundant supplies actual and prospective, there has been continued dullness, and prices have further receded. The following relates to the trade of Manchester:—

Digitized by Google

The same quiet feeling which has prevailed in this market during the last twelve days still continues. Prices, however, have really undergone little change during the week. Compared with the quotations of this day last week, the prices asked to-day for most descriptions of the lower makes of cloth and yarn are a little lower, and both spinners and manufacturers are more willing sellers. People are now more sanguine that peace will be established, and this feeling has to some extent a good effect upon the market. Nevertheless, prices are not much influenced in consequence, as the large supplies of cotton coming forward have a counteracting effect. The week having passed without any alteration in the rate of interest by the Bank Directors has given some confidence, and merchants have continued to make inquiries and offers for goods suitable for Eastern markets, probably by way of anticipating any advance in the rate of interest which may accrue from the establishment of peace. The buyers for the continent continue to do very little, and the exports for January show a great diminution on those of previous years. The regular course of trade with the continent has been much interfered with by the severe weather since the beginning of the year, and also by the derangement of traffic caused by the war. On the other hand, the production of yarn and cloth both in France and Germany has been lessened, so that this country has derived some benefit from that cause. Spinners here are encouraged to sell freely for future delivery, as the aspects of the cotton market are at present all in their favor. A sudden falling off in the receipts of American cotton might make a change in public opinion with regard to prices, but at present the continued large receipts of cotton at the ports and the large amount at sea induce consumers to think that prices must be rather easier for some time.

Mr. Rivett Carnac has issued an elaborate report, dated Allahabad, December 24, on the area under cotton cultivation during the present season in the districts of the Central Provinces of India and the Berars. He states that assuming the cultivation in the districts for which returns have not yet been received has not undergone any material change, the returns show a decrease of 55,091 acres in the Central Provinces, and an increase of 73,641 acres in the Berars, or a total increase during the season of 18,550 acres, or rather less than one per cent. in the area sown with cotton in the two provinces. The cultivation has fallen off in the Nagpore division (the Wurdah valley) of the Central Provinces, where the best cotton is grown. The decrease in the Nagpore district is but small; the figures for the present season being as much above those for the year 1868–69 as they are below those of last season. In the returns of the Wurdah district a decrease of upwards of 40,000 acres will be noticed; but here, again, the figures of the present season are above those of 1868–69. The cause of the decrease is thus referred to by the Commissioner of the Nagpore division. Mr. Bernard writes:—"The breadth sown is less than last year. The three causes for this decrease are the low and uncertain price of cotton at sowing time, the heavy July rains, which spoilt a large breadth of Autumn sowings, and lastly, the high prices of food grains." In the other divisions of the Central Provinces no great change is the be noticed. The cotton cultivation there, is indeed, very inconsiderable compared with the acreage under cotton in the Nagpore division and in the East and West Berars. For the Berars, the figures of only three districts—Akola, Oomrawuttee, and Ellichpore—have been received.

But they are the three most important cotton-growing districts, and with the increase noticeable in this part of the Poonah valley it may, I think, be fairly assumed that the cultivation throughout the Berars has held its own this season. You will then see that, according to the estimates formed by the deputy commissioner and the officers best qualified to form an opinion on the subject, the area under cotton cultivation in the Central Provinces and the Berars, which tract supplies about one quarter of the cotton annually exported from Bombay, has certainly not decreased during this season, which, in consequence of the great fall of prices, must be considered a discouraging one for the cultivators. As regards the effect of the season on the crop, the same authorities report that in the chief cotton-supplying district the yield, if no unforeseen calamity occurs, is likely to be an excellent one, and that the late rains which caused so much alarm affected but a small portion of the early crop. I am inclined to believe that the effect of the rain was not very serious, and that, as but a small portion of the crop was ripe at the time, the damage will be found to be confined to the early pickings, and that, unless the rain returns, the quality of the cotton will improve as the season advances. And we may hope that, under present conditions, the exports from our provinces will not fall short of a quarter of a million bales. But it must be remembered that if prices are very low, it generally happens that the local manufactures revive, and that a large quantity of cotton is bought up for local consumption which affects the quantity available for export.

The following figures show the imports and exports of cotton into and from the United Kingdom, from September 1 to February 9, compared with the corresponding period last year:

	1870–1.		1869–70.	
	Imports.	Exports.	Imports.	Exports.
American...bales	833,219	98,368	482,881	52,989
Brazilian	174,759	18,621	224,945	31,943
East Indian	576,273	238,893	758,003	289,080
Egyptian	139,914	2,954	98,363	2,195
Miscellaneous	152,211	3,924	55,978	6,853
Total	1,876,376	362,785	1,620,170	382,990

The public sales of colonial wool have been progressing with more briskness, and scoured cape wools, which are in demand for export to Germany have advanced 1½d. per lb., as compared with November last. Other kinds of wool show an improvement of ½d. to 1d. per lb.

As regards breadstuffs, the chief feature is in the flour department. In the early part of the week flour was in great demand for immediate shipment to France, but the inquiry has now subsided. The following statement shows the imports and exports of cereal produce into and from the United Kingdom during last week, and since the commencement of the season, compared with the corresponding periods in 1869–'70:

FOR THE WEEK ENDING FEB. 4.

	1870'71.		1869'70.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show a large decrease in dry goods, but there is an increase in general merchandise. The total imports amount to $7,005,147 this week against $7,622,798 last week, and $4,651,876 the previous week. The exports are ——— this week, against $4,281,530 last week and $4,651,876 the previous week. The exports of cotton

Digitized by Google

week were 14,571 bales, against 17,475 bales last week. The following are the imports at New York for week ending (for dry goods) Feb. 17, and for the week ending (for general merchandise) Feb. 18:

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
Dry goods	$2,660,243	$2,057,682	$2,387,438	$2,663,591
General merchandise	3,075,243	1,887,065	2,146,761	4,341,556
Total for the week	$5,735,486	$3,944,747	$4,534,199	$7,005,147
Previously reported	22,590,437	22,212,362	26,670,820	33,211,704
Since Jan. 1	$28,325,923	$29,157,109	$31,205,019	$40,216,851

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports, for the week ending February 18:

EXPORTS FROM NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
For the week	$2,968,819	$3,261,173	$3,208,786	.. ....

—Enterprising Marine Insurance companies from distant parts of our own land have, within a few years, established agencies here, and lately one has come from Europe. At the present time, therefore, there is considerably more insurance capital in the marine business in this city than heretofore, and as a result, a greater competition. A comparatively new feature in marine insurance in this country is the brokerage system. An active and enterprising body of men now make it their business to solicit insurances to place with the different organizations. As long as there were a limited number of companies, and while a uniform tariff of rates was strictly adhered to, such a system could only exist on sufferance. Now, however, that the amount of capital is so largely increased, and companies and associations of undoubted security are in the field, it is not simply a question of assets that must guide insurers in their selection, but economy of outlay, and the certainty of liberality and fair dealing in the payment of claims. Messrs. Wreaks & Walsh, 60 Wall street, are the marine agents of the Merchants' Mutual Insurance Company of California and of the California Insurance Company, whose advertisements will be found on another page. By a provision of the constitution of the State of California all stockholders in joint stock companies are personally liable, each one in the proportion that the number of shares that he owns bears to the whole number issued, for all indebtedness that may be incurred over and above the capital and assets of such corporations. The California Insurance Companies are therefore comparatively much stronger than those of equal assets organized in other States. Their stockholders become to a certain extent individual underwriters, each one responsible for a definite proportion of every risk taken, &c., &c.

— Messrs. Drexel, Winthrop & Co., bankers, 18 Wall street, offer for sale the 7 per cent. first mortgage gold bonds of the Houston and Texas Central Railway Company. These bonds are secured by first mortgage on the road, of which 220 miles are already in operation, and also by a land grant of 6,400 acres per mile. The receipts of the company in 1870 were $1,538,420 in gold, upon a mileage of 166 miles, and in January, 1871, the earnings were 213,000. The price is 90 and accrued interest.

— Mr. William C. Gilman, dealer in insurance scrip and stocks, 46 Pine street, has issued in neat pamphlet form, the annual statements of the Marine Insurance Companies of New York, compiled from official sources, and to parties interested in the subject this pamphlet will be found of much value and interest.

BANKING AND FINANCIAL.

—BANKING HOUSE OF HENRY CLEWS & CO., 32 WALL ST., N.Y.—Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed upon all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make telegraphic transfees of money to any distant point, and transact every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upwards on

The Imperial Bank,
Messrs. Clews, Habicht & Co., } London.
The Provincial Bank of Ireland, Dublin and branches.
The National Bank of Scotland, Edinburgh and branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Governments and other investment securities; also Gold and Exchange.

Advances made to our dealers at all times on approved collaterals at market rates of interest.

Collections made in any part of the world.

HARVEY FISK. A. S. HATCH.

FISK & HATCH,
Bankers and Dealers in Government Securities,
No. 5 Nassau street,
New York, Feb. 20, 1871.

The Six Per Cent. Gold Bonds, of the Central Pacific Railroad Company have an established character which renders them especially desirable for investments.

They are based on one of the most important and valuable railroad lines in the world, fully completed, amply equipped, and already earning large revenues, which must increase enormously with the growth of the country it traverses and the development of trade with Japan, China and Australia, a large portion of which must find its way across the American continent.

Holders of Five-twenty Bonds (which are liable to be funded at a lower rate of interest within a short time) may exchange them for Central Pacific Bonds, bearing the same rate of interest, and save from 15 to 18 per cent. for reinvestment, while their security remains as reliable as before.

They are dealt in at the New York Stock Exchange, and at several of the more important Bourses of Europe. We have introduced them into our regular business upon the same basis as Government Bonds, and buy and sell them as freely at current market rates, and are prepared to furnish them to investors or others at daily quotations.

We buy and sell Government Bonds, Gold and Coupons, execute orders in miscellaneous Securities at the New York Stock Exchange, make collections, receive deposits subject to check at sight, allow interest on balances, and do a general Banking business.

FISK & HATCH.

The Bankers' Gazette.

FRIDAY EVENING, February 24, 1871.

The Money Market.—The large accumulation of loanable funds in this market has shown no diminution during the past week, but on the contrary, the effect of this extreme ease in the rates for money, continued now for several weeks, is becoming more and more perceptible in all the financial markets. Three to four per cent. has been the ruling rate for call loans, though the latter rate has hardly been obtainable from borrowers on government collateral. In a few exceptional instances we have heard of balances being loaned for a day as low as 2 per cent.

There is no anticipation of any material change in the market for some weeks to come, and, as we have previously noticed, the banks have shown a disposition to enter into time engagements extending over several weeks at 5 per cent, a rate unusually low on such contracts. The last bank statement, although showing a decrease of $904,314 in the excess of legal reserve, could hardly be considered very unfavorable to continued ease in money, as the result was produced by an increase in deposits of $2,229,458, and a decrease in specie of $953,377, while there was an increase in legal tenders of $593,347; loans were increased $3,641,175, and circulation decreased $52,323, the whole excess of reserve over the 25 per cent. required by law was $19,066,933.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	Feb. 18, 1871.	Feb. 19, 1870.	Feb. 20, 1869.
Loans and discounts	$274,912,520	$267,317,368	$263,428,068
Specie	24,767,397	37,264,587	23,351,291
Circulation	31,737,841	35,691,371	34,247,321
Net deposits	216,290,333	212,188,882	187,612,546
Legal Tenders	56,366,639	55,134,060	50,99.,197

The demand for commercial paper has been stimulated by the extreme ease in money and the difficulty of obtaining remunerative rates on call, and under these influences paper has been

United States Bonds.—The market closes to-day at an advance of ¼@¾ on the prices of Friday last February 17th, 5-20's of 1867 being quoted now at 110¼@110¾. The improved business in governments has been caused chiefly by the purchases of banks and other lenders of money who have sought this investment for funds in hand, which could not be loaned on call except at very low rates of interest. There has apparently been no speculative movement, nor any attempt to force prices upward, and the strong tone noticed is chiefly due, as mentioned above, to the super-abundance of loanable funds now seeking employment.

There is unquestionably, too, a growing confidence in the continued firmness of these securities from the better prospects of peace abroad, and the consequently improved chances that the new five per cent. bonds may be successfully negotiated. A further influence in the same direction, which cannot fail to have a certain continuing effect upon the market, is the known desire of Secretary Boutwell to place his new loan, and the supposition that he will favor, so far as he consistently may, every measure tending to bring up the prices of bonds to a point where the object may be accomplished.

Official notice has been given that the interest due March 1st on the 10-40's, amounting to $4,864,182, will pe paid immediately without debate. At the Treasury purchase of $2,000,000 on Tuesday, the offerings were only $3,718,100, an amount so limited as to give material strength to prices subsequently.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, Feb. 18.	Monday, Feb. 20.	Tuesday, Feb. 21.	Wednesd'y Feb. 22.	Thursday, Feb. 23.	Friday, Feb. 24.

State and Railroad Bonds.—State bonds have been tolerable active during the week, without any wide fluctuations in prices, the most noticeable change being a decline of about 2 per cent. on new South Carolinas. Despatches from Alabama continue to report the prospect of interest payment on the Alabama and Chattanooga Railroad bonds as very good, though it would appear that the Legislature can hardly appreciate injury done to the credit of the State each day that definite action is further postponed.

Among railroad bonds, the Pacifics have as usual been the most active. Despatches from Washington to-day give the reports of the Judiciary Committee and Pacific Railroad Committee of the Senate, both favorable to the roads.

The telegram in the New York *Express* this evening is as follows:

"Two questions were considered by the Judiciary Committee:—First, has the Government the right to retain the whole compensation for services performed by the railroads, and apply the same to the payment of the bonds and interest, under existing laws, in conformity with the opinion of the Attorney-General? And second, if not, is the interest upon the said bonds due from the companies, and are they bound, under existing laws to pay it semi-annually, as maintained by the Attorney-General? On both of these questions the opinion of the Committee is adverse to that of the Attorney-General, and maintains the position taken by the companies, that the United States are bound to pay for one-half the services in money, and can only apply the other half on the bonds, and that the companies are only bound to the performance of the Government service where required, and, beyond the performance of such service, are not bound to pay the interest until the maturity of the bonds. It is understood that all of the committee concur in the report except Mr. Edmunds. The report from Senator Stewart is from the Committee on the Pacific Railroads. It recommends no legislation, but expresses the opinion the Government will send freight over said road as far as practicable to do so".

The effect of these reports was, of course, favorable to the price of the securities, and Central Pacifics closed at 95@95¼, and Union Pacific's First Mortgages, 83⅛@83¼; Land Grants, 72@72½; Incomes, 73@73½.

We understand that the Central Pacific bonds were yesterday admitted to the regular call on the London Stock Exchange, and as they are also quoted at the Exchanges of Amsterdam, Frankfort and New York, we believe that no other railroad bond has so general a currency in the leading financial markets of the world.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

	Saturday, Feb. 18.	Monday, Feb. 20.	Tuesday, Feb. 21.	Wednesd'y, Feb. 22.	Thursday, Feb. 23.	Friday, Feb. 24.

Railroad and Miscellaneous Stocks.—There has been more activity in the Stock Market, with considerable buoyancy in prices. The remarkably low rates for money which have prevailed for several weeks are beginning to have some effect in stimulating speculation, and in several of the leading favorites there have been large transactions with important fluctuations in prices. Western Union Telegraph and Pacific Mail have been the most active—the former under the manipulation of a "pool," said to be the Vanderbilt party, who called in on Thursday a large amount of stock previously loaned to parties who had sold "short," and thus advanced the price about 2 per cent. It is stated that the capital stock has been reduced $4,000,000 by the operation of a sinking fund. Pacific Mail has been advanced on rumors of an increased subsidy from Congress and favorable contracts with the Pacific Railroad. Quicksilver has been strong on the election of a new board of directors.

To-day there was continued activity in the market, with a more general advance, Western Union reaching 50⅜, Pacific Mail 45¼, New York Central 95½, Lake Shore 96¼, Wabash 54½, Rock Island 108, and United States Express 48.

Except for the lack of outside support an active speculative movement in stocks might now be expected, but as it is, the operations have thus far been limited chiefly to cliques, and has been essentially a brokers market.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week

The earnings of the Union Pacific Railroad for January compare as follows:

	1871.	1870.
Gross earnings	$479,572 76	$528,529 22
Expenses	281,061 63	473,950 38
Net earnings	$198,511 13	$54,578 84

The nine months, May 1 to Jan. 31, of the two fiscal years, compare as follows:

	1870-71.	1869-70.
Gross earnings	$5,859,546 49	$6,644,241 73
Expenses	3,116,796 62	4,430,003 67
Net earnings	$2,742,749 87	$2,214,238 07

The Gold Market.—The market has generally been firm but dull. The firmness of foreign exchange tends to support gold, and also the prospect of specie shipments commencing this season at an earlier period than usual; the export of last week was $1,170,554, but the exports of the present week will probably be much less than that amount; we are unable to learn of any important gold shipments for to morrow, and of silver about $200,000 in bars. The rates for carrying have ranged from 4 per cent. to flat, and to-day 3, 2½, 3¼ and 2 per cent. Receipts for customs this week have been $3,627,000, and payments at the Sub-Treasury to-day for March interest on the 10-40s were about $1,200,000, or one-quarter of the whole. At the Treasury sale of $1,000,000 on Thursday the bids amounted to $4,805,000.

The following table will show the course of the gold premium each day of the week past:

	Quotations. Opening.	Lowest.	Highest.	Closing.	Total Clearings.	Balances. Gold.	Currency.

Foreign Exchange.—The leading drawers have remained firm throughout the week, with scarcely a fractional variation. There is no extraordinary demand to support rates, but the same scarcity of exchange which has been noticed for a number of weeks past. At the present moment there seems to be no prospect of a decline in the market, though the complete settlement of European affairs might stimulate an export trade beyond the general expectations. At this time in 1870 prime bankers' sterling was quoted at 108¾@108¾, and in 1869 at the same. The cotton exports from all United States ports this week amount to 125,248 bales, producing $8,045,000 in gold, against 61,444 bales in same week of 1870, producing then $5,750,855 in gold, with gold at 118 and Middling Uplands at 24c.

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3. The Table of Railroad, Canal and Other Stocks, on the next page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column *x=extra; s=stock or scrip.*

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q.—J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of United States and State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name.

The Financial Reports of Railroad and other Companies are published in the CHRONICLE as soon as issued, and indexed in the table of stocks on the next page, as stated above in Note 8. A complete record of these reports is thus obtained in a file of this paper.

Erie Railway—Last Statement.—FREIGHT AND PASSENGER BUSINESS OF 1870.—The following is the published statement to the Legislature relative to the freight and passenger business of the Erie Railway Company for the year 1870:

JAMES FISK, JR.,
J. D. WHITE.

Sworn to before me this 8th day of February, 1871.

MORTIMER SMITH,
Notary Public, New York.

Lake Shore and Michigan Southern Railway.—The following are the principal statistics of this railway, as returned by the Company to the State Engineer and Surveyor, for the year ending September 30, 1870:

Capital stock by charter	$50,000,000
Capital stock paid in	34,938,000
Funded debt, 7 per cent	22,001,000
Floating debt	1,573,314
Total stock, bonds and debt, existing Sept. 30, 1870	58,512,314
Cost of road, branches and equipment	52,804,745
Length of road and laterels, miles	942.25
Length of double track, sidings, &c., miles	95.45
Length of branches owned, miles	118.88
Length of main line (Buffalo to Chicago), miles	539.97
Weight of iron on main tracks, lbs. per yard	60
Engine houses and shops	30
Locomotive Engines	276
Passenger cars, 1st class (8-wheel)	134
Passenger cars, 2d class (8-wheel)	40
Baggage, mail and express cars (8-wheel)	57
Freight cars (8-wheel)	5,942
Miles run by passenger trains	2,232,132
Miles run by freight trains	4,362,758
Miles run by other trains	977,611
Miles run by passenger, freight, &c. trains (all)	7,572,501
Passengers carried (all classes)	2,424,896
Passengers carried one mile	197,755,480
Freight (tons of 2,000 lbs) carried	2 843,084
Freight (tons of 2,000 lbs) carried one mile	521,149,505
Expenses—Maintenance of way	$2,945,131
" —Repairs of machinery, &c	1,157,386
" —Operating and general	4,186,466
" —On all the above accounts	8,288,934
Earnings—from passengers	$4,225,298
" —from freights	8,306,254
" from other sources	639,682
" From all the above sources	13,171,234
Net earnings from operations	4,882,299
Interest paid on funded debt	$1,708,770
Dividend paid on common stock and on guaranteed 10 per cent	2,905,571
Carried to surplus fund	267,958
Total amount of surplus fund	1,230,716

Marietta and Cincinnati.—At the annual meeting in Cincinnati on Wednesday President King read a report showing a favorable state of affairs. Among other things he said: The stockholders of the Ohio and Mississippi Company, at the annual meeting in October, authorized the Board of Directors to change the guage of the road four feet nine inches, which will conform to the Marietta and Cincinnati track. It is believed that the consummation of this plan, by which cars can be transported between St. Louis and Louisville and the seaboard via Parkersburg without change will result in a very great increase of through business. The distance from Cincinnati to Baltimore is 589 miles, or 240 miles less than the average distance from Cincinnati to New York, by the New York Central, Erie and Pennsylvania roads. From St. Louis to Baltimore, via Cincinnati and Parkersburg, the distance is 329 miles, or 210 miles less than the average distance to St. Louis by the same roads to New York. The improper location of the road between Warren and Belpre has, since the opening of the road, always been a source of great expense in maintenance and loss in revenue to the Company. With the view of remedying this grave error in location, the Baltimore Short Line Railway Company has, during the past year, been incorporated under the laws of Ohio, and proposes, with the assistance of the Marietta and Cincinnati Railroad Company, to construct a road in as direct a line as practicable from Warren to Belpre.

The South Pacific Railway—Act Passed Yesterday—Route and Land Grants to the Road.—WASHINGTON, Feb. 21.—The Senate bill was passed by the House to-day, with amendments. The Corporation is authorized to lay out, locate, construct, furnish, maintain and enjoy a continuous railroad and telegraph line, with the appurtenances from a point on the eastern boundary of the State of Texas, at or near Marshall, to Ship Channel in the Bay of San Diego, in the State of California, pursuing in the location thereof, as near as may be, the route known as the thirty-second parallel of north latitude, and is vested with all the powers privileges and immunities necessary to carry into effect the purposes of this act. The capital stock of the Company shall be fixed at a sum not exceeding $50,000,000, and when the amount is fixed it shall never be increased, except by consent of Congress. The Company has power and authority to purchase the stock, land grants, &c., and consolidate with any railroad company or companies heretofore chartered on the route prescribed in this act; but no such consolidation shall be with any competing through line of railroads to the Pacific Ocean. The right of way through the public lands is granted to the extent of 200 feet in width on each side of the railroad, wherever it may go over public lands, and grounds are also granted for stations, buildings, workshops, wharves, switches, side-tracks, turn-tables, water stations and such other structures as may be necessary, not exceeding forty acres at any one point. There is also granted every alternate section of public land, not mineral, designated by odd numbers, to the amount of twenty alternate sections per mile, on each side of the railway through the Territories of the United States and ten alternate sections of land per mile on each side of the railway in California, where the same shall not have been sold, reserved, or otherwise disposed of by the United States, and to which a pre-emption or homestead claim may not have attached at the time that said road is definitely fixed. In such cases, other lands are to be furnished.

All lands granted which shall not be sold or otherwise disposed of within three years after completion of the entire road, shall be subject to settlement and preemption like other lands, at the price to be fixed and paid to the Company, not exceeding an average of $2.50 per acre.

The Company shall have power and authority to issue two kinds of bonds, secured by mortgage, namely: First, Construc-

Digitized by Google

tion Bonds. Second, Land Bonds. Construction Bonds shall be secured by mortgage: First, on all or any portion of the franchises, road-bed or track of said railway, and all the appurtenances thereto belonging; land bonds shall be secured by mortgage first on all or any portion of the lands hereby granted. Whenever the Company shall complete the first and each succeeding section of twenty consecutive miles of railway, and put it in running order as a first-class road, it shall be the duty of the Secretary of the Interior to cause patents to be issued conveying to the Company the number of sections of land opposite to and coterminus with said completed road to which it shall be entitled for each section so complete.

The road shall be constructed of iron or steel rails manufactured from American ore, except such as may have been purchased or already contracted for. The construction of the railway shall commence silultaneously at San Diego and a point at or near Marshall, Texas, to be completed within ten years. The road shall be subject to the use of the United States for postal, military, and all other governmental service at fair and reasonable rates of compensation, not to exceed the price paid by private parties for the same kind of service; and the Government shall at all times have a preference in the use of the same for the purpose aforesaid. It shall not be lawful for any of the directors, either in their individual capacity, or as members of an incorporated or joint stock company, to make contract for the construction, equipment or running of its road, or to have any interest therein; and all such contracts or agreements are hereby declared null and void; and all money or property received under such contracts or agreements may be recovered back for the benefit of the Company by any stockholder.

Pennsylvania Railroad.—PHILADELPHIA, Penn., Feb. 21.—The annual meeting of the Pennsylvania Railroad Company was held in this city to-day. The revenue for the year amounted to $17,531, 706, being an increase over last year of $280,895. The net earnings for the year amounted to $2,531,706. In reply to inquiries, Vice-President Scott said: "There are pending negotiations for a lease of the Camden and Amboy Railroad, which we think will be highly beneficial to this Company. The Pennsylvania Railroad has no interest in the Union Pacific Railroad. The extensions of the Pennsylvania Railroad now are limited to Chicago, St. Louis, Louisville, Cincinnati, and as leading from these centres others forming connections with New Orleans, and other lines to the Pacific coast."

The Bergen Tunnel Difficulty Settled.—The Bergen tunnel difficulty has at length been amicably settled. At a meeting on Saturday last, at which the Delaware, Lackawanna and Western Railroad was represented by Moses Taylor and Samuel Sloan and Job Bruhin, and the Erie by Jay Gould, definite settlement was arrived at on the following basis:

1. The use of Bergen tunnel in common by both companies for ten years, the Erie to receive a rental for use of tunnel of $100,000 per annum, said rent to be paid by the two companies in proportion to their tonnage.

2. The business of Binghamton and Syracuse, to and from New York, to be divided equally between the Erie Company and the Delaware, Lackawanna and Western, the whole to be worked as a common line from New York to Syracuse and Oswego.

Morris and Essex Railroad.—According to the annual report of the Morris and Essex Railroad Company, recently presented to the Legislature, the capital stock is $11,900,950; funded debt, $12,184,000; other indebtedness, $20,205 57; construction account, $23,300,000. The receipts for the year 1870 were $2,858,452 68; expenses, $1,900,931 18; balance, $957,521 50. Two payments of interest of seven per cent. have been made to the stockholders by the lessees.

Central Railroad Company of New Jersey.—The capital stock is $15,000,000; old mortgage bonds, $394,000; mortgage bonds of 1890, $2,837,000; accounts payable, $1,568,043 35; total, $19,799,043 35. The receipts for last year were $4,393,514 12, derived from the following sources: Passengers, $1,118,147 20; merchandise, $1,172,870 63; coal, $1,954,550 56; mail, express, rents, &c., $147,945 73. The quantity of coal carried during the year was 2,754,713 tons.

Camden and Amboy New Loan.—This company lately sold in London £500,000 sterling 6 per cent mortgage bonds, free from all Federal or State taxation. The bonds are of £200 each, and the price of issue 92 per cent, or £184 per bond. The repayment of the bonds is secured by an annual sinking fund of 2 per cent.

The Leavenworth, Lawrence and Galveston Railroad, now running to Thayer, 110 miles south of Lawrence, 135 miles from Kansas City, is soon to be constructed westward 50 or 60 miles to, or nearly to the Arkansas river, intersecting the great Texas cattle trade to Abilene.

Railway Progress in California.—The San Francisco *Bulletin*, quoting our figures of railway progress in the Northwest during 1870, supplies the omission of the Pacific coast (of which we could not obtain the data), with approximately correct figures from memory. During 1870 track was laid on the following roads in about the proportion named: California and Oregon, 40; San Joaquin Valley, 20; Vallejo and Marysville, 42; Southern Pacific, 34; Los Angelos, Wilmington and San Pedro, 18; Petaluma and Santa Rosa, 15; San Rafael and San Quentin, 3½; Copperopolis, 31; total, 171½ miles. On several of the roads named there is a considerable amount of grading done, and all that are incomplete will be pushed more rapidly this year. The showing for 1870 is small, but all the leading roads named are important projects, and with the revival of business will be prosecuted to an early completion, including several connecting roads, such as the Sonoma branch of the Vallejo, and the straight line branch of the Central Pacific, between Sacramento and San Francisco. Oregon built about 100 miles of road during 1870, and Nevada 35. In Washington Territory a beginning is to be made immediately on the Northern Pacific. Grading on the eastern end is already vigorously under way. The *Bulletin* estimates that there will be 500 or 600 miles of road built on the coast during the current year, unless the Supreme Court of California should decide against the constitutionality of local subsidies.—*N. Y. Daily Bulletin.*

Virginia Coupon Bonds.—Holders of Virginia coupon bonds are notified that all such as have memoranda or endorsement upon them are considered as being mutilated by the New York stock board, and they have determined not to pass any of them. Persons having such bonds can, by application to the Treasurer of Virginia, get them renewed in such a manner as will do away with all trouble.—*Richmond Enquirer.*

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, February 24, 1871.

Trade during the past week has been good, notwithstanding the intervention of a close holiday. A reduction in railroad freights has stimulated the demand for foreign goods to go inland, while reduced prices, the result in part of a prospect of fuller supplies, have caused a revival of the export movement in Western products. There is, however, an absence of a speculative confidence, without which the markets may be said to lack spirit, although the report of peace in Europe, current this afternoon, caused some indications of a revival.

Cotton has partially recovered the late decline, Middling Uplands closing at 15⅜. Breadstuffs more active at some decline, closing firm. Flour, $6 60@$6 90 for shipping extras. Wheat, $1 50@$1 54 for new Spring, and Corn, 84@85c. for prime new mixed. Groceries have favored buyers, except for Rice, with a fair degree of activity.

Provisions have been pressed for sale, at a pretty uniform decline in hog products, but Beef, Butter and Cheese have been firm, the latter showing some improvement on a rather unseasonable export demand. Pork declined yesterday to $22 00@$22 25 for mess, and $21 50@$21 75 for prime mess, closing firm with buyers to-day at those figures. Lard is down to 12¾c@13c. for prime Western steam; and Bacon is lower at 11⅛@11⅝c. for long clear and short rib, but to-day all these were firm and active at the higher figures.

Tobacco shows no decided change from last week. In Kentucky Leaf the reduced prices then quoted are still current. Shippers are taking the new crop, but for home consumption the business is almost altogether restricted to the old crop. The sales embrace 200 hhds. new crop for export 6@7c. for lugs, and 7½@9½c. for low and medium leaf, and 300 hhds., mainly old crop, to cutters and the trade at 7¾@10½c. for low to good leaf. In Seed Leaf Tobacco the supply yet available is not large, but is increasing, and sellers are more disposed to meet the views of buyers. The sales are 99 cases new crop Massachusetts, on private terms; 100 cases Ohio, crop of 1869, at 22½c., and 250 cases Pennsylvania, crop of 1870, on private terms. Spanish Tobacco continues to move off freely, and the sales embrace 450 bales Yara at 95@97½c., and 250 do. Havana at 85c.@$1 00. Manufactured Tobacco is in steady request and firm.

East India Goods are without special feature, but firm. Metals are quiet, except Pig Iron, which is firmer, as many of our domestic furnaces are compelled to stop work, owing to the impossibility of procuring coal. Coal has greatly advanced in this market, owing to the fact that supplies are small and are cut off by difficulty between the miners and the railway companies.

Whiskey has declined under large receipts. There has been some further export movement in the poorer qualities of Hops. Hay is drooping. Fruits have slightly improved in nearly all descriptions. Fish fairly active.

Naval Stores show an advance in Spirits Turpentine to 54c., but Rosins are quiet. Oils have been dull and Petroleum has slightly declined. Hides have done rather better of late, but are quiet. Leather and Skins dull. Tallow has sold fairly for export at steady prices.

Wool has been taken freely by dealers, and prices rule very firm. Stocks are not large in any quarter, and some scarcity seems to be apprehended before the clip for 1871 can be made available. Freights have shown some weakness in rates. The late speculation in leading staples, such as Breadstuffs and Provisions, caused some accumulation of room on the berth, but in the last few days with lower prices for merchandise, and a little easier rates of freight, shipments have become more active. The shipments of to-day embraced grain to Liverpool at 7d. by steam and 6d. by sail, and flour to London at at 2s. 4½d.@2s. 6d. by sail.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns shows the exports of leading articles of commerce from the port of New York *since* January 1, 1871, to all the principal foreign countries, and also the *total* export of the same articles for the last week and since January 1.

ARTICLES.	EXPORTS SINCE JANUARY 1 TO																		Total this week.	Total since January 1, 1871.	Total same time 1870.

COTTON.

FRIDAY, P. M., Feb. 24, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening February 24. From the figures thus obtained it appears that the total receipts for the seven days have reached 136,661 bales against 141,957 bales last week, 161,095 bales the previous week, and 154,482 bales three weeks since, making the total receipts since the first of September, 1870, 2,787,780 bales against 2,115,539 bales for the same period of 1869–70, showing an increase since September 1 this year of 372,241 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	62,780	45,469	Florida.....bales.	994	571
Mobile	16,720	5,640	North Carolina	2,269	982
Charleston	7,065	3,891	Virginia	11,302	5,319
Savannah	19,038	6,831			
Texas	9,501	7,408	Total receipts	136,661	82,753
Tennessee, &c	7,992	6,773	Increase this year	53,908	....

The exports for the week ending this evening reach a total of 125,248 bales, of which 94,617 were to Great Britain, and 30,631 to the Continent, while the stocks at all the ports, as made up this evening, are now 693,218 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Week ending Feb. 24..	Exported to—		Total this week.	Same w'k 1870.	Stock.	
	G. Brit	Contin't			1871.	1870.
New Orleans	40,343	18,594	59,137	36,118	286,488	245,810
Mobile	12,684	1,200	13,984	2,364	80,924	71,478
Charleston	6,022	746	6,768	....	32,428	21,621
Savannah	11,022	6,081	17,113	9,448	97,777	64,774
Texas	6,189	2,410	8,593	2,677	58,101	47,551
New York	17,112	1,500	18,612	9,896	104,000	85,000
Other ports	1,011	....	1,011	1,001	84,000	82,000
Total	94,617	30,631	125,248	61,444	693,218	569,234
Total since Sept. 1	1,897,912	808,871	1,696,183	1161,049	....	....

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 63,804 bales, while the stocks to-night are 124,984 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Feb. 17, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1.		EXPORTED SINCE SEPT. 1 TO—				Northern Ports.	Stock.
	1870.	1869.	Great Britain	France	Other Forign	Total.

The influences operating upon the market the past week have been much the same as during the previous week; though the falling off in the receipts at our ports and the increasing probabilities of peace in Europe have served to impart rather more firmness with a slight improvement in prices both here and at Liverpool. This better feeling is particularly noticeable here at the close, on the arrival of telegrams this afternoon that peace was assured. Holders feel that with France and the Continent competing more directly for our cotton some activity will result which will take off our surplus, though with the receipts keeping up to the present formidable figures, they continue to be free sellers at the quotations. The improvement during the week has been ¼c., the close being 15⅝c. for Middling Uplands and 14½c. for Low Middling against 15½c. for Middling and 14¼c. for Low Middling last Friday. For forward delivery the movement has been free with the greatest advance on the later month's sales being made to-day at 15c. for Low Middling for June, and 15½c. for July. For May the closing quotation was 14 13-16, for April 14⅝, for March 14 9-16, and for February, 14 7-16. The total sales of this description for the week, (including 1,150 bales free, on board, but not including bales "Exchanged") have been 58,550 bales. For immediate delivery the total sales foot up this week 24,820 bales, including 2,192 bales to arrive, of which 5,139 bales were taken by spinners, 1,053 bales on speculation, 16,478 bales for export, and 2,150 bales in transit. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary.....per lb.	12¼@....	12¾@....	13 @....	13½@....
Good Ordinary	13½@....	14 @....	14½@....	14½@....
Low Middling	14⅜@....	14¾@....	15 @....	15¼@....
Middling	15⅝@....	15⅝@....	15½@....	16¼@....
Good Middling	16¼@....	16¼@....	16½@....	17 @....

Below we give the total sales of cotton and price of *Uplands* at this market each day of the past week:

	Total sales.	Ordinary.	Good Ordinary.	Low Middling.	Middling
Saturday	3,381	12¼@....	13½@....	14½@....	15⅝@...
Monday	6,737	13⅜@....	13⅝@....	14¾@....	15¼@ ..
Tuesday	3,890	12⅝@ ...	13¾@....	14½@....	15⅝@....
Wednesday		Holl	day.		
Thursday	4,850	12½@....	13¾@....	14½@...	15⅝@....
Friday	5 962	13⅜@....	13¾@....	14½@....	15⅝@....

For forward delivery the sales (including 1,150 free on board,) have reached during the week 58,550 bales (all low middling or on the basis of low middling), and the following is a statement of the sales and prices:

For February.		For May.			
bales.	cts.	bales.	cts.	bales.	cts.
2,500	14¾	700	14 11-16	3,800	15
1,800	14 7-16	26,200 total March.		1,400	15 1-16

		7,000 total May.			
		For June.			
		40	14¾		
		300	14 15-16		

The sales during the week of free on board have reached 1,150 bales. The particulars of these sales are as below:

1,050 free on board at Mobile.....p. t. | 100 free on board at New Orleans..p. t.

The following exchanges have been made during the week:

1-16c. paid to exchange 100 Feb. for 100 March.
¼c. paid to exchange 300 Feb. for 300 April.
⅜c. paid to exchange 400 Feb. for 400 March.
½c. paid to exchange 200 March for 200 May.
⅝c. paid to exchange 100 April for 100 May.
500 February for 500 March, equal terms.

WEATHER REPORTS BY TELEGRAPH.—Our telegrams to night indicate for the past seven days less rain than during previous weeks. At Mobile it has rained three days, at Montgomery one day, and at Selma it is reported to have been warm and cloudy through the week. At Charleston, Savannah, Macon, Columbus, Augusta, Memphis and Nashville it rained from one to two days in the early part of the week, but has since been pleasant, except at Memphis, where it has been cloudy pretty much all the week, and is raining again to-day. Galveston has been pleasant, no rain, thermometer averaging 66. The thermometer at Charleston has averaged 52, at Mobile and Columbus 56, at Montgomery 58, Macon 57, and at Memphis 58.

Digitized by Google

OUR EXPORTS.—The extent of our crop this year is still, of course, somewhat uncertain, but the general estimate place it now rather over than under 4,000,000 bales. Taking that figure then as the basis and allowing an increase in stock in the United States of say 100,000 bales, we shall still have left for export (provided our own spinners consume the same amount as last year) 750,000 bales more than during last season. Up to this time (the latest mail dates February 17,) we have exported 481,330 bales more than for the same period of 1869-70, leaving, if the crop foots up as above estimated, about 270,000 bales for the balance of the season, in addition to last seasons exports for the same period, to make up the surplus which we shall have to spare over and above last year. Great Britain has had already 573,000 bales more than last year, and hence if the news of peace received to-day turns out to be correct, for the balance of the year she would not be entitled to any further increased supply. It is not unlikly, however, that the movement to the continent from Liverpool will be larger than last season, or in other words the continental supply will more of it go through Liverpool. In that case, of course, the direct movement from here to Great Britain would also be larger; otherwise our years' exports would divide themselves up about as follows—giving Great Britain in all, say 2,000,000 bales, and other ports 950,000 bales. Our shipments (according to latest mail dates) have already been to Great Britain 1,302,000 bales, and to the continent 292,000 bales; the remaining shipments would therefore in this case be about 700,000 bales to Great Britain, and 650,000 bales to the continent.

INDIA.—According to our latest mail advices (January 21, received this week from Bombay) the first indications may be noticed of the effect of low prices on the movement of the crop. This is particularly showing itself among the ryots in their unwillingness to send forward their cotton. Messrs. W. Nicol & Co. write "that supplies of new cotton are still coming forward to this market on the smallest scale, and the question of how long prices are to remain relatively as much above home quotations depends entirely upon the monetary strength the ryots are possessed of. That it is great is evident from the reluctant manner in which the trifling arrivals in the up-country markets are parted with, while picking is progressing rapidly." So also we see Messrs. Finlay, Muir & Co. state "that new cotton comes on the green slowly." If this indisposition to sell continues, we must expect to find the movement to Europe slower and perhaps smaller than last year, though in all probability an increased crop will have been raised. Up to February 10, the cable reports state that the exports from Bombay had been, since January 1, to Great Britain 59,000 bales and to the Continent 12,000 bales, against 41,250 bales to Great Britain and 8,800 bales to the Continent during the same period of 1870. The total exports from Bombay for 1870 and the four previous years were as follows:

From	Exported to Great Britain.	Exported to European.	Exported to China.	Total.
Jan. 1, 1870, to Dec. 31, 1870.	864,568	164,880	52,097½	1,081,545½
Jan. 1, 1869, to Dec. 31, 1869.	970,354	182,524	17,273	1,171,151

GUNNY BAGS, BAGGING, &C.—The market for cloth the past week has been rather quiet, but prices are very firmly held; the only transaction, however, we hear of is 1,000 bales deliverable June 1st at 19c. currency, duty paid. Bags are quiet also, the only sale reported being 250 bales to arrive here at 10¾c. Hemp continues quiet, and Manila is quoted 10¼@10½c. as before; but there are no sales reported. A sale of 300 bales Sorsogan was made at 10¾c. gold. Jute is in moderate demand but firm, 500 bales sold in Boston at 6¼c. gold. Jute Butts are in active demand, part speculative, and the transactions since our last including Boston and to arrive are fully 12,000 bales at 4@4¼c. currency, and 3¾@3⅞c. gold.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	Week ending Feb. 24, 1871. Receipts.	Shipments.	Stock.	Week ending Feb. 24, 1870. Receipts.	Shipments.	Stock.
Augusta	3,828	3,195	22,626	2,677	1,284	25,010
Columbus	1,241	1,463	12,148	1,008	941	13,527
Macon	1,441	1,669	15,686	516	592	16,587
Montgomery	1,841	2,452	9,404	1,134	255	11,326
Selma	1,450	2,511	8,860	882	974	7,765
Memphis	16,975	21,424	41,224	6,009	11,758	22,343
Nashville	3,570	3,147	8,434	1,069	1,048	5,285
	30,346	35,861	118,382	13,295	16,852	101,843

These totals show that the interior stocks have decreased during the week 5,515 bales (being now 16,539 bales more than for the same period of last year), while the aggregate receipts are 17,051 bales more, and the shipments 19,009 bales more than for the corresponding period of 1870.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons:

	1871.	1870.
Stock in Liverpool..... bales.	764,000	311,000
Stock in London.....	79,341	81,705
Stock in Glasgow.....	250	300
Stock in Havre.....	44,230	91,500
Stock in Marseilles.....	6,850	4,600
Stock in Bremen.....	3,450	6,300
Stock rest of Continent.....	25,000	32,000
Afloat for Great Britain (American).....	294,000	249,000
Afloat for France (American and Brazil)..	....	41,874
Total Indian cotton afloat for Europe.....	131,632	108,512
Stock in United States ports.....	693,218	568,234
Stock in inland towns.....	118,382	101,843
Total.....	2,160,353	1,596,868

These figures indicate an *increase* in the cotton in sight to-night of 563,485 bales compared with the same date of 1869.

The exports of cotton this week from New York show a decrease since last week, the total reaching 14,571 bales, against 17,475 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

EXPORTED TO	WEEK ENDING Jan. 28.	Feb. 4.	Feb. 11.	Feb. 18.	Total to date.	Same time prev. year.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 80,477 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in THE CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night:

	Total bales.
NEW YORK—To Liverpool, per steamers Algeria, 1,963....Nevada, 3,319....Samaria, 513....City of Washington, 1,022....Italy, 2,615.... per ships Glenallen, 356....Themis, 1,024....Riversdale, 1,101	11,913
To Cork, for orders—per bark Nictaux, 1,196	1,196
To Christiana, via Glasgow—per steamer Caledonia, 100	100
To Bremen—per steamer Hermann, 1,302	1,302
To Gibraltar—per bark Attila, 60	60

Of the present stock of cotton 45 per cent is American against 44.50 per cent last year. Of Indian cotton the proportion is 29 per cent against 34 per cent.

LONDON, Feb. 11.—The cotton trade is dull and prices have receded ⅛d. to ¼d. per lb. The following are the particulars of imports, deliveries and stocks:

	1869. bales.	1870. bales.	1871. bales.
Imports, January 1 to February 9	43,113	15,915	25,464
Deliveries	80,219	56,454	13,947
Stocks, Feb. 9	108,123	81,705	79,341

ALEXANDRIA, Jan. 27.—Business in cotton is very quiet, and prices have receded ⅛d. per lb. The following is the statement of exports:

From	Great Britain. bales.	Continent. bales.	Total. bales.
Nov. 1, 1870, to Jan. 26, 1871	91,169	20,113	111,282
Same period, 1869-70	77,847	25,257	103,104
Same period, 1868-69	87,172	27,306	114,478
Same period, 1867-68	87,217	26,873	114,090
Same period, 1866-67	94,183	20,617	114,800

BOMBAY, Feb. 7.—New Oomrawuttee, good marks, 200r.—6 11-16d by sail; 6⅞d. by steamer; new Dhollera, 188r.—6 5-16d. by sail; 6½d. by steamer; new Comptah, 173r.—5¾d. by sail; 6 1-16d. by steamer, all cost and freight.

HAVRE, Feb. 10.—The stock of cotton yesterday evening was 44,230 bales, of which 23,130 bales were American, and 17,030 bales East Indian.

BREADSTUFFS.

FRIDAY P. M., February 24, 1871.

The market has been depressed for Flour, Wheat, Corn and Oats, until to-day, when there was a slight recovery in Flour and Wheat. Barley has been steadily advancing.

Flour has arrived but moderately, and there was no great pressure to sell early in the week; but the announcement of a material reduction in railroad freights from the West, and continued dull accounts from Liverpool so weakened the market yesterday that lines of shipping extras to the extent of about 10,000 bbls. sold at $6 50@6 70. This movement partially relieved the market of some accumulations on the wharf and in the hands of city millers, and to-day, with a continued good shipping demand holders showed rather more strength, and although less active shipping extras sold at $6 65@6 80 being an advance of 10c.

Wheat has shown a steady downward tendency under dull accounts from abroad, the competition of Corn in the freight market, and the subsidence of speculation. The reduction in rail freight from the West also weakened the market; and yesterday several boat loads on new No. 2 Spring sold at $1 49@1 50 in store. It was reported that contracts have been made to bring half a million bushels of Wheat from Chicago by rail. To-day, however, with a partial advance in the Liverpool quotation, and rumors that the treaty of peace between France and Prussia has been signed, there was a firmer feeling, closing at $1 51@1 54 for New Spring, and a large line of Amber Winter sold for export to the continent at $1 63 in store.

Corn has met with a moderate demand both for export and home use, but with pretty full receipts, and a disposition to affect prompt sales, prices have ruled in favor of the buyers, until to-day, when the supply was small, and a slight advance was established prime, mixed selling at 84@86c afloat, and prime yellow 86c, also afloat.

Barley has advanced 3@5c per bushel. The local demand has not only been active, but our coastwise neighbors have come to us for supplies. State Barley last sold at $1 for two rowed, and Canadian $1.08 @1 18, the higher figure for Bay Quinte.

Oats have been dull and prices weak. Nothing of moment done in the past two days and the close is quite unsettled.

The following are the closing quotations:

Flour—		Wheat, Spring, bush	$1 44@1 51
Superfine	$ bbl. $5 75@6 25	Red Winter	1 52@1 55
Extra State	6 70@6 90	Amber do	1 58@1 63
Extra Western, common to good	6 60@6 90	White	1 60@1 80
Double Extra Western and St. Louis	7 00@9 25	White California	1 75@1 80
Southern supers	....@....	Corn, Western Mix'd	82@85
Southern, extra and family	6 80@9 50	Yellow, new	85@86
California	....@....	White	85@95
Rye Flour, super & extra	5 40@6 20	Rye	1 10@1 15
Corn Meal	3 85@4 60	Oats	65@69
		Barley	1 00@1 20
		Malt	1 10@1 25
		Peas, Canada	1 15@1 35

The movement in breadstuffs at this market has been as follows:

GROCERIES.

FRIDAY EVENING, February 24, 1871

The week under review has been a broken one, owing to the intervention of a legal holiday, and the volume of business has been somewhat affected thereby, though at the best the general inquiry was slow and uncertain and the position not remarkably encouraging. Our jobbers in nearly all cases find the distributive movement small, and, holding fair supply, are of course not greatly inclined to purchase beyond actual wants, particularly as stocks in first hands in nearly all cases are increasing, and there must soon be a better assortment from which to make selections with a probability of easier terms. Values have undergone no violent or decided change, but with few exceptions the tone is weak, and any fresh advantage has been gained by the buying interest. Holders of goods likely to be wanted in European markets were encouraged somewhat by the more favorable indications of peace.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black	5,316 pkgs.	Laguayra	295 bags.	Sugar, Brazil	.... bags.	
Green	9,097 pkgs.	Other	722 bags.	Manilla, &c.	578 bags.	
Japan	3,044 pkgs.	Sugar, Cuba	7,362 bxes.	M'las'es, Cuba	3,006 hhds.	
Various	1,817 pkgs.	Cuba	5,330*hhds.	Porto Rico	488*hhds.	
Coffee, Rio	18,124 bags.	Porto Rico	50*hhds.	Demerara	894*hhds.	
Java	1,145 mats.	Other	376 hhds.	Other	316*hhds.	
Maracaibo	333 bags.					

*Hhds. include bbls. and tcs. reduced

Imports this week have included 15,414 bags Rio, 4,306 bags of other kinds of coffee; and good receipts of sugar and molasses.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at date.		Imports at leading ports since January 1.	
	1871.	1870.	1871.	1870.

Molasses, hhds.	7,211	22,360	14,948	40,450

TEA.

The volume of business has not been very large, and the general tone of the market proved slow and unpromising throughout the greater portion of the period under review. Since the opening of the new year there has been an immense amount of Tea withdrawn from bond, and as this is now pretty well distributed the consumption naturally falls off somewhat, while the supply and the assortment at the same time increases, and buyers gain their advantage therefrom. The weakness is developed to the greatest extent on Japans and Greens, with some concessions offered by holders as an inducement to hasten operations, and though it is still safe to call Oolongs steady, they lack buoyancy and move with less general freedom. The trade, however, seems to have a fair amount of confidence in Blacks, as they are growing in favor with consumers, and when business shows any animation sell much more readily than other styles. As a rule, importers express no alarm at the present stagnation of trade, but affect to consider it as merely a natural lull between the heavy movement of January and the setting in of the regular spring demand, the latter likely to commence as soon as transportation becomes cheaper and more certain. Sales of 3,350 pkgs. Green and 5,500 Oolongs.

Imports this week have included 605,788 lbs. Black, per "Amandine," from Amoy and 268 packages.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871	2,589,501	6,732,653	3,300,638	12,622,792
1870	4,917,126	2,692,234	445,448	8,054,8 3

The indirect importations, including receipts by P. M. Steamers via Aspinwall, have been 4,575 pkgs. since January 1, against 4,550 last year.

COFFEE.

There has, on the whole, been a fair amount of activity current, but nothing of magnitude moving, and it is evident that jobbers do not as yet find enough encouragement in the condition of the distributive trade to induce them to enter the market with freedom. Values are without any important change and generally steady, with no new influences at work except, probably, that stronger indications of peace abroad have revived the hopes of an increased European demand. Brazils have sold to some extent and former prices were obtained in most cases, with holders talking fully as firmly and confidently as before, on a plea of absence of margins on current importations and stimulating advices from the points of production, as well as the probabilities of an European outlet. The position, however, is not quite so unfavorable for the buying interest as two or three weeks ago, the advantage being gained from the increased supply and the improved assortment, embracing two steamers' cargoes, and jobbers generally have shown greater caution in all their operations, especially as stock is pretty much all available and selections can be made without difficulty. At the other ports there has been a good business doing and full prices obtained. Java continues dull, the stock being well under control and firmly held at rates which buyers refuse to pay, but from second hands the distribution is good, and consumers appear quite willing to submit to extreme figures for fine stock. On West India styles a sweeping movement has taken off the bulk of the supply of Maracaibo, but aside from this the market was without animation and void of anything particularly interesting. Prices remain as before and are generally firm, as the accumulation is small and few immediate additions are looked for. The transactions embrace 10,681 bags Rio, 4,001 bags Santos, 14,150 bags Maracaibo, 200 bags Java, 425 bags Laguayra, 175 bags Savanilla, 131 bags Mexican, and 1,513 bags St. Domingo. Sales at Baltimore, on spot and to arrive, of 23,108 bags Rio, and at New Orleans 3,500 bags Rio.

Imports of Rio this week have included the following cargoes: "Imperador," 5,400 bags; "Amelia Wilson," 3,500 bags; steamer "North America," 6,054 bags Rio, and 460 bags Santos. Of other sorts the imports have included 1,086 bags St. Domingo, per "R. Murray, Jr.," and 4,306 bags sundries.

The stock of Rio Feb. 23, and the imports since January 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.
Stock	24,466	...	10,311	9,500	6,467	2,000	52,744
Same date 1870	43,286	....	18,418	8,000	5,000	....	74,704

* Includes mats, &c., reduced to bags. † Also, 51,168 mats.

SUGAR.

A most decidedly dull and uninteresting condition of affairs has prevailed on the market for Raw Sugars during the entire week, with a heavy feeling on values and the cost still further reduced on all grades. The arrivals have been more abundant and importers hardly so confident as heretofore, the majority offering their receipts with a considerable show of freedom, not only on the spot but to arrive, and in some instances there has been quite a little pressure to realize. Buyers, however, could not be tempted to engage in anything like free operations, and the business was largely confined to odd broken lots, with scarcely enough changing hands from day to day to afford a fixed basis of quotations. Most of the Trade are doing nothing beyond a light retail business, and Refiners find the market for their product growing worse and worse, and the result is that all purchases are calculated with a remarkable nicety as to actual wants, and beyond this nothing is taken. The proportion of well cured desirable parcels of the new crop is now comparatively small, the later arrivals showing a very poor average and this adds somewhat to the reduction in values, though in the present condition of business it is extremely doubtful about realizing even our modified quotations for the very best dry hard stock. There has been no improvement in the demand for Refined, the market ruling extremely dull throughout and prices are again reduced. The falling off in cost, however, fails to increase the demand, and though most refineries are working as slowly as circumstances will admit, the accumulation daily grows larger, and holders more anxious to realize. Sales during the week include 2,981 hhds. Cuba; 40 hhds. Porto Rico; 350 hhds. Demerara; 185 hhds. New Orleans; 5,780 boxes Havana; and 400 hhds. Melado.

Imports at New York, and stock in first hands, Feb. 23, were as follows:

	Cuba, bxs.	Cuba, *hhds.	P. Rico, *hhds.	Other *hhds.	Brazil, bags.	Manilla, &c, bags.	Melado hhds.

MOLASSES.

The market for foreign, without any unusual amount of activity, begins to have a more business like tone, and a fair movement may reasonably be expected from week to week during the ensuing two or three months. The old crop is now considered as of but little importance, holders having now placed values down to a point as low as could reasonably be expected, and there quietly awaiting such demand as may be developed, though the outlet is doubtful as distillers seldom appear as buyers, and refiners do not find the quality inviting. The new crop, however, begins to appear in larger quantities and attracts greater attention, especially as the supply is more generally distributed, and the increased number of holders coming in competition brings about some modification from the extreme figures asked on the first arrivals, and gives buyers more advantage. Refiners have been the most liberal operators, but offerings of choice grocery styles found a very ready sale to the trade, who have for a long time been without any first-class foreign goods. Domestic has arrived freely, but met with a fair demand at pretty full prices, and for the best even a slight advance was obtained. Holders, however, meet the outlet willingly on any reasonable bid. There has of late been a good steady demand for Sugar House Syrup, mainly on Southern account, and the sales making mostly at 24@25c. per gallon, in bbls., and 21@22c. do. in hhds. We note 450 hhds. low grade old Cuba, 150 hhds. new crop Porto Rico, and 1,853 bbls New Orleans.

Total	56,225	45,196	34,711	42,044	122,290	136,853	14,948	40,450

Including tierces and barrels reduced to hhds.

SPICES.

There is no very decided alteration to note in the general condition of this market, the entire trade agreeing that the position is a firmer one and the tendency on most of the leading styles of goods in sellers' favor. The business is, as before, much restricted by the paucity of the offering, the few invoices in first hands having been in most cases entirely withdrawn, not altogether with an idea that an immediate advance can be forced, but with full confidence that buyers must ultimately be compelled to take them at materially higher figures. Pepper, Nutmegs and Mace are the best supported descriptions, other kinds ruling firm, except, probably, on Cassia, which is a little unsettled. Jobbers continue to report a very fair distribution, and are realizing extreme prices on most goods.

FRUITS, &c.

The demand for Raisins since our last has been extremely light and confined to jobbing lots for the wants of grocers and the usual trade; prices remain nominally unchanged, but the feeling is that a large lot could be bought at a reduction. Turkey and French Prunes have continued active, and prices have further advanced; since our last we learn that a lot of 500 casks of Turkish Prunes of the crop of 1868 has been sold at a private price, but said to have brought scarcely enough to pay the duty. Currants to arrive soon have met with a good demand, but close again rather quiet. Sardines have shown no important movement, about 1,000 cases quarter boxes are reported on private terms. Citron is firmer but quiet. Nuts have shown no particular movement and remain as formerly quoted. There has been some demand for Firecrackers, but prices are without important variation.

Foreign Green are in good demand for West India kinds, which have not been plenty, and prices are a trifle better. Mediterranean fruit has been abundant and sell pretty cheaply. We quote Messina Lemons $3 75@4 00 per box; do. Oranges, $2 50@3 00; Porto Rico Oranges, $9 00 per bbl.; Aspinwall Bananas sell well at from $2 00 to $3 50 per bunch. A cargo of Cocoanuts sold since our last at $40 per thousand, and 2,000 bunched do. Bananas at $2 00 @2 50 per bunch.

In Domestic Dried the transactions seem for the moment to be limited to Apples and Peanuts. The better grades of Apples are active and wanted and prices are improving, with still an upward tendency, the movement appears to be part speculative. Peaches of all kinds, on account of scarcity, are quiet, but held at extreme prices. Blackberries are remarkably firm, but buyers do not seem willing to meet the views of holders, and trade is at the present at a standstill. Peanuts are coming in rather sparingly and command higher prices; the tendency still looks upward. Pecans are slow of sale.

In Green Apples there is rather less trade on account of the high prices at which they rule, and the low prices of box Oranges. Cranberries are still in limited demand but rule about steady for good stock.

ADVICES FROM PRODUCING MARKETS.

Tea.—Messrs. Aug. Heard's telegram to Everett & Co., Boston, reports:

HONG KONG, Jan. 12.—Fair to good cargo Foochow Oolongs, 23 Taels per picul. Stock of Oolongs on offer at Foochow and Amoy 50,000 half chests. The total export this season to America will not exceed 12,500,000 lbs.

SHANGHAE, Jan. 13.—Total export Green Teas to the United States not likely to exceed 16,000,000 lbs. Prices advanced about five per cent.

YOKOHAMA, Jan. 28.—Good medium Jan. Tea $34@$35 per picul. The export this season estimated at 13,000,000 lbs.

The following shows the quantity of Tea afloat for the United States at late dates (not including San Francisco), and which has not yet arrived:

Rio Coffee.—The regular American mail brings market reports a fortnight later to Jan. 25, 1871, from Messrs. Boje & Co.'s circular we learn: That the brisk demand last reported still existed, especially for the European market, for which purchases would have been much larger were it not for the poorness of the selections and the daily increased rates asked by holders. The firmness of the New York market—reported by American mail—was also used by dealers, and at the close, with the limited stock of 90,000 bags, prices showed a decidedly upward tendency.

Total sales for United States since Dec. 24 ..... 128,100 bags
Daily arrivals for same time about ..... 5,700 "
Vessels sailed since Dec. 24, 1870 ..... 177,699 "
Vessels cleared and ready ..... 11,488 "
Vessels loading or about to load ..... 338,600 "

SANTOS.—Sailed, 4,000 bags; Loading, 4,000 bags.

Cuba Sugar.—HAVANA, February 17th.—The *Weekly Report* says: The demand during the week has been comparatively moderate for the season and at the close has become somewhat paralyzed, owing to the declining tendency of prices in New York, which has compelled buyers to reduce their offers, meeting, however, little desire on the part of holders to accept them, especially for fine good sugars for Europe, which arrive in smaller quantities than other sorts. Notwithstanding, some sales have been closed at very irregular prices, according to the quality of the staple and terms of sale and delivery; but good lots on hand could not be easily obtained at anything lower than our last quotations of 10¼@10⅝ rs. per arrobe No. 12—and we accordingly give these figures as the real market value, particularly for numbers above No. 12, which are now the most sought after.

The sales which have been reported during the week amount to about 18,000 boxes of all kinds, against 12,000 boxes last week.

Shipments this week from Havana and Matanzas have been as follows:

To	Boxes.	Hhds.
New York	6,277	2,975
Boston	1,396	345
Baltimore	770	58
New Orleans	3,587	....
Total export of the week to all countries	29,955	8,426

The general movement at both ports has been as follows:

	Rec'ts this week		Exports since January 1. To U. S.		To all Ports.		Stock at date.

THE DRY GOODS TRADE.

FRIDAY, P. M., February 24, 1871.

The new schedule of freights to the West, which took effect on Monday last, reduced the cost of transportation so much that trade has been more active during the latter part of the week, and buyers have been operating more freely, especially those purchasing full packages. The West is well represented in the market by jobbing and retail dealers, who are already purchasing more freely than at the time of our last report, and are shipping considerable amounts of goods purchased earlier in the month, but which were held over awaiting a freight tariff more favorable to Western shippers. The firmness with which prices are maintained by both agents and jobbers gives buyers confidence in the stability of the market, and the condition of the trade at present, leads to the belief that future purchases will be heavy, and that the season, though likely to be short, will be active. The current trade is considerably less than that of a corresponding period last season, but this is generally considered due to the severe winter experienced in nearly all localities in the interior, and is not a matter of much surprise to any class of dealers. Money has not been very plentiful in many sections of the South and Southwest, and trade has been delayed somewhat in consequence, but as the season advances and dealers experience a demand from consumers, a more general inquiry is looked for.

DOMESTIC COTTON GOODS.—The market for all domestic cotton fabrics continues firm, and the tendency of prices, especially on brown and bleached fabrics, seems to be upward. The market is devoid of speculative feeling and prices are only advanced as the stocks are exhausted and the demand exceeds the supply. Quotations are somewhat unsettled at the moment, in consequence of jobbers selling goods at prices lower than those recently established by agents, but are becoming steadier as the trade improves. Brown cottons are in good request, standard grades being sold close to production, an active demand having opened from bleachers, in addition to the trade with distributors. Medium grades are selling fairly for exportation, but the movements in this direction are not so heavy as for a few weeks previous. A moderate demand from distributors, however, has kept up the sales to a fair aggregate, and the list of quotations is fully maintained. Bleached goods in fine 4-4 makes are active, and in many instances are sold ahead of production. Prices have advanced on Lonsdales and a few other brands of a similar grade, while heavier 4-4 goods are unchanged, and firm at the recently revised quotations. Colored cottons are selling a little more freely, and are firm at steady quotations.

Prints are improving somewhat, but the demand continues light for this season of the year. The market is apparently firm, but prices are not fully maintained on all light work, in consequence of the accumulation of some brands in first hands, and decline in the price of cloths. Medium colorings are in less liberal supply, and are held more firmly. Paper cambrics are scarce and tend upward, the agents for several prominent makes contemplating an early advance of ¼c.

DOMESTIC WOOLENS.—There is a fair jobbing demand for medium and fine grades of fancy cassimeres, with continued heavy movements from first hands. The clothing trade are about supplied with spring weights, and are not buying, as yet, for the winter season, hence the sales now are confined to distributors. The stock is well sold out for this season of the year, and supplies have been coming in slowly, but in consequence of a rise in the streams, the production is somewhat greater, and manufacturers will probably soon turn their attention to heavy weights. Cloths have sold well and the aggregate movements are considerably in excess of those of a corresponding period last year. These goods are also well closed out and prices are firmly maintained. Shawls are selling moderately, and as the demand improves agents are opening more liberal assortments though many will not open their full stocks until next week.

FOREIGN GOODS.—Dress fabrics are in active demand, and show a decided improvement as compared with the preceeding week. The low prices at which goods are placed stimulate trade, and the demand is active for medium and high priced fancy fabrics, which at prices in some instances 25 per cent. below those current a year ago, are likely to find ready sale to consumers. Silks are in good request, but are not moving so freely from first hands as during the early part of the month. Gros grains are the most active, and are held firmly, the stock not being excessive, while the receipts are small. In fancies the trade is less active, but small amounts sell freely. Shawls are animated, and are in short supply in first hands. Broches are in especially good request and are reported scarce, the demand being unusually active and the receipts small.

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of leading Jobbers:

BROWN SHEETINGS AND SHIRTINGS are firm, and fine goods are becoming scarce. A few advances have been made, as will be seen by the annexed quotations: Amoskeag A 36 12½, do B 36 12, Atlantic A 36 13, do D 11, do H 12½, Appleton A 36 13, Augusta 36 11½, do 30 10, Bedford R 30 8½, Boott O 34 10½, Commonwealth O 27 8, Grafton A 27 8, Great Falls M 36 11 do S 38 10, Indian Head 36 13, do 30 10½, Indian Orchard, A 40 13, do C 36 11, 11½ Laconia O 39, 12 do B 37 11, Lawrence A 36 11, Lyman O 36 11, do E 36 12½, Medford 36 12, Nashua fine O 38 11½, do R 36 13, do E 40 14½ Newmarket A 36 11, Pacific extra 36 12½, do L 36 11½, Pepperell 7-4 22½, do 8-4 25, do 9-4 27½, do 10-4 32½, do 11-4, 37½, Pepperell E fine 39 13, do R 36 12, Pocasset F 30 8½, Saranac fine O 33 11, do R 36 13, Stark A 36 12½, Swift, River 36 9, Tiger 27 8.

BLEACHED SHEETINGS AND SHIRTINGS are active and some brands are sold ahead of production, orders being taken for future delivery at value. Amoskeag 46 16½, do 42 15, do A 36 15, American A 36 12½, Androscoggin L 36 16 Arkwright WT 36 13, Ballou & Son 36 13, Bartletts 36 14½, do 33 13½, Bates XX 36 17@18, Blackstone AA 36 14, Boott B 36 13½, do O 30 11, do R 28 9, Clarks 36 17½, Dwight D 40 18, Ellerton 10-4 45, Forestdale 36 15, Fruit of the Loom 36 15—16 Globe 27 7, Gold Medal 36 13, Great Falls Q 36 16 Hill's Semp. Idem 36 15, Hope 36 13, James 36 15, Lonsdale 36 15½, Masonville 36 15½@16, Newmarket C 36 12½, New York Mills 36 21 Pepperell 6-4 22½, do 10-4 87½, Tuscarora XX 36 19, Utica 5-4 25 do 6-4 82½, do 9-4 47, do 10-4 52½, Waltham X 33 11½, do 42 15½ do 6-4 22½, do 8-4 27½, do 9-4 32½, do 10-4 37½, Wamsutta 36 20.

PRINTING CLOTHS are in moderate request, but prices are weak and somewhat lower, 64x64s selling at 6⅝@6¾c.

PRINTS are selling slowly, and light work is not well sustained. Quotations are unchanged, however, as follows: American 11, Albion solid 11, Allens, 11, do pinks 11½, purples 11½, Arnold 9, Atlantic 6, Dunnell's 11, Hamilton 11, London mourning 10, Mallory 11½, Manchester 11, Merrimac D 11, do W pink and purple 13½, do W fancy 12½, Oriental 10½-11, Pacific 11, Richmond's 11, Simpson Mourning 10½, Sprague's pink 11½, do blue and White 11, do shirtings 10 Wamsutta 7½.

CHECKS.—Caledonia 70 22½, do 50 24, do 12 26½, do 10 21, do 8 17, do 11 22, do 15 27½, Cumberland 13, Jos Greers, 55 15½, do 65 18 Kennebeck 20, Lanark, No. 2, 9½, Medford 13, Mech's No. A 1 29.

DENIMS.—Amoskeag 26, Bedford 14½, Beaver Cr. AA 23, Columbian heavy 24, Haymaker Bro. 14, Manchester 20, Otis AXA 22½, do BB 20,

CORSET JEANS.—Amoskeag 11½, Androscoggin —, Bates 9. Everetts 13½, Indian Orchard Imp. 10, Laconia 11½, Newmarket 10.

THE Commercial AND Financial Chronicle

HUNT'S MERCHANTS' MAGAZINE,

A Weekly Newspaper,

REPRESENTING THE INDUSTRIAL AND COMMERCIAL INTERESTS OF THE UNITED STATES.

VOL. 12. NEW YORK, MARCH 4, 1871. NO. 297.

Advertisements.

Advertisements will be inserted at the following prices per line for each insertion:

ordered less than 4 times		20	cents per line.
" 5 times or more		16	"
" 9	"	14	"
" 13	"	12	"
" 26	"	10	"
" 52	"	8	"

If the advertisement occupies one column or upwards, a discount of 15 per cent on these rates will be allowed.

Space is measured in agate type, 14 lines to the inch.

Advertisements will have a favorable place when first put in, but no promise of continuous insertion in the best place can be given, as all advertisers must have equal opportunities.

Advantages.

1. The CHRONICLE has much the largest circulation of any financial publication issued.

2. Its circulation extends to business men in BOTH the FINANCIAL and COMMERCIAL branches, and also to a very numerous class of retired merchants, moneyed men and investors, who are not engaged in regular business.

3. It is preserved on file by subscribers, and thus possesses a great advantage for advertisers, over those publications which are habitually thrown aside after perusal.

WM. B. DANA & CO.,
PUBLISHERS,
79 & 81 William St., N. Y.

☞ For terms of Subscription see 5th page.

Bankers and Brokers.

Elizabethtown & Paducah Railroad Company

OF KENTUCKY.

FIRST MORTGAGE

Eight Per Cent. Convertible Bonds.

This road, connecting the important points of Louisville and Paducah, is 185 miles long, and passes through a rich agricultural and mineral section of the State of Kentucky. The traffic will be abundantly remunerative.

Sixty miles of this road are already in successful operation, and it is expected that the line will be opened to Greenville, 88 miles, in July next. The western end of the line, (on which a considerable amount has been expended) will be pushed vigorously to completion. The Company have in good and BONA FIDE stock subscriptions amounting to

$3,095,000

of which the city of Louisville subscribed

$1,000,000.

These Bonds are the only lien upon the property and franchises of the Company, and as an additional safeguard to purchasers are deposited with the UNITED STATES TRUST COMPANY OF NEW YORK which will pay over the proceeds to the Railroad Company only in the ratio of construction.

The management is in the hands of most responsible and favorably known citizens of Kentucky, with the guaranty of their able and faithful direction, and with the large amount of stock subscribed these Bonds form a very safe and desirable investment.

The coupons are payable on the first days of March and September at the Bank of America, New York.

The Bonds are now offered at the low price of 87½ cents and accrued interest, and we with confidence recommend them to investors as a thoroughly safe security.

Treasury Department.

WASHINGTON, February 4, 1871.

Public notice is hereby given, that books will be opened on the sixth day of March next, in this country and in Europe, for subscriptions to the National Loan, under the Act approved July 14, 1870, entitled "An Act to authorize the Refunding of the National Debt," and the Act in amendment thereof, approved January 20, 1871.

The places at which subscriptions may be made, and the names of the authorized Agents of the Government, will be announced hereafter. The proposed loan comprises three classes of Bonds, namely:

FIRST. Bonds to the amount of five hundred millions of dollars, payable in coin, at the pleasure of the United States, after ten years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of five per cent per annum.

SECOND. Bonds to the amount of three hundred millions of dollars, payable in coin, at the pleasure of the United States, after fifteen years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of four and a half per cent per annum.

THIRD. Bonds to the amount of seven hundred millions of dollars, payable in coin, at the pleasure of the United States, after thirty years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of four per cent per annum.

Subscribers to the Loan will have preference in the following order, namely:

FIRST. Subscribers for equal amounts of each clas of bonds,

SECOND. Subscribers for equal amounts of bonds bearing interest at the rate of four and a half per cent and of bonds bearing interest at the rate of five per cent.

THIRD. Subscribers for five per cent bonds.

When a subscription is made the subscriber will be required to deposit two per cent of the amount thereof, to be accounted for by the Government when the bonds are delivered; and payment may be made either in coin or in bonds of the United States known as FIVE-TWENTY BONDS, at their par value. The coin received in payment will be applied to the redemption of five-twenty bonds.

The bonds will be registered or issued with coupons as may be desired by subscribers. Registered bonds will be issued of the denominations of $50, $100, $500, $1,000, $5,000, and $10,000; and coupon bonds of each denomination except the last two. The interest will be payable in the United States, at the office of the Treasurer, any Assistant Treasurer, or Designated Depositary of the Government.

The bonds of the several classes aforesaid, and the interest thereon, are exempt from the payment of all taxes or dues of the United States, as well as from taxation in any form by or under State, municipal, or local authority.

After maturity, the bonds last issued will be first redeemed, by classes and numbers, as may be designated by the Secretary of the Treasury.

GEO. S. BOUTWELL,
Secretary of the Treasury.

OFFER FOR SALE,

Houston and Texas Central Railway Company

FIRST MORTGAGE LAND GRANT SINKING FUND

7 Per Cent Gold Bonds.

Secured by a First Mortgage upon 6,400 acres per mile, and upon the whole and entire line of road, its franchises and property of every description.

RECEIPTS IN GOLD COIN.

OPERATING 141 MILES. 1869.	OPERATING 166 MILES 1870.
$1,047,827 65.	**$1,538,420 00**

The receipts for January, 1871, were $213,000, gold.

The net earnings for the year 1870 were more than sufficient to pay the interest upon $13,000,000, or over three times the present issue of Bonds.

The affairs of this Company have been examined by many capitalists, who have invested largely in the Bonds, and we are confident that a careful scrutiny will prove them to be the best and safest scrutiny now offered in this market.

FOR SALE AT 90 AND ACCRUED INTEREST BY

DREXEL, WINTHROP & CO.,

18 WALL STREET.

SAFE INVESTMENT.

The attention of Capitalists is called to the

FIRST MORTGAGE

SEVEN PER CENT BONDS

OF THE

PEORIA, PEKIN & JACKSONVILLE RAILROAD COMPANY,

Issued in sums of $500 and $1,000, redeemable July 1st, 1994, with coupons for semi-annual interest, payable on the first days of January and July, in the City of New York, and secured by a Mortgage for $1,000,000 upon the Railroad, its franchises and all equipment, on the well protected basis of about $12,000 per mile.

This Road, with its 88 miles of main, and over 8 miles of side track, is completed and in successful operation between the cities of Peoria and Jacksonville, in the state of Illinois. At Peoria, the third city in the state in respect to business and population, it intersects four prominent Railroads, with connections for Chicago, Rock Island and other points North, East and West but having its principal connection with that of the Chicago, Rock Island and Pacific Company. At Jacksonville it connects with three Roads forming, with the Jacksonville Division of the Chicago and Alton Road, the shortest line between Peoria and St. Louis.

Its rental receipts from other Roads, whose trains pass over less than ten miles of its track, are $40,000 per annum, being more than one half of the amount of the annual interest on its First Mortgage Bonds, otherwise amply provided for by its existing business.

A portion of the $1,000,000 of First Mortgage Bonds, aforesaid, the high character of which for investment will be observed, are now offered for sale by

The CHRONICLE *will be sent to subscribers until ordered discontinued by letter. Postage is 20 cents per year, and is paid by the subscriber at his own post-office.*

WILLIAM B. DANA, JOHN G. FLOYD, JR. } WILLIAM B. DANA & CO., Publishers, 79 and 81 William Street, NEW YORK. POST OFFICE BOX 4,592.

Mr. Alex. Holmes is our only travelling agent.

☞ The Publishers cannot be responsible for Remittances unless made by Drafts or Post-Office Money Orders.

☞ A neat file for holding current numbers of the CHRONICLE is sold at the office for 50 cents. Volumes bound for subscribers at $1 25. The first and second volumes of the CHRONICLE are wanted by the publishers.

THE NEW LOAN AND THE DEBT STATEMENT.

One of the best tests by which to judge of the industrial prosperity of any country is the elasticity of its revenue, and its expansive increase under any stimulus or pressure. The debt statement for the past month illustrates this elasticity in a remarkable degree. For notwithstanding the large diminution of the taxes by Congress, our national debt has been decreased since February by the amount of $7,317,960, and by no less than 208 millions since March 1, 1869. It is gratifying to find that the business of the country begins to show favorable symptoms of resuscitation and that general confidence is reviving. Mr. Boutwell claims that the excess of revenue by which in his administration he has paid off more than 200 millions of the public debt due is to the rigid economy which has been enforced in all departments of the Government. In his anxiety to extend the same economy to the management of the debt, he has just concerted a new funding scheme, or at least a modification of the old one after consultation with some of our most experienced financial authorities. The first step of this modified plan is to fund 200 millions of the new five per cents. This is to be commenced at once. The final development and consummation of the scheme is to be the funding into 4 4½ and 5 per cent. bonds over 1,000 millions of Government securities of 1862, 1864 and 1865, the 5 years option on which has already matured. He claims that as money is extremely easy here, and as the war is over in Europe, the present moment is very favorable for a purpose, in the accomplishment of which every tax-payer in the country would heartily rejoice. The books for the subscriptions to the new loan are to be opened on Monday and agents have been accredited in London, Frankfort, Amsterdam and Paris. For the sale of the bonds in this country 900 agents have been appointed including 75 private banking establishments. The First National Bank of this city has already sent in the first subscription of $1,000,000 to the Treasury. Much of the activity which has been exhibited in the recent negotiations is due to the energy and sagacity of Mr. C. C. Norvell, who has been commissioned by the Secretary of the Treasury as agent for popularising the loan. Of course, it is premature as yet to predict anything as to the final success of the negotiation. But the preliminary movements certainly exhibit considerable enterprise and firmness. In any event the funding into a long loan at a low rate of interest, our whole gold-bearing debt of 1,900 millions is a mere question of time. If one scheme fails from being premature, another must and will succeed.

The Secretary of the Treasury has reduced his balance of currency to $20,854,605, showing a decrease of four millions during the month. In letting out these four millions of currency which were previously locked up in the Treasury vaults Mr. Boutwell has pursued the same plan of lowering his currency balance which he has recently adopted. The need has passed away, however, for this outpouring of currency. Had the floodgates been opened last fall when the money market was disturbed and currency was scarce, the outflow would have done good. Now the money market is easy and the currency balance of the Treasury should rather be augmented than diminished. To such strictures as these in the manipulation of the Treasury balance, some superficial observers would reply that it is unreasonable to urge the Secretary to let out his currency during October and November and December, if in January and February, after he has yielded to the pressure of argument and has begun to pour out his hoarded greenbacks, we blame him as strongly for his new policy. But this reasoning is based on misapprehension. The currency machinery of this country is notoriously so unelastic that it needs adjusting from the Treasury balance. We have as yet no other means provided for the indispensable task of regulating the volume of our circulating money. Yet it must by some means be so controlled as that it shall enlarge during the fall when currency is scarce, and contract "between seasons," when currency is in oversupply. Consequently in the autumn we urged Mr. Boutwell not to hoard his currency, but gently to deplete the Treasury vaults, and now that the

Digitized by Google

money market is oversupplied we advocate an opposite policy. In short, when as now, the fever of speculation is kindled and kept up by a plethoric money market, the Treasury is recommended to avoid giving further stimulus and adding fuel to the fire. There is, however, this excuse for Mr. Boutwell's outpouring of currency. He does not wish the money market to be in an unfavorable state for the reception and success of the new loan; and he has just been obliged by the new banking law to call in two millions of three per cent certificates, making a contraction of bank reserve to the extent of five millions in all.

The coin balance has increased to 103 millions, and as over two millions of gold notes have been paid off we have an accumulation of nearly five millions of gold. This increase has enabled the Secretary to sell seven millions this month and to buy ten millions of bonds.

PEACE FOR FRANCE AND EUROPE.

Louis Napoleon, when at a memorable crisis he uttered the dictum, "*L'Empire c'est la paix*," little thought that his reign would close with the imposition on France of bonds to keep the peace so heavy, so harsh, and so unprecedented as those which have just been dictated at Versailles and ratified by a vote of five-sixths of the National Assembly at Bordeaux. The fallen Emperor of the French has at least the satisfaction that for twenty-two years he gave his people a Government which excelled in its material benefits with any they previously had; and that in the last *plebiscite* four-sevenths of the whole nation recorded their votes in approbation of his dynasty and rule. The commerce and wealth of France have certainly received an amazing impulse, and the growth of so many years of industrial prosperity can not have been destroyed by an eight months' disastrous campaign. France has suffered similarly before when less able to bear it, and her speedy recuperation after the peace of 1815 leaves no doubt that if for many years to come her fiscal capacity be put to a severe strain she will not be unable to pay the treaty indemnity of five milliards of francs which the victorious Germans have exacted from her. Whoever may doubt this, M. Rothschild, the great European banker, seems to have no doubt. For it is said that he promises, if needful, to find the money to make the requisite payments in one year instead of three years, so that Paris and France may be quit of the claims and relieved of the presence of the invaders. Such an engagement from so eminent a source is very suggestive at the present moment. It shows a confidence that France will be free from intestine trouble, and possesses within herself the elements of swift recuperation. From the minute sub-division of landed property there, and the wide distribution of wealth in many hands, nine-tenths of the population have nothing to gain and everything to lose by a civil war. What the friends of order have now to do is to set up a centralized Government, adapted to their institutions, strong enough to preserve order, to give security to property, and to keep the explosive elements of the population in check. This the friends of order can undoubtedly do if they set about it, for they are an overwhelming majority of the people. It matters little for the purposes of order and security what sort of government they establish if it be honest, economical and just. They may make themselves a Republic like ours, with a powerful executive; or a constitutional monarchy, with the balance of power in a Parliament, like that of England; or they may compel themselves to defer innovations in governmental forms, and continue for a time, with small modification, the existing institutions, so that their whole strength may be given to the solving of the stupendous problems of the hour in regard to finance, taxation, and industrial rehabilitation.

We have so recently seen in the South the amazing rapidity with which the ravages of our civil war disappeared in prosperity and industrial growth, that we can understand the reasons of the confidence of the leaders of European finance in the future of France. Still for the present she is deeply burdened and much exhausted. One-third of her territory has been laid waste, her richest wine districts have been ruined, four millions of her people are almost starving; her crops which were light last year can scarcely be large this year, for war has crippled her farmers, consumed their horses and cattle, scattered their laborers, disintegrated their industrial system, and destroyed their agricultural implements, bridges, machinery and other improvements. The loss of men during the war is estimated at 500,000, of which 150,000 were killed, wounded or disabled. How great have been the losses by disease we perhaps shall never know. But from the extreme severity of the winter and the ravages of famine the losses in the occupied parts of France must have been heavy. When Prussia invaded Austria in 1866 it was found that those districts which the armies passed through or stayed in lost by disease alone, mostly cholera, 250,000 of the population.

To bring order from this industrial chaos, to reorganize the business of the nation, and to resuscitate its commercial life, the Prussians must be got out of the country as soon as possible. For they insist on material guarantees until their milliard of francs is paid, and refuse until then to release the French territory they have occupied. This territory and the population now under German military government is given as follows by the well-known statistician, Dr. Peterman, of Gotha. There have been some changes, the extent of which is not accurately known:

FRENCH TERRITORY OCCUPIED BY THE GERMANS.

Occupied Territory.	Area in German square miles.	Population (1866).
Department—Meuse	131.11	301,653
" Vosges	110.42	418,998
" Haute Saone	96.98	317,706
" Haute Marne	112.96	259,096
Arrondisements—Nancy, Toul, and Lunerville, of the Department Meurthe	69.94	296,742
Arrondisement—Briey, of the Dept. Moselle	21.56	64,511
Military Government, Lorraine	524.97	1,653,706
Department—Aisne	133.52	565,025
" Ardennes	95.03	326,814
" Marne	148.57	390,809
" Seine et Marne	104.18	354,400
" Aube	109.00	261,951
" Seine et Oise	101.77	533,727
Military Government in Rheims	602.07	2,432,776
" " Lorraine	524.97	1,658,706
" " Alsace	273.39	1,638,546
	1,490.03	5,730,028

NOTE.—As a German mile is 6,859 yards a square German mile will be 47,045,881 square yards, and one square German mile will be equal to 15,197 English square miles.

Moreover, the Germans hold several important links in the railroad system of France. The Strasburg *Zeitung* says that "of the western roads the Germans hold the one to Rouen and Havre as far as Mantes, the Granville road as far as Dreux, and the Mans railroad as far as Châteaudun. Of the eastern railroads they hold the road to Orleans, the direct line to Tours, and the whole line to Pithiviers. The Marseilles railroad via Nevers, is also held as far as Gien, and all the lines of the French East railroad except a few points in districts not yet occupied by the Germans." A glance at the map will show the importance of these railroads to the industry of France and the absolute necessity that she should have them released from the iron grasp of the Prussian. The present war has inaugurated a new principle of international law, and in regard to the nation that provokes war a precedent is given to exact of that nation such heavy security as to cripple her as a war-power for years to come. The future application of this principle will be such, we trust, as to check the martial ardor of ambitious Princes.

When France has shaken herself loose from the shackles which this war has thrown around her will she be able to raise taxes enough to pay the interest on her old debt, together with the new burdens imposed by the indemnity. She has suffered a frightful calamity by the destruction of realized wealth and by the cession of Alsace. She is about to lose Strasburg and Metz and Mulhouse and several other large manufacturing cities, with a million and a half of population. Of course the tax revenue hence arising will also be lost to the Treasury at Paris. This revenue by the last published returns was only 10 millions of dollars, a much smaller sum than was suppose. The figures are as follows:

TAXES RAISED IN 1867 FROM ALSACE AND GERMAN LORRAINE.

	Real and personal est. fr.	Stamps, &c. fr.	Interest taxes. fr.	Total taxes. fr.
Rhin Bas	6,406,994	4,952,057	5,855,261	17,214,242
Rhin Haut	5,973,155	4,045,905	4,996,858	15,015,918
Moselle (four-fifths)	4,500,000	3,400,000	5,000,000	12,900,000
Meurthe (one-third)	1,700,000	1,300,000	3,900,000	6,900,000
	fr.18,580,079	fr.13,697,962	fr.19,752,119	fr.52,030,160
Total	$3,716,016	$2,739,592	$3,950,424	$10,406,032

To these taxes must be added about 3 or 4 millions for local taxation, and the losses of revenue, as will be seen, cannot exceed 13 or 14 millions of dollars a year. Now this sum is a very small proportion of the aggregate revenue of the Imperial Government, which is reported as follows for 1870:

IMPERIAL REVENUE OF FRANCE FOR 1870.

Direct Taxes.			
Real estate		$34,500,000	
Pernsonal property		10,717,200	
Door and window tax		7,874,400	
Trade lincenses		13,366,240	
Registration		72,559,000	
Stamps		16,852,320	$155,859,160
Indirect Taxes.			
Customs		$15,022,800	
Excise:			
Liquors	$48,686,600		
Salt	6,368,000		
Sugar	22,361,600	77,416,200	
Monopolies:			
Tobacco	49,361,800		
Powder	30,636,204		
Miscellaneous	8,317,000	88,315,004	180,754,004
Domains, forests, &c			11,080,315
Ordinary revenue			$347,693,479
Special Budget for local Government			58,059,782
Balances			7,451,333
Total revenue for 1870			$413,204,594
Loss from Alsace, &c			13,204,594
Product of taxation for 1872 at same rate			$400,000,000

If France does her utmost the foregoing figures exhibit the probable revenue of 400 millions of dollars for 1872. For the year 1871 the revenue will of necessity be smaller and more uncertain. Hence the expenditure may have to be met by anticipating the future. It is also doubted whether with an assured revenue of 400 millions of dollars she can pay her way, keep up her Government, and pay the interest on her debt. This debt before the late war involved the annual expense of 105 millions of dollars, as shown in the following table:

ANNUAL PAYMENTS ON THE FRENCH DEBT—1870.

Rentes existing before 1st April, 1814	$12,672,749
Rentes created from the invasion of 1815	30,940,600
" by Louis Phillippe	2,455,597
" by Republic of 1848	10,784,699
" by Louis Napoleon	26,633,322
Total of consolidated debt	$72,784,967
Interest of redeemable debt	6,593,766
Terminable annuities	18,713,726
Total debt before the war	$98,092,459
War loans of 1870	7,500,000
Total annual interest on debt	$105,592,459

From these figures we see that before the war the French debt was a less burden than our own. But the question arises how much the Prussian indemnity will add to the annual burden. If France can pay the requisite taxes without impoverishment, and if there is a fair prospect for the establishment of a stable, strong, wise government, there is no reason why France may not raise what she wants by a short loan on moderate terms, until her credit is so far established as to enable her to fund her debt in a more permanent form and at about the usual low rates of interest.

As the pressure of the debt will be more severe while the taxes cannot at present be augmented, the most vigilant economy will have to be practiced and the profusion of the Imperial expenditure during the last few years offers abundant provocation for the pruning knife of administrative reform. The civil service, for example, cost in 1870 $121,991,659; the military, $77,562,081; the navy, $32,569,005, and extraordinary expenses, $24,681,362. The year's expenses were, therefore, almost 260 millions of dollars independently of the charges on the debt. It is a somewhat significant contrast to find that the same expenses in Prussia last year cost about 150 millions of dollars. For France, under the new regime, 200 millions might be ample. She would thus soon find herself, notwithstanding her present prostration, in a financially superior position. With a surplus in the Treasury she will soon place her new loan without difficulty. Any one who doubts this should be referred to the wonderful success of the three great French loans of 1854 and 1855, when France was much less wealthy than a year ago. The following are the official returns of the subscriptions:

POPULAR FRENCH LOANS OF 1854 AND 1855.

	Loan of 1854. Millions of francs.	Jan. 1855. Millions of francs.	July 1855. Millions of francs.
Amount asked by the Government.	250	500	750
" of sums offered	467	2,175	3,653
" offered in Paris	214	1,398	2,534
" " in the departments.	253	777	1,119
Number of subscribers	98,000	177,000	317,000
Subscribers at Paris	26,000	51,000	80,000
Subscribers in the departments	72,000	126,000	237,000

DEBT AND FINANCES OF NORTH CAROLINA.

Nearly all the debt of North Carolina was contracted in aid of internal improvements, directly or indirectly. Some of the efforts to give such aid have resulted disastrously, and in others the agents of the State wasted the funds. Nearly all the debt is evidenced by coupon bonds. A very small amount of the "old registered certificates" is outstanding. It is true there is a law authorizing coupon bonds to be registered; but this is effected only by indorsement by the State Treasurer on the bonds. The coupons are unprotected. Where bonds thus registered have been stolen the Legislature has heretofore refused to issue new bonds, except for the principal. The coupons of bonds issued before the war, after being severed from the bonds, cannot be distinguished from other coupons from other bonds of the same number. Hence the Treasurer was obliged to disregard the notice of the United States not to pay the coupons of what are called "Floyd bonds," i. e., bonds taken from the Indian Funds and fraudulently disposed of during the time when Floyd was Secretary of War, because there were seven or eight classes of bonds having the same numbers as the Floyd bonds, and the coupons of the latter cannot be distinguished from those similarly numbered. But coupons of bonds dated January 1, 1866, and since, by a policy inaugurated by Treasurer Battle, have letters and figures printed on them, which make them distingushable. The debt of North Carolina may be distributed into the following general classes:

1st. Bonds dated before May 20, 1861 (the date of the formal declaration of the secession of the State.)

2d. Bonds dated October 1, 1861, and July 1, 1862, issued under acts passed before the war, for building railroads. But these, although not issued for war purposes, have no market value, are not recognized by the Stock Boards, because they are payable in "good and lawful money of the *Confederate* States." Hence their amount ($913,000) is not usually estimated as a part of the State debt, although all laws enacted and debts incurred during the late war, not in aid of the same and not contrary to the allegiance of North Carolina to the United States, have in general terms been declared valid. To these might be added $215,000 issued for building the Chatham Railroad, dated January 1, 1863, under a law enacted during the war. The Legislature of North Carolina has thus far failed to authorize the exchange of other bonds for the above issued during the war, except to the amount of $20,000.

3d. Bonds issued since the war, under acts passed before the same, for railroad purposes.

4th. Bonds issued since the war to fund the principal and interest, past due and unpaid, of the debt of the State. This was done by authority of the Funding Acts of March 18, 1866, and August 20, 1868, the former signed by Worth, Governor, and Battle, Treasurer, the latter by Holden, Governor, and Jenkins, Treasurer.

5th. Bonds, not special tax, issued since the war (not for funding) under acts passed since the war.

6th. Bonds, called special tax bonds, issued since the adoption of the State Constitution in 1868, which required a special tax to be levied to pay the interest annually.

Lastly—Unconstitutional bonds, i. e., bonds declared after their issue, either by a direct decision of the Supreme Court of the United States, or impliedly, to be unconstitutional and void.

We make a few observations in the order above stated.

1st. The stock owned by the State in the North Carolina Railroad Company, and the dividends thereon, are pledged to pay the

Digitized by Google

principal and interest of the $3,000,000 State bonds, issued to pay for said stocks. This is by the charter of the company passed in 1848.

Besides, the same stock is pledged to secure bonds issued in 1867 and 1868, to the Western N. C. R. R. Co., i. e., ten shares of stock in the N. C. R. R. Co., on each $1,000 bond, the mortgage being indorsed thereon. It is manifest that this is only a "second mortgage."

Similar pledges are made of the stock and dividends in various other railroad companies, e. g., the Atlantic & N. C., the Western N. C. R. R. Co., &c., but the pledge at present has but little value. The total amount of the "ante war," or "old bonds," is $8,378,200.

2d. No additional explanation is needed as to this class.

3d. The total amount of bonds issued since the war under acts passed before for railroad purposes is $2,647,000—issued $430,000 to the Wilmington, Charlotte and Rutherfords Railroads, and the residue to the Western N. C. R. R. Co. It is this latter issue which has the second mortgage of the stock of the N. C. R. R. Co.,which appears to us an illusory security.

4th. Nearly all the bonds issued under the Funding Act of 1866 and under the act of 1868, were issued to take up "old bonds" become due, or the matured interest of old bonds, hence it becomes difficult to assign a reason why they should not stand on the same footing.

5th. The fifth class includes the $1,200,000 issued to the Chatham Railroad Company under ordinance of the Convention of 1868.

6th. There has been no charge that these have been misappropriated by the officers of the company. The road is being built with the proceeds.

SPECIAL TAX BONDS.

These are the bonds which the people of North Carolina generally believe were (most of them) squandered, either by bad management or fraud. Total, $11,407,000. They are the object of special nortility, and from the present tone of feeling it would appear that few of them will be paid in full, and perhaps most of them not at all. Various acts have been passed in regard to them by the same Legislature which originally authorized their issue.

1st. On 20th January, 1870, a resolution was adopted directing the Treasurer to pay no more interest on them until further orders, previous to which he had already paid $208,470 on coupons. The amount collected was $484,859 for the following roads:

Williamston and Tarboro' Railroad Company	$38,418
Western North Carolina Railroad Company	201,605
Wilmington, Charlotte and Rutherford Railroad Company	143,998
Northwestern North Carolina Railroad Company	57,628
Western (Coalfields) Railroad Company	43,206

2d. On 5th February, 1870, an act was passed ordering all then in the hands of the companies to be issued only on certain certificates of work actually done. The introduction of the act into the Assembly is declared to be notice to all parties, and all sales, purchases and disposal of the bonds, after the date of introduction are declared void. This provision applies to those holding the bonds under hypothecation but not *bona fide* purchasers. The following bonds only were returned under said act, viz: Northwestern North Carolina Railroad, $1,080,000; Chatham Railroad, $1,650,000; Atlantic, Tennessee and Ohio Railroad, $1,613,000. Total, $4,345,000. The Treasurer says:

"None of these have been reissued under the provisions of said act. The laws under which they have been issued having been repealed, I recommend that these bonds be destroyed. Application is made by the Northwestern North Carolina Railroad Company, for the return of the mortgage given by it to the State, which application has not been complied with for want of authority. I think the company is entitled to the delivery. The Atlantic, Tennessee and Ohio Railroad Company has made the same application. As some of the bonds of the State issued to this Company are outstanding, of course sufficient should be retained to protect the interests of the State."

3d. By act of 8th of March, 1870, all the special tax acts are repealed, the repeal covering not only the sections authorizing the appropriations and those levying the tax, but the whole act in which those sections are contained. This repeal does not apply to ordinances of the convention. All bonds of the State which have been issued under the said acts in the hands of the President or other officer of the corporation, are ordered to be returned to the Treasurer. The moneys collected under the special tax acts are appropriated to the use of the State Government and directed to be credited to the counties in the next tax to be collected in 1870. (This credit has, however, not been allowed.)

4th. By act passed March 12th, 1870, the Legislature directed the Treasurer to borrow $150,000, afterwards increased to $250,000, of these special tax moneys, and authorized him to replace the same out of the first moneys which might afterwards come into his hands by dividends of corporations or of taxes.

5th. The Treasurer having reported that he had replaced the moneys to the credit of the special tax funds, the General Assembly, by act passed Dec. —, 1870, directed him to borrow from this fund again.

A case is pending in the Supreme Court of North Carolina, the decision of the Court being expected in a few days, which arises from the effort by the holders of coupons of bonds issued to the Western Railroad Company to enforce the payment of the same by mandamus against the Treasurer. First, because they allege that any act depriving them of the same is in conflict with the clause of the Constitution of the United States which forbids any State passing a law impairing the obligation of contracts. Secondly, because as they allege, section 8, Article V, of the State Constitution prohibits money collected for this purpose being appropriated to any other purpose. The name of the case is L. G. Bayne & Co. vs. D. A. Jenkins, State Treasurer.

The General Assembly of 1870-71 has done nothing yet on the subject of the State debt. The general opinion seems decidedly against any effort to begin the payment of interest at present.

The dominant party desire a convention of the people and will have as little legislation on this subject as possible, until the question of calling a convention be settled.

The special tax bonds are claimed as follows:

1. Bonds issued to the Western division of the Western N. C. R. R. Co., $6,640,000. It is believed that hardly any part of the proceeds has been spent in building the road. The feeling against them is strong and bitter, and an article of impeachment against Gov. Holden has been presented, based on the charge that he issued $2,640,000 (the higher numbers) without the President of the Company having furnished him the certificate required by law. Gov. Holden alleges that this certificate was given but lost.

2. Bonds issued to Eastern Division of the same Company, $340,000. Nothing is known of the disposition of these bonds, at the last report they having been hypothecated, hence no definite feeling pro or con has arisen yet. The impression, however, seems adverse.

3. Bonds issued to the Western R. R. Co., $1,320,000. It is charged that these bonds have not been used to the building of the road, and the feeling against them is bad.

4. Bonds issued to the Wilmington, Charlotte and Rutherford R. R. Co., $3,000,000. It is thought that $1,000,000 of these were sold for the company at 52 cents. The residue is not in as good favor, as no report has been made in regard to their disposal, and it is charged that they have not aided materially in building the road.

5. $300,000 issued to the Williamston and Tarboro' Railroad Company. These seem to have been sold at 50 or 60 cents, and used in building the road, but the latter is mortgaged, subject to a lien superior to the State lien. The contractor has stopped work; and if the road should be sacrificed there will be feeling against the bonds, although it is admitted that the State has got the benefit of a graded road through this means.

Lastly. The bonds issued to the Chatham Railroad Company, dated October, 1868, issued under act of Assembly, numbered 1,201 and upward, have been pronounced unconstitutional by the Supreme Court. $350,000 are outstanding. There are likewise $100,000 "Penitentiary bonds," thought to be unconstitutional, as there was no tax levied to pay the interest.

ASSETS OF THE STATE.

The State Treasurer's report of 1870-71 shows the nominal amount of the stocks and bonds held by the State: Total stocks, $21,707,500; total bonds, $6,017,000.

1st. Stocks.—Of these the only ones of much value are the $3,000,000 held in the North Carolina Railroad Company. All this stock is pledged by the charter of 1848, and also by an act passed in 1866 for certain bonds of the State, as said above. $1,000,000 is preferred stock as long as held by State. This Company is now paying dividends.

The stock in the Western North Carolina Railroad, Wilmington, Charlotte and Rutherford, &c., is only of nominal value.

2d. Bonds.—The bonds held by the State are of inconsiderable value, nearly all having been made of subordinate lien by acts authorizing the companies to issue first mortgage bonds.

REVENUE.

There have been received into the Educational Fund from poll taxes, $136,076; entries of vacant lands, $1,843; retail licenses, $24,823; auctioneers' taxes, $193; fines, penalties and forfeitures, $6,711; principal of State loans repaid by public fund and interest, $164,320—total receipts, $333,973.

The total cash receipts into the public fund were, from Oct. 1, 1869, to Sept. 30, 1870, both inclusive (not including special tax receipts to pay interest on certain bonds, commonly called "special tax bonds"), $744,647 73; special tax receipts to pay interest, $484,859 69. Of the above amount belonging to the general fund, $413,275 33 were from the taxes of 1869, and $61,962 02 from the taxes of 1870. The State has lost considerable money from the insolvency of sheriffs and their sureties, and more stringent measures are recommended in regard to sheriffs' bonds.

VALUATION OF TAXABLE PROPERTY.

The valuation of real property in North Carolina in 1860-61 was $125,155,447. Personal property was not then valued. In 1869-70 the valuation of real estate was about $90,000,000, and personal property about $25,000,000. The reduction in the valuation of real estate was caused by losses in the late war and disorganization of labor, but chiefly by the State of uncertainty and depression which afflicts the public mind as to the future. We think the value is much underestimated. The number of acres of land returned for taxation is, in round numbers, 26,000,000, though there are 30,000,000 acres in all probability. There were returned acres improved, 6,517,284; unimproved, 17,245,685.

PRODUCTIONS.

In 1860 the State produced as follows:

Cotton	145,514 bales.
Indian Corn	30,078,000 bushels.
Wheat	4,743,000 "
Rice	7,593,000 pounds.
Sweet potatoes	6,140,000 bushels.
Peas	1,932,000 "
Oats	7,781,000 "

The State has great agricultural advantages, but they have not been developed as they ought to be. Railroads permeate it in all directions except the extreme west; others are being built. The manufacturing facilities are very fine, both as to water power, proximity to market and to the raw materials, especially cotton. The State is finely located, relatively, to the great centres of population and trade. Weldon, a railroad centre in North Carolina, and Buffalo, in New York State, are at about the same distance from New York city. The mineral wealth of the State is great. The climate is excellent—probably, on the whole, equal to any in America. The population is quiet and orderly, notwithstanding complaints of local troubles. While at present, owing to obvious causes, the prosperity of the people is depressed, yet we see no reason why North Carolina should not soon be a prosperous and wealthy State.

REVIEW OF THE MONTH.

The great ease in the money market, with the usual attendant circumstances pertaining to that condition of affairs, the definite settlement of the Franco-Prussian war by the recent signing of the peace treaty between the belligerent powers, and the notice from Secretary Boutwell of the introduction of the new Government loan, have been the three most noteworthy events which characterized the past month. The supply of loanable funds at this centre has been very abundant, and the demand for money in stock or merchandize speculations comparatively limited, so that the natural result was produced of an extremely easy loan market, and lenders have found difficulty at times in placing their funds at 4 per cent on the best collateral, the rates during the whole month for the bulk of business having been from 3 to 5 per cent. The consequences of these easy rates have been seen in the stock and bond markets, where the demand for securities from parties who desired to employ balances to advantage were considerably increased, although the speculative demand was very little stimulated until near the close of the month.

The long expected settlement of the European war has at length been consummated, on terms, indeed, which are generally considered to be very severe for France, but which are infinitely preferable for her to any prolongation of a hopeless struggle, as now, at least, her people will be able to resume their commercial occupations and the country may regain its prosperity in manufactures and agriculture. The effects of the termination of the war have not as yet, been great upon our financial markets, and it seems very doubtful whether there will be any remarkable effects noticed here, beyond the increased activity in those branches of commerce, depending particularly upon the French and German markets for their supply or demand.

Government securities have been in much favor with buyers, both corporations and individual investors, and advanced about 1¼@2 per cent during the month. Secretary Boutwell gave notice in the early part of the month that the new Government loan would be introduced and books opened for subscription on the 6th of March, and as it was thus evident that he would desire the prices of bonds and gold should be so equalized as to facilitate the negotiation of the new five per cent loan at par in gold, the market has been much strengthened by the idea that the Government programme in the sale of gold and purchase of bonds might be shaped so as to produce this result. It does not appear, however, that Mr. Boutwell will actually pursue any different course on account of the new loan, from that which would otherwise have been followed. The 5 per cents 10-40s have shown the largest advance and closed at 111¼.

Stock operations were comparatively dull during the earlier part of February and the market showed an unusual sluggishness in responding to the easy rates of money, which generally stimulate speculative business whenever there is a fair prospect of their continuance for some weeks ahead. With a few exceptional days of temporary activity, there was but little outside support and the market was chiefly a "broker's market." Towards the last of th month there was more general activity and a buoyant tendency with something of the animation which has been noticed in former years. Prices advanced on nearly the whole list and at the close the feeling was decidedly in favor of higher prices, notwithstanding a temporary reaction caused by sales to realize the advance already made.

The following table will show the opening, highest, lowest and closing prices of all the railway and miscellaneous securities sold at the New York Stock Exchange during the months of January and February, 1871:

There has been at times considerable speculative activity in the gold market, but without wide fluctuations in the premium, which has not varied more than 1¼ per cent on the outside range. On the fall of Paris an attempt was made to advance the price, upon the idea that a large export demand for coin from this country would speedily follow, and the premium was thus put up to 112¼, but as there was no real cause for the higher rates, and as the opinion of the principal foreign bankers was in favor of a lower premium, the prices again declined, and closed at 110⅜. There has been no large export of specie, although the rates of exchange advanced to very near the specie shipping point. An important influence adverse to speculation for a rise was also found in the action of the Secretary of the Treasury in offering the new Government loan, as his influence would naturally be thrown on the side of lower gold.

The following table will show the rate of Gold in New York:

Foreign Exchange was firm throughout the month and advanced to 109⅜ for best bankers 60 days' sterling. There has been but little exchange offering and without any considerable supply of commercial bills the demand for ordinary trade purposes has been sufficient to keep rates very firm. The export of United States bonds is small, but since the beginning of the armistice, which promised also a permanent cessation of hostilities, several prominent Railroad Companies of good credit have offered loans abroad and these may affect the exchange market to some extent if taken freely in London.

The cotton exports were largely in excess of last year, but owing to the low prices of cotton hardly produced any more bills than in February, 1870.

The following have been the quotations of Foreign Exchange:

COURSE OF FOREIGN EXCHANGE (60 DAYS) AT NEW YORK.

Days.	London. cents for 54 pence.	Paris. centimes for dollar.	Amsterdam. cents for florin.	Bremen. cents for rix daler.	Hamburg. cents for M. banco.	Berlin cents for thalers.

Latest Monetary and Commercial English News

[From our own correspondent.]

LONDON, Saturday, February 18.

The political events of the week have been important, but they have in the main related to home affairs. The chief measure of the session—the new Army bill—has been introduced by the Government, and it is generally understood that the proposals made are adequate to the requirements of the times. A vast number of changes will take place, and the system of purchase will be abolished at a cost to the country of between £7,000,000 and £8,000,000. The total strength of the regular army, after deducting the 70,000 regular troops in India, is fixed at 133,000 men, of whom 25,000 will be stationed in the colonies. The actual number of regular troops in Great Britian will amount therefore to 108,000 men. There will be the addition of the army reserve of 40,000 men; the militia, 150,000 men; and the volunteers, 130,000 men. The figures given by the Minister at War are: Field horse artillery, 8,473; garrisons, 7,419; depot brigades, 2,815; militia artillery, 15,854; volunteer artillery, 34,695; making a total of 68,600 artillerymen. There will be cavalry of the line, 12,952; and yeomanry, 14,000; together, 26,952; engineers (Royal), 3,549; volunteers, 6,689; total, 10,229. Infantry of the line, 69,181; militia, 123,146; together, 192,327. Volunteers, 130,386; making a gross total of 332,817; to which if we add the reserves we shall have an army of 431,779. This is certainly a formidable army, and if well organized and equipped is amply sufficient for the protection of these islands. But even these numbers can be very largely augmented, more especially if we remain at peace for a few years, for by the system of retirement from the line and militia to the reserves a large number of soldiers will be liable to serve in case of danger. But then there is one just line of defence, our navy, to be broken through, and this we believe to be so powerful that only a combination of foreign fleets could effect it. The whole military system is, in fact, to be reconstructed; the country is to be divided into military districts; and each district officer is to be responsible to the War Office in London. The field artillery is to be made very formidable, and all classes of soldiers are to be armed with the most perfect kinds of rifles yet manufactured.

The discussions which have taken place on Military organization have quite thrown into the shade the question of a renewal of the war. At the same time, however, news from France has been awaited with interest, and as the terms of peace must soon be ascertained, it is more than probable that the question will soon be finally settled. There is certainly a general belief in the restoration of peace, for the very simple reason that France is not in a position to continue the contest. The nature of the peace will be better ascertained when the German terms are known.

Money has been in strong demand, but notwithstanding the prospect of higher quotations, the Bank still refrain from advancing their *minimum* rate of discount. Yesterday and to-day, the demand has been very active, and no accommodation is now obtainable under the Bank rate. Six months' bills are also dearer, and there are evident signs of improving rates of discount. But with trade so quiet, and with most abundant supplies of money, there is at present no fear of much higher quotations. The rates of discount are now as under:

	1870. Per cent.	1871. Per cent.		1870. Per cent.	1871. Per cent.
Bank minimum	3 @	2½@ ..	4 months' ba'k bills	3⅛@3¼	2⅞@3⅛
Open-market rates:			6 months' ba'k bills	3⅛@3¼	3⅛@3⅜
30 and 60 days' bills	2⅞@	2⅝@	4 and 6 trade bills	3⅛@4	3⅛@4
3 months bills	3 @	2⅝@			

The rates of interest allowed by the joint stock banks and discount houses for deposits are subjoined:

	1870.	1871.
Joint stock banks	2	1½
Discount houses at call	2	1½
Discount houses with 7 days' notice	2¼	1¾
Discount houses with 14 days' notice	2½	2

Rates of discount at Amsterdam are rather lower, but at other continental cities there are no material variations. Annexed are the quotations:

	B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.		B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.
At Paris	2½	6	2	—	Brussels	2½	4	2¼	3¼
Vienna	5	6	5	5	Madrid	5	5	5	5
Berlin	4	5	3⅝	4	Hamburg	—	—	3	3⅛a4⅛
Frankfort	4	4	3½	3½	St. Petersburg	5	8	4½	7
Amst'd'm	4½	3½	4½	3					
Turin	5	6	5	6					

A large amount of overdue bills on Paris has been offered. The rates are high, three months being quoted at 25.75 to 25.85. Bills on St. Petersburg have been in fair demand, but in other respects the Exchange market has been rather flat.

For Gold for export there has been a fair demand, and Silver is in request for export to Germany.

In the Stock Exchange business has been extremely quiet, and speculators are still in doubt with regard to the political future. But few, therefore, are operating largely, and in the absence of any animation the tendency of prices is drooping. Atlantic and Great Western Railway securities are very firm at higher quotations. The highest and lowest prices of consols and the principal American securities on each day of the week are as under:

	Monday.	Tuesday.	Wed'sday.	Thu'sday	Friday.	Sat'day.

Now that the demand for flour for export to France has subsided, the trade for breadstuffs has become quite stagnant, and the tendency of prices, except for the better qualities of wheat, is downward. It is quite evident that the trade are operating with great caution, and that in their dealings with France much circumspection will be shown until the credit of that country is re-established. As soon, however, as the invading armies have left, the French will be in a position to ascertain their position more accurately with regard to their food prospects. It will, no doubt, be found that their wants are very great, and that the home supply of wheat for the twelve months from the commencement of next harvest will be greatly deficient. It is true that there is still time to sow spring wheat, but hitherto, the custom has been in France to plant by far the greater breadth of land with winter wheat, and consequently, the supply of seed wheat more suited to spring sowing is very limited. The crop, under the circumstances, will be a precarious one, for not only will there be a scarcity of seed, but the various appliances are likely to be very deficient.

Annexed is a return showing the imports and exports of cereal produce into and from the United Kingdom during last week, and since the commencement of the season, compared with the corresponding periods in 1869–'70:

FOR THE WEEK ENDING FEB. 11.

	1870'71. Imports.	1870'71. Exports.	1869'70. Imports.	1869'70. Exports.
Wheat.....cwt.	607,957	27,938	409,295	1,509

Large supplies of cotton continue to be received, and the trade remains dull at lower prices. The trade of Manchester calls for little comment. The demand has remained uniformly quiet each day, and yet the decline in prices has been so gradual that it has been scarcely perceptible. At the end of a week buyers find that they have obtained a small advantage in some departments, but both spinners and manufacturers keep so well engaged that for immediate delivery they can still obtain last week's prices for most descriptions of cloth and yarn. The feeling in this market is that cotton may give way, but not very much, but that an advance from the present scale of prices is very unlikely. Hence spinners enter freely into long contracts whenever they find favorable opportunities for selling, and buyers on their part give out orders for distant delivery whenever they have a decided concession in price allowed them.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show an increase in both dry goods and general merchandise. The total imports amount to $8,035,653 this week against $7,005,147 last week, and $7,622,798 the previous week. The exports are 4,658,414 this week, against $4,281,530 last week, and $4,051,876 the previous week. The exports of cotton the past week were 19,010 bales, against 14,571 bales last week. The following are the imports at New York for week ending (for dry goods) Feb. 24, and for the week ending (for general merchandise) Feb. 25:

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
Dry goods	$2,037,327	$3,395,505	$1,992,573	$3,405,999
General merchandise	3,073,771	4,043,748	2,082,826	4,629,654
Total for the week	$5,111,098	$7,439,253	$4,075,399	$8,035,653
Previously reported	28,325,923	29,157,109	31,205,019	40,216,851
Since Jan. 1	$33,437,021	$36,596,362	$35,280,418	$48,252,504

Digitized by Google

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports, for the week ending February 21:

EXPORTS FROM NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
For the week	$2,968,819	$3,261,173	$3,208,786	$4,658,414
Previously reported	22,943,310	20,665,571	20,384,115	30,349,677
Since Jan. 1	$25,912,129	$23,926,744	$23,592,901	$35,008,091

The following will show the exports of specie from the port of New York for the week ending February 25, 1871:

Feb. 20—Str. Henry Chauncey, Aspinwall—		American gold	$5,000
American silver	$1,212	Feb. 23—Str. Missouri, Havana—	
Feb. 20—Schr. Hattie E. Smith, Baracoa—		American gold	50
American silver	1,000	American silver	2,880
American gold	2,000	Feb. 24—Brig Anne Ingram, Maracaibo—	
Feb. 21—Str. South America, St. Thomas—		American gold	22,600
American gold	15,000	Feb. 25—Steamship Main, Southampton—	
Feb. 21—Str. Colorado, London—		Silver bars	129,462
Gold bars	30,000	Feb. 25—Str. City of Brooklyn, Liverpool—	
For Liverpool—		Silver bars	281,600
Silver bars	146,429	Foreign gold	41,021
Feb. 23—Str. Calabria, Liverpool—		Gold bars	9,200
		American gold	2,600
Total for the week			$690,047
Previously reported			5,481,227
Total since Jan. 1, 1871			$6,171,274

Same time in 1870	$4,872,642	Same time in 1867	4,508,322
1869	5,352,494	1866	4,326,099
1868	10,592,115	1865	4,066,521

The imports of specie at this port during the past week have been as follows:

Feb. 20—Str. City of Manchester, Liverpool—		Feb. 25—Schr. E. L. Porter, Savanilla—	
Gold	$7,850	Gold	$2,079
Feb. 21—Schr. Clara Smith, Surinam—		Feb. 25—Schr. Morro Castle, Havana—	
Silver	724	Silver	960
Feb. 25—Str. Tybee, San Domingo—		Gold	2,484
Silver	560	Feb. 25—Schr. Martha Maria, Aroba, W. I.—	
Gold	2,901	Gold ore	10,768
Total for the week			$28,326
Previously reported			391,408
Total since January 1, 1871			$419,734

Same time in 1870	$3,051,570	Same time in 1868	$542,537
1869	2,021,640	1867	262,603

NATIONAL TREASURY.—The following forms present a summary of certain weekly transactions at the National Treasury and Custom House.

1.—Securities held by the U. S. Treasurer in trust for National banks and balance in the Treasury:

Week ending	For Circulation.	For U. S. Deposits.	Total.	Bal. in Treasury.—Coin.	Bal. in Treasury.—Currency.	Coin certificates. outst'd'g.

Feb. 25	177,800	176,472	307,200	595,671

The Chesapeake & Ohio Railroad.—There has been much discussion recently in the newspapers, and among legislators, railroad men and Wall street men, on the subject of transportation between the seaboard and the Western States. The question of tolls on the Erie canal, the profits realized on the trunk lines of railroad with the large increase in their capital stock, and the diversion of trade to Canada, have all been brought up and much time wasted upon them, without arriving at any satisfactory conclusion. In the meantime a very practical remedy for the evil chiefly complained of—high cost of transportation from West to East—is being quietly pushed through by a strong company, which is completing a railroad between the Ohio river and the nearest navigable waters of the Eastern coast on the James river at Richmond, Va. This is the Chesapeake & Ohio Railroad Company, comprising among its directors some of the best known financial names in New York, including Messrs. C. P. Huntington, Wm. H. Aspinwall, A. A. Low, Richard Irvin, Wm. B. Hatch and Jonas G. Clark, besides Mr. Pliny Fisk, of Trenton, N. J., and several prominent men of Virginia.

The Great East and West through lines are now as follows, viz.:

1. The New York Central and Hudson River Railroads, from New York to Buffalo, and thence by the lakes or connecting railroads.

The distance by this route from New York to Cincinnati is 883 miles, and to Chicago 980 miles.

2. The Erie Railway, from New York to Dunkirk, thence by lake navigation or connecting railroads.

The distance by this route from New York to Cincinnati is 861 miles. and to Chicago 983 miles.

3. The Pennsylvania Railroad, from Philadelphia to Pittsburgh, on the Ohio River (467 miles above Cincinnati), thence by river navigation or connecting railroads.

Distance from Philadelphia to Cincinnati, by water from Pittsburgh, 822 miles, and by connecting railroads from Pittsburgh 668 miles.

Distance from Philadelphia to Chicago, by all rail connections, 823 miles.

4. The Baltimore and Ohio Railroad, from Baltimore to Wheeling and Parkersburg, on the Ohio River (respectively, 376 miles and 283 miles, above Cincinnati), thence by river navigation or connecting railroads.

Distance from Baltimore to Cincinnati, via the river from Parkersburg, 667 miles; via connecting railroads, 591 miles.

Distance from Baltimore to Chicago, via connecting railroads, 828 miles.

Some idea of the wonderful growth of traffic may be derived from the following comparison of the earnings, at different periods, of the four existing East and West trunk lines:

The New York Central Railroad, for example, notwithstanding its large proportion of lateral and branch lines, shows a gross revenue of $24,221 per mile in 1867–68, against $16,829 per mile in 1861–62. The Erie Railway, which earned in 1862 $13,483 per mile, increased to $20,887 per mile in 1868. The Pennsylvania Railroad, in like manner, increased its annual earnings from $7,300,000 in 1861 to $17,250,811 in 1869. The earnings of the Baltimore and Ohio Railroad increased from $4,000,097 in 1861, to $8,724,915 in 1869.

The route of the Chesapeake and Ohio Railroad is from Richmond, on the James River, to the Ohio River, near the mouth of the Big Sandy, 427 miles. Its western terminus is 315 miles nearer Cincinnati than Pittsburgh, 224 miles nearer than Wheeling, and 131 miles nearer than Parkersburg, and is practically at the head of *reliable* navigation on the Ohio River.

Distance by this route from tide-water to Cincinnati (by water from mouth of Big Sandy), 579 miles; by connecting railroads (building or projected) 562 miles.

Distance from tide-water to Chicago, by connecting roads via Cincinnati, 875 miles, or by a contemplated route (via Dayton) 822 miles.

A portion of the first mortgage bonds of the company are now offered for sale by Messrs. Fisk & Hatch, the well-known bankers, whose name as financial agents of the company is a guaranty of good faith and soundness in the enterprise.

—Attention is directed to the advertisement in another column of the First Mortgage Eight Per Cent. Convertible Bonds of the Elizabethtown and Paducah Railroad Company of Kentucky. The agents of the loan state that a large amount has been placed during the last ten days. Considering the large *bona fide* stock subscription of $3,095,000 (of which the City of Louisville subscribed $1,000,000, and the Louisville and Nashville Railroad $100,000), and that the management and direction of the road is in the hands of prominent and responsible business men of Louisville, these bonds, at the present price of 87½, and accrued interest, certainly invite the attention of investors.

The road is completed and in successful operation 60 miles, and track laying is being vigorously pushed, both east and west of Green River, and the Eastern Division of the road to Greenville (93 miles) will be finished on or before the 1st of June. The Company have on hand iron enough to complete the road to the 105th mile. There is a large force at work on the Western Division, and it is expected that the entire line will be nearly completed during the present year. The road runs through a fine and fertile agricultural country, and over 80 miles of it through a rich coal and iron field. Its traffic should therefore be large.

The agents for the sale of these bonds are the well-known firms of Norton, Slaughter & Co., 41 Broad street; W. Alexander Smith & Co., 40 Wall street, and Hallgarten & Co., 28 Broad street, who will furnish any further information that parties may desire.

BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH, BANKERS,
No. 5 NASSAU STREET, NEW YORK, Feb. 27, 1871.

☞ THE FIRST MORTGAGE BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY,

originally offered by us last Winter, were so rapidly taken that, prior to the 1st of June last, a sufficient amount had been sold (upward of $5,000,000) to supply the Company with all the money that would be required until March or April of the present year.

THE CHESAPEAKE AND OHIO RAILROAD.

A NEW TRUNK LINE FROM THE SEA-BOARD TO THE WEST,

is already completed and in operation from Richmond to the celebrated White Sulphur Springs, 227 miles.

Digitized by Google

During the past year the work on the extension to the Ohio River has been prosecuted with great vigor; over 4,000 men having been employed during a great portion of the time.

The completed portion of the Road is doing a GOOD LOCAL BUSINESS, and its advantages AS A GREAT EAST AND WEST THROUGH LINE for the transportation of the heavy freights (which constitute the principal part of the East and West through traffic) are numerous and important.

1. *A short route.* 2. *Low grades.* 3. *Light curves.* 4. *Genial climate.* 5. *East and West termini at favorable points on tide-water and the Ohio River.* 6. *A very large through and local traffic awaiting its progress.*

All these conditions favor a cheap and economical working of the line, and will enable the Chesapeake and Ohio route to do a profitable East and West through business at rates which would not pay by the more difficult and costly lines, and to *control an enormous South-western through trade.*

The most apparent and pressing want of the grain, pork and wool producing regions of the West, at the present time, is more economical transportation to the sea-board.

The waters of the Ohio River, which flow by the western terminus of the CHESAPEAKE AND OHIO RAILROAD, connect with more than 12,000 MILES OF RELIABLE RIVER NAVIGATION, and 8,000 MILES ADDITIONAL which are available for portions of the year, and with over 20,000 MILES OF RAILROAD.

These rivers and railroads wash the shores and traverse the territory of SIXTEEN MAGNIFICENT, POPULOUS AND GROWING STATES, containing 1,000,000 square miles; unite more than 200 towns and cities, of which at least twenty-five contain each a population of 20,000 and upward, and minister to the wants of 10,000,000 of people.

To all this vast area, with its magnificent internal systems of water and railroad transportation, its teeming population, its wealth of production, and its enormous commerce, THE CHESAPEAKE AND OHIO RAILROAD OPENS AN ACCESSIBLE, SHORT, EASY AND ECONOMICAL OUTLET TO THE ATLANTIC COAST, upon whose shores the great West and Southwest must find the chief market for their products, and whence they must mainly draw their supplies of manufactured and foreign goods.

Among the officers and Directors are some of our best known and prominent business men—Mr. C. P. Huntington, whose financial management of the great Central Pacific Railroad has been so successful, is President of the company, with Messrs. W. H. Aspinwall, A. A. Low, Jonas G. Clark, Richard Irvin and others, well-known merchants of New York as directors.

We are now authorized to sell an additional amount of FIRST MORTGAGE 6 PER CENT GOLD BOLDS of the company, at the original price of 90 *and accrued interest.*

The Bonds are secured by a mortgage upon the entire road, franchises and property of the company, WHICH NOW, IN COMPLETED ROAD AND WORK DONE, EXCEEDS THE ENTIRE AMOUNT OF THE MORTGAGE, and which, when completed, will be worth at least $30,000,000.

A Sinking Fund of $100,000 per annum is provided for their redemption.

They are issued as Coupon or Registered Bonds, and in denominations of

$100, $500 and $1,000.

Interest payable May and November, in the City of New York.

The superior advantages, valuable property and franchises, and able and honorable management of the Chesapeake & Ohio Rail road Company, render it one of the most substantial, reliable and trustworthy Corporations in the country, and commend its Securities to the unhesitating confidence of capitalists and investors.

Pamphlets, maps and full particulars furnished upon application.

FISK & HATCH, Bankers.

—BANKING HOUSE OF HENRY CLEWS & Co., 32 WALL ST., N.Y.—Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed upon all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make telegraphic transfees of money to any distant point, and transact every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upwards on

The Imperial Bank, Messrs. Clews, Habicht & Co., } London.
The Provincial Bank of Ireland, Dublin and branches.
The National Bank of Scotland, Edinburgh and branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Governments and other investment securities; also Gold and Exchange.

Advances made to our dealers at all times on approved collaterals at market rates of interest.

Collections made in any part of the world.

The Bankers' Gazette.

FRIDAY EVENING, March 3, 1871.

The Money Market.—There has been a slight improvement in the rates for money on call since our last report, consequent upon the improved demand arising from increased activity at the Stock Exchange. At the date of writing last week, we noticed the fact that the super-abundance of money offered on call loans was beginning to have the usual effect of stimulating speculation in stocks and bonds, and the movement having been more fully developed since, there has been more demand for money, and lenders have been able to place their balances with less difficulty, though at rates which are hardly enough better to warrant a change in quotation. The principal business has been done at 4 @5 per cent., with numerous exceptions at 3 per cent. on government collateral; and these were about the fair quotable rates at the close. On time engagements 5 per cent. for 60 days, 6 per cent. for four months, and 7 per cent. for 9 months have been the terms upon which most contracts have been made, with approved collaterals for security.

The tone of feeling indicated by the above remarks is evidently on the side of continued ease in money for some time to come; an idea which is based upon the present situation of monetary affairs, upon the large purchases of bonds to be made by the government this month—$10,000,000—and upon the expectation that Secretary Boutwell will endeavor, so far as practicable, to keep an easy market during his funding operations.

The bank statement of last week, Feb. 25th, was not in its net result favorable to increased ease, as the excess over legal tender reserve was $663,867 lower, from an increase of $1,338,783 in deposits, and a decrease of $1,145,289 in specie, although legal tenders were $811,769 higher. Loans showed an increase of $3,093,479, and circulation a decrease of $17,396.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	Feb. 25, 1871.	Feb. 26, 1870.	Feb. 27, 1869.
Loans and discounts	$278,005,969	$268,495,642	$261,971,897
Specie	23,562,048	35,094,289	20,8[illegible]2,603
Circulation	31,720,445	35,820,905	31,247,981
Net deposits	217,629,116	211,132,943	185,216,175
Legal Tenders	57,178,468	53,771,824	50,835,054

Digitized by Google

The demand for commercial paper has been much above the supply, and rates are, if changed at all, more favorable to borrowers than before quoted.

The best class of 60 days or 3 months paper has been sold at about 6 per cent, and both city and country banks and other lenders of money have been among the purchasers. The demand for money on discount seems to be unusually small, but with the advent of Spring business and the resumption of commercial relations also with France and Germany by our importers, a better supply of commercial paper may be expected, particularly from the dry goods trade.

United States Bonds.—There has been much activity in governments during the week, with an advance on all issues, but more particularly on the 6's of 1881 and the 10-40's.

The several influences previously noticed have continued to have an important effect upon the market in stimulating business and giving buoyancy to prices. These influences were, chiefly, the action of Secretary Boutwell in placing his new loan upon the market, and thus taking a position in which his influence must necessarily be thrown on the side of higher prices; and secondly, the extraordinary ease in money which has induced purchases of bonds by bankers who generally employ their balances on call loans. The Treasury programme for March, announcing the purchase of $10,000,000 five-twenties in the month, against the sale of $7,000,000 gold, was also a source of additional strength. It is evident that opinions have materially changed among our most intelligent bankers in regard to the prospects of the new loan, and it seems now to be very generally anticipated that the five per cent. bonds will be successfully negotiated within a reasonable time. The Treasury Department has issued a statement showing the amount of the several classes of United States debt at its maximum in July, 1865, to have been $2,755,995; at the beginning of President's Grant's administration, $2,491,399; and on March 1, 1871, $2,283,145, or about $500,000,000 less than at the close of our war, six years ago. The exhibit is certainly a very strong one to send abroad as an evidence of the spirit which exists in this country in regard to paying off our national obligations.

The 6's of 1881 having positively ten years to run, have been most in favor with investors, and show an advance of about 1 per cent. Ten-forties close at 109¼ ex-coupon, against 111⅛ last week. At the Treasury purchase of $2,000,000 on Wednesday, the bids were only $4,804,600, indicating a comparatively small supply of bonds on the market, a circumstance which has undoubtedly been an important check upon large speculative operations.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, Feb. 25.	Monday, Feb. 27.	Tuesday, Feb. 28.	Wednesd'y March 1.	Thursday, March 2.	Friday, March 3.

State and Railroad Bonds.—State bonds have generally been strong on a smaller business than usual, as the attention of purchasers has been largely absorbed by the Stock Market. North and South Carolinas, Virginias, Tennessees and Georgias have been the most active.

Despatches from Alabama report that the Legislature has directed the payment of interest on all the bonds of the Alabama and Chattanooga Railroad Company in the hands of *bona fide* holders, and the Governor of the State will be in New York next week to superintend the disbursements on this account.

In South Carolina an important bill has been introduced into the Legislature to provide for the funding of the debt and other purposes, which is likely to pass and to have a favorable influence upon the bonds. A report has also been made by the Joint Finance Committee of the Virginia Legislature in favor of funding the State debt and interest overdue to July 1, 1871.

The Pacific Railroad bonds have been firm and in good demand, Central Pacifics closing at 95⅜@95½, and Union Pacifics at 85½@85⅞, Land Grants at 74⅞@75½, and Incomes at 70½@71½. On the latter bonds the March coupons are now being paid in New York and Boston.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

	Saturday, Feb. 25.	Monday, Feb. 27.	Tuesday, Feb. 28.	Wednesd'y, March 1.	Thursday, March 2.	Friday, March 3.

Railroad and Miscellaneous Stocks.—The stock market has at length responded with some life to the inducements offered for speculative operations in the easy rates of money, and there has been a more general activity in stocks than for many months before. The volume of business has been very large, orders from outsiders constituting a large portion of the transactions, a circumstance which is always regarded by the brokers with much satisfaction, as indicating the prospect of a continued healthy activity in business.

The principal features have been the Vanderbilt stocks, Western Union Telegraph and Lake Shore, all under the manipulation of the same party, Rock Island, Northwest, Wabash, Ohio and Mississippi, Columbus, Chicago and Indiana Central, Reading, St. Paul, Union Pacific and Pacific Mail. There have been no new developments in regard to the financial affairs of these companies, and the general advance has been based upon the inherent strength of the situation and the management of parties operating for a rise.

The following will show the difference betwen the quotations of last Friday and to-day:

	Feb. 24.	Mar. 3.
N. Y. Central & Hudson River	95¾	97¼
N. Y. Central & Hudson River, scrip	91¾	93¼
Lake Shore	96¾	96¾
Reading	98¾	101¾
Rock Island	107¼	112¼
Northwest, pref	87¾	94¾
Northwest, com	76¾	81¾
Ohio & Mississippi	36¾	44
St. Paul	53¼	54
St. Paul, pref	74¾	75¾
Union Pacific	28¼	32¾
West. Union Telegraph	50¾	52¼
Pacific Mail	45¾	48¾

Showing the largest advance on Union Pacific, Ohio and Mississippi, the Northwest and Rock Island. An important element to be considered in estimating the probability of a continued active business in stocks is the large amount of funds released by the Treasury purchases of bonds, which must seek some other channel for investment, and as railroad securities are becoming more and more popular a large proportion of the funds so released will undoubtedly seek employment in this direction.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

	Saturday, Feb. 25.	Monday, Feb. 27.	Tuesday, Feb. 28.	Wednesd'y March 1.	Thursday, March 2.	Friday, March 3.

The Gold Market.—Gold has been quite steady on a comparatively small business. Considerable short sales were previously made on the idea that Mr. Boutwell's funding policy would lead to a decline in the premium, and the short interest thus created is an element of strength in the market. It is still anticipated by many of the best-informed, that there will be a large export demand for specie this season, as the rates of exchange have already approached very near the shipping point—but this expectation may fail to be realized, if the new loan should be largely taken abroad, or in case of a heavy demand arising for other American securities. To-day the price was firmer and closed at 111, on the firmness in foreign exchange, and the advance of the Bank of England rate yesterday to 3 per cent. Rates for carrying have ranged from 4 to 1 per cent, and to-day they were 2, 3, 1½, 2½ and 4 per cent. At the Treasury sale of $1,000,000 on Thursday the bids amounted to $3,532,500.

The following table will show the course of the gold premium each day of the week past:

	Quotations. Opening.	Lowest.	Highest.	Closing.	Total Clearings.	Balances. Gold.	Balances. Currency.
Saturday, Feb. 25	111½	111¼	111⅝	111½	$20,575,000	$1,343,850	$1,527 886

American silver (old coinage)	1@2 p.c. premium.	Spanish dollars	2@3 p.c. premium.
		South American dollars	par.

Foreign Exchange.—The highest rates for Exchange made since the first of January were reached to-day, when prime bankers sterling bills were this afternoon put up to 109¾@109¾. This firmness was caused by a good trade demand for bills, against a moderate supply from any other source than the cotton

Digitized by Google

exports, and also by the advance in the Bank of England rate yesterday.

A considerable amount of Exchange was drawn in the early part of the week by a prominent banking house against the Massachusetts sterling loan, and the placing of Railroad loans upon the London market may also be expected to make some bills if the loans are successful. The future course of the market, however, is quite uncertain, and must depend largely upon the progress of the new United States funding loan, and the demand for other American securities in the foreign markets.

Cotton exports of the week from all ports have been 141,852 bales, worth $8,818,000 in gold, against 54,522 bales in the same week of 1870, producing then $5,015,000 in gold, with middling uplands at 23 cents, and gold at 115.

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3 The Table of Railroad, Canal and Other Stocks, on the next page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column *x=extra; s=stock or scrip.*

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q —J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of United States and State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name.

The Pacific Railroad Claims.—WASHINGTON, Feb. 23.—The remainder of the afternoon session (Senate) was taken up in considering a proposition to direct the Secretary of the Treasury to pay over to the Pacific Railroad Company half of the transportation money retained in the Treasury, which Mr. Stewart offered as an amendment. Mr. Edmunds expressed the belief that the Secretary had acted in accordance with the law, and moved to lay the amendment on the table. The friends of the railroad voted this down by 28 to 19, which vote made it evident that the measure would be passed. The chief point of contention was a proviso offered by Mr. Sherman, which was intended to reserve the right of the Government, if it has any under existing law, to collect from the Company the interest on the bonds before the end of thirty years, when they mature, if meantime the Company be comes able to repay it. This was resisted by Mr. Stewart and some others, and failed by a majority of two. After the amendment offered by Mr. Stewart had been adopted, however, a proviso to secure the same end, but different in wording was put in the bill by a *viva voce* vote. The Senate seems inclined to help the Company as long as it needs help, but disinclined to give it more power than it has under the present law, to escape refunding the interest when it has reached the degree of prosperity warranting repayment.

Senator Stewart's report from the Committee on the Pacific Railroads concludes as follows:

"The cost of the overland service for the whole period from the acquisition of our Pacific Coast possessions down to the completion of the Pacific Railroad was over $8,000,000 per annum, and this cost was constantly increasing. The cost since the completion of the road is the annual interest—$3,877,129—to which must be added one-half the charges for services performed by the Company, about $1,163,138 per annum, making a total annual expenditure of about $5,000,000, and showing a saving of at least $3,000,000 per annum This calculation is upon the basis that none of the interest will ever be repaid to the United States except what is paid by services, and that the excess of interest advanced over freights is a total loss. It is clear that it is for the interest of the Government that these roads should remain in their present hands. If the present Company should be crushed, one of two results must happen, either the roads must pass into the hands of the first mortgage bondholders, with whom the Government has a less favorable contract, or the Government must take the roads and pay the first mortgage. The last result no legislator can look upon with favor. The Committee, however, do not think it necessary to recommend any further legislation, at the present time, on the subject. The employment of these roads for Government purposes, in all proper cases, is so manifestly for the interest of the United States, that it is believed the several Departments of the Government will, under existing laws, extend to them all the patronage in their power consistent with the public interests."

A Texas Railroad Case.—In the case of Campbell *vs.* The Texas and New Orleans Railroad Company, Moran, and others, Mr. Justice Bradley, in Chambers United States Supreme Court to-day, reviewed the law and the evidence and refused to dissolve the injunction. The opinion virtually establishes that the bonds of 1861 have a priority over the bonds of 1858, as to the forty miles of railroad between Liberty and Houston. The seventy miles between Orange and Liberty will be sold separately. The equities as to the forty miles between Liberty and Houston, and as to the land certificate, will be adjusted before there is any sale as to these. Paschal and Sessions for complainants; Hale and Evarts for Moran.

The Pittsburgh Cincinnati and St. Louis Railway.—This Company held its annual meeting in Steubenville, Ohio, on the 6th of February. A summary of statistics was presented, however, from which we copy the following:

PITTSBURGH AND COLUMBUS DIVISION.

Earnings	$2,821,124 64
Expenses	2,095,009 80
Net earnings	$726,114 84

The operating expense is 74 26-100 per cent of the earnings. There is included in the expense of this year $135,351 which is properly chargeable to 1869, which amount deducted from the expenses of 1870 makes the working expense 63.60 per cent of the earnings.

The earnings per mile are $14,617.

INDIANAPOLIS AND CHICAGO DIVISION.

Earnings	$3,507,550 13
Expenses	2,834,152 02
Net earnings	$672,398 11

The operating expense is 80 82-100 per cent of the earnings, against 93 35-100 per cent for 1869. The earnings per mile are $5,974.

LITTLE MIAMI DIVISION.

Earnings, thirteen months	$2,024,675 49
Expenses	1,257,938 7
Net earnings	$766,736 77

The operating expense is 62 per cent of the earnings, against 65 per cent for last year.

The earnings per mile are $10,330. We have paid upon the Little Miami lease and rent account as follows:

Annual lease, 8 per cent on $6,000,000	$480,000 00
Little Miami & C. & X. Express	7,500 00
Interest on bonds, &c	174,205 36
Total	$661,705 86
Government tax on dividends	12,409 87
Total	$674,114 74

NET EARNINGS.

The following is a summary of the net earnings:

Pittsburgh & Columbus Division	$726,114 84
Indianapolis & Chicago Division	672,398 11
Little Miami (13 months) Division	766,736 77
Grand Total	$2,165,249 72

The Pittsburgh & Columbus Division has 193 miles of road, the Indianapolis & Chicago Division, which in this account seems to include the 314 miles from Columbus to Chicago, the 105 miles from Bradford Junction to Indianapolis, the 102 miles from Richmond to Anoka, and the 61 miles from Logansport to the Illinois line—that is all of the Columbus, Chicago and Indiana Central Railway—has 582 miles. The Little Miami Division has 197 miles of road.

The Pittsburgh, Cincinnati & St. Louis Company pays 30 per cent of the gross earnings of this division as rental to the Columbus, Chicago & Indiana Central Company. This 30 per cent for the past year amounts to about $1,050,000, which is more by $380,000 than the gross earnings of the division. Moreover, it guarantees the interest on $15,851,000 of the mortgage bonds of the Columbus Company, whether or no the 30 per cent is sufficient therefor. This year the 30 per cent, as we have seen, is but $1,050,000, while the guaranteed interest on the bonds amounts to $1,107,000. So it appears that the Panhandle Company loses $435,000 this year in operating the Columbus, Chicago & Indiana Central Railway.

But even in this statement a favorable view can be taken. For though the expenses were 81 per cent in 1870, they were 93½ per cent in 1869; and though the gross earnings were less by $22,000 in 1870, the net earnings were greater by $650,000—in fact were nearly ten times as great; for in 1869 the net earnings of these 582 miles of railroad (besides, we believe, the rental of 25 miles between Cambridge and Rushville in which this company has a half interest) were less than $76,000! Moreover, during the past year the lessee has obtained more favorable terms.

The prospect for the current year, we should say, is quite favorable. The St. Louis business, now large, is still growing, and an increase may reasonably be looked for the other lines. Morever, it is to be hoped that fair prices may be received for transportation throughout this year, which was not the case for nearly or quite one-half of last year.—*Railroad Gazette.*

Columbus, Chicago & Indiana Central.—The negotiations pending between this company and the Pennsylvania Railroad company have been satisfactorily settled and adjusted so as to leave the former free from floating debt. The guarantee of the first mortgage consolidated bonds is reaffirmed, as will appear by the following letter, signed by the Presidents of the Pennsylvania Railroad Company and Pittsburg, Cincinnati & St. Louis Railroad Company:

"PHILADELPHIA, Pa., December 1, 1870.

"*To Messrs. W, R. Fosdick and Jas. A. Roosevelt, Trustees, and A. Parkhurst, Esq., Trustee:*

"GENTLEMEN: Under the contract and lease of the Columbus, Chicago & Indiana Central Railway, dated January 22, 1869, as amended by the contract of February 1, 1870, the Pittsburg, Cincinnati & St. Louis Railway Company as lessee, which lease the Pennsylvania Railroad Company has guaranteed, will, by the terms of said lease, pay the interest as it matures on the $15,000,000 of the first mortgage consolidated bonds of the Columbus, Chicago & Indiana Central Railroad Company, or on the bonds which they represent; and on $821,000 of the second mortgage bonds of the Columbus & Indianapolis Central Railway Company, which bonds are secured by deeds of trust made respectively to you.

"You are, therefore, authorized to inform the holders of said bonds, and to give such further public notice as you may think proper, that the interest on the said $15,821,000 of bonds will be regularly paid by the Pittsburg, Cincinnati & St. Louis Railway Company, or the Pennsylvania Railroad Company, according to the tenor of said amended contract and lease. "Yours, very respectfully,

"J. EDGAR THOMSON, President.
"THOS. L. JEWETT, President."

Digitized by Google

Cincinnati & Dayton Short Line.—Important action was taken recently by two of the companies who are interested in the building of this road, by means of which a through line is to be secured from Cincinnati to Buffalo and the East, by way of Dayton, Springfield, Delaware and Cleveland. The stockholders of the Sandusky & Cleveland Company have ratified a contract granting to the Cincinnati & Springfield Company a running and business arrangement over twenty-five miles of their road, from Dayton to Springfield. The Cleveland, Columbus, Cincinnati & Indianapolis Company have assented to a contract which is also to be signed by the Lake Shore & Michigan Southern and Cincinnati & Springfield Companies, and which specifies that the Cincinnati & Springfield Company shall build or lease a road between the points indicated in their title. Twenty-five miles of this "short line" is arranged for by the action of the Sandusky Company, leaving about sixty miles, from Dayton to Cincinnati, over which a new road will probably be built. The bonds for the construction of the Cincinnati & Springfield Short Line, not to exceed two millions of dollars, are to be guaranteed by the Lake Shore and the Cleveland, Columbus, Cincinnati & Indianapolis Companies, an equal amount by each, and the road, when completed, is to be leased to, and at the end of ten years consolidated with, the Indianapolis Company. The capital stock of the Cincinnati & Springfield Railway Company is not to exceed two millions dollars, including the $500,000 bonds for rolling stock. Of the receipts on through business between Cleveland and Cincinnati, 64 per cent accrues to the Indianapolis Company and 36 per cent to the Springfield Company.

The distance from Cleveland to Cincinnati by this new route will be less than two hundred and fifty miles.—*Railroad Gazette.*

Dayton & Michigan Guaranteed Preferred Stock.—On the 15th of this month the stockholders of the C., H. & D. Co. met at the office of the company to vote upon the question of guaranteeing three and a half millions of dollars of D. & M. preferred stock, which is to be used in retiring the bonds upon that road, in compliance with the law of April, 1870.

For some reason the attendance was very small, there being only about twenty persons present, and in their own right and by proxies representing less than 12,000 shares.

The vote stood as follows:

For guaranteeing	11,205 shares.
Against guaranteeing	47 shares.

Railroad Consolidation in Missouri.—A portion of the stockholders and directors of the St. Louis and Southeastern Company, and the Evansville and Southern Illinois Railroad Company, met at the office of the former on Tuesday, and by an unanimous vote both companies were consolidated, the combined capital stock of which is nine and a half millions of dollars. To-day the directory will meet the directors of the Carmi and Paducah road, which, it is expected, will also consolidate with this company, when another and permanent organization and a new election will be held. In unity there is strength, and the three combined interests will doubtless soon complete the road, and open to St. Louis a short-air line to important points in Illinois and through to the Ohio River, one branch to Evansville and the other to Shawneetown.

Railroad Freights.—The agents of the freight combination of the New York Central, Erie, and Pennsylvania railroads recently met in this city, and completed the schedule of rates on through freights, as given below:

	1st. cwt.	2d. cwt.	3d. cwt.	4th. cwt.	Special. cwt.
Chicago	$1 50	$1 30	$1 00	$0 70	$0 55
Cincinnati	1 38	1 18	93	65	51
Louisville	1 66	1 43	1 14	81	64
Columbus	1 20	1 03	81	56	44
Cleveland	96	84	66	46	36
Detroit	1 06	91	71	50	39
Milwaukee	1 50	1 30	1 00	70	55
Toledo	1 15	99	78	54	42
St. Louis	1 89	1 63	1 29	92	73
Indianapolis	1 42	1 22	96	67	52
Sandusky	1 08	92	78	51	40
Springfield	1 24	1 06	83	58	45
Xenia	1 38	1 18	93	65	51
Quincey	1 89	1 63	1 29	92	73
Erie	88	75	58	41	32
St. Joseph	2 49	2 03	1 69	1 22	1 03
Nashville	1 95	1 68	1 34	90	76
Memphis	2 20	1 91	1 53	1 05	87
Omaha	2 50	2 05	1 75	1 20	1 05
Keokuk	1 94	1 68	1 34	97	78
St. Paul	2 80	2 40	1 85	1 40	1 25
Leavenworth	2 47	2 01	1 67	1 20	1 01
Corry	88	75	58	41	32
Franklin	1 00	85	65	45	40
Meadville	1 00	85	65	45	40

Buffalo rate unchanged.

At the same time, the following changes have been made in the classification of freights:

Jute	from	Third Class	to	Fourth Class.
Fence wire	"	Fourth "	to	Special "
Pig lead	"	Fourth "	to	Special "
Soda Ash	"	Fourth "	to	Special "
Caustic Soda	"	Fourth "	to	Special "
Crockery (in crates)	"	Fourth "	to	Special "

—A dispatch from Baltimore, dated Feb. 28, states that the Baltimore and Ohio Railroad Company have reduced their freights from Baltimore to all western points, to correspond with the recent reduction from New York.

Provision for the State Debt of Virginia—A Sinking Fund to be Created.—RICHMOND, Va., March 1.—The Joint Finance Committee to-night agreed on a bill which will be reported to the Legislature to-morrow. It provides that the holders of all bonds, stocks, &c., of the State, except the five per cent dollar bonds and what are known as sterling bonds, may fund two-thirds of the amount of the same, together with two-thirds of the interest due or to become due to July 1, 1871, in six per cent coupon, or registered bonds, payable thirty-four years after date, or at the pleasure of the State. After ten years the interest to be paid semi-annually. The five per cent dollar bonds may be funded in a like manner but to bear only five per cent interest for the other one-third of the amount. Certificates are to be issued payable, the interest in money and the principal in bonds, whenever the State of West Virginia shall have assumed and paid her portion of the public debt. The bill also provides for a sinking fund, and the act goes into effect on its passage.

Dubuque & Sioux City Railroad.—The earnings of road under lease to Illinois Central Railroad Co. were as follows:

	1869.	1870.
Gross earnings	$1,290,508 63	$1,184,822 82
Net earnings	442,558 28	393,598 40
Drawback to I. F. & S. C. RR. Co	9,119 72	21,089 54

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, March 3, 1871.

The uncertainty which prevailed respecting the course of political affairs in France, interferred with business early in the week, and gave a very irregular course to prices; the close showing very little improvement in tone. The weather has been mild, and promises an early opening of inland navigation, which usually stimulates business in heavy and bulky articles. The great yield of the last crops of our leading agricultural staples—Cotton, Breadstuffs, Provisions and Tobacco—may lead to a larger spring business than usual.

The following is a statement of the stocks of leading articles of merchandise at dates given.

	1870. Mar. 1.	1871. Feb. 1.	1871. Mar. 1.
Beef.....tcs. and bbls.	28,028	26,851	32,069
Pork.....bbls.	41,390	56,672	76,547
Tobacco, foreign.....bales.	18,449	20,726	23,482
Tobacco, domestic.....hhds.	12,720	14,518	12,779
Coffee, Rio.....bags.	44,452	17,580	11,687
Coffee, other.....bags.	16,650	29,607	17,320
Coffee, Java.....mats.	14,558	....	38,553
Sugar.....hhds.	47,709	24,277	30,829
Sugar.....boxes.	75,518	38,103	30,960
Sugar.....bags, etc.	272,200	354,826	366,965
Melado.....hhds.	742	1,670	1,694
Molasses.....hhds.	19,149	6,528	7,409
Molasses.....bbls.	2,500	3,000	2,686
Hides.....No.	49,000	57,400	145,850
Cotton.....bales.	85,000	81,700	107,000
Rosin.....bbls.	47,000	26,961	28,400
Spirits Turpentine.....bbls.	5,740	6,749	5,014
Tar.....bbls.	15,900	11,096	10,140
Rice, E. I.....bags.	6,580	6,555	3,000
Rice, Carolina.....casks.	3,650	....	500
Gunny Cloth.....bales.	7,100	12,100	13,300
Gunny Bags.....bales.	7,100	11,800	12,100
Linseed.....bags.	117,100	89,700	111,100
Saltpetre.....bags.	5,300	15,077	16,950
Jute and Jute Butts.....bales.	7,000	21,400	18,100
Manila Hemp.....bales.	33,230	32,854	35,640

The Tobacco market has been quite active, if we consider the limited stocks available, and prices are steady. The sales of the week are about 800 hhds. of which 500 hhds. for export, mostly new crop, at 6½@7c. for lugs and 7½@8½c. for low and medium leaf, no prices being made as yet for the finer qualities; 300 hhds. mostly to cutters, were principally old crop at 7½@11½c. for common to fine leaf. Seed leaf tobacco has arrived freely, and as freely been taken for home use and export, being much wanted. The sales have been as follows: Pennsylvania, new crop, 100 cases at 23c.; 100 cases, 100 do., 56c.; do., 100 do. and 250 do, old crop, all on private terms; Ohio, new crop, 172 cases, 20c.; 103 do., private terms; Connecticut, new crop, 75 cases on private terms; do. old crop, 59 cases, 58@60c.; 150 do., 50c.; 150 do., 45@60c.; 111 do., private terms. Massachusetts—29 cases crop of 1869, 32c. Spanish Tobacco has also had a free sale including 100 bales new Yara, two cut, on private terms, and 600 bales Havana at 85@95c.

Provisions have been only moderately active, and bag products have had a downward tendency, but with a stock well concentrated has prevented any decided break in prices. Mess Pork closed to-day at $21 75@$22, Prime Mess $21@$21 25; Lard 13c. for Prime Steam; Bacon 11@11½c. for long clear and short rib. Beef, however, has met with more demand for export, with liberal sales of Western Prime Mess, at $27@$27 75 per tierce. Cheese continues much in demand for export, with choice dairies at 16½c., and some held higher, but including some very poor stock at 3@4c. Butter less active and barely supported.

In metals, the chief interest centers in American Pig Iron, which, in consequence of the suspension of production caused by the impossibility of procuring coal, has advanced to $33 for No. 2 and $35 for No. 1. This, however, has not as yet done more than strengthen Scotch Pig.

Hides have been active, and prices at the close show an advance of ½c. gold for South American—Montevideo selling at 23¾c. Skins and Leather quiet. Tallow dull and rather weak.

Wool has shown much activity in all grades, with prices tending upward, and stocks mostly in the hands of dealers. Several hundred bales of South American Sheep-skins have been sold.

Freights have been fairly active, but the speculative values at which Flour and Wheat are held, with a scarcity of Corn, and some increase of room on the berth. Rates have declined. To-day, the Liverpool steamers took Grain at 6@6½d.; Cotton, 9-32d.@11-32d.; Lard, 35s., and Grain was shipped to Glasgow by sail at the same rates.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns shows the exports of leading articles of commerce from the port of New York since January 1, 1871, to all the principal foreign countries, and also the *total* export of the same articles for the last week and since January 1.

COTTON.

FRIDAY, P. M., March 3, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening March 3. From the figures thus obtained it appears that the total receipts for the seven days have reached 126,935 bales against 136,661 bales last week, 141,957 bales the previous week, and 161,095 bales three weeks since, making the total receipts since the first of September, 1870, 2,917,616 bales against 2,189,513 bales for the same period of 1869–70, showing an increase since September 1 this year of 728,103 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	55,549	37,448	Florida bales.	195	854
Mobile	10,852	5,924	North Carolina	1,963	1,048
Charleston	7,019	3,238	Virginia	9,887	3,176
Savannah	19,660	7,274			
Texas	10,216	7,953	Total receipts	126,935	78,197
Tennessee, &c	11,594	6,783	Increase this year	53,738	....

The exports for the week ending this evening reach a total of 141,872 bales, of which 99,400 were to Great Britain, and 42,472 to the Continent, while the stocks at all the ports, as made up this evening, are now 659,708 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Week ending March 3.	Exported to—		Total this week.	Same w'k 1870.	Stock.	
	G. Brit	Contin't			1871.	1870.
New Orleans	40,418	28,754	69,172	24,416	266,324	254,966
Mobile	11,345	279	11,624	1,006	78,105	71,854
Charleston	2,276	2,662	4,938	3,702	31,362	21,916
Savannah	19,409	8,758	28,167	6,194	85,464	61,149
Texas	2,485	1,710	4,195	3,053	62,453	49,349
New York	21,486	3,663	25,149	16,297	104,000	75,000
Other ports	1,981	1,616	3,627	254	32,000	32,500
Total	99,400	42,472	141,872	54,532	659,708	568,764
Total since Sept. 1	1,495,715	852,591	1,848,306	1228,014	....	....

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 87,350 bales, while the stocks to-night are 90,944 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Feb. 24, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1.		EXPORTED SINCE SEPT. 1 TO—				Northern Ports.	Stock
	1870.	1869.	Great Britain	France	Other Forign	Total.

The natural result of the accumulating receipts has been reached the past week in a decline of ⅛c. for middling uplands, and of ¼c. for ordinary. All other considerations have been lost sight of; even the settlement of the difficulties in Europe has had no influence, as the Cotton which is pouring in at the Southern ports is thought to furnish the surest proof that the supply is more than sufficient to meet any possible demand. Under this accumulation of stock, holders have lost heart, so that offerings have been large attended with considerable pressure to sell. At the same time buyers have held off, spinners taking only to a limited extent, while shippers have been prevented from purchasing freely on account of the dullness and lower rates at Liverpool. The close to-night was without any improvement in tone, the market continuing depressed, Middling Uplands being quoted at 14¼c., and Low Middling at 13⅞. For forward delivery there has been a corresponding decline on the earlier months, and from 1 @ 1¼c. on the later rates, showing the prevailing sentiment as to the effect of the increased estimates of the crop. The closing quotations were for March, 13⅝c.; for April, 13¾; for May, 13⅞; for June, 13¾; for July, 14, and for August, 14¼. The total sales of this description for the week, (including 2,050 bales free, on board, but not including bales "Exchanged") have been 101,750 bales. For immediate delivery the total sales foot up this week 18,965 bales, including 1,784 bales to arrive, of which 4,145 bales were taken by spinners, 288 bales on speculation, 13,771 bales for export, and 761 bales in transit. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	11⅝@....	11⅝@....	12 @....	12⅜@....
Good Ordinary	12⅝@....	13 @....	13⅛@....	13⅝@....
Low Middling	13⅜@....	13⅝@....	14⅛@....	14⅜@....
Middling	14⅜@....	14⅝@....	15⅛@....	15⅛@....
Good Middling	16 @....	16⅛@....	16⅝@....	16⅜@....

Below we give the total sales of cotton and price of *Uplands* at this market each day of the past week:

	Total sales.	Ordinary.	Good Ordinary.	Low Middling.	Middling
Saturday	2,194	12⅛@....	13⅜@....	14⅛@....	15⅝@...
Monday	3,848	12⅜@....	13⅝@....	14⅜@....	15⅛@ ..
Tuesday	2,875	12⅛@....	13⅜@....	14⅛@....	15⅛@....
Wednesday	2,651	12 @....	13⅛@....	14⅜@....	15⅛@....
Thursday	2,919	11⅞@....	13⅛@....	14 @....	15 @....
Friday	4,477	11⅝@....	12⅞@....	13⅞@....	14⅛@....

For forward delivery the sales (including 2,050 free on board,) have reached during the week 101,950 bales (all low middling or on the basis of low middling), and the following is a statement of the sales and prices:

For February. bales.	cts.
70	14⅝
1,500	14 7-16
2,200 total Feb'y.

The sales during the week of free on board have reached 2,050 bales. The particulars of these sales are as below:

300 free on board at Galveston p. t.	200 free on board at Savannah p. t.
1,500 free on board at Mobile p. t.	2,050 total.

The following exchanges have been made during the week:

5-16c. paid to exchange 700 March for 700 May.
⅜c. paid to exchange 700 March for 700 May.

WEATHER REPORTS BY TELEGRAPH.—Our telegrams report that at Mobile, Selma and Montgomery, Alabama, and at Macon and Columbus, Georgia, it has rained two days during the latter part of the past week; at Savannah it has been warm and dry, and at Augusta the same, with the exception of one rainy day; at

Digitized by Google

Memphis, Tennessee, it has rained three days, and at Nashville two days. The thermometer at Mobile has averaged 61; Selma, 64; Montgomery, 59; Charleston, and Macon, 58; Columbus, 55; Galveston, 65; Memphis, 58.

RECEIPTS.—The receipts continue extremely large for this season of the year, footing up to-night 126,935 bales, and surpassing in extent all expectation. At the interior ports, with the exception of Memphis and Nashville, the arrivals have been but little in excess of last year, but at the two ports named they are still very free. A count of stock taken at Memphis this week has brought to light 8,000 bales not included before, which is the reason for the increase in stock at the interior ports to-night.

A PAYING PRICE FOR COTTON.—It has been a surprise to many that the Southern planters are not better off to-day. They have marketed several cotton crops at high prices, and yet now that the quotation has fallen to a low point they (that is, the large majority of them) appear to have nothing laid up to fall back upon, and many are even discussing the question whether raising cotton after all is not a failure. Before the war ten cents per pound to the planter was supposed to be a good paying price; that even a higher figure has since not paid them would appear to be proved from the fact stated above. And yet this past experience is not conclusive as to the future, although it sheds considerable light upon it. Why then is the Southern planter in no better condition?

First. Evidently because cotton and other agricultural products cannot, even with the greatest economy, be raised as cheaply as formerly.

Second. But chiefly because the Southern planters are not thrifty, careful, economical managers. This point was very well stated by General Colquitt, in an admirable speech made by him last week at the Georgia State Agricultural Convention, of which society he is President. He clearly showed that until they learned how to save in little things, to manage prudently and wisely, and raise their own food, success was not possible. All this knowledge, however, is not of spontaneous growth—it is only attained by severe experience. In this view the present low prices may be of great benefit, inasmuch as they will enforce thrift and economy, and year by year make possible cheaper cotton.

Third. Again, the debt the planters incur and the ruinous rates of interest which they pay to extend cultivation have helped to sap the profits of past years, or, in other words, increase largely the cost of production; and for this there would appear to be no remedy except in decreased cultivation. As General Colquitt very forcibly puts it—"if the planter wants a mule in order to cultivate more land, and has not the money to purchase the mule, let him cultivate less land and do without the mule." Experience teaches that no other course is safe.

A natural conclusion from these facts is that no accurate statement can be made of the present actual cost of the production of cotton to the planter. That he is worse off to-day than at the beginning of this season is evident. Whether he is likely to keep up the production on the present scale with present prices our readers can judge as well as we.

GUNNY BAGS, BAGGING, &c.—Cloth contiues in light request, but about former prices rule steady. The only transaction we hear of is 700 rolls Domestic in Boston at 20c. currency, 60 days. Bags have not moved very freely, but the quotations of last week are still current. Sales here and in Boston are 1,250 bales, part to arrive, at 10¼@11c. gold, in bond. Hemp meets with only a fair sale at 10@10½c. gold, for Manila on spot. Sales are 1,100 bales from store per "Glen Allen," and 500 to arrive per "Ringleader," both on private terms. Also, from store, 1,219 bales Sisal, and 72 bales Tampico, also on private terms. Jute is dull and nominally as before quoted. Jute Butts are in good demand for consumption and speculation at fair prices. The sales are 300 bales ex "Carrisbrook Castle," 4¼c. currency, 60 days; 175 ex "Naturalist;" 500 ex "Riversdale," at same price and time; 500 ex "Kings Bridge," at 4c. currency, and 1,500 bales to arrive at 3¾c. gold. In Boston, 500 bales to arrive ex "Lincoln," and 500 bales ex "Mt. Washington," at 3¾c. gold.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	Week ending Mar. 3, 1871.			Week ending Mar. 3, 1870.		
	Receipts.	Shipments.	Stock.	Receipts.	Shipments.	Stock.
Augusta	3,008	2,587	23,047	2,303	3,678	23,635
Columbus	1,196	797	12,547	712	380	13,859
Macon	1,226	2,693	14,219	529	908	16,208
Montgomery	1,938	2,587	8,755	1,087	12,413	11,759
Selma	1,153	1,401	8,612	787	1,505	7,047
Memphis*	15,523	17,489	47,258	5,454	4,337	23,460
Nashville	3,380	2,967	8,847	1,163	1,032	5,416
	27,424	30,521	123,285	12,035	24,253	101,384

*A new count of stock was taken at Memphis this week, and 8,000 bales added to stock.

These totals show that the interior stocks have increased during the week 4,903 bales (being now 21,901 bales more than for the same period of last year), while the aggregate receipts are 15,389 bales more, and the shipments 6,268 bales more than for the corresponding period of 1870.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons we are again without our usual cable dispatch to-night, and give therefore for stock and American, afloat, the figures of last week:

	1871.	1870.
Stock in Liverpool bales.	764,000	292,000
Stock in London	78,233	75,136
Stock in Glasgow	350	300
Stock in Havre	43,870	80,500
Stock in Marseilles	4,600	4,600
Stock in Bremen	2,750	6,700
Stock rest of Continent	25,000	30,000
Afloat for Great Britain (American)	294,000	286,000
Afloat for France (American and Brazil)	....	43,560
Total Indian cotton afloat for Europe	143,495	101,336
Stock in United States ports	659,708	568,764
Stock in inland towns	123,285	101,384
Total	2,139,290	1,590,280

These figures indicate an *increase* in the cotton in sight to-night of 547,010 bales compared with the same date of 1869.

The exports of cotton this week from New York show an increase since last week, the total reaching 19,010 bales, against 14,571 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 129,113 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in THE CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night:

	Total bales.
NEW YORK—To Liverpool, per steamers City of Manchester, 618....Pennsylvania, 2,599....Calabria, 1,200....Colorado, 2,808....Abyssynia, 1,511....Donati, 1,251....City of Brooklyn, 1,011....England, 2,589....per ship Crusader, 2,068....per barks Aphrodite, 474....Kong Oscar, 830....Osceola, 301	17,260

Included in the above totals are 48 bales from New York to Gibraltar, and 200 bales from New York to Trieste.

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 110¾ and 111⅛, and the close was 111. Foreign Exchange market is stronger to-day. The following were the last quotations: London bankers', long, 109⅝@109¾; short, 110½, and Commercial, 109⅛@109¼. Freights closed at 9-22@11-32 by by steam and ¼@5-16d. by sail to Liverpool.

BY TELEGRAPH FROM LIVERPOOL.—

LIVERPOOL, March 2, 4:30 P. M.—The market has ruled dull to-day, with a downward tendency, with sales of the day footing up 8,000 bales, including 1,000 bales for export and speculation. The sales of the week ending February 24 were 84,000 bales, of which 17,000 bales were taken for export and 5,000 bales on speculation. The stock in port is 764,000 bales, of which 400,000 bales are American. The stock of cotton at sea bound to this port is 444,000 bales, of which 290,000 bales are American.

BREADSTUFFS.

FRIDAY P. M., March 3, 1871.

The market for flour and grain the past week has not been active, but prices have ruled very firm, with flour, wheat and corn showing some advance.

The receipts of flour have been moderate, and prices have ruled firm. During Saturday and Monday there was considerable speculation, but this subsided on Tuesday, and the market has since been somewhat unsettled, with buyers of lines of Shipping Extras at $6 75@6 85, and selling at $6 90@7 00, delivered, and this difference has been sufficient to prevent much business being done. The local trade has been active, and the medium and better grades have sold freely at full or better prices. To-day Shipping Extras were doing rather better, at $6 80@6 90, with some choice at $7.

Wheat has been inactive since Monday but at full prices. The stock on hand is much reduced, while fully two months must elapse before we can receive any supplies except such as come forward by rail, consequently holders show no disposition to give way in order to effect sales, and for the limited business going, they name their own prices. Two ship loads of Amber Winter were taken for the continent early in the week, at $1 63, in store, and the same quality sold to a considerable extent to-day at $1 65 in store; No. 1 Spring was quoted at $1 58, with some holders not offering under $1 60.

Corn has met with a large and pressing export demand, with a steady trade, and, although supplies have been considerably increased, prices are higher. At to-day's market prime Western Mixed was taken quickly at 86@86½c., and Yellow at 87@88c. Western and Southern White Corn dull and unsettled.

Rye has remained quiet. Barley opened active and some advance was established, but the market for two or three days has been quiet, though firm.

Oats also opened the week with considerable speculative activity, but the close is dull, with the early improvement not fully sustained.

The following are the closing quotations:

Flour—		Wheat, Spring, bush	$1 45@1 59*
Superfine	$ bbl. $6 00@ 6 40	Red Winter	1 54@ 1 57

*Estimated.

GROCERIES.

FRIDAY EVENING, March 3, 1871.

The general market for groceries has been somewhat irregular, Coffee showing a slight improvement, Spices ruling firm, Teas steady, while Sugars declined materially and Molasses was barely sustained. The changes in values, however, appear to be merely the shaping out and getting matters into position preparatory for the Spring trade, and the indications of a better business within a week or two are considered as more encouraging. Importers have in some instances forced matters a little by offering freely from current arrivals, especially where the stocks coming to hand were undesirable, but there was no "slaughtering" of goods, nor are the accumulations becoming too heavy to be carried with ease.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black....	6,902 pkgs.	Laguayra ..	500 bags.	Sugar, Brazil.	801 bags.
Green.....	8,044 pkgs.	Other.....	1,742 bags.	Manila, &c..	25,888 bags.
Japan.....	2,419 pkgs.	Sugar, Cuba..	8,902 boxes.	M'lass'es, Cuba	2,367 hhds.
Various.....	2,587 pkgs.	Cuba.....	7,270*hhds.	Porto Rico.	244*hhds.
Coffee, Rio....	15,556 bags.	Porto Rico	130*hhds.	Demerara..	63*hhds.
Java	2,340 mats.	Other.....	1,162 hhds.	Other.....	....*hhds.
Maracaibo..	2,520 bags.		*Hhds. include bbls. and tcs. reduced		

Imports this week have included 4,800 bags Rio, and 3,390 bags of other kinds of coffee; good receipts of sugar and molasses, including 3,719 bags Brazil, and 27,212 bags Manila sugar.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at date.		Imports at leading ports since January 1.

TEA.

We still find business a little slow and the market without particularly new or interesting features. Japans have been almost entirely neglected and are supposed to be quite weak, though the absence of business places values in a nominal condition. Oolongs were also du., as the pretty large distribution early in the month met the wants of the most anxious buyers. For Greens there has been some little inquiry, and holders are making all out of it they can with a result thus far of a somewhat firmer tone on choice qualities, partly in sympathy with a corresponding feeling in Europe, and of late holders have commenced withdrawing samples, preferring to await further developments before entertaining the bids buyers are now making. The line trade has been fair at full market quotations. We learn of sales part extending over a period of ten days of 15,364 packages Greens; 3,400 packages Oolongs; and 400 packages Souchongs.

Imports this week have included 119,868 lbs. Black, and 567,833 lbs. Green, per "Anglo Saxon," from Shanghae; 376,906 lbs. Green, and 3,519 lbs. Japan, per "Yokohama," from Shanghai; 76,947 lbs. Black, per "Oseeola," from Hong Kong: 364,851 lbs. do, per "The Cedars," from Amoy; 29,282 lbs. Green, per "Nesutan," from Hong Kong; and 737 pkgs.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871	3,315,160	7,706,676	3,304,152	14,325,988
1870	6,046,623	4,037,453	609,548	10,693,624

The indirect importations, including receipts by P. M. Steamers via Aspinwall, have been 5,312 pkgs. since January 1, against 5,262 last year.

COFFEE.

The entire market has shown a very strong tone throughout, and in some instances there is a slight improvement in values, with sellers rather indifferent operators even at extreme figures, and rather inclined to withdraw samples. On Brazils the week opened with quite a sweeping movement, one of our leading jobbing houses taking up all the desirable parcels available, especially the present arrivals per steamers, and the inquiry has since been quite fair, materially reducing the stock in first hands. The stimulating influence to break the previous feeling of apathy was in the main to be attributed to late favorable accounts from Rio Janeiro, and prices were worked up to a fractional advance, where they have remained quite steadily on all grades, with importers showing much confidence as the accumulation here is reduced to a mere nothing for the season, and cannot receive many additions for some time to come. Buyers object to current values as unwarrantably high, and are generally indisposed to operate except through the most positive necessity, but the position is against them for the time being and they are compelled to submit. Java still moves only to the extent of the ordinary jobbing business from second hands, but holders appear to lose no confidence and will enter into no negotiations except at extreme prices. West India grades have been quiet, principally owing to the absence of really desirable supplies of magnitude, as buyers can be found looking for goods, and their views appear to be nearly or quite up to those of holders. The jobbing business has rather increased and full prices were generally realized. Sales here of 19,581 bags Rio, and 2,850 to arrive; 2,400 bags Laguayra, 2,518 bags Ceylon, 12,700 mats damaged and 8,600 mats sound Java, 150 bags Maracaibo, 1,052 bags Savanilla, 250 bags Jamaica, 1,700 Gonaives, 786 bags St. Domingo for export, beside 500 bags shipped direct.. Sales at Baltimore of 3,179 bags Rio, and at New Orleans of 9,500 bags do.

Imports of Rio this week have included 4,800 bags, per "Countess of Dudley." Of other sorts, the imports have included 2,880 bags St. Domingo, per "La Cayenne;" 2,087 bags Maracaibo, per "Ynes;" 2,525 bags Laguayra, per "A. B. Patterson;" and 203 bags of sundries.

The stock of Rio Mar. 2, and the imports since January 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.
Stock	10,637	...	9,328	7,900	8,103	1,000	36,963

* Includes mats, &c., reduced to bags. † Also, 88,553 mats.

SUGAR.

The market for Raws has been in a feverish unsettled condition since our last, but the changes in value were in buyers' favor and quotations are again generally reduced. Importers finding the arrivals pretty free, and the stock accumulating to an uncomfortable extent, and looking in vain for an increase in the outlet, at last determined to force one, and under liberal offerings the market at once broke down and for a time became a little demoralized. The anxious sellers, however, having unloaded, the decline was checked and values became more steady, though there was no reaction and the demand did not greatly increase. Buyers, indeed, found nothing to encourage a very free movement, the wants of the Trade still proving quite limited and Refiners finding the sale of their product diminishing rather than increasing with prices shrinking almost daily. All grades of Raws have fallen off in value, but the reduction as before noted is most decided on the new crop Muscovado, some lots of which are in a most miserable condition, and much better sold at once than allowed to accumulate expenses by being placed in store. Centrifugal grades continue to be quite a favorite and from these all classes are making selections. Refined sold slowly and with a pretty good supply and assortment offering prices fell off on all grades. At the concession a few more orders were filled and there was said to be some demand for export, though the latter has not amounted to much as yet in the way of actual business owing in part to a misunderstanding as to the amount of drawback to be obtained. Sales of 3,653 hhds. Cuba; 28 hhds. Porto Rico; 863 hhds. Martinique; 245 hhds. Demerara; 587 hhds. New Orleans; 8,071 boxes Havana; 466 baskets Batavia; and 526 hhds. Melado.

Imports at New York, and stock in first hands, Mar. 2, were as follows:

MOLASSES.

The anticipations of some increase in the demand for foreign stock have no been fully realized, partly because Refiners have received and withdrawn from bond a good many parcels on direct importation, and to some extent because

Digitized by Google

the ruinous cost at which coal has been placed entirely shuts off the already very small margin for profit held by manufacturers. Holders of the stock have not been obliged to contend against any material increase of the accumulation in the meantime, and as a rule refrained from urging business, though in the majority of cases quite willing to entertain any reasonable negotiation. On what is left of the old crop values are nominal, and the position is not much better on the new crop for the time being that the disposition is not to conced to any extent from the modifications made last week, while choice grocery styles continue to job out at full figures. The supply of domestic is gradually working down at irregular figures on the common and medium grades, but prime stock shows a pretty steady tone. Sugar House Molasses continues in demand and is rather firmer, with most of the sales now at 25c. in bbls. and 22c. in hhds., the demand as before on Southern account principally. Sales of 693 hhds. Cuba Muscovado; 250 hhds. Porto Rico; 175 hhds. Demerara; and 2,423 bbls. New Orleans.

The receipts at New York, and stock in first hands, Mar. 2, were as follows:

*Including tierces and barrels reduced to hhds.

SPICES.

There is really nothing interesting to report on this market for the present, the invoice trade moving very moderately for want of supplies, and business in a wholesale way does not amount to enough to make a basis for quotations. The feeling among importers as a rule is very strong however, and they are confident that whatever may come to hand will readily sell at extreme rates. In a jobbing way the movement keeps up to about the ordinary average, and dealers have the position so well under control that it is pretty much the old story and any reasonable price asked is obtained.

FRUITS, &c.

The demand for all descriptions of Foreign Fruits is limited to the jobbing wants of the trade. Layers are not quotably lower but the feeling is less steady, and lots are not bid on by buyers. Prunes are still held very confidently, but business at the moment appears to be very light. Currants have been dealt in rather sparingly, but former prices were steady. Nuts early this week were fairly active, especially Walnuts, at a material advance in prices. Languedoc Almonds also were in fair demand and higher. Sardines are quite dull, and though not quotably lower, can be bought on easier terms. Citron is firm but quiet.

Foreign Green box fruits have continued in full supply, and comparatively low prices rule. Oranges sell from store at $2 50@3 25, and Lemons $3 50@ $4 00 per box. West India kinds are not plenty and rule higher. Oranges selling at $10@12 per bbl. Baracoa Cocoanuts $35@40 per thousand. Carthagena do. sell from store at $70 per thousand. There have arrived since our last some 2,000 bunches Aspinwall Bananas, which are jobbing from store at $2@3 per bunch.

Domestic Dried are quiet again for Apples, and prices are easier, except perhaps, for the choicest kinds; the decline is caused by heavier receipts of State, and the subsidence of the speculative demand, which has been apparent for some time past. Blackberries are in fair demand, but the firmness of holders restricts transactions. Pitted Cherries are steady and selling fairly. Raspberries are doing better. Other kinds are quiet on account of small offerings and high prices.

Domestic Green are in small demand for apples, but the best kinds rule very steady. Prime cranberries in crates sell well at steady prices. We quote apples $4@4 50 for good to best, and cranberries $3 50@4 per crate.

ADVICES FROM PRODUCING MARKETS.

Tea.—From Messrs. Aug. Heard & Co.'s circulars we have particulars of China markets to the following dates:

Shanghae, Jan. 13, 1871.—The business of the past month had been limited, owing to the reduced stocks and the interruption occasioned by the holidays. With Great Britain the season was nearly over, there being but little more Black Teato go, and for Greens the London market offered no inducements. Consequently, of the 40,000 half-chests Green Tea settled during the month, 27,000 half-chests were supposed to be for American account, which was a small business compared with previous months. The tsock of 40,000 half chests was composed of inferior quality. The quantity to be received was stated to be very small, and the whole crop was likely to fall four millions of pounds short of last seasons. It was noteworthy that the average weight of half-chests this season (1870-71) was about 3 pounds less than last year, owing, probably, to there being less dust, many exporters having sifted before shipping.

	Pounds.
Total receipts Green Tea at Shanghae from June 1, 1870, to January 11, 1871, including shipments, stocks, and that now loading	26 066,614
Same time last season	29,109,639
Deficiency this season	3,042,995

Amoy, Jan. 7.—Season is over. No stock. No vessels loading. Exports to the United States have been 6,260,588 pounds; exports. to Great Britain have been 1,155,528 pounds.

Foochow, Jan. 5.—A good business in Congous for London and the colonies had been done, and upwards of 28,000 half-chests had found buyers. In Oolongs there had also been large transactions, and Teamen had made some concessions. Total settlements about 35,000 half-chests; stock about 62,000 half-chests.

Yokohama, Jan. 23.—Large transactions had taken place, without much change in quotations. The favorable condition of the New York market (reported by last American mail) greatly increased the business. The bulk of the stock was of poor quality, and fine teas were firmly held.

The following shows the quantity of Tea afloat for the United States at late dates (not including San Francisco), and which has not yet arrived:

Date of sailing, 1870-71.	Name of Vessel.	From.	Cargo. Black. lbs.	Cargo. Green. lbs.	Cargo. Japan. lbs.	Total. lbs.

Rio Coffee.—Messrs. Wright & Co.'s telegram, dated Rio de Janeiro, 6th February, 1871, reports: Sales coffee for United States since 23d January, 25,000 bags; shipments, 71,000 bags; loading, 30,000 bags; stock at date, 76,000 bags. Exchange, 23¾d.

Manila Sugar.—Messrs. Peele, Hubbell & Co.'s *Market Report* of Jan 3, 1871, gives us annual statistics in addition to the quotations. The past fortnight there had been contracts for 5,000 piculs superior, at $4 75 for China; no inquiry existed for lower grades. The firmness on the part of dealers prevented transactions, as buyers could be found at about last rates. The Government has published a new tariff, to go into effect on July 1, 1871, by which the duty on sugar is 17c. per 100 kilogrammes. Exporters make this 11c. per picul on invoices.

Export of sugar from Manila for 1870:

	U. S. Atlantic Ports.	California.	Great Britain
1870	804,637 piculs.	65,608 piculs.	648,756 piculs.
1869	843,969 "	120,741 "	512,578 "

Five years export to United States:

1868.	1867.	1866.	1865.
185,613 piculs.	98,502 piculs.	85,842 piculs.	66,640 piculs.

Of the 804,637 piculs to United States in 1870 there went to Boston 81,080, to New York 273,557.

THE DRY GOODS TRADE.

FRIDAY, P. M., March 3, 1871.

The volume of business has not increased materially since our last report, but the demand for goods is becoming more general, and is confined less exclusively to any particular line than for some weeks past. Jobbers are doing a better trade in all departments, but the demand is chiefly on the larger houses, the small jobbing trade still reporting an absence of any spirited inquiry. There is a moderate increase in the demand for all classes of foreign goods with both importers and jobbers, but the movements in domestics are quiet at the moment, in consequence of the heavy movements earlier in the season.

The market is well supplied with buyers from the West, Southwest and South, with a sprinkling from the State and other near localities. The extremely mild and Spring-like weather during the week has been beneficial to trade in bringing in many dealers from the interior who had apparently anticipated a late Spring, and were delaying their purchases in consequence. The season's business is still backward, and is far below that of a corresponding period last year, but the prospects are none the less encouraging for an active and profitable season; yet, although it will doubtless be a short one, unless, as many dealers expect, buyers take only small amounts, and purchase more frequently during the remainder of the Spring in such lots as are required to replenish their assortments, in which case the trade would drag well into the Summer.

Prices are steady as the rule, no important changes having occurred, excepting in Prints, which have experienced a reduction of ¼c. per yard. Payments are made promptly when due, so far as we are able to learn, and the financial condition of the trade throughout the country seems to be healthy, though in some sections funds are a little cramped.

DOMESTIC COTTON GOODS—Are meeting a more general demand, but the aggregate movements show little, if any, improvement over those of the preceeding week, as there are fewer large dealers purchasing, now, than at that time. Brown sheetings and shirtings, in standard grades, are in good request, and some of the principal makes are sold close to production. Prices are firm, but do not appear likely to advance, as the breaking up of winter is affording the manufacturers more water power, and the production is slowly increasing. Bleached goods are not selling so freely as during a few preceeding weeks, but the demand is still equal to the supply, and is sufficient to firmly maintain prices. No further advances have been made, and we do not learn that any are contemplated. In any event it would be well for agents to bear in mind the fact that dealers in the interior, in their purchases made early in February, in expectation of higher prices, anticipated their wants for some time to come, and will, in consequence, be light purchasers.

Prints have been reduced to 10½c. for standards, with the exception of Cochicos, Merrimacs, Pacifics, Dunnells and Hamiltons which remain at the former prices. The two latter will probably be marked down soon, but the other brands seem to be well sustained. The trade has not picked up, to any extent, since this reduction, but will, it is thought, as soon as the market becomes a little more settled.

DOMESTIC WOOLEN GOODS.—The demand for fine and medium light weight fabrics, suited to the current wants of the trade, shows some improvement, though the movements from first hands are hardly satisfactory. Jobbers are doing but little as yet, retailers having scarcely begun their purchases, though there is more inquiry for medium grades of goods. There is a small movement in heavy weights for the use of clothiers' Fall trade, and a majority of the mills are preparing for the manufacture of these goods, the production of light weights having about ceased. Cloths are moving well at full prices, which are considerably higher than those current early in the year. Cotton warp goods are moderately active, but are not in very liberal supply.

FOREIGN GOODS.—There is a fairly active trade doing in dress goods in first hands and with jobbers. Trade is improving somewhat with jobbers, though the sales of all fabrics are still made in small lots. Silks sell freely in high cost gros grains, and are becoming scarce. Lower priced fancy silks are moderately active, but importers are not inclined to press sales at the current prices, which are kept down by the extensive offerings of a leading retailer, at prices but little above the cost of importing. Linens continue fairly active in housekeeping goods, with a more liberal distribution by jobbers. The market for all linen goods continues stiff, both here and in Europe, and prices tend upward abroad, as the continental markets are opened. Linen handkerchiefs are particularly firm, a leading importer of these goods informing us that he yesterday received advices from his house in Ireland to the effect that linen cambric goods had advanced 15 per cent.

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of leading Jobbers:

BROWN SHEETINGS AND SHIRTINGS are in fair demand, as compared with other goods, and prices are fully maintained. We annex quotations: Amoskeag A 36 12½, do B 36 12, Atlantic A 36 13, do D 11, do H 12½, Appleton A 36 13, Augusta 36 11½, do 30 10, Bedford R 30 8½, Boott O 34 10½, Commonwealth O 27 8, Grafton A 27 8, Great Falls M 36 11 do S 33 10, Indian Head 36 13, do 30 10½, Indian Orchard, A 40 13, do C 36 11, 11½ Laconia O 39, 12 do B 37 11, Lawrence A 36 11, Lyman C 36 11, do E 36 12½, Medford 36 12, Nashua fine O 33 11, do R 36 13, do E 40 14½ Newmarket A 36 11, Pacific extra 36 12½, do L 36 11½, Pepperell 7-4 22½, do 8-4 25, do 9-4 27½, do 10-4 32½, do 11-4, 37½, Pepperell E fine 39 13, do R 36 12, Pocasset F 30 8½, Saranac fine O 33 11, do R 36 13, Stark A 36 12½, Swift, River 36 9, Tiger 27 8.

BLEACHED SHEETINGS AND SHIRTINGS continue in good request at full prices, but the tendency is less toward higher figures than at the time of our last report. We annex quotations: Amoskeag 46 16½, do 42 15, do A 36 15, American A 36 12½, Androscoggin L 36 16 Arkwright WT 36 13, Ballou & Son 36 13, Bartletts 36 14½, do 33 13½, Bates XX 36 17@18, Blackstone AA 36 14, Boott B 36 13½, do O 30 11, do R 28 9, Clarks 36 17½, Dwight D 40 18, Ellerton 10-4 45, Forestdale 36 15, Fruit of the Loom 36 15—16 Globe 27 7, Gold Medal 36 13, Great Falls Q 36 16 Hill's Semp. Idem 36 15, Hope 36 13, James 36 15, Lonsdale 36 15½, Masonville 36 15½@16, Newmarket C 36 12½, New York Mills 36 21 Pepperell 6-4 22½, do 10-4 37½, Tuscarora XX 36 18@19, Utica 5-4 25 do 6-4 38, do 9-4 47, do 10-4 52½, Waltham X 33 11½, do 42 15½ do 6-4 22½, do 8-4 27½, do 9-4 32½, do 10-4 37½, Wamsutta 36 20.

PRINTING CLOTHS are quiet and steady, the nominal quotation for 64x64s being 6½@6¾c.

PRINTS are off ¼c. on nearly all makes, and are steady at the revised prices, but remain quiet. THE Commercial AND Financial Chronicle

HUNT'S MERCHANTS' MAGAZINE,

A Weekly Newspaper,

REPRESENTING THE INDUSTRIAL AND COMMERCIAL INTERESTS OF THE UNITED STATES.

VOL. 12. NEW YORK, MARCH 11, 1871. NO. 298

Advertisements.

Advertisements will be inserted at the following rices per line for each insertion:

ordered less than 4 times	20	cents per line.
5 times or more	16	"
9 "	14	"
13 "	12	"
26 "	10	"
52 "	8	"

If the advertisement occupies one column or upwards, a discount of 15 per cent on these rates will be allowed.

Space is measured in agate type, 14 lines to the inch.

Advertisements will have a favorable place when first put in, but no promise of continuous insertion in the best place can be given, as all advertisers must have equal opportunities.

Advantages.

1. The CHRONICLE has much the largest circulation of any financial publication issued.

2. Its circulation extends to business men in BOTH the FINANCIAL and COMMERCIAL branches, and also to a very numerous class of retired merchants, moneyed men and investors, who are not engaged in regular business.

3. It is preserved on file by subscribers, and thus possesses a great advantage for advertisers, over those publications which are habitually thrown aside after perusal.

WM. B. DANA & CO.,
PUBLISHERS,
79 & 81 William St., N Y.

Elizabethtown & Paducah Railroad Company

OF KENTUCKY.

FIRST MORTGAGE

Eight Per Cent. Convertible Bonds.

This road, connecting the important points of Louisville and Paducah, is 185 miles long, and passes through a rich agricultural and mineral section of the State of Kentucky. The traffic will be abundantly remunerative.

Sixty miles of this road are already in successful operation, and it is expected that the line will be opened to Greenville, 93 miles, in July next. The western end of the line, (on which a considerable amount as bee expended) will be pushed vigorously to completion. The Company have in good and BONA FIDE stock subscriptions amounting to

$3,095,000

of which the city of Louisville subscribed

$1,000,000.

These Bonds are the only lien upon the property and franchises of the Company, and as an additional safeguard to purchasers are deposited with the UNITED STATES TRUST COMPANY OF NEW YORK which will pay over the proceeds to the Railroad Company only in the ratio of construction.

The management is in the hands of most responsible and favorably known citizens of Kentucky, with the guaranty of their able and faithful direction, and with the large amount of stock subscribed these Bonds form a very safe and desirable investment.

The coupon are payable on the first days of March and September at the Bank of America, New York.

The Bonds are now offered at the low price of 87½ cents and accrued interest, and we with confidence recommend them to investors as a thoroughly safe security.

ST. LOUIS & IRON MOUNTAIN

RAILROAD COMPANY'S

Seven Per Cent Gold First Mortgage Bonds,

ON ITS ARKANSAS BRANCH.

This extension of 99½ miles is from Pilot Knob, on the Iron Mountain Railroad, to the Arkansas line, where it connects with the Cairo and Fulton Railroad of Arkansas. Forty-five miles will soon be opened for business. A large amount of grading has been done on the lower section near the Arkansas Line, and the entire work will be pushed rapidly forward to completion. THE BONDS ARE DUE IN 1895 IN GOLD, secured by Mortgage to the Farmers' Loan and Trust Company. Interest payable June 1 and December 1, in GOLD, FREE OF GOVERNMENT TAXES. It is expected that the local traffic of the extension will equal that of the main line.

It will open a country rich in Lead, Copper, and Iron Mines heretofore inaccessible and will traverse the famous Black River Lumber region. Only a limited number of Bonds will be sold at present. Price, 90 and accrued interest in currency. Further information will be given upon application to

H. G. MARQUAND,
Vice-President, 120 Broadway.

Attention is called to the following recommendation of these bonds:

ST. LOUIS, January, 1871.

We, the undersigned, recommend the Bonds of the ST. LOUIS AND IRON MOUNTAIN RAILROAD (Arkansas branch) as a good security.

The proposed connection with the Cairo and Fulton Railroad of Arkansas will be a valuable one for this City, and the trade from Arkansas will be large. The administration of the affair of the Company is in capable and experienced hands, and the present revenue of the main line, while it is steadily increasing, is already sufficient to insure the payment of the interest.

JOHN D. PERRY, President Kansas Pacific Railroad Co.
ADOLPHUS MEIER, Vice-President Kansas Pacific Railroad Co.
NATHAN COLE, Mayor of St. Louis.
S. D. BARLOW, Comptroller of St. Louis.

The attention of Capitalists is called to the

FIRST MORTGAGE

SEVEN PER CENT BONDS

OF THE

PEORIA, PEKIN & JACKSONVILLE RAILROAD COMPANY,

Issued in sums of $500 and $1,000, redeemable July 1st 1894, with coupons for semi-annual interest, payable on the first days of January and July, in the City of New York, and secured by a Mortgage for $1,000,000 upon the Railroad, its franchises and all equipment, on the well protected basis of about $12,000 per mile.

This Road, with its 88 miles of main, and over 8 miles of side track, is completed and in successful operation between the cities of Peoria and Jacksonville, in the state of Illinois. At Peoria, the third city in the state in respect to business and population, it intersects four prominent Railroads, with connections for Chicago, Rock Island and other points North, East and West but having its principal connection with that of the Chicago, Rock Island and Pacific Company. At Jacksonville it connects with three Roads forming, with the Jacksonville Division of the Chicago and Alton Road, the shortest line between Peoria and St. Louis.

Its rental receipts from other Roads, whose trains pass over less than ten miles of its track, are $40,000 per annum, being more than one half of the amount of the annual interest on its First Mortgage Bonds, otherwise amply provided for by its existing business.

A portion of the $1,000,000 of First Mortgage Bonds, aforesaid, the high character of which for investment will be observed, are now offered for sale by

W. T. HATCH & SON, Bankers,

First Mortgage Bonds

OF THE

CONNECTICUT WESTERN

RAILROAD COMPANY,

Coupon or Registered, and by the Legislature of Connecticut made free of all State Tax—Seven per Cent. interest, payable January and July in New York. They have thirty years to run. The subscribed Capital Stock of the Company is $1,620,000, all of which, except $45,000, has been paid in cash. Of this, $750,000 has been subscribed and paid by the City of Hartford. The mortgage is made in trust to the Treasurer of the State. The Bonds are registered in the office of the Controller of the State, and countersigned by him, and by the terms of the Charter can only be delivered by him to the Company in the proportion of $2,000 bonds for $3,000 cash previously expended in the construction of the road.

The road extends from Hartford, where it connects with the whole New-England system of railroads, westerly to Millerton, on the New York State line, where it connects with the Harlem Road, north and south: with the Dutchess and Columbia to Fishkill, now completed; with the Poughkeepsie and Eastern to Poughkeepsie, to be finished in July, and with the Connecticut and Rondout Road, soon to be built, opening direct connection with the coal supplies of the Pennsylvania Coal Company and the Delaware and Hudson Canal Company. A wide field for business is opened by its numerous railroad and river connections in supplying the country with coal, lumber, grain, cattle and breadstuffs from the west, and returning iron, lime, marble and the manufacturing products of the many thrifty towns along its line.

The grading is complete, a part of the iron purchased, and track-laying will commence as soon as the condition of the bed will permit.

The character of the Managers, among whom are Hon. Wm. H. Barnum, Ex-Gov. Holley, Geo. M. Bartholomew, Esq., and James Goodwin, Esq., is a guarantee that the enterprise will be carried through in a substantial and economical manner.

The price of the Bonds is NINETY per cent. and accrued interest.

FUNDING THE DEBT.

The Secretary of the Treasury still invites subscriptions to his new 5 per cent. bonds, and proposes to keep the books open until 1st May, unless the first 200 millions should be subscribed before that time. In reply to inquiries whether any awards will be made if the aggregate subscriptions do not reach 200 millions, the semi-official reply is that if no bonds but five per cents are subscribed for, 200 millions will be the maximum amount awarded, and that the remaining 300 millions of five per cents will not be offered to the public except in connection with the 4 and 4½ per cents of which 1,000 millions are authorized in the law of July 14, 1870. The object of this limitation is to secure a preference for the earlier subscribers, so that those who act promptly may be sure to obtain their five per cents, while all others will be equally sure to have the option of subscribing for mixed lots of 4, 4½ and 5 per cents. It is also announced that every subscriber will be held liable to take his bonds when they are ready for delivery. The question has arisen how those subscribers shall make their payments who exercise their option of paying in outstanding bonds at par, and when the interest on such old bonds as are thus tendered will cease. The reply is, that in those cases the interest stops on the 1st of May, when the quarterly interest on the new bonds begins. Hence the first day of May is the time to which all interest will be adjusted. The new five per cents are payable at the option of the Government after ten years, and being a long bond they are certainly very desirable for banks or private investors. For a fortnight longer there will be reserved for foreign subscribers 100 millions, and the same amount for subscribers in this country. After the 21st inst. there will be no limitation.

In the absence of full reports from abroad it is, of course, impossible as yet to give any opinion as to the success of Mr. Boutwell's new loan in the English and Continental money markets. Here the old arguments are revived that too many agencies were appointed; and the statement is that if the negotiation of the new bonds had been entrusted to one or two leading financial firms in New York, they would have appointed their own sub-agents and the prospects of success would have been increased. These representations were made long since to Mr. Boutwell and were rejected by him for various reasons, and especially on the ground that the loans which have always been most successful in this country have been those which were offered the most freely to the masses of the people. Such, for example, were the early war loans negotiated by the Treasury in the early years of the war. To this it is replied that the loans in question were all negotiated by one firm in the way proposed, and that the only loan in which Mr. Boutwell's present method was tried of multiplex agencies was the ten-forty loan of March 3, 1864, which was a failure until the expedient of centralized agencies was adopted, when the loan was rapidly absorbed to about the same amount which is now offered of the new fives. Mr. Boutwell agreed, however, that the war being over, the credit of the Government is so well established that a long 5 per cent at par in gold ought to be regarded here and abroad as the best and cheapest bond in the market; that peace in Europe having returned a favorable crisis would occur in foreign money markets for placing a new loan; that the money market here is likely to be easy for some months to come, and can readily be relieved by the power of the Treasury if undue activity should temporarily occur. Hence, he thought, there was no longer any need for central agencies and was persuaded that the mode just adopted was the best, and had proved its superiority to all others in the great French loans of the Imperial Government, of which an account appears in another column of this paper. How far the anticipations of the Secretary will be borne out by the results will not probably be disclosed until the new bonds are ready for delivery, as many persons are reported to be delaying their subscriptions until that time. All that can be said at present is that on this side of the Atlantic the public show less disposition to take the new loan than its more sanguine friends had anticipated.

Digitized by Google

One reason for this has been supposed to arise from the large amount of first-class railroad bonds of undoubted credit which are offering in the market, and which bear a higher rate of interest than the new Government bonds. Hence those holders of five-twenties who wish to change their investments are under a strong temptation to sell their governments to replace them with the railroad bonds. Whether this movement has been in operation abroad as actively as at home we have as yet no means of knowing, nor can we foresee how much further it may extend.

Another obstacle to the new loan has been the uncertainty of the immediate future of our loan market. The return of peace in Europe will, it is expected, create an active outflow of the foreign capital which for six or seven weeks has been accumulating here quest of temporary employment. From France and Germany there is expected a large demand for funds to rehabilitate their prostrated industries. Till it can be seen what force these new influences will project upon the loan market here, the more cautious of our financial firms seem inclined to avoid making engagements which, like those invited by Mr. Boutwell, cannot be consumated till after an interval of about two months, when the financial situation may have developed material changes.

FRANCE AND HER CREDITORS.

The new French Government seems to promise considerable financial vitality. It is said that the first instalment of half a milliard of francs is ready in cash, and as the share of Alsace and the other ceded territory is allowed for another half milliard, there may perhaps be no more to pay for some months to come, if at least an extension of time be needful. The question as to how much the war has cost to France was probably answered by M. Thiers on Wednesday in the Assembly at Bordeaux. In answer to a question by M. Germaine, he said the expenses of the war outside of Paris exceeded 1,100 millions of francs, or 220 millions of dollars. Of course the war expenses must have been prodigious inside of Paris, and the waste of war in the occupied districts of the country will be found enormous. But the money outlay reported by M. Thiers will form an important element in any calculation as to the probable credit of the French Government and their ability to raise on fair terms the loans which are now of pressing necessity to them. France raised last year two war loans—one in August for the nominal capital of 750 millions of francs, which brought in about 245 millions of cash, and the other in October for a capital of 250 millions at 6 per cent. From these two loans not more was probably raised than 450 millions of francs or 90 millions of dollars. M. Thiers' reported war outlay of $220,000,000 will therefore leave a debt of $130,000,000 to be immediately provided for. By other pressing debts in Paris and elsewhere the floating obligations will no doubt be swelled to $200,000,000. This sum has to be raised at once, and, with the half milliard instalment of Prussian indemnity, will make $300,000,000. Should it be decided to obtain, if possible, the remaining 4½ milliards, so as to promptly get rid of the armies of occupation, and set free the industries of France from the wasteful presence of an invading host, the aggregate to be raised will be $1,200,000,000 or about two thirds of the loans raised by us during the last year of the war. It has been suggested that our three-year seven-thirty notes which played so useful and prominent a part in our war finances offer a resource which, with some modification, might be with advantage adopted by the French to meet the former emergency. War, especially in France, always causes a good deal of coin to be hoarded. Before the lifetime of these temporary notes expires, France will bring out her hoards, will resuscitate her industry, and can thus pay off the capitalists who hold them by means of her own peculiar method of raising loans for the Government. What this method is and how it applies itself to the hoarded savings of the frugal French may be seen from the loans of the Empire, which were as follows:

LOANS NEGOTIATED BY THE FRENCH GOVERNMENT BY INSCRIPTION.

	Amount.	Late of 3 per cent.	Offered	Number of subscribers.
1. March 14, 1854.....	$50,000,000	65.25	93,663,080	99,224
2. January 3, 1855.....	100,000,000	65.25	439,671,234	180,480
3. July 18, 1855.....	150,000,000	65.25	730,544,423	316,976
4. May 7, 1859.....	100,000,000	60.50	501,927,839	690,230
5. January 12, 1864.....	60,000,000	66.30	969,400,000	542,061
6. August 2, 1868.....	90,000,000	69.25	3,030,378,042	781,292
7. August 21, 1870.....	150,000,000	66.60	150,000,000	...
*8. October 25, 1870.....	50,000,000	60 per cent.	50,000,000	....

* 6 per cents partly raised in England.

The success of these loans marked a new era for government finance in Europe. It astonished the great monetary potentates of the Old World almost as much as did the like success achieved by our own popular loans during the war with the South. Louis Napoleon's plan was, however, different from ours, and adapted itself precisely to the thrifty people whom he wished to bind by interest as well as patriotism to the already tottering throne. The first loan was in 1854, and a favorable moment of military enthusiasm was chosen for its issue. The sum asked was only fifty millions of dollars; but 100,000 subscribers came forward and offered twice as much. A few months later $100,000,000 was asked for by Napoleon. When the books were opened the bureaux were crowded, and twice as many people subscribed, their offers aggregating four times as much as to the first loan. Again the method was tried for $150,000,000, when $730,000,000 was offered by 316,976 persons. Then other loans were negotiated with the same success, the last of which, on the 2d of August, 1868, was the most successful of all, being negotiated at a high price, and commanding subscriptions from three quarters of a million of people.

So great a revolution in financial strategy could not have been successful without a firm basis of principle on which to rest. Like our own early subscriptions to the seven-thirties, these French loans were made accessible to the masses of the people. Frugal persons of small means were invited to record directly their own inscriptions in the *Grand Livre* of the government credit. Napoleon could not get the great princes of the money market to deal with him on such terms as he wished. He determined, therefore, to throw boldly aside the old methods of contracting with one or two millionaire firms and offered his loan to the millions of citizens who had never held government loans before, and to whom the new *rentes* were attractive, not only by their novelty, but from their lucrative returns. Three per cent was the nominal interest, but the price was such as to yield 5 per cent on the investment. The novel plan was also introduced of allowing payment by instalments extending over 15 or 18 months, ten per cent being payable on allotment, and 90 per cent in 15 monthly instalments. This arrangement was admirably adapted to attract the masses of the people and bind them to the cause of order and stable government. A subscription for ten francs of *rente* or two dollars a year interest was the smallest subscription taken. For this the first instalment was four dollars, and the whole subscription 40 dollars, a discount of 4 per cent being allowed if the whole of the instalments were paid at once. In our own war loans the minimum subscriptions were not fixed quite so low; as the smallest bonds we have ever issued were for fifty dollars. The effect in France has been to place the public funds in the hands of a large army of fundholders scattered all over the country, every one of whom is a foe to revolution and a firm supporter of the actual government, whatever it may chance to be. How

Digitized by Google

much beyond this Louis Napoleon may have gone in attaching to himself and to his dynasty the nation which gave him seven million votes last year remains to be seen. What is certain is that he has given the French for 18 years a government which in its protection for life and property, its fostering of commercial and industrial progress, and its general material results, is superior to any that ever established itself on the soil of France. The enormous expense at which this end was secured may be seen from the subjoined table of the public debt, taxation and expenditure:

FRENCH DEBT, REVENUE AND EXPENDITURE.

	Public debt, millions.	Taxes, millions.	Expenditures, millions.	Deficit, millions.
1852	[$1,103·238	$297·400	$302·600	$5·200
1853	1,115·500	304·800	309·600	4·800
1854	1,133·931	360·400	397·600	37·200
1855	1,216·575	458·600	479·800	21·200
1856	1,517·608	382·800	439·200	57·400
1857	1,606·398	359·800	378·400	18·600
1858	1,684·419	374·200	371·600	+3·600
1859	1,718·657	435·800	441·600	6·800
1860	1,866·802	392·400	416·800	24·400
1861	1,943·835	401·200	434·000	32·800
1862	1,984·974	435·400	442·400	7·000
1863	2,416·047	452·800	457·400	4·600
1867	2,704·026	361·300	390·900	29·600
1869	2,852·695	394·800	425·700	30·900
1870	3,052·695	413·700	410·900	+2·800

How large a part of the heavy expenditures and accumulating deficits have been due to the disbursements for interest on the debt is shown in the subjoined table:

INTEREST ON THE FRENCH NATIONAL DEBT, EXCLUSIVE OF SINKING FUND.*

	1866.	1869.	1870.
Funded 3 per cent Rentes	$60,614,432	$64,400,548	$65,205,243
Funded 4 per cent Rentes	89,219	89,219	89,219
Funded 4½ per cent Rentes	7,550,727	7,890,619	7,490,505
Redeemable debt	6,521,867	6,993,766	6,593,766
Annuities, &c.	16,174,715	18,114,895	18,713,726
War loan of 21st August, 1870	.....	.....	4,500,000
War loan of 25th October, 1870	.....	.....	3,000,000
Total	$90,950,960	$97,489,047	$105,592,459

* In 1867 the practice ceased of appropriating to expenditure about $30,000,000 a year as a sinking fund. This sum during several years was not so applied, and is omitted in the table.

The France of to-day is evidently richer, as well as more patient of taxation, than the France of Louis XIV., by whose splendor and extravagance the public debt was raised to $600,000,000, and the burden was found so heavy that St. Simon despaired, and suggested bankruptcy as the only expedient to save the country from worse evils. The progress is not due so much to the growth of the population. France was then populous, and contained 20 millions. It is to the capital, the productive forces, and the machinery; the railroads, the telegraphs, and the labor-saving inventions that we must look for the most potent causes of the wealth and tax-paying capacity which France has developed during this century. Still the extravagance of successive governments has outstripped the resources of the nation; and if the established government of Louis XIV. was embarrassed by deficits in the Treasury; if his successor, Louis Philippe, lost his throne from similar ambitious extravagance; the new dynasty of Louis Napoleon must have been much more embarrassed, and might have come to an end long ago but for the fortunate discovery of those novel methods for raising popular loans which we have described above. Moreover, universal experience shows that an embarrassed, borrowing government is usually timid, corrupt, and seldom is well served. Hence one is not surprised to find that it is corruption and insubordination which paralyzed the military arm of France, dethroned her Emperor, laid waste her territory, prostrated her before the invading hosts of Germany, and bound upon her helpless shoulders a burden of debt which will oppress her children for ages to come.

Still this vast expenditure by Louis Napoleon during 18 years was not all spent in frivolous donations to the army and the legion of honor. The Crimean war, according to an eminent British authority, cost France 1,700 millions of dollars, the Italian war $300,000,000, and the expeditions to China and Mexico $200,000,000. Better still, France has been covered with a network of railroads, partly at the government expense. In 1851 there were in all France but 1,200 miles of railroad; now she has 9,515 miles. Moreover, the security and order which the country has enjoyed have developed its manufactures and trade. The annual value of the real estate in France has doubled within a few years. It is said to be at present greater than that of England, and is estimated at 650 to 750 millions of dollars. The population is almost stationary, but the wealth and resources of the country have received a rapid increase. This is shown by the growth of the urban population, in consequence of the aggregate of industrial operatives in the great centres of trade. The movement in the four largest cities was as follows:

	1820.	1861.	1866.
Paris	713,766	1,696,141	1,825,274
Lyons	115,841	318,808	323,954
Marseilles	101,217	260,916	300,131
Bordeaux	92,375	152,750	194,241

Before the war there were 9 millions of families in France, 1 million of which were in easy circumstances. Of the remaining 8 millions three millions are inhabitants of towns. In England, from the monstrous growth of the manufacturing system, the urban population has increased from one-fourth in 1870 to four-fifths at present. In France it is about two-fifths of the whole. In 1846 the rural French population was 78.58 per cent; and the urban 24.42 per cent. In 1861 the rural population was 71.14 per cent, and the urban 28.86 per cent. The ownership of land is very evenly distributed. There are 6 millions of houses in France, most of them freeholds with farms and vineyards belonging to their occupiers. As a further illustration of the diffusion of wealth among all classes it is worthy of note that the public debt of France was held January 1, 1867, by 1,095,683 persons, who averaged $2,000 each. A marked contrast is offered by the centralization in few hands of the national debt of Great Britain. It amounts to 3,850 millions of dollars and was held in 1865 by only 126,331 persons, giving a share of more than $30,000 to each holder. Five years previously the National Debt of Great Britain was held by 268,242 persons, of whom 94,560 received not over $25 a year, 43,845 received from $25 to $50, 86,808 from $50 to $250; 22,516, $250 to $500, 12,787 from $500 to $1,000; 3,646, $1,000 to $1,500; 2,417, $1,500 to $2,200; 1,091, $2,500 to $5,000; 361 $5,000 to $10,000, and 210 holders received over $10,000 each. Let us next turn from the fixed and mobilized capital to the growth of French commerce. The principal articles France imports from abroad for home comsuption are cotton, silk, wool, wheat and coal, the value for three years being as follows:

Imports.	Value of Imports of Cotton, &c., for three years. 1866.	1867.	1868.
Cotton	$85,213,813	$47,390,456	$59,088,165
Silk	29,841,318	35,005,869	43,400,850
Wool	49,168,726	44,740,332	53,064,712
Coal	25,771,025	26,119,053	26,206,311
Wheat	3,307,996	35,506,599	56,478,960

A more striking indication of the development of the internal and external commerce of France is given in the rapid development of its foreign trade, and especially by the steady increase of its exports to Great Britain, which are officially reported as follows:

	Exports to Great Britain from France.	Imports of British Home produce into France.
1860	$88,870,185	$26,249,900
1861	89,133,230	44,477,940
1862	108,377,580	46,046,835
1863	120,123,585	43,366,545
1864	128,203,755	40,936,805
1865	158,126,155	45,310,475
1866	185,063,770	58,500,700
1867	168,674,080	60,605,050
1868	169,481,535	53,263,670
1869	167,636,885	57,191,650

The growth of the import and export trade of France is reported as follows:

	Total Imports.	Entered for home consumption.	Total Exports.	Exports of domestic produce and manufac.
Average, 1854 to 1858	$462,360,000	$332,450,000	$479,180,000	$344,600,000
" 1859 to 1863	569,320,000	425,200,000	617,640,000	454,200,000
" 1864 to 1868	762,760,000	571,740,000	797,740,000	592,360,000
Year 1866	769,020,000	558,700,000	856,200,000	636,120,000
Year 1867	806,160,000	605,300,000	796,800,000	565,180,000
Year 1868	840,000,0.0	660,740,000	744,040,000	557,980,000
Year 1869	.....	634,840,000	.....	619,460,000

Digitized by Google

In like manner the records of every department of French industry and trade might be opened in turn. Each would offer its own statistical argument to prove from the material progress of the past that France, when social disorganization gives place to good government, will probably be able to recuperate swiftly and to pay the unprecedented indemnity charges which the war has imposed upon her. It has been affirmed, hower, and perhaps it can scarcely be denied that there is no other nation in Europe which could bear so heavy an addition to its fiscal burdens without imminent danger of national bankruptcy. The French will, we trust, go on as they have begun to carry out the wise counsels of M. Thiers in his inaugural to the National Assembly:

"Tranquillize; reorganize; revive credit; reanimate industry; behold the only policy possible or even conceivable at this moment. France, alas, is unfortunate; more so than at any other period of her history, but she remains one of the greatest and most powerful nations of the earth."

DEBT AND FINANCES OF ALABAMA.

The old debt of this State now outstanding, amounting to about $4,000,000, was contracted in 1837-8 and 9, for the establishment of banks, which subsequently failed, and left the State liable. No less than seven States made default in the payment of their interest, between 1837 and 1847, upon bonds issued for banks or internal improvements, among which were Pennsylvania, Illinois, Indiana and Michigan. Alabama though heavily involved—to the extent of $14,000,000—paid promptly her interest, and a part of the principal annually, by heavy taxation, so that only about $4,500,000 remained unpaid at the end of the war in 1865, as Alabama alone of the Southern States, continued to pay the interest on her debt during the war. The total amount of State debt at the close of last fiscal year, September 30th, 1870, was $5,382,800, exclusive of the indebtedness to the educational fund of $3,095,210, making a total of $8,478,010, for which annual interest is to be provided. There was an increase of debt in the year of $112,400.

REVENUE AND TAXATION.

The principal source of revenue is from taxation, which is applied to a considerable number of objects, among which the following are the most important:

	Assessed Value.	Tax.
Real Estate Bonds	$60,152,316	$574,153
Town Property	33,965,495	250,092
Stocks of Goods and Merchandize	9,626,486	67,517
Horses, Mules, Sheep and Hogs (over 6 months old)	8,225,312	64,263
Special Poll Tax for Schools (No.)	106,335	162,819

The total receipts from taxes were $1,122,785, from licenses, $120,100, and the total revenue from all sources, $1,283,586; the total expenditures, including interest on the debt, were $1,366,398, and the balance on hand, September 30, 1870, was $44,325.

Auditor Reynolds says in his report that the change to the present *ad valorem* system of revenue from the former system, which was largely specific in its nature, has met the approbation of the people of the State, as it is felt to be more equal in its adjustment of the burthen to be borne by each citizen. This is especially appreciated by the poor, who, under specific taxation, felt the weight of the former tax levy, while they are much relieved by the exemption of $500 worth of personal property. He recommends a State Board of Equalization as imperatively necessary to adjust assessed values fairly throughout the State, and upon the reduction of rate of taxation speaks as follows:

"It is well known that the present tax levy under the revenue laws now in force, is the first assessment in ten years that made provision for the payment of the current expenses and interest of the State debt. It is also known that no reduction of the public debt has been as yet secured; yet I am free to recommend a reduction in rate of taxation from 7½ tenths to six tenths of one per cent, *provided*, the recommendations in this report are complied with in reference to a State board of equalization being created by statute, and the State relieved from the payment of fees and allowances in criminal cases, as urgently recommended to the General Assembly. Without these changes, I am clearly of the opinion that any attempt at reduction of rate of taxation will be followed by an *increase* of the public debt, or cause payments due from the State to be deferred, which is but another method of stating an increased liability or larger indebtedness.

"A comparison of receipts from taxation and licenses for the years 1860-61, 1865, 1866, 1867, 1868, 1869 and 1870, with the necessary disbursements to pay pressing liabilities for the same years, will more clearly show what is here stated.

	Receipts from tax and license.	Disbursements in payment of legitimate claims ag'st the State.
1860 and '61	$1,788,982 43	$2,233,781 97
1865	1,626,782 93	2,282,355 97
1866	62,967 80	606,494 39
1867	691,048 86	819,434 85
1868	724,760 56	1,066,800 24
1869	686,451 02	1,286,231 00
1870	1,242,261 25	1,336,398 85

DEBT.

The total debt of the State September 30, 1870, was $5,382,800, exclusive of the educational fund. The liability on railroad bonds was as follows:

Name of Railroad.	Miles.	Amount.
Alabama & Chattanooga	240	*$3,840,000
Montgomery & Eufaula	40	640,000
Selma, Marion & Memphis	40	640,000
Selma & Gulf	30	480,000
South & North	90	1,980,000
Mobile & Montgomery	—	900,000
Total		$8,480,000

* $2,000,000 of the amount is in bonds of the State, the balance is in endorsed bonds.

In addition to the foregoing endorsements by the State for rail road enterprises, the Montgomery and Eufaula Railroad Company has received $300,000 as a loan by the act approved March 3, 1870

The provisions of the general law, approved February 21, 1870 authorizing the endorsement of the State on railroad bonds under certain limitations, are substantially as follows: That the Governor shall endorse the first mortgage bonds of any railroad company incorporated previous to April 1, 1870, for $16,000 per mile, on proof of the completion and equipment of twenty miles previous to November 1, 1871, from funds obtained without regard to the State endorsed bonds, and not to be repaid subsequently from the proceeds of those bonds. And a similar endorsement is to be given on every section of five miles afterward completed and equipped. These provisions do not apply to the N. O., Mobile and Chattanooga Railroad, nor to roads less than thirty miles long, nor all of them to roads which completed the first twenty miles within sixty days from the passage of the act. The bonds are forbidden to be sold for less than 90. Companies are required to show how bonds are used. The State, by virtue of its endorsement, has a *first lien* on the bonds.

In case of default in the payment of interest, it is made the duty of the governor to take possession of the line in default; and in case the earnings of the same shall not be sufficient to pay the accruing interest, he is required to sell the road in behalf of the State. Thus the State assumes the entire responsibility, as *principal*, for their payment, and of the interest accruing on the same. In the meantime, to pay the interest accruing on any road in default, "*the auditor of the State is authorized, and it is made his duty, upon his warrant, to draw from the treasury any sum of money necessary to pay the interest on any of the bonds indorsed by the State, whenever said interest is not provided for by the company; and to pay such interest when due, as provided for in this act; and in case the exigency requires, the Governor is hereby authorized and directed to negotiate temporary loans for such purpose, and pledge the credit of the State therefor, so that the interest on all the indorsed bonds of the State shall be promptly paid when due.*"

After five years the Company is to set apart 2 per cent. of the principal of the bonds annually as sinking fund. No road shall receive aid unless the first section is completed by November 1, 1871, and twenty miles annually thereafter.

The portion of the law given in italics above is of unusual interest at present on account of the default which was made in the payment of January interest on the Alabama and Chattanooga Railroad bonds. This default was apparently unexpected by the State authorities, and some considerable delay was unfortunately made in the payment of interest by the State. This delay, however, seems to have been made for the purpose of inquiring fully into the facts relating to the negotiation of the bonds, and the Legislature adopted a resolution directing the payment of interest on bonds in the hands of bona fide holders. It would have been better for the credit of the State had the interest been paid immediately upon the default made by the company, though it is not apparent that the delay was any indication of an intention to deny the obligation on the part of this State, whose good faith in the payment of its last obligations has established for it so high a reputation for financial integrity.

DETAILED STATEMENT OF THE DEBT OF ALABAMA, SEPT. 30, 1870.

Description.	Date of Issue.	Amount now Outstanding.	Rate p. c.	Principal when Due.
Old State bonds	1852	$168,000	5(a)	May 1, 1872
" extended	1866	1,941,000	5(a)	May 1, 1883
" "	1866	473,800	5(a)	May 1, 1886
Sterling bonds of 1850	1850	688,000	6(b)	June 1, 1870
Sterling bonds extended	1866	64,800	5(c)	1886
" " "	1866	82,500	6(c)	1886
" " "	1867	648,000	5(c)	1886
New bonds	1866	829,700	8(d)	1886
"	1868	487,000	8(d)	1888
RR. bond indorsements	.. ..	8,480,000	8	....
Loan to Montgomery & Eufaula RR	....	300,000	..	....

(a) Interest payable May 1 and Nov. 1, by Messrs. Henry Clews & Co., New York.
(b) Interest payable June 1 in London.
(d) Interest payable Jan. 1 and July 1, by Messrs. Henry Clews & Co., in New York.
(c) Interest payable Jan. 1 and July 1, in London.

DEBT AND FINANCES OF SOUTH CAROLICA.

Previous to the war in 1860 there was no State whose credit stood much higher than that of South Carolina. Starting with the year 1794, and following her financial history closely till 1860, we find her legislators always anxious to avoid additions to her debt, and guarding with vigilance the credit of their State.

The debt of 1794 consisted of the inconsiderable amount of $38,836 60, interest payable quarterly at the rate of 3 per cent per annum, and redeemable at pleasure.

From that time, extending through a period of forty-four years, there was no other appeal made to the State for aid. In 1838 the City of Charleston was visited by a sweeping conflagration which destroyed the finest portion of the city, and with a view of affording assistance to that afflicted community, the legislature created the Fire Loan Debt. This consisted of stock and bonds. The amount of that stock is now $303,343,89, with interest at the rate of 6 per cent.; and of bonds, $484,444 51, at the rate of 5 per cent. per annum. The bonds are principally held in London, and familiarly known as the Sterling Bonds. The assets of the bank of the State are held liable for them, and believed to be sufficient to meet the payments. The bonds and stocks of this issue are past due—1868 being the year of their redemption.

Then came an interval of sixteen years before the bonds in aid of the Blue Ridge Railroad were issued. These bonds were

Digitized by Google

issued in 1854 to the amount of $1,000,000, with interest at the rate of six per cent., redeemable in five equal successive annual installments of $200,000 each, in and between the years 1874 and 1878 their amount now is $970,000.

In 1853 commenced the series of issues of stock for the election of the State Capitol, viz:

	Date of Issue.	When Redeemable.	Amount outstanding.
State capital stock	1853-55	1871-80	$499,000 00
" "	1856	1877	189,690 80
" "	1857	1888	127,441 87
" "	1858	1883-85	304,370 00
" "	1859	1887-89	215,476 24
" "	1861	1882-86	130,315 00
" "	1863	1890	1,740 00

These different issues amounted in all to $1,987,137 96 interest, payable semi-annually, at the rate of 6 per cent. on January 1 and July 1. This amount, added to those above named, closes the antebellum debt of the State, including the issue of 1861 and 1863, which is recognized as a legitimate obligation, and sums up $3,814,862 91. During the war there were issued for military defence and other purposes, stock and bonds bearing 7 per cent interest for $2,241,840; this, with $612,147 20 accumulated interest, gives a total of $2,853,987 20. This portion of the debt has been ignored.

Next follows the debt contracted since the war, viz.:

	Date of Issue.	When Redeemable.	Amount outstanding.
State capital bonds	1866	1885	$11,600 00
Funded coupons	1868	1887-97	300,000 00
Funded debt	1866	....	1,131,700 00
Conversion bonds	1869	1888	1,201,800 00
do stock	1869	....	64,000 00
Funding bills, Bank State S. C.	1868	1888	1,192,150 00
Special bonds	1868	1888	500,000 00

with 6 per cent interest, payable semi-annually. This $4,401,250 00, added to the ante-bellum debt of $3,264,628 41 gives $7,665,908 as the total positive liabilities of the State. The total amount of bonds converted during the year into the conversion bonds, authorized by the act of March, 1869, was $918,704. During the year 1871 Fire Loan Stock to the amount of $303,342 falls due, and as this has been judicially decided as standing upon the same footing as the Fire Loan Bonds, the assets of the bank of the State will be liable for them if the decision is sustained by the Supreme Court.

All interest on the debt is paid in gold.

RAILROAD ENDORSEMENTS.

The contingent liability of the State by the endorsement of railroad bonds is stated as follows:

South Carolina Railroad Bonds, payable in 1868, secured by first mortgage	$2,093,312
Northeastern Railroad Bonds, payable in 1869, secured by first mortgage	92,000
Charleston and Savannah Railroad Bonds, payable in 1877, secured by first mortgage	505,000
Savannah and Charleston Railroad Bonds, payable in 1889, secured by first mortgage	245,750
Laurens Railroad Bonds, payable in 1879, secured by first mortgage	75,000
Spartanburg and Union Railroad Bonds, payable in 1878-79, secured by first mortgage	350,000
Greenville and Columbia Railroad Bonds and Certificates of Indebtedness, payable in 1881, 1882, 1883 and 1888, by acts of 1861, 1866 and 1869, secured by first mortgage	1,426,545
Blue Ridge Railroad, by act of 1868	4,000,000
Total	$8,787,608

Comptroller Neagle states that the bonds of the South Carolina Railroad, $2,093,312, and those of the Northeastern Railroad of $92,000, fell due respectively in 1868 and 1869, and that he has not been informed of their redemption, but supposes from the fact of no demand having been made upon the State that the companies have provided for their payment.

In regard to the action of the last legislature upon the subject of State debt the following despatch from Charleston contains in brief space, information of much interest:

CHARLESTON, March 8.—The South Carolina Legislature adjourned *sine die* at 12 o'clock last night. The new railroad schemes, involving an addition of four millions or more to the State debt, were finally defeated after a hard struggle. There has been no addition of any kind to the State debt during the session. It is estimated that the taxes for the current year will be ample to meet all the financial needs of the State Government, and the taxes for next year have been somewhat reduced. The ordinary appropriations have been largely cut down. The bill to fund all the existing liabilities of the State in a new sterling loan, and absolutely prohibiting any increase of the public debt until said loan is paid, unless such increase be authorized by a direct two-thirds vote of the people of the State, has become a law.

The bill here referred to contained provisions for a State loan not exceeding £1,200,000 of 6 per cent coupon bonds to run 20 years.

REVENUE AND EXPENSES.

For the year ending October 31, 1870, the receipts and expenses were as follows:

Balance on hand October 31, 1869	$11,851
Gross receipts of the year	1,820,162
Total	$1,832,013
Expenditures	1,830,840
Balance October 31, 1870	$1,172

Of the above amount of expenses $745,088 is classed as extraordinary, leaving $1,085,831 as regular expenses, to which must be added $279,118 of coupons paid in gold and $84,362 for premium on gold, making the total of ordinary expenses for the year $1,449,312. The only important items of receipts for the year are those from taxes, amounting to $815,779, and from the financial agent of the State of New York, Mr. H. H. Kimpton, amounting to $971,039. The Comptroller supposes that a tax levy of 1 per cent will be necessary to meet the expenses of the next year, and ecommends that a law be passed to set aside hereafter one fourth of the annual revenue from taxes as a sinking fund to redeem the debt as it falls due. The assets of the State November 1, 1869 was $2,754,660, consisting of various railroad stocks; $463,960 were sold during the year, and $2,290,700 remained on hand November 1, 1870.

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS.

The following are the changes in the Redeeming Agents of National Banks since the 2d of March, 1871. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency.

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
Missouri—Columbia	The Broome County National Bank	The St. Louis National Bank, St. Louis, approved.
Indiana—South Bend	The South Bend National Bank	The National Park Bank of New York and the Third National Bank of Chicago, approved.
Massachusetts—Gloucester	The Cape Ann National Bank	The First National Bank of Washington, approved in addition to the National Bank of Redemption, Boston.
Wisconsin—Appleton	The First National Bank	The Fourth National Bank of Chicago, approved.
Illinois—Galva	The First National Bank	The Third National Bank of Chicago, approved in addition to the National Currency Bank of New York.
Virginia—Fredericksburg	The National Bank.	The First National Bank of Washington and National Park Bank of New York, approved in addition to the Merchants' National Bank of Baltimore.
Ohio—Elyria	The First National Bank	The National Park Bank of New York, approved in place of the Central National Bank of New York.
Minnesota—Stillwater	The Lumberman's National Bank	The National Bank of Commerce, Chicago, approved.

New National Banks.

The following is the only national bank organized during the week:

Official No.
1,800—The First National Bank of Cheyenne, Territory of Utah. Authorized capital, $100,000; paid in capital, $50,000. Amasa R. Convers, President; Henry J. Rogers, Cashier. Authorized to commence business March 7, 1871.

[From our own correspondent.]

LONDON, Saturday, February 25.

A profound sensation has been created by the formal announcement of the German terms of peace. What the actual indemnity is has not yet been ascertained, but it is understood that it is very heavy, and is not less than £220,000,000. One telegram gives it at £320,000,000. Alsace and German Lorraine, including Metz and also, it is said, Belfort, are to be ceded to Germany. Peace, or a continuance of the war, must now be determined in a few hours, and it is announced that Count Bismarck has intimated that no modification of the terms will be admitted. It is hoped that the National Assembly at Bordeaux will submit, for at such a moment, when the army is disorganized, and the country is in a state of collapse, it would be madness for the French to resume hostilities. M. Thiers has a thankless task to perform to-day—that of submitting the terms of peace to the French Assembly. How they will be received may be imagined, for intense irritation is certain to be produced, but a hope is entertained that M. Thiers will be able to convince the Assembly that the country needs peace, and that such a result can only be obtained by yielding at once to the German terms. The French will unquestionably breath vengence, but the time for revenge is not now. France must be reorganized, and in some respects, remoddled first.

There has been an increased demand for accommodation this

Digitized by Google

week, but the Bank authorities have refrained from advancing their rates of discount. In fact, in the place of our own money market advancing towards those of the continent, theirs are declining towards ours. Latterly, the banks of Berlin and Amsterdam have reduced their rates one half per cent, and excepting at Paris, where the official rates is nominally 6 per cent., money at the principal monetary centres is not above 4½ per cent. The prospect before us is so uncertain that it is doubtful if capital will find its way abroad as quickly as might be supposed. It is by no means necessary that a high rate of interest alone should be the attractive power. The ten per cent rate which was current in England for several months after the failure of Overend, Gurney & Co., failed to draw capital to the London market. On the contrary it caused such distrust abroad that even an English bank note was difficult to negotiate in many places on the Continent. It was not until the rate had been reduced to eight and subsequently to six per cent that the foreigner became convinced of our solvency. Confidence, therefore, as well as a remunerative rate of interest must exist, and from all that we hear it must take considerable time before such a condition of affairs retur s. Confidence grows, but slowly. When distrust once prevails it takes a long time to eradicate it, and it can scarcely be thought that France in such a matter will differ from other nations. Besides which, there are other countries willing to borrow of us who offer good rates of interest and in whom confidence is felt. With regard to France, however, all is uncertainty. Even admitting, as must unquestionably be admitted, that France is a country of fast resources, is admirably situated, has an enterprising, ingenious and thrifty people, still it is difficult to solve the question of the future after the experiences of the last eighty years. If France would be content in herself, and make it her interest to found institutions which shall stand the test of time, however, troublous it may be, her recovery would be rapid, for capital would be quickly subscribed to advance every useful and profitable work. But France has been unfortunate in her rulers, and it is hoped that the present crisis will bring men to the front who will govern or correct principles, and admit of the people having representatives in their Assembly who shall make it their chief aim to study the requirements of the country. The state of France, and the unsettled condition of Europe, keep trade in check, and although there is every indication of some improvement in the rate of interest, any great rise can scarcely take place until a considerable impression has been made in the supplies of idle money by the requirements of legitimate trade and genuine enterprise. The following are the present rates of money:

	1870. Per cent.	1871. Per cent.		1870. Per cent.	1871. Per cent.
Bank minimum	3	2½	4 months' ba'k bills	3⅛@3⅜	2¾@3
Open-market rates:			6 months' ba'k bills	3⅛@3⅜	3⅛@3⅜
30 and 60 days' bills	3 @...	2¼@...	4 and 6 trade bills..	3⅝@4¼	3⅝@4
3 months bills	3 @3¼	2¼@...			

The rates of interest allowed by the joint stock banks and discount houses for deposits are subjoined:

	1870.	1871.
Joint stock banks	2	1½
Discount houses at call	2	1½
Discount houses with 7 days' notice	2¼	1¾
Discount houses with 14 days' notice	2½	2

The changes on the continent have consisted of a decline of ¼ per cent at Berlin, and of about ¼ per cent at Hamburg. The following are the quotations at the leading cities, compared with those of last year:

	B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.		B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.
At Paris	2½	6	2	—	Brussels	2½	4	2¼	3¼
Vienna	5	6	5	5	Madrid	5	5	5	5
Berlin	4	4½	3¾	4	Hamburg	—	—	3	3¼
Frankfort	3½	4	2¾	3½	St. Petersburg	5	8	4¼	7
Amst'd'm	4½	3½	4½	3					
Turin	5	6	5	6					

Gold has been in increased demand for export to Germany, owing to the Paris indemnity, a considerable portion of which has been paid in bills on London. Nearly one million sterling has been purchased this week, of which £440,000 has been taken out of the Bank, the arrivals having been inadequate to the demand. Silver is quieter and prices are rather lower.

The French loan has been largely dealt in during the week, and has been as high as 92, or 7 premium. On the receipt of news yesterday from Versailles, announcing that difficulties had arisen in arranging the terms of peace, a fall of 1 per cent took place. The last price to-day is 90½@91½. The German loan is 100½@101; do. second issue, 2½@2¾ premium. United States 5-20 onds are firm at a slight improvement. Atlantic and Great Western railway securities—both the certificates of debenture and the consolidated mortgage bonds—have been in demand, and have improved about 2 per cent. Other United States securities show very little change. Canada Government securities are rather weaker; but Canada railway shares remain firm. British railway shares have further advanced in price; the traffic receipts being much larger than in 1870. The following were the highest and lowest prices of Consols and the principal American securities on each day of the week:

	Monday.	Tuesday.	Wed'sy.	Thu'sy	Friday.	Sat'day.
Consols	91⅞-92⅛	91⅛-92	91⅞-92⅛	91⅞-92⅛	91⅛-92	91⅛-91⅝

Messrs. Rothschild & Co. have issued the prospectus of a new loan for Brazil. The amount is £3,000,000 in five per cent. bonds at 89 per £100 bonds, with interest commencing from the 1st of February last.

There has been a better demand for cotton during the week, and prices are rather higher. The following relates to the trade of Manchester.

This market has experienced no change of any moment since last Friday, and quotations are generally unaltered. On Tuesday the tone of the market was rather more lively, but as it arose only from a temporary briskness in the cotton market, and not from any increased demand for either goods or yarns, with a few exceptions, the better feeling quickly subsided when the Liverpool market relapsed into its previous flat condition on Wednesday afternoon. The demand for home-trade yarns was good in the beginning of the week, and gave at least the appearance of animation to that department of the market. Some spinners sold rather freely, and prices had a tendency to go against the buyer. Since Tuesday, however, there has been less going on in all sections. Still prices keep wonderfully steady, and their steadiness may be ascribed to the heavy orders which spinners had on hand some time since, and which have enabled them to bridge over any periods of quietness that have intervened since. All along a moderate demand has existed, and producers have had no difficulty in selling whenever they chose to concede a point. This is still the case, and to-day's market has resembled many of its predecessors, as buyers have been willing to do business at a small reduction in value, provided they could get deliveries in what to them appeared a reasonable interval of time. At the close of last week the large arrivals of cotton tempted spinners to buy more freely in Liverpool. This increased demand strengthened that market, and threatened to react upon this. The temporary improvement, however, was counteracted by reports of increased receipts at the American ports, and no improvement in prices was established here.

The protracted continuance of such large receipts at American ports is a fact which cannot be ignored, and has considerable effect upon buyers here, who see no probability of an advance in prices. The consequence is that whenever from some temporary caprice or reason the cotton market shows symptoms of excitement buyers here withdraw from the market, and decline to go on except at old prices. There seems to be a general impression on all sides that the present scale of prices is pretty safe, and that whatever fluctuations may occur they are not likely to be violent or of frequent occurrence. This confidence in prices leads producers to undertake large contracts, and some sales have occurred this week for delivery two months hence.

Annexed is a return showing the imports and exports o cotton into and from the United Kingdom, from September 1 t February 23, compared with the corresponding period last year:

	1870-1. Imports.	1870-1. Exports.	1869-70. Imports.	1869-70. Exports.
American ..... bales	1,057,217	114,597	513,904	54,660
Brazilian	202,926	20,200	234,004	31,942
East Indian	594,914	253,795	765,921	297,092
Egyptian	161,113	3,706	102,133	2,284
Miscellaneous	158,757	4,113	59,608	8,108
Total	2,175,927	396,411	1,681,470	394,037

The wool trade is characterized by great steadiness, and a healthy demand exists. Scoured Cape wools continue in demand

Digitized by Google

for export, and have advanced 1d. to 2d. per lb. Other kinds are ½d. to 1d. per lb. dearer than in November last. At the beginning of the present series of public sales the market had chiefly to depend on the English and German trade, France being but thinly represented, but with the growing certainty of a speedy re-establishment of peace the number of French buyers increased, and during the last eight or ten days we have had the usual attendance, and almost the usual competition from that country. About 60,000 bales are estimated to have been taken for export.

The wheat trade at the commencement of the week was dull, and prices declined 1s. to 2s. per quarter, but the market closes with a firm tone, and a portion of the above decline has been recovered. The weather is very fine, and is exactly suited to farming operations.

The following figures show the imports and exports of cereal produce into and from the United Kingdom during last week, and since the commencement of the season, compared with the corresponding periods in 1869–'70:

FOR THE WEEK ENDING FEB. 18.

	1870'71. Imports.	1870'71. Exports.	1869'70. Imports.	1869'70. Exports.
Wheat.....cwt.	544 558	35.382	367,783	786
Barley.....	157,888	5,220	103,239	225
Oats.....	18,278	18,596	54,114	1,327
Peas.....	8	844	5,817	911
Beans.....	61,597	64	10,429	...
Indian corn.....	176,485	....	139,114	1,540
Flour.....	108,604	255,670	20,869	651

SINCE THE COMMENCEMENT OF THE SEASON (AUG. 28).

Wheat.....cwt.	16,272,207	1268,619	23,132.019	127,496
Barley.....	3,961,950	80,960	3,953,740	11,745
Oats.....	4,096,210	542,864	5,484,926	43,903
Peas.....	891,295	31,160	727,872	8,080
Beans.....	801,284	5,597	963,030	1,167
Indian corn.....	8,071,404	40,729	10,211,389	9,414
Flour.....	2,399,293	855.517	3,480,878	9,088

The above figures show a material diminution in the imports and an important increase in the exports as compared with last season. It is, however, to be borne in mind that last season's importations were much above the average, and a comparison with former years will show that our present receipts quite justify the cautious policy now being adopted by the trade. Should peace, however, be restored, and confidence resumed in France the French will in all probability, become large buyers of cereal produce in the various markets of the world. The delays which now exist in France, both at the ports and on the railways are at present checking the French demand for wheat and other breadstuffs for the charges, when so many delays occur, and here especially when the vessels are lying in port or demurrage, accumulate so rapidly as to render transactions more than usually hazardous. From Sept. 1, 1868, to Feb. 20, 1869, the imports and exports of cereals were as follows:

	Imports.	Exports.		Imports.	Exports.
Wheat.....cwt.	14,390,288	135,449	Beans..... cwt.	1,585,828	3,065
Barley.....	6,052,148	60,368	Indian Corn.....	6,804,435	322
Oats.....	3,905,228	58,437	Flour	1,971,898	19,509
Peas.....	727,542	5,944

—Attention is directed to the first Mortgage Bonds of the Connecticut Western Railroad, which are now offered by Messrs. Winslow, Lanier & Co., Bankers, 27 Pine street. The road extends from Hartford, where it connects with the railroad system of New England, westerly to Millerton, on the New York State Line, where it connects with the Harlem Road, north and south, and with other roads to Fishkill and Poughkeepsie.

This is a home New England security.

The Bonds are guarded in the amount of issue by the State officers. The Company receive them from the Comptroller of the State, by whom they are registered, and who delivers them to the Company, only in the proportion of $2,000 for $3,000 cash, previously expended on the road.

The grading is complete, a part of the iron purchased, and track-laying will commence as soon as the condition of the bed will permit.

The character of the managers, among whom are Hon. William H. Barnum, ex-Gov. Holley, George M. Bartholomew, Esq., and James Goodwin, Esq., should be a guarantee that the enterprise will be carried through in a substantial and economical manner.

The price of the Bonds is 90 per cent and accrued interest.

—Tables of great value showing the comparative rates in gold and currency of United States Government Bonds between New York and London, Paris, Frankfort, Berlin, Hamburg, Amsterdam, Brussels and Antwerp—and between London and the continental markets, have been compiled by Mr. Lewis G. Hausen, of 43 Exchange Place, (basement,) and may be obtained by addressing him through P. O. Box 4,373. The list of subscribers to Mr. Hausen's tables, which are published in a handsome volume, includes the names of nearly 100 of the principal banking houses of New York.

—Mr. H. G. Marquand, 120 Broadway, is now offering some of the first mortgage 7 per cent gold bonds of the St. Louis and Iron Mountain on its Arkansas Branch. The road is well known to our readers, and the price of 90 for seven per cent gold bonds is such as to invite their investigation of the details of this loan. The earnings of this road for 1870 and for the two past months of the year will be found in our table of railroad earnings, on a subsequent page.

—The statement of the Merchants' Insurance Company of Chicago will be found to-day in our advertising columns. The cash capital of this Company is $500,000; surplus, $378,252; assets, $878,252. The office of the Company in New York is at No. 1 Pine street. The agents here urge upon our business men, that by insuring in this Company they will have their names favorably presented to the stockholders in Chicago, who are among the leading and most substantial merchants of that city.

BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH, BANKERS,
No. 5 NASSAU STREET, NEW YORK, March 10, 1871.

THE CHESAPEAKE AND OHIO RAILROAD.

A NEW TRUNK LINE FROM THE SEA-BOARD TO THE WEST,

is already completed and in operation from Richmond to the celebrated White Sulphur Springs, 227 miles, and there remain but 200 miles, now under construction, to complete it to the Western terminus on the Ohio River, 315 miles below Pittsburg, at the head of RELIABLE AND CONTINUOUS navigation.

The completed portion of the Road is doing a GOOD LOCAL BUSINESS, which will be enormously increased as it progresses and opens the immense mineral riches of Virginia and West Virginia, whose coal and iron are celebrated for their quality and abundance, and would alone enrich the means of communication which affords them access to the markets East and West.

The advantages of the Chesapeake and Ohio Railroad AS A GREAT EAST AND WEST THROUGH LINE for the transportation of the heavy freights (which constitute the principal part of the East and West through traffic), are numerous and important.

1. *A short route* between the Atlantic coast and the Great West.
2. *Low grades.*
3. *Light curves.*
4. *A Genial climate,* which admits of safe, economical, and rapid railroad operation throughout the year.
5. *East and West termini* at favorable points on tidewater and the Ohio River.
6. *A very large through and local traffic* awaiting its progress.
7. *A comparatively light capital and debt,* and consequently a light tax upon traffic for payment of interest and dividends.

All these conditions favor a cheap and economical working of the line, and will enable the Chesapeake and Ohio route to do a profitable East and West through business at rates which would not pay by the more difficult and costly lines, *and to control an enormous South-western through trade.*

We are now authorized to sell an additional amount of the FIRST MORTGAGE 6 PER CENT GOLD BONDS of the company, at the original price of 90 *and accrued interest.*

The Bonds are secured by a mortgage upon the entire road franchises and property of the company, WHICH NOW, IN COMPLETED ROAD AND WORK DONE, EXCEEDS THE ENTIRE AMOUNT OF THE MORTGAGE, and which, when completed, will be worth at least $30,000,000.

A Sinking Fund of $100,000 per annum is provided for their redemption.

They are issued as Coupon or Registered Bonds, and in denominations of

$100, $500 and $1,000.

Interest payable May and November, in the City of New York.

The superior advantages, valuable property and franchises, and able and honorable management of the Chesapeake & Ohio Rail road Company, render it one of the most substantial, reliable and trustworthy Corporations in the country, and commend its Securities to the unhesitating confidence of capitalists and investors.

Pamphlets, maps and full particulars furnished upon application.

FISK & HATCH, Bankers.

NEW LOAN OF THE UNITED STATES.

Important Circular.

TREASURY DEPARTMENT,
Washington, February 23, 1871.

Public notice is hereby given, that books will be opened on the sixth day of March next, in this country and in Europe, for subscriptions to the National Loan, under the Act approved July 14, 1870, entitled "An Act to authorize the Refunding of the National Debt," and the Act in amendment thereof, approved January 20, 1871.

The proposed loan comprises three classes of bonds, namely:

First. Bonds to the amount of five millions of dollars, payable in coin, at the pleasure of the United States, after fifteen years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of five per cent. per annum.

Second. Bonds to the amount of three hundred millions of dollars, payable in coin, at the pleasure of the United States, after fifteen years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of four and a half per cent. per annum.

Third. Bonds to the amount of seven hundred millions of dollars, payable in coin, at the pleasure of the United States, after thirty years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of four per cent. per annum.

Subscriptions to the loan will have preference to the following order, namely:

First. Subscriptions that may be first made for five per cent. bonds to the amount of two hundred millions of dollars; of which there will be reserved for twenty days, one-half for subscribers in this country and one-half for subscribers in foreign countries.

Second. Subscriptions for equal amounts of each class of bonds.

Third. Subscriptions for equal amount of bonds bearing interest at the rate of four and a half per cent., and of bonds bearing interest at the rate of five per cent.

Fourth. Subscriptions for any five per cent. bonds that may not be subscribed for in the preceding classes.

When a subscription is made, the subscriber will be required to deposit two per cent of the amount thereof in coin or currency of the United States, or in bonds of the class to be exchanged, to be accounted for by the Government when the new bonds are delivered; and payment may be made either in coin or in bonds of the United States known as FIVE-TWENTY BONDS, at their par value.

The coin received in payment will be applied to the redemption of five-twenty bonds, and the debt of the United States will not be increased by this loan.

The bonds will be registered or issued with coupons, as may be desired by subscribers. Registered bonds will be issued of the denominations of $50, $100, $500, $1,000, $5,000, and $10,000; and coupon bonds of each denomination except the last two. The interest will be payable in the United States, at the office of the Treasurer, any Assistant Treasurer, or Designated Depositary of the Government, quarterly, on the first days of February, May, August, and November, in each year.

The bonds of the several classes aforesaid, and the interest thereon, are

Digitized by Google

exempt from the payment of all taxes or dues of the United States, as well as from taxation in any form by or under State, municipal, or local authority.

After maturity, the bonds last issued will be first redeemed, by classes and numbers, as may be designated by the Secretary of the Treasury.

The bonds will be issued at the United States Treasury, but the agents for the negotiation of the loan in Europe are authorized to make arrangements with subscribers for the transmission of the bonds to the agents through whom subscriptions may be received.

Subscribers in the United States will receive the new bonds of the agents with whom the subscriptions are made.

In the United States, the National Banks are authorized to receive subscriptions, and subscriptions may also be made at the office of the Treasurer of the United States, or of any Assistant Treasurer, or the Designated Depositaries at Buffalo, N. Y., Chicago, Ill., Cincinnati, Ohio, Louisville, Ky., Mobile, Ala., and Pittsburg, Pa.

The following banking houses are also authorized to act as agents in receiving subscriptions in the United States, viz:

NEW YORK CITY.

Austin Baldwin & Co.	Leonard, Sheldon & Foster.
Baker & Kitchen.	Maitland, Phelps & Co.
A. Belmont & Co.	Marx & Co.
Blake Brothers & Co.	Morton, Bliss & Co.
Brown Brothers & Co.	P. M. Myers & Co.
Budge, Schiff & Co.	George Opdyke & Co.
Cecil, Stout & Thayer.	E. D. Randolph & Co.
John J. Cisco & Son.	Reid, Leo & Content.
Clark, Dodge & Co.	Security Bank.
Henry Clews & Co.	Kuhn Loeb & Co.
Jay Cooke & Co.	J. & W. Seligman & Co.
Dabney, Morgan & Co.	Soutter & Co.
Thomas Denny & Co.	Edward Sweet & Co.
Drexel, Winthrop & Co.	Moses Taylor & Co.
Duncan, Sherman & Co.	Trevor & Colgate.
Fisk & Hatch.	Turner Brothers.
Frank & Gans.	Chase & Higginson.
Gibson, Casanova & Co.	Union Trust Company.
Glendinning, Davis & Amory.	Van Schaick & Co.

BANKING HOUSE OF HENRY CLEWS & CO., 32 WALL ST., N. Y.

Our business is the same as an incorporated bank.

Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed on all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make telegraphic transfers of money to any desired point, and transact every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upward on.

The Imperial Bank, and Messrs. Clews, Habicht & Co., London.

The Provincial Bank of Ireland, The National Bank of Scotland, and all their branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Government and other investment securities; also Gold and Exchange.

Advances made on approved collaterals and against Merchandise consigned to our care.

We make collections of Notes, Drafts, Coupons and Dividends with promptness on all points, and are fully prepared to offer banking facilities upon either currency or gold basis.

The Bankers' Gazette.

FRIDAY EVENING, March 10, 1871.

The Money Market.—The rates for money on call have remained pretty uniformly at 4@5 per cent during the week, according to the collateral furnished, although there have been numerous exceptions at 3 per cent. on governments, especially in the past two days, when the rates have evidently been a little easier than early in the week, closing to-day after bank hours at 3@4 per cent. The sharpest activity in the stock market was noticeable in the latter part of last week and the early part of the present, since which time there has been some decrease in the volume of transactions, with a less active demand for money on speculative operations. There is a general anticipation of continued ease in the money market for some time to come, although the extreme low rates which have now ruled for some weeks cannot be expected to last far into the Spring season, when commercial transactions will be largely increased.

The last bank statement showed an increase of $4,625,887 in loans, increase of $770,159 in specie, a decrease of $60,163 in circulation, an increase of $7,430,458 in deposits and an increase of $841,360 in legal tenders. The result of these changes was a gain of $1,600,000 in legal reserve against an increase of $7,370,000 in liabilities, showing a loss of $231,055 in their excess over legal reserve, the whole of that excess being $18,172,011.

The expansion of loans and large increase in deposits are the features most worthy of notice.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	Mar. 4, 1871.	Mar. 5, 1870.	Mar. 6, 1869.
Loans and discounts.....	$262,631,886	$68,634,212	$262,089,583
Specie.....	24,332,207	35,898,493	19,486,634
Circulation.....	660,282	33,733,942	34,275,885
Net deposits.....	225,059,574	213,078,341	186,604,437
Legal Tenders.....	58,019,768	54,065,933	49,145,369

The demand for commercial paper is still much larger than the supply, and on the very choicest grades we have heard of transactions as low as 5½ per cent, although the fair quotable rate for best names is still 6 per cent. The banks have not been quite as ready to purchase as heretofore, probably anticipating that money on call loans may pay better rates of interest before long. A feature of the discount market at the present time is the small amount of second-class paper offering, which is frequently so limited as to hardly furnish a basis for quotations.

United States Bonds.—The general tone of the market for Government Bonds was strong during the early part of the week on a moderate business, but has been dull during the past two days, and a fraction lower than at the highest point. Currency six per cents. advanced sharply, selling up to 115 and closing to-day at 114¼@114⅜, an advance of about 1 per cent on the week; 10-40's close about ¼ per cent. lower than last Friday, and it is generally believed that the sharp upward turn which occurred in these bonds just before the opening of the new 5 per cent. loan was the result of speculative manipulation. The chief interest of the market has unquestionably been directed to the progress of this loan, for which the books were opened here on Monday, and in London to-day. The subscriptions thus far have not been very large, and it seems apparent that the process of negotiating the bonds must at all events be gradual, and no feeling of patriotic enthusiasm can be relied upon to carry off the loan, such as that which helped so greatly the negotiation of bonds during the war. Mr. Boutwell has, no doubt, based his action, to a great extent, upon a supreme confidence in the idea that a gold bond of the United States, bearing 5 per cent interest, ought to be worth par, and in this assumption the majority of our financiers would probably agree with him; there may be, however, some difference of opinion as to whether the present time was a favorable period for the introduction of the loan, and also in regard to the question whether sufficient importance has been attached to the business details required for carrying through so large a project.

The result of the introduction of the loan in Europe is awaited with much interest, as rumors have been circulated that large

Digitized by Google

amounts would be taken by Messrs. Rothschilds. The bonds have attractive features for investors, as they are free from all taxation, and the interest upon them is payable quarterly. The Assistant Secretary was in the city to-day in conference with some of the foreign bankers, and it is reported that some new arrangements are to be made in regard to the loan.

At the Treasury purchase of $2,000,000 5-20s on Wednesday, the bids were $4,594,550.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, March 4.		Monday, March 6.		Tuesday, March 7.		Wednesd'y March 8.		Thursday, March 9.		Friday, March 10.

Railroad and Miscellaneous Stocks.—The stock market has, on the whole, been less active than last week, but there has still been much excitement at times, with considerable irregularity in prices. On Saturday and the early days of this week the tone, with some exceptions, continued strong, although it was evident that large sales had been made to realize the advance; subsequently, under further large sales to realize and the operations of a "bear" clique, the market fell off and showed some weakness, which was most apparent on Wednesday, since which time there has been an improvement in tone, with firmness in prices, and at the close to-day the appearances seem decidedly in favor of another upward movement. Much interest has been shown in specialties: Union Pacific has been particularly weak, closing at 27½, against 32½ last week. Pittsburgh has advanced to 118½, on rumors of a proposed lease to the Pennsylvania Road at 7 per cent on the stock at 150; Erie has been weak; Lake Shore is strengthened by the report that the earnings of January and February were $250,000 more than in the same months last year. The N. Y. Central & Hudson River stock and scrip are strong, on the declaration to-day of a 4 per cent dividend, payable April 15. The low-priced miscellaneous stocks have been separately advanced, by parties interested in them; Quicksilver Mining stock has been strong since the election of the new board, which includes a number of very prominent bankers. At the Union Pacific Railroad election, Mr. Scott, of the Pennsylvania road, was elected President, and several other prominent railroad men were elected as directors, who had not previously been in the board.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

State and Railroad Bonds.—There has been more business done in the Southern State bonds this week, with a varying tone in the market. Virginias, Tennessees, North and South Carolinas have been the chief features; an important advance of about 6 per cent. was made upon the latter, on the strength of the passage of the bill authorizing the new sterling funding loan of £1,200,000 in six per cent. bonds, the proceeds to be used in retiring the old debt. This law, as above stated, is regarded on the market as favorable to the bonds, though we understand that parties who are not inclined to take a hopeful view of the State's finances, allege that the actual result of the law will, in fact, be otherwise. North Carolinas have been heavy. In regard to the other States there have been no new developments to affect the prices of their securities.

Pacific Railroad bonds have been strong on Centrals, which sold up to 96, and in the Amsterdam market at 83½. Union Pacifics have been depressed on large sales which have probably been connected in some way with the recent election and partial change of Directory. The President, in his annual report, attributes all the late depression in the securities of the company to the action of the Government in regard to the payment of interest; but, while public opinion is generally against the course pursued by the Government it is well known that the extreme fluctuations in Union Pacifics were the result of speculative operations. The following were the closing quotations: First Mortgage, 83@83½; Incomes, 67½@67¾; Land Grants, 73½@73¾; Stock, 27½@27¾.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

The Gold Market.—Gold was dull and heavy until Tuesday and ruled at 110½@111½; on that day, however, there was a stronger tone in the market and higher prices, supported by a good trade demand for customs and the stiffening in foreign exchange. Some short interest was previously made on the expectation of large subscriptions to the new loan, and this has been one cause of firmness which was assisted also to-day by the lower quotations of our securities in London, and by the prospect of considerable coin shipments in the next few months, if exchange remains at the present high rates. Rates for carrying have ranged from 2 to 4½ per cent., the former rate being made at the close to-day. At the treasury sale on Thursday, of $2,000,000, the bids amounted to $4,083,500. Custom house receipts for the week have been $3,602,000.

The following table will show the course of the gold premium each day of the week past:

	Quotations. Opening.	Lowest.	Highest.	Closing.	Total Clearings.	Balances. Gold.	Balances. Currency.
Saturday, Mar. 4....	110¾	110¼	111¾	111	$37,224,000	$2,433,688	$2,757,121

Prussian X thalers	7 95 @ 8 40	English silver	4 75 @ 4 85
X guilders	3 90 @ 4 00	Prussian thalers	69¾@ 70¼
Spanish doubloons	16 40 @ 16 60	Specie thalers	1 04 @ 1 06
Patriot doubloons	15 50 @ 15 65	Mexican dollars	1 03¾@ 1 03¾
American silver (old coinage) 1@2 p.c. premium.		Spanish dollars	2@3 p.c. premium.
		South American dollars	par.

Foreign Exchange.—The market has continued very firm, and since the sailing of Wednesday's steamer, has touched 109¼ as the outside quotation for best 60 days bankers' sterling. There is no particular activity in business, but there are very few bills offering, and the rates being close to specie shipping point, there is little object for bankers to draw bills, and ship specie to meet them. There seems to have been nothing of importance in the way of further negotiation of foreign loans, neither was the Bank of England rate advanced again on Thursday, so that the market has been left to be regulated by the usual trade demand. To-day there was a slight concession in rates, and while 109¼ was the asking price, a commission of 1-16 to ⅛ was generally allowed.

There is no anticipation expressed of weakness in the market during the immediate future, and the lower prices of cotton at Liverpool, which have been a source of strength in the exchange market this week, can hardly be expected to improve soon, if our crop receipts continue to be proportionately as large as they have been of late.

The total exports of cotton this week from the United States amounts to 123,278 bales, worth about $7,766,514, in gold, against 70,735 bales in the same week of 1870, producing then $6,100,000, with gold at 112, and middling uplands at 22c.

Quotations are as follows:

	60 Days.	8 Days.
London prime bankers	109⅜@ 109¾	110¼@ 110⅝
" commercial	109 @ 109⅛	.....@ ....
Paris (bankers)	@	.....@ .....
Antwerp	5.12½@5.11¼	5.08¾@5.07½

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3. The Table of Railroad, Canal and Other Stocks, on the next page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column x=*extra*; s=*stock or scrip*.

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q.—J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of United States and State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name.

Pennsylvania Railroad Company's Twenty-fourth Annual Report.—*To the Shareholders of the Pennsylvania Railroad Company*:—Your directors have the pleasure to submit to you a very satisfactory report of the results of the business of the company for the past year. During that period the operations of the company have been very extensive, and have been attended with gratifying success.

The earnings of your main line and branches were:

From passengers	$8,595,371	
From emigrant passengers	162,671	
From mails	146,743	
From express matter	310,785	
From general freights	12,793,160	
From miscellaneous sources	522,974	
		$17,531,706
EXPENSES.		
For conducting transportation	$3,162,064	
For motive power	3,240,606	
For maintenance of cars	1,186,945	
For maintenance of road	3,058,685	
For general expenses	211,762	
		11,260,085
Leaving net earnings for 1870 of		$6,271,621

The total amount of revenues compared with last year is:

1870	$17,531,706
1869	17,250,811
Increase	$280,895

Changes in the sources of revenue are shown below:

Increase in first class passengers	$95,300	
" emigrants	31,605	
" mails	27,781	
" express matter	8,131	
" miscellaneous sources	257,572	
		$420,891
Decrease in freights		130,496
Increase, as above stated		$280,895

The only item of income that shows a decrease is from freights, and this has occurred under an increased tonnage of 401,060 tons, and is mainly accounted for by the reduction of freight charges—without any legitimate object—during the past summer and autumn, by the New York lines, to a point much below the cost of transportation.

The gross revenues for 1870 are equal to $48,071 25 per mile for the main line of railroad.

The whole number of passengers carried in 1869 was 4,229,363, and in 1870, 4,352,769, an increase of 123,406, or nearly 3 per cent. The average distance traveled by each passenger was 34 65-100 miles, being 43-100 of a mile greater than in 1869.

The number of tons of freight moved (including 376,650 tons of fuel and other material transported for the company) was 5,804,051 embracing 2,550,389 tons of coal. It was last year, 5,402,991 tons.

The average charge per net ton per mile upon freights during the year was 1 549-1000 cents, against 1 718-1000 cents last year, and 1 9-10 the year previous, and, per passenger, 2 49-100 cents per mile, against 2 51-100 cents last year, or an average decrase in freight charges of 9 8-10 per cent, and in passenger charges of 8-10 of one per cent per mile.

The actual cost of operating your railroad, including branch lines, in 1870, was 59 15-100 per cent of its receipts.

Earnings of the Philadelphia and Erie road in 1870 were:

From passengers	$606,438	
From freights	2,459,154	
From express matter	33,111	
From mails	25,000	
From miscellaneous sources	20,339	
Total (nearly $11,000 per mile of road)		$3,144,044
The operating expenses during the same period were:		
For conducting transportation	$712,179	
For motive power	736,926	
For maintenance of cars	260,710	
For maintenance of way	867,912	
		2,577,728
Showing a balance to credit of P. & E. R. R.		$566,316

The revenues of the lines operated by this company and the amounts paid for their working expenses, interest and dividends, are as follows:

From the Pennsylvania Railroad and branches	$17,531,706
From the Pittsburgh, Ft. Wayne & Chicago Railway	8,118,595
From the Erie & Pittsburgh Railway (10 months)	670,859
From the Philadelphia & Erie Railway	3,144,044
	$29,665,206

And the expenses of operating these lines were:

Pennsylvania Railroad	$11,260,085	
Pittsburgh, Ft. Wayne & Chicago Railway, including rent, etc.	7,052,011	
Erie & Pittsburgh Railway including rent, etc., (10 months)	1,642,281	
Philadelphia & Erie Railroad (including $566,316 29 net earnings, paid to that company	3,144,044	
The loss upon advances to the Columbus, Chicago & Indiana Central Railway Company, to meet its floating debt, etc., and on the operations of the lease of the said company for 1870, amount under an agreement and settlement with the lessee, to	1,166,892	
		$23,265,317
Leaving the net profits of the year 1870 upon all the operations of the company		$6,399,888
From which deduct dividends declared in May and November (each 5 per cent.) with the taxes paid thereon	$3,455,357	
Balance to debt of interest account and the amount allowed discount on sale of bonds	1,799,161	
Due for the lease of the Harrisburg & Lancaster Railroad	134,821	
Annual payment to the State of Pennsylvania on account of interest and principal due upon the purchase of her works between Pittsburgh and Philadelphia	460,000	
		$5,849,330
Leaving a balance of credit to profit and loss of		$550,548

This balance is the result of the business of the year, without bringing forward a similar surplus in 1869 amounting to $463,533, and after charging to expense account the additional cost of substituting iron bridges on the main line of the road and other expenses of construction account.

The operation of the Pittsburgh, Fort Wayne & Chicago Railway continue to show the favorable results confidently anticipated at the time the lease was made.

The earnings during the year 1870 were	$8,118,595
And the operating expenses	4,371,937
Balance	$3,746,608
The annual rent, with interest on the bonds of the company, expenses of maintaining the organization, annual contribution to the sinking fund, etc., etc., amounted to	$2,680,024
Showing the surplus of the lease to be	1,066,583
The earnings of the Erie & Pittsburgh Railroad from March 1 to December 31, 1870—10 months—(operated under the General Manager of the Pittsburgh, Fort Wayne & Chicago Railway), were	$871,859
And expenses for the same period were	383,425
Balance	$487,433
The interest on the bonds of the company, expenses of maintaining organization, etc., etc., during this period, amounted to	$258,875
Showing a profit of	$228,576
Giving a profit on the leases of these two roads of	$1,295,160

It is not the intention of the directors that the mortgage indebtedness of the company shall be increased beyond the thirty-five millions of dollars already authorized, as they consider that the other assets of the company, after exhausting this issue, will be ample to meet any enlargement of their works that may be required to comply with the public demand for transportation facilities.

The value of the existing sinking fund, instituted for the payment of the existing second mortgage bonds, will not only be sufficient to cancel the bonds issued under it when due, but a balance will be left which, if judiciously administered, will also pay off at maturity not only the first mortgage bonds, but also those of the general mortgage; while the lien of the State upon the Philadelphia & Columbia Railway is being paid off by the annual reduction of its principal, in accordance with the act of Legislature, to an extent which will extinguish it before its maturity.

From this summary the shareholders will notice that the interest upon the mortgage debt of the company after 1871 may be provided from interest upon installments outside of your railroad, and that this debt may be all canceled at maturity by the existing sinking fund, leaving the net earnings of your railroad, which last year amounted to $6,271,621 67 (after meeting the annual payment of $460,000 to the State) for the stockholders.

To meet the demands upon the treasury during 1871, to complete the works in progress that are deemed essential to protect the existing interests of the company and pay the debentures, amounting to $1,109,224 falling due in July, the Board proposes to give to each shareholder the privilege of subscribing for one share of stock for every six that may be standing in his name upon the books of the company on the 30th of April, at par. Under the terms of the general mortgage, there can be issued only one million one hundred and ninety-two thousand dollars of these bonds in addition to those already sold, until the debentures due in July are canceled and further payments are made upon the State debt and prior mortgages upon its line, when an additional issue equal to such reduction and payments may be made. The net revenues of the company in 1870 were in excess of the amount required to meet dividends of 10 per cent upon the proposed increase of capital, and there is no reason to expect less favorable results in the future. To enable the company to provide for this distribution of stock, the directors accepted the provisions of the general act of Assembly of Pennsylvania, approved December 29, 1869, authorizing the increase of the capital of all railway companies 50 per cent.

In regard to the control of Western lines the President, after assigning reasons to show that it was necessary to the company's interests, remarks:

This control was effected by the lease for nine hundred and ninety-nine years of the Columbus, Chicago and Indiana Central Railway, and of the Little Miami Railroad, through the Pittsburgh, Cincinnati and St. Louis Railway Company, which your company controls by the ownership of a large majority of its shares; and the direct lease of the Pittsburgh, Fort Wayne and

Digitized by Google

Chicago, and the Erie and Pittsburgh Railways. Under the lease of the Pittsburgh, Fort Wayne and Chicago Railway this company became possessed also of one-half the shares of the Indianapolis and St. Louis Railway Company (between Indianapolis and Terre Haute), which had a lease of the old line between Terre Haute, Alton and St. Louis. The Pennsylvania Railroad Company had previously acquired a majority of the shares of the new line between Terre Haute and St. Louis via Vandalia, thus completing our connection with St. Louis.

Under the amended lease of the Columbus, Chicago and Indiana Central Railway, this company felt morally bound to assume its obligations to the Indianapolis and Vincennes Railroad Company, of which it is now nearly the sole shareholder. This enterprise is at present unprofitable, but will ere long prove a productive work, and when extended into Cairo, the grading of which is in a great measure finished, it will soon become a line of national importance.

The result of the operation of all these lines for 1870 shows a small profit, which, under judicious management must annually increase. The net profits for 1871, it is confidently expected, will be very satisfactory.

With a view to give greater simplicity and efficiency to the management of this large Western interest, and as far as practicable return to our former policy, a charter was obtained from the Commonwealth of Pennsylvania incorporating the "Pennsylvania Company," to which all the interest above mentioned of the Pennsylvania Railroad Company will be transferred on the 1st of March next, and $8,000,000 of the preferred capital stock of the Pennsylvania Company received therefor, which amount covers fully all of our expenditures in this connection. The whole capital of the Pennsylvania Company will consist of $8,000,000 of preferred, and not exceeding $4,000,000 of common stock. All the profits of the corporation during 1871, after meeting the obligations of the lines leased, are to be used by the managers in perfecting and equipping the railroads transferred to it. After 1871, the preferred shares of this company will yield at least 6 per cent on their par value.

In addition to the interests of the company in the West to be transferred to the Pennsylvania Company, it still holds twenty-two thousand shares (a large majority) of the stock of the Cleveland, Mount Vernon & Delaware Railroad Company—whose line is partly finished, and the remainder in progress, under the judicious supervision of its President, Judge Hurd, of Mount Vernon, Ohio. This interest was received with the lease of the Pittsburgh, Fort Wayne & Chicago Railway, and promises to become a profitable investment; also, $1,049,000 of the bonds of the Newport & Cincinnati Railroad Bridge, now being erected to connect the Little Miami Railway with the Kentucky system of railroads; four millions four hundred and forty-six thousand dollars of the general mortgage bonds of the Pittsburgh, Cincinnati & St. Louis Railway Company; one million seven hundred and sixty-six thousand dollars of the second mortgage bonds of the Terre Haute, Vandalia & St. Louis Railway Company, and eight hundred and seven thousand dollars of the first mortgage bonds of the Cincinnati & Muskingum Valley Railroad Company—the line of which is built from Zanesville to Morrow, 132 miles, and is being extended from Zanesville (16 miles) to Dresden, on the Pittsburgh, Cincinnati & St. Louis Railway. The interest upon all these bonds (amounting to $8,068,000) will be duly met from the revenues of these works.

This company also holds a majority of the shares of the stock of the Chartiers Railway Company.

The liabilities of the Pennsylvania Railroad Company in the West as guarantors arise wholly under the leases that it has made or guaranteed, and extend to four millions of dollars of the first mortgage bonds of the Grand Rapids and Indiana Railroad Company—as required by the terms of the lease of the Pittsburg, Fort Wayne and Chicago Railway. The Grand Rapids and Indiana Railroad Company, besides its railway, holds lands pledged for the payment of these bonds, valued at least at eight millions of dollars, and they cannot, therefore, reasonably become a charge upon this company, even if the railway should prove unproductive—an expectation which is not justified by the revenues of that portion of the line already built; to the bonds of the Indianapolis and Vincennes Railroad Company, amounting to $3,150,000 upon 114 miles of road, which will doubtless earn, after 1872, ample revenues to meet its interest and provide for the principal when due; to the interest upon $36,724,052 of the bonds of the Pittsburg, Fort Wayne and Chicago Railway Company and the Erie and Pittsburg Railroad Company, and to $15,831,000 of the bonds of the Columbus, Chicago and Indiana Central Railway Company. These works, as a whole, *now* yield net revenues *more* than sufficient to meet the interest upon all of the obligations mentioned, while the operation of the sinking fund of the Pittsburg, Fort Wayne and Chicago Railway Company, the terms of which have been faithfully complied with, and the semi-annual amount due charged to running expenses, will pay off the whole of its mortgage indebtedness, amounting to $13,563,000, before the bonds are due.

Respectfully submitted, by order of the Board,

J. EDGAR THOMPSON, President.

Union Pacific Railroad.—ANNUAL MEETING OF THE STOCKHOLDERS AT BOSTON.—The annual meeting of the stockholders of the Union Pacific Railroad Company was held at the office of the Company, in Boston on the 8th inst. The meeting was called to order by the President, Hon. Oliver Ames, who at once submitted his annual report to the stockholders of the road:

The report shows that during the past year, on account of the great depression of business in California, the earnings of the road have not been as large as was anticipated; but, it is thought that with rigid economy in every department of business during the ensuing year, the net earnings will be sufficient to pay the interest on the bonds. The great danger anticipated from the snows of the Platte Valley and Laramie Plains has proved groundless, and the Union Pacific Railroad can be run with more certainty of being unobstructed by snows than the railroads of New England and New York.

Work upon the bridge at Omaha has proceeded rapidly, and a permanent and durable structure will be ready for use the ensuing Summer. The bridge is of 11 spans, of 250 feet each, 50 feet above high water, resting upon one stone abutment now completed; and 11 iron piers, all in place, and the larger part of them are already sunk from 60 to 72 feet in the sand, and resting in the bed-rock. An act has been obtained from Congress, authorizing a mortgage of the bridge. It is proposed now to raise $2,500,000 of twenty years eight per cent mortgage bonds, to provide means for the completion of the bridge. The tolls on the bridge will be fixed at a rate sufficient to pay the interest on the bonds, and set apart enough to a sinking fund to redeem them at maturity.

The report closes by stating how greatly the construction of the road benefitted the Government, and how ungenerously the companies were treated by the course pursued by the Government in regard to the payment of their interest, to which course Mr. Ames attributes all the fluctuations in Union Pacific securities. While the majority of our readers will probably agree with the remarks so far as to disapprove the action of the Government, there are very few of them, we hope, who will attribute all the fluctuations in Pacific Railroad securities to that cause, as it would be the greatest injustice to charge upon Secretary Boutwell results which really arose from the operations of parties who were speculating upon an immense scale.

No financial report was submitted at the meeting of the stockholders, but the statement was made that the remaining assets of the Company had been sold for more than enough to liquidate the floating debt, and the April interest was provided for.

ELECTION OF DIRECTORS AND OFFICERS.

The following gentlemen, who each received 292,539 votes—the whole number cast—were declared elected:

Thomas A. Scott, Pennsylvania; Oliver Ames, John Duff, Elisha Atkins, Oakes Ames, Massachusetts; L. P. Morton, New York; R. E. Robbins, Massachusetts; James Brooks, New York; G. M. Dodge, Iowa; Sidney Dillon, New York; C. S. Bushnell, Connecticut; John Edgar Thompson, Pennsylvania; Andrew Carnagie, New York; George M. Pullman, Illinois; F. Gordon Dexter, Massachusetts. Colonel Thomas A. Scott, of Pennsylvania, and Vice-President of the Pennsylvania Central Railroad, was elected to that office.

Mr. Scott was Assistant Secretary of War under both Cameron and Stanton.

MONTHLY EARNINGS OF PRINCIPAL RAILROADS.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, March 10, 1871.

The continuance of mild weather has improved the condition of the street and caused the resumption of navigation on some of the Northern rivers, from which trade has derived a little stimulus, felt most in foreign goods; the leading domestic staples being disturbed by speculative considerati ons, have been variable, and close unsettled. It seems to be anticipated that the Spring business will be large, and, on the whole, fairly remunerative.

Cotton declined to 13½c. for low middling on the spot and 13 for future delivery, followed, however, by a reaction which has not been fully entertained. Breadstuffs have had a downward tendency since Monday, but closed firm. Groceries have been unsettled, but sugars show some reaction from the current point.

Tobacco has been less active, buyers having supplied their more pressing needs, are disposed to hold off for further orders, or until lower prices shall offer a better prospect for satisfactory returns. In the meantime, receipts continue liberal, and stocks accumulate. The sales of Kentucky Leaf for the week are about 550 hhds., of which one half for export, and made up, as heretofore, mostly of new crop, at 6½@8½c., plugs to medium leaf; the sales to cutters' and dealers' continue to be mainly of old crop at regular prices. In Seed Leaf, the business has been less active, and prices are weak and unsettled. The sales have been 450 cases new crop Pennsylvania on private terms; 100 do. State, crop of 1870, at 26c.; 75 cases fine Connecticut wrappers, crop of 1869, at 60c.; 100 do., assorted lots, at 35@58c.; and 100 cases New Ohio on private terms. In Spanish Tobacco the market has also been moderate, the sales embracing 186 bales Ambulena on private terms, and 500 do. Havana, 85c.@ $1 00. Manufactured Tobacco shows a free export movement.

Provisions have been dull, and hog products show a material decline. Pork is about a dollar per bbl. lower; Mess closed to-day at $21 50, cash, and better April and Prime Mess $20 25@20 50; Lard closed at $12⅞ for Prime Western Steam on spot, and better April; Bacon, 10¾c. for Short Rib. The decline is attributable to a marked reduction of stuffer's limits. Beef is comparatively scarce, and fine Cheese has sold fairly for export, but closes weak. Butter has slightly declined under increased receipts.

Foreign fruits show more steadiness at the close, after some large sales at easier prices. Hops have been active for export at full prices. Whiskey has slightly advanced on small receipts from the West.

Hides have been fairly active at full and temporary prices. Leather in more demand. Tallow firm but quiet.

Metals have met with a fair demand. East India goods fairly active, but a slight dealing is quoted in Manila Hemp. Jute Butts have sold freely at 3¾c. gold. Seeds of all kinds have done better, Clover Seed is still taken freely for export.

Wool has become less active, owing partly to the extreme views of holders, and partly to manufacturers having supplied their wants for the present.

Freights have latterly been more active, especially in the shipment of Breadstuffs. The business to day embraced Cotton for Liverpool at ¼@5-16d, by sail; Grain at 5¾@6½d, by sail and steam; Wheat to London 6½d, and Flour 2s 3d; Wheat to Glasgow by steam, 6d; the latest rates paid for Provisions to Liverpool by steam were 30s for Bacon, 35s for Lard, and 40s for Cheese.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles from the port of NewYork since January 1, 1871, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show *total values*, including the value of all other artiles besides those mentioned in the table.

ARTICLES.	Great Britain.	France.	Holland & Belg.	Germany.	Other N. Europe.	Spain.	Other S. Europe.	China & Japan.	Br. N. A. Colonies.	Australia.	EXPORTS SINCE JANUARY 1 TO Cuba.	Hayti.	Other W. Indies.	Mexico.	British Guiana.	Brazil.	Other S. American.	All oth. Ports.	Total this week.	Total since January 1, 1871.	Same time 1870.

COTTON.

FRIDAY, P. M., March 10, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening March 10. From the figures thus obtained it appears that the total receipts for the seven days have reached 136,533 bales against 126,935 bales last week, 136,661 bales the previous week, and 141,957 bales three weeks since, making the total receipts since the first of September, 1870, 3,051,230 bales against 2,258,825 bales for the same period of 1869–70, showing an increase since September 1 this year of 792,405 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	69,796	84,721	Florida.....bales.	1,848	659
Mobile	8 789	4,477	North Carolina.....	1,296	717
Charleston.....	8,630	3,670	Virginia.....	8,763	2,290
Savannah.....	13,428	7,796			
Texas.....	9,873	6,000	Total receipts.....	136,533	66,726
Tennessee, &c.....	15,660	6,396	Increase this year	69,807	....

The exports for the week ending this evening reach a total of 123,278 bales, of which 87,020 were to Great Britain, and 36,258 to the Continent, while the stocks at all the ports, as made up this evening, are now 651,683 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Week ending M'ch 10.	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans.....	25,303	20,002	45,305	47,149	236,236	241,423
Mobile	18,296	3,226	21,522	....	60,790	73,663
Charleston.....	7,076	4,182	11,258	562	25,688	22,512
Savannah.....	10,593	4,580	15,273	5,170	78,854	63,291
Texas.....	9,267	1,681	10,948	....	59,030	58 000
New York.....	13,931	2,487	16,118	13,574	112,000	67,000
Other ports.....	2,054	....	2,054	4,280	29,000	80,000
Total.....	87,020	36,258	123,278	70,735	651,683	653,894
Total since Sept. 1...	1,575,809	386,175	1,965,984	1805,255	....	....

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 52,543 bales, while the stocks to-night are 97,789 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to March 3, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1. 1870.	1869.	EXPORTED SINCE SEPT. 1 TO— Great Britain	France	Other Forign	Total.	Northern Ports.	Stock.

The past week has been an excited one in the cotton market. At the opening on Saturday the depression of the previous day was continued, and prices for all grades below middling were ¼c. off. This downward tendency was continued the next day, and at the close quotations had further declined ¼c. for ordinary; ⅛c. for good ordinary, and ¼c. for low middling. The next day the receipts at our ports were somewhat less free and a more settled feeling was at once apparent; holders, although willing sellers, no longer pressing their stock on the market. Since then the tone has gradually improved until yesterday, when, with the Liverpool quotations about ¼@½d. better, holders here became less desirous to sell and an advance of ¼c. was established on all grades below middling. To-day, with less favorable European accounts, there has been a slight reaction in feeling but no change in prices, with the offerings only moderate. The higher grades, not being in excessive supply, have not shared in the fluctuations of the week, Middling Uplands remaining at 14⅛c. (the close of last week) during all the week and so close to-night. For future delivery the transactions have been very large and prices have fluctuated more widely. The closing quotations were for March, 13⅛c.; for April, 13⅛c.; for May, 13⅛c.; for June, 13 9-16c.; for July, 13⅝c., and for August 14c. The total sales of this description for the week (including 1,200 bales free on board, but not including bales "Exchanged") have been 138,900 bales. For immediate delivery the total sales foot up this week 25,104 bales, including 2,280 bales to arrive, of which 3,840 bales were taken by spinners, 1,744 bales on speculation, 18,240 bales for export, and 1,280 bales in transit. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.

		700	14	800	13⅞		

The sales during the week of free on board have reached 1,200 bales. The particulars of these sales are as below:

200 free on board at Charleston.....p. t.
1,000 free on board at Mobile.....p. t.

1,200 total.

The following exchanges have been made during the week:

¼c. paid to exchange 300 April for 300 June.
⅛c. paid to exchange 200 March for 200 May.
600 March for 600 May, equal terms.

WEATHER REPORTS BY TELEGRAPH.—Our telegrams report that at Memphis, Tenn., and Macon, Ga., it has rained two days, the rest of the week being pleasant; at Columbus and Augusta, Ga., and at Nashville, Tenn., it has rained one day; at Mobile, two, much rain had fallen; at Galveston there have been delightful showers; and at Selma the weather has been warm and dry. The thermometer at Galveston has averaged 66, Macon, 60; Columbus, 58; Selma, 61; Memphis, 55.

RECEIPTS.—We have had another week of extremely large receipts, and our information is that there is considerable cotton still on the plantations and at the landings awaiting shipment. If, therefore, the lower prices do not check the movement, we must expect continued free arrivals for some weeks. A count of stock at Nashville this week discloses the fact that there is 1,700 bales less on hand than the running count called for.

THE NEXT CROP.—Preparations for planting are making considerable progress throughout the South—complaints, however, of too much rain reach us by mail from almost every quarter. As to the extent of planting it is of course too early to speak with accuracy and yet there are two facts bearing upon the next crop which may be considered established.

1. That very much less is being spent for fertilizers. This, we think, will prove to be a more important element in the problem as to the extent of the next crop along the Atlantic States than is generally imagined. One explanation of the large amount picked during the last two seasons in those States, is the fact that the plant under the influence of the fertilizers has matured more rapidly and fruited more abundantly, thus increasing the length of the picking season and the capacity of each laborer to secure the crop. This more rapid and superior development of the plant may easily enable one hand to do the work of three during the ingathering season. Up to this time we are informed that not one-tenth of the amount of fertilizers have been purchased which had been purchased at this date last season. This disproportion may not be continued to the same extent as the season advances; and yet, without doubt, the larger number of farmers in those sections have lost money the past season and will be compelled therefore to study economy.

Digitized by Google

2. Another fact which would appear to be settled is that more land is being put down to grain. There are two circumstances tending to produce this result: One is the very low price at which cotton is now selling; and the other, the promise that Breadstuffs will this next season continue to command pretty high rates on account of the late war in Europe which will create an extra demand for food from this country. Whether this land put under Breadstuffs will be made good to cotton by the cultivation of new land, we cannot of course state. The average pecuniary condition of the planter and the low price of cotton would not appear to make such a result likely.

GUNNY BAGS, BAGGING, &c.—The demand for cloth since our last has not been large, but former prices are pretty steady, especially for lots to arrive. We note the sale of 300 bales to arrive in Boston at 12½c., gold, in bond, 100 bales in Boston to be delivered June 1 at 19¼c., currency, duty paid, and 500 rolls domestic at 20c. Bags most of the week have been quiet, but toward the close we note a very fair demand. Sales are 300 bales in Boston, per "Tennyson," 100 bales per "Mount Washington," and 100 bales per "Whittier," all at 11c., gold, in bond, held firmly at 16@16½c., currency, on spot. Hemp has been in good demand, and rules firm, but not higher; sales are 1,000 bales fair quality at 9¾c., and 700 bales superior at 10½c., both per "Ringleader," and 4,000 bales to arrive at 10c., thirty and sixty days said to have been taken by a speculator. Jute is in fair demand, and rules very steady; sales are 2,000 bales low grade at from 5½c., gold, to 6½c., currency, 200 bales superior quality at 7½c., currency; in Boston 200 bales "M" "C" at same price, and 600 bales to come here at 7⅞, currency. Jute Butts have moved freely at full prices; the sales are 1,400 bales on spot at 4c., currency, and 250 bales in Boston on spot at 4½c., currency, 500 bales per "Arminta," at 3¾c., gold, 500 bales per "Cavalier," at 4½c., currency, 1,300 bales per "Ivanhoe," at 3¾., gold, 1,660 bales per "Prince Patrick," 250 bales per "Lincoln," 250 bales per "Tennyson," all at 3½c., gold.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	Week ending Mar. 10, 1871.			Week ending Mar. 10, 1870.		
	Receipts.	Shipments.	Stock.	Receipts.	Shipments.	Stock.
Augusta	3,127	4,399	21,775	1,893	3,270	22,258

Selma	950	1,162	8,400	342	889	6,500
Memphis	10,980	15,299	42,919	10,660	6,832	27,288
Nashville†	3,870	3,232	7,785	783	500	5,699
	21,548	28,826	112,227	14,917	14,488	101,813

* A count of stock this week at Macon makes the stock to-night 11,057 bales.
† A count of stock at Nashville this week disclosed the fact that there was 1,700 bales less of stock than the running count called for.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons:

	1871.	1870.
Stock in Liverpool.....bales.	768,000	271,000
Stock in London	76,340	73,683
Stock in Glasgow	350	300
Stock in Havre	42,160	74,080
Stock in Marseilles	4,600	4,600
Stock in Bremen	2,750	6,700
Stock rest of Continent	25,000	30,000
Afloat for Great Britain (American)	350,000	313,000
Afloat for France (American and Brazil)	....	58,631
Total Indian Cotton afloat for Europe	161,178	118,048
Stock in United States ports	651,683	553,894
Stock in inland towns	112,227	101,813
Total	2,194,288	1,604,929

These figures indicate an *increase* in the cotton in sight to-night of 589,359 bales compared with the same date of 1870.

The exports of cotton this week from New York show an increase since last week, the total reaching 24,669 bales, against 19,010 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

BOMBAY, Feb. 18.—Total sailings of the week, 14,500 bales; of which to Great Britain, via the Cape, 1,800 bales; do. per steamer, 11,000 bales; to the continent, 1,700 bales; total sailings in Februrusry, 16,100 bales; to Great Britain, per steamer, 11,400 bales; do. per sailing vessel, 1,800 bales; to the continent, 2,900 bales; total receipts of the week, 28,000 bales; stock on shipboard estimated at 58,000 bales. Hinginghaut, 210r—7 15-100d. cost and freight; Broach, 193r.—6 63-100d. cost and freight; do. machine-ginned, 208r.—7 9-100d. cost and freight; good fair Oomrawuttee, 195r.—6 69-100d. cost and freight; fair do., 191r.—57-100d. cost and freight; Dhollera, old, 186r.—6 42-100d. cost and freight; saw-ginned Dharwar, old, 191r.—6 57-100d. cost and freight; Comptah, old, 170r.—5 92-100d. cost and freight; Bengal, 170r.—5 92-100d. cost and freight. Dull market. Freights to Liverpool, per sailing vessel, 47s. 6d.; overland, per steamer, £3 15s.; via canal, £3 5s. Exchange, documentary bills, at six months' sight, on London, 1s. 11½d. per rupee. 7lb. shirtings, 4r. 10a.; 8½lb. shirtings, 5r. 10a.

BOMBAY, Feb. 21.—Market steady. Broach, 190r.—6¾d. per sail, 6½d. per steamer, cost and freight; machine-ginned do., 205r.—6 13-16d. per sail, 6 15-16d. per steamer, cost and freight; Dhollera, good marks, 192r.—6 7-16d. per sail, 6 9-16d. per steamer, cost and freight. Only a few candies new cotton arrived

BREADSTUFFS.

FRIDAY P. M., March 10, 1871.

The market for Flour and Grain opened the week with some speculative spirit, favored by an advance in Liverpool, but this speculation subsided on Monday, and prices have since been irregular and drooping, with few exceptions, closing, however, firm and active. Some has arrived, but sparingly, but the export demand has also been very moderate, and with an increasing desire to realize on lots in store, which is small on the approach of mild weather. Considerable lines of shipping extras have been sold at $6 65@6 75, but choice brands continue to be held at $7. No. 2 and Superfine Flours are relatively scarce and high. There has been more doing in Southern Flours for the West Indies. There have been large purchases of Rye Flour, partly on speculation. Corn Meal has also been in better demand. At to-day's market with Liverpool quoted at 3d. higher, fair shipping extras closed at $6 70@6 80.

Wheat early in the week touched about the highest prices of the season. Liverpool showed a large advance, and a brisk export demand for France was anticipated. The best new Spring sold at $1 60@$1 61, in store, and choice Amber Winter $1 70, delivered. But Liverpool soon became dull, and shipper's refused to go on, except at some decline; prices consequently have been giving way since Monday until to-day, with more export demand; 45,000 bushels new Spring sold at $1 56½@$1 58, in store.

Corn has not been in large supply, but under a decline of 9d. in Liverpool shippers have been compelled to insist upon lower prices, and we have to note a decline of 3c., closing with a fair export demand at 85½@86c. for prime new Western Mixed, afloat.

In Rye there has been a large movement, embracing Western at $1 13@$1 15. Barley has become very dull, and a portion of the late advance has been lost. Oats were in speculative demand early in the week, but close dull, with the improvement hardly maintained. The stock is large, and receipts at Western markets comparatively free.

The following are the closing quotations:

Flour—		Wheat, Spring, bush	$1 45@1 60
Superfine	$ bbl. $5 00@ 6 50	Red Winter	1 56@ 1 60
Extra State	6 75@ 7 00	Amber do	1 65@ 1 70
Extra Western, common to good	6 70@ 7 00	White	1 65@ 1 85
Double Extra Western and St. Louis	7 15@ 9 25	White California	....@ 1 80
Southern supers	....@	Corn, Western Mix'd	83@ 86
Southern, extra and family	6 85@ 9 25	Yellow, new	87@ 88
California	....@	White	85@ 92
Rye Flour, super & extra	5 75@ 6 35	Rye	1 15@ 1 20
Corn Meal	3 90@ 4 60	Oats	67@ 71
		Barley	95@ 1 20
		Malt	1 05@ 1 20
		Peas, Canada	1 15@ 1 35

The movement in breadstuffs at this market has been as follows:

At Chicago there were on the 4th inst., afloat, 740,890 bush. of corn and 194,740 do. of wheat, about 2-3 of which are included in the above.

GROCERIES.

FRIDAY EVENING, March 10, 1871.

Business has not been very heavy during the past week, and at times the market had quite a dull tone, but on the whole the feeling shows some improvement in favor of the selling interest. On none of the leading articles has it been deemed necessary to further modify values, while in some cases a slight advance was established, with holders offering their supplies in a more cautious manner and occasionally entirely withdrawing the most desirable parcels. The mail orders at hand are fair, buyers from the interior occasionally make their appearance, there is a prospect of lower freight charges, and with navigation fully resumed on the Hudson River dealers feel considerably encouraged.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black....	12,013 pkgs.	Laguayra ..	273 bags.	Sugar, Brazil.	.... bags.	
Green.....	9,081 pkgs.	Other.....	689 bags.	Manila, &c..	6,296 bags.	
Japan.....	4,129 pkgs.	Sugar, Cuba..	1,551 boxes.	M'las's, Cuba	2,376 hhds.	
Various.....	1,675 pkgs.	Cuba.....	5,185* hhds.	Porto Rico.	220* hhds.	
Coffee, Rio....	14,878 bags.	Porto Rico	250* hhds.	Demerara..	25* hhds.	
Java	12,093 mats.	Other.....	1,157 hhds.	Other.....	....* hhds.	
Maracaibo..	1,347 bags.	*Hhds. include bbls. and tcs. reduced				

Imports this week have included 21,751 bags Rio, and 8,288 bags of other kinds of coffee; with liberal receipts of sugar and molasses, including 11,409 bags Manila sugar, and 1,007 bbls. New Orleans molasses; also three cargoes of tea, making 1,419,398 lbs. of Black and 976,880 lbs. of Green.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at d ate.		Imports at leading ports since January 1.	
	1871.	1870.	1871.	1870.

TEA.

The market has been quite dull, partly because there was an auction sale announced for the close of the week, but mainly because stock was not in reality wanted. Two or three little spurts of activity in the various grades recently noted have satisfied the most urgent buyers, and the disposition of jobbers has since been to confine their operations to close calculation on actual wants, which were not heavy, as the distribution as yet fails to show any great amount of life. Prices are in a doubtful condition and quotations remain nominally as before, though bids made at full figures are pretty sure to find goods at once forthcoming. The supply has of late increased, and the available assortment is now very fine considering the outlet. Sales of 2,100 Greens, 1,300 Oolongs and 4,200 Japans. The auction sale to-day (Friday) was fairly attended, but there was not much spirit shown and prices ruled rather lower than those at private sale, a result naturally to be expected in the present condition of the market The Greens did rather the best, the Blacks being thin and undesirable. The prices were as follows: Oolong, 55@75c; Souchong, 75c; Japan, 73c; Hyson, 37@$1 00; Young Hyson, 50@$1 25; Gunpowder, 58@$1 25; Imperial, 20@$1 15, and Twankay, 28@32.

orts this week have included 980,834 lbs. of Black per "Caliph," from Foochow; 435,083 lbs. do. per "Nightingale," from Hong Kong; and 8,581 lbs. of Black and 976,880 lbs. of Green per "Mary Whitridge," from Shanghae.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871.....	4,737,792	7,706,676	3,304,152	15,748,620
1870.....	6,046,623	4,047,235	609,548	10,703,416

The indirect importations, including receipts by P. M. Steamers via Aspinwall, have been 5,312 pkgs. since January 1, against 10,212 last year.

COFFEE.

A generally quiet state of affairs has prevailed throughout this market, owing more to an absence of supplies, however, than from lack of demand, as buyers, though not particularly anxious, have been willing to operate fairly in desirable goods. Of Brazils the accumulation in first hands continued moderate, under perfect control, and was only to be reached at the most extreme figures, owners appearing to feel no desire whatever to sell and making no show of samples except on direct inquiry. On the other hand jobbers were fully as indifferent, the majority holding fair supplies to meet the light distributive call, and though not disinclined to negotiate on good stock could it be found at a reasonable price, objected most decidedly to handle the poor assortment available, at the rates asked, especially as a large cargo per steamer was momentarily expected. Buyers and sellers have, therefore, remained quietly awaiting further developments, and each seemed to be hopeful of some little advantage. Later advices from Rio Janeiro were also looked for with considerable interest, as they were likely to show the effects of European peace news upon the market at the point of supply. The other seaboard markets have been fairly active. Java has jobbed from second hands to about the usual extent, but the wholesale movements were moderate, owing in the main to small supplies, and the ease with which they were controlled. For West India styles the demand was fair and the market about as active as the moderate offerings would admit of, with the sales showing full values current. Exporters continue on the look out for St. Domingo qualities and the stock is not allowed to accumulate, most of the arrivals being either immediately sold in bond or re-shipped direct to Europe. As we close the entire market is very firm. Sales of 9,819 bags Rio, part to arrive; 2,100 bags Maracaibo; 500 bags Laguayra; 350 bags Savanilla; 1,800 bags St. Domingo, and 300 of the latter shipped direct. Sales at Baltimore, of 12,469 bags Rio; and at Hampton Roads 3,668 bags Rio.

Imports this week have included 2,850 bags of Rio per "Milton," 13,901 do. per "Flamstead," and 5,000 do. per "Talisman." Of other sorts the imports have included 3,002 bags of Maracaibo per "Hedvig," 3,495 do. by the "Laura Pride," 1,780 do. St. Domingo by the "A. L. Putnam," and 6 bags of sundries.

The stock of Rio Mar. 9, and the imports since January 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.
Stock.....	10,637	...	15,600	4,000	7,809	1,000	39,046
Same date 1870.....	35,436	....	24,440	....	2,000	....	63,876

* Includes mats, &c., reduced to bags. † Also, 30,284 mats.

SUGAR.

On raws the week opened dull and a little slack on all grades, but evidences of an improving tone were soon manifested, which subsequently developed into increased activity and a slight advance in prices on both old and new sugars. Still while taking larger amounts of stock buyers did not operate with activity, were careful in making selections, and generally appeared to move without excitement, the refined article still selling too slowly to warrant the manufacture of large quantities, and the trade distributing only small quantities of raw, though now that the ice has disappeared a better call is hoped for from the river counties. Importers have experienced less trouble from accumulating receipts on pier, and unless stocks were very green and heavy have placed a goodly proportion in store to await a reaction, the commencement of which it is claimed has already set in this week. Advices from the points of production are reported as encouraging for the selling interest, but without decided change in values present or prospective, and the probabilities are that our market for some little time will be subject almost entirely to the simple laws of supply and demand, nothing indicating that either buyers or sellers can bring any other influences to bear. Refined have again been reduced in price, owing to a larger production, an accumulation of stock, and the necessity to realize, but with the prevailing low cost, the probabilities of lighter freight charges to the interior, and quite a number of export orders known to be here, the feeling is somewhat more hopeful for an early improvement in business; indeed at the close prices already commence to harden on all grades. Sales of raw include 4,256 hhds. Cuba, 577 hhds. Martinique, 75 hhds. Demerara, 100 hhds. Porto Rico, 1,064 hhds. New Orleans, 1,499 boxes Havana, and 642 hhds. Melado.

Imports at New York, and stock in first hands, Mar. 9, were as follows:

	Cuba, bxs.	Cuba, *hhds.	P. Rico, *hhds.	Other *hhds.	Brazil, bags.	Manila, &c, bags.	Melado hhds.

MOLASSES.

We find no decided change in the general tenor of the market for foreign grades. Holders have continued to offer their stock of old crop at low prices and it has been taken in small lots as wanted by distillers, etc., until the accumulation is now reduced so low as to be likely to cause little or no trouble during the balance of the season unless an attempt to advance the cost is made, to which buyers are not in a frame of mind to submit. The new crop has peddled out on the choice grocery grades to the trade at former full prices, and a few purchases of cargoes have been made by refiners, though the latter class of buyers are not plenty the small amount of work doing and their own importations furnishing a very good supply. In fact, the entire demand from all quarters is simply a matter of immediate necessity and with increasing

Digitized by Google

stocks importers can gain no advantage for the present. Domestic has been in moderate uncertain demand, and the supply available pretty large with prices mainly in buyers favor though receivers hold out rather stiffly for extreme rates on choice goods, parcels of which are few and far between. Sugar-House Molasses still selling very well for Southern shipment and firmer at 22c in hhds and 25c in bbls the latter the favorite. Sales of 575 hhds old Cuba, (about 400 to arrive coastwise) 575 hhds. Cuba clayed, 950 hhds new Cuba Muscovado; 225 hhds. Porto Rico; and 1,475 bbls. New Orleans.

The receipts at New York, and stock in first hands, Mar. 9, were as follows:

*Including tierces and barrels reduced to hhds.

SPICES.

In a general way everything appears to be pretty much as last noted, the volume of business proving small and values nominally unchanged. The most liberal stock on hand is of Cassia, and invoices of this can be bought on comparatively easy terms, but for other leading grades dealers talk very firmly, as there is little or nothing here available, and all recent advices indicate few cargoes in transit and small shipments from the point of production. A better European call is also anticipated, and if realized will, in all probability, require most of the supplies offering for several months. Among the jobbers there is a fair general movement, without any great activity; and as a few of the leading dealers control the position prices are firm and uniform.

FRUITS, &c.

The market for Layers is held more firmly than at the date of our last, but business is still confined to jobbing lots for the immediate wants of the city trade. Prunes and Sardines are both quiet, but remain steady at the late advance. Under a pressure to sell, on the other side, Sardines declined to 15c. gold, to arrive. The low prices, however, stimulated a demand, and the market recovered full 1c. gold, the sales for the week footing up about 1,000 cases, mostly quarter boxes, to arrive. Almonds have met with a fair sale, but are not quotably changed. Walnuts are in good request, and the tendency of price is still upward. In other descriptions we do not learn of any important change or transactions.

In Foreign Green Fruits the demand is good, and steady prices rule. The supply has not been very large, but there are a great many vessels due here now, and as fast as they come are sold with as much dispatch as possible. The first arrival was the brig "Ann and Mary," on the 9th about noon, and the cargo of 3,579 boxes Palermo Oranges and 1,381 do. Lemons sold at three o'clock. The largest sale of the season is announced for to-morrow. West India fruit has not been so plenty, and meets with a steady good sale at $12@13 per barrel for Oranges; $40@$45 per thousand for Baracoa Cocoanuts; $65 for Carthagena do., and $2 50@$2 75 per bunch.

Domestic Dried are very quiet for Apples, and the market may be called a little easier for State Apples, but not actually lower. Southern are rather more steady in value, on account of their cheapness compared with State. Blackberries are steady, but not active. Peaches of all kinds, except inferior pared, are scarce, and in demand at high prices. Old unpared sell quite readily at about 1c. per pound below the nominal price of new. Pitted Cherries, Plums, and Raspberries have all sold freely, and the latter have increased in value. Pea nuts have been actively dealt in, both here and in the growing districts, and prices have advanced with still an upward tendency. Pecans are rather quiet and though firmly held are not higher.

Domestic Green are quiet, caused probably by the large supply and cheapness of Mediterranean Oranges. Prime Apples are steady at $4 75@$5 25 good do., $4@$4 50. Cranberries sell at $3@$3 50 per crate for fair, and $3 75@$4 for best.

Canned goods are in only moderate demand, and we note no change in quotations for some time past; jobbing about as follows: Tomatoes, 2 lbs., $1 75, @$1 80 per dozen; 3 lbs., $2 35@$2 40. Peaches, 2 lbs., $2 25@$2 30; 3 lbs., $3 20@$4. Corn, Eastern, $2 75; Baltimore, $3 50. Lobster, 1 lb., $2; 2 lbs., $3. Borden's Condensed Milk, 16 oz., $2 90. Pineapple, 2 lbs., $2 75, 3 lbs., $3 25 per dozen; and Peas, 2 lbs., $3 50@$4 per dozen.

ADVICES FROM PRODUCING MARKETS.

Tea.—The following shows the quantity of Tea afloat for the United States at latest dates (not including San Francisco), and which has not yet arrived:

Rio Coffee.—Mail dates to February 4th are at hand, which give the following particulars of the market. Total sales for the past fortnight amounted to 65,000 bags, of which 32,800 bags were for the United States. Quotations were unchanged, though a considerable advance was demanded by holders. Stock at date, 75,000 bags. Daily arrivals have averaged about 7,900 bags.

Java Coffee and Sugar.—We have reports by mail, dating Jan. 12, 1871. Coffee in good enquiry; transactions are very limited, as stock of last year's crop are nearly closed, nominal quotation ƒ31@ƒ35 for the extreme grades. Of the Padang sale of 56,000 piculs, on December 30, it is estimated that 30,000 piculs will be shipped to America. About this year's crop the report is unfavorable, the heavy rains having done much damage, and it is generally believed that the crop will be much smaller than last year.

SUGAR—There has been a brisk demand; the last month transactions have taken place at ƒ15 75@ƒ16, and lately ƒ16 50 has been paid, below which nothing is obtainable, owing to last year's crop being nearly exhausted. For delivery, of this year's crop, some 60,000 piculs have been sold at ƒ14 75@ƒ15, which latter price is still being offered.

Date.	Vessel.	Coffee. (pcls.) 136 lbs.	Sugar. (pcls.) 136 lbs.

Total piculs of 136 pounds		2,164	96,337

Cuba Sugar.—HAVANA, March 4.—Owing to the quietness which prevails in the leading British markets and the declining prices in the United States, the majority of buyers have reduced their offers to 10rs. per arrobe No. 12 for classes suitable for those quarters; but most planters have continued firm in their former pretentions of 10¼@10½rs., especially for good strong sugars, and there has accordingly been but little done during the week. The actual demand is almost entirely for crystalized sorts, which are paid at higher figures than those noted above, say, at 10 ⅝@10¾rs. No. 12. Now that peace between France and Germany has been signed, there will very likely be an improving demand for these sugars from the former country. Anticipating this, and with the certainty of a small crop here, holders appear to pay little attention to the adverse cable reports concerning some of the leading foreign markets. The demand closes quiet, at firm prices.

The sales which have been reported during the week amount to about 8,500 boxes of all kinds against 5,000 boxes last week.

Shipments this week from Havana and Matanzas have been as follows:

To	Boxes.	Hhds.
New York	2,406	3,604
Boston	2,297	....
Baltimore	919	1,091
New Orleans	82	214
Total export of the week to all countries	29,373	5,229

The general movement at both ports has been as follows:

	Rec'ts this week Boxes.	Hhds.	Exports since January 1. To U. S. Boxes.	Hhds.	To all Ports. Boxes.	Hhds.	Stock at date. Boxes.	Hhds.

1870	79,496	5,240	71,483	21,806	240,127	29,512	315,963	22,975
1869	61,742	4,158	106,488	19,065	237,161	22,189	141,765	9,201

New Orleans Molasses.—The supplies are light, and are now nearly all fermenting. Good Molasses is scarce. The market is bare, or nearly so, of of Prime and Choice not fermenting. Poor Molasses is neglected, while good is in request. The receipts on Wednesday and Thursday were mostly sold at 15@25c. per gallon for inferior Fermenting; 30@40c. for Good and Prime Fermenting; 50@55c. for prime to strictly prime not Fermenting, and 59@60c. for choice. Yesterday the market was dull, without any change in prices.

	Sept. 1, 1870.	Same time 1869.

THE DRY GOODS TRADE.

FRIDAY, P. M., March 10, 1871.

There has been some improvement in the jobbing trade during the week, the number of buyers in the market having been largely increased, while the Spring-like weather has had the effect to stimulate a more liberal distribution of all seasonable fabrics. Buyers do not seem disposed to purchase large lots; the trade thus far has not been sufficient to break jobbers' stocks, hence the demand from this class of buyers for goods to replenish their assortments remains very light. The Spring season has never before opened so late as in the present instance, the current trade being no heavier than has usually been experienced about the middle of February. Still, the fact exists that dealers throughout the country hold very small stocks of goods, and as consumers generally appear to be in a sufficiently prosperous condition to enable them to make purchases of at least average amounts of goods, it is believed by dealers that there will yet be an active trade done, and that the aggregate business of the season will be very satisfactory. The grain-growing sections of the West and Southwest are in an easy financial condition, and the demand from dealers in those localities promises to be large. In the South, money is tight, and the sales to the exclusively cotton-growing districts will naturally be small.

Collections are coming in freely from nearly all sections, and we hear of but few points where dealers are asking an extension of time. The retail trade has scarcely opened, even in the large cities, excepting at the South. From all we can learn, however, the prospects are favorable for a fair season, the low prices at which goods are selling being calculated to stimulate an active traffic.

DOMESTIC COTTON GOODS.—There has been but little change in the general features of the market since our last report. Trade in brown and bleached cottons continues good, especially with jobbers, while agents are well sold up on all prominent makes of standard qualities. Colored cottons are improving, but the trade lacks spirit, and is usually backward. Denims of the best makes are in short supply in first hands, and other goods are not held in larger amounts than are usual at this season of the year. Corset Jeans have met active sale throughout the week to manufacturers and distributors at full prices. Prints have been steadier at the decline, but are moving with little, if any, more freedom than at the time of our last report. There seems to be little probability of a further decline, however, the stock being firmly held by agents, while jobbers have agreed not to break prices. On other lines the market is firm and unchanged, but there is thought to be a lack of stability on many lines of both brown and bleached goods.

DOMESTIC WOOLEN GOODS.—There is a good trade doing in fine and medium grade fancy cassimeres, in first hands, both clothiers and distributors being liberal purchasers, though the bulk of the sales are to the latter. Low grade cassimeres are not very active, but meet fair sales for this season of the year. Stocks of all grades are light, and the amount carried over into next season will be smaller than for any previous season for many years. The demand for faced goods is not quite so active as at the time of our last report, but these fabrics are still moving in considerable amounts, and the stocks held by the agents for the principal mills is unusually small. The jobbing trade in woolens remains small, but is said to be improving slightly. Shawls of popular marks sell freely, but the demand lacks spirit in consequence of jobbers holding good stocks, the demand from retailers not having been sufficient as yet to break their original assortments and necessitate second purchases.

FOREIGN GOODS.—Importers have not done so large a trade as during last week, but the business has been very satisfactory, and more activity is looked for as soon as the jobbing trade picks up. Dress fabrics in medium and low-priced styles are in good request, and are held at steady prices. Thin fabrics are meeting moderate sale to the Southern trade, while the demand from other sections is mainly for more effects, plaid poplins and orleans, and similar fabrics suited to the earlier trade. Laces and white goods are selling more freely, and the season's business in these goods will, it is thought, be much more active than was that of the spring season last year. Woolens are in good demand, light blue cloths being especially active and scarce. The silk trade is improving as the demand from consumers increases, and the movements are good, as compared with other fabrics. The demand is chiefly for low and medium priced fancies, though high priced goods are in fair request.

The exports of dry goods for the past week, and since January 1, 1871, and the total for the same time in several previous years are shown in the following table:

	FROM NEW YORK.				FROM BOSTON

Insurance

OFFICE OF THE

ATLANTIC

Mutual Insurance Co.

NEW YORK, January 26, 1871.

The Trustees, in conformity to the Charter of the Company, submit the following statement of its affairs on the 31st December, 1870:

Premiums received on Marine Risks, from 1st January, 1870, to 31st December, 1870..	$5,270,690 09
Premiums on Policies not marked off 1st January, 1870	2,155,723 64
Total amount of Marine Premiums	$7,426,413 73
No Policies have been issued upon Life Risks nor upon Fire Risks disconnected with Marine Risks.	
Premiums marked Off from 1st January, 1870, to 31st December, 1870	$5,392,738 55
Losses paid during the same period	$2,253,590 39
Returns of Premiums and Expenses	$1,063,263 57

The Company has the following Assets, viz.:

United States and State of New York Stock, City, Bank and other Stocks	$8,843,740 00
Loans secured by Stocks, and otherwise..	2,377,350 00
Real Estate and Bonds and Mortgages	217,500 00
Interest and sundry notes and claims due the Company, estimated at	339,352 03
Premium Notes and Bills Receivable	2,089,915 95
Cash in Bank,	316,125 45
Total amount of Assets	$14,183,983 43

Six per cent interest on the outstanding certificates of profits will be paid to the holders thereof, or their legal representatives, on and after Tuesday, the Seventh of February next.

The outstanding certificates of the issue of 1867 will be redeemed and paid to the holders thereof, or their legal representatives, on and after Tuesday, the Seventh of February next, from which date all interest thereon will cease. The certificates to be produced at the time of payment and cancelled. Upon certificates which were issued (in red scrip) for gold premiums, such payment of interest and redemption will be in gold.

A dividend of THIRTY-FIVE Per Cent is declared on the net earned premiums of the Company, for the year ending 31st December, 1870, for which certificates will be issued on and after Tuesday, the Fourth of April next.

By order of the Board,

J. H. CHAPMAN, Secretary.

COTTON.
1,000 Tons Arrow Ties for baling Cotton.
For Sale by
SWENSON, PERKINS & CO., AGENTS,
P. O. Box 5,734. 80 Beaver street, N. Y.
These Ties have been used more extensively than any others, and last year for more than one-half of all the cotton baled in the United States, and received the premium at several State fairs.

THE Commercial AND Financial Chronicle

HUNT'S MERCHANTS' MAGAZINE,

A Weekly Newspaper,

REPRESENTING THE INDUSTRIAL AND COMMERCIAL INTERESTS OF THE UNITED STATES.

VOL. 12. NEW YORK, MARCH 18, 1871. NO. 299.

Advertisements.

(Advertisements will be inserted at the following rices per line for each insertion:

ordered less than 4 times	20	cents per line.
5 times or more	16	"
9 "	14	"
13 "	12	"
26 "	10	"
52 "	8	"

If the advertisement occupies one column or upwards, a discount of 15 per cent on these rates will be allowed.

Space is measured in agate type, 14 lines to the inch.

Advertisements will have a favorable place when first put in, but no promise of continuous insertion in the best place can be given, as all advertisers must have equal opportunities.

Advantages.

1. The CHRONICLE has much the largest circulation of any financial publication issued.

2. Its circulation extends to business men in BOTH the FINANCIAL and COMMERCIAL branches, and also to a very numerous class of retired merchants, moneyed men and investors, who are not engaged in regular business.

3. It is preserved on file by subscribers, and thus possesses a great advantage for advertisers, over those publications which are habitually thrown aside after perusal.

Financial.

Elizabethtown & Paducah Railroad Company

OF KENTUCKY.

FIRST MORTGAGE

Eight Per Cent. Convertible Bonds.

This road, connecting the important points of Louisville and Paducah, is 185 miles long, and passes through a rich agricultural and mineral section of the State of Kentucky. The traffic will be abundantly remunerative.

Sixty miles of this road are already in successful operation, and it is expected that the line will be opened to Greenville, 98 miles, in July next. The western end of the line, (on which a considerable amount has been expended) will be pushed vigorously to completion. The Company have in good and BONA FIDE stock subscriptions amounting to

$3,095,000

of which the city of Louisville subscribed

$1,000,000.

These Bonds are the only lien upon the property and franchises of the Company, and as an additional safeguard to purchasers are deposited with the UNITED STATES TRUST COMPANY OF NEW YORK, which will pay over the proceeds to the Railroad Company only in the ratio of construction.

The management is in the hands of most responsible and favorably known citizens of Kentucky, with the guaranty of their able and faithful direction, and with the large amount of stock subscribed these Bonds form a very safe and desirable investment.

The coupons are payable on the first days of March and September at the Bank of America, New York.

The Bonds are now offered at the low price of 87½ cents and accrued interest, and we with confidence recommend them to investors as a thoroughly safe security.

ST. LOUIS & IRON MOUNTAIN

RAILROAD COMPANY'S

Seven Per Cent Gold First Mortgage Bonds,

ON ITS ARKANSAS BRANCH.

This extension of 99¼ miles is from Pilot Knob, on the Iron Mountain Railroad, to the Arkansas line, where it connects with the Cairo and Fulton Railroad of Arkansas. Forty-five miles will soon be opened for business. A large amount of grading has been done on the lower section near the Arkansas Line, and the entire work will be pushed rapidly forward to completion. THE BONDS ARE DUE IN 1895 IN GOLD, secured by Mortgage to the Farmers' Loan and Trust Company. Interest payable June 1 and December 1, in GOLD, FREE OF GOVERNMENT TAXES. It is expected that the local traffic of the extension will equal that of the main line.

It will open a country rich in Lead, Copper, and Iron Mines heretofore inaccessible, and will traverse the famous Black River Lumber region. Only a limited number of Bonds will be sold at present. Price, 90 and accrued interest in currency. Further information will be given upon application to

H. G. MARQUAND,
Vice-President, 120 Broadway.

Attention is called to the following recommendation of these bonds:

ST. LOUIS, January, 1871.

We, the undersigned, recommend the Bonds of the ST. LOUIS AND IRON MOUNTAIN RAILROAD (Arkansas branch) as a good security.

The proposed connection with the Cairo and Fulton Railroad of Arkansas will be a valuable one for this City, and the trade from Arkansas will be large. The administration of the affairs of the Company is in capable and experienced hands, and the present revenue of the main line, while it is steadily increasing, is already sufficient to insure the payment of the interest.

OF THE

PEORIA, PEKIN & JACKSONVILLE RAILROAD COMPANY,

Issued in sums of $500 and $1,000, redeemable July 1st 1894, with coupons for semi-annual interest, payable on the first days of January and July, in the City of New York, and secured by a Mortgage for $1,000,000 upon the Railroad, its franchises and all equipment, on the well protected basis of about $12,000 per mile.

This Road, with its 83 miles of main, and over 8 miles of side track, is completed and in successful operation between the cities of Peoria and Jacksonville, in the state of Illinois. At Peoria, the third city in the state in respect to business and population, it intersects four prominent Railroads, with connections for Chicago, Rock Island and other points North, East and West but having its principal connection with that of the Chicago, Rock Island and Pacific Company. At Jacksonville it connects with three Roads forming, with the Jacksonville Division of the Chicago and Alton Road, the shortest line between Peoria and St. Louis.

Its rental receipts from other Roads, whose trains pass over less than ten miles of its track, are $40,000 per annum, being more than one half of the amount of the annual interest on its First Mortgage Bonds, otherwise amply provided for by its existing business.

A portion of the $1,000,000 of First Mortgage Bonds, aforesaid, the high character of which for investment will be observed, are now offered for sale by

W. T. HATCH & SON, Bankers,

34 WALL STREET, N Y.

The Directors of the Company are as follows

JOHN ALLEN (President), of Saybrook, Conn., late of Hopkins, Allen & Co., New York.

RICHARD ARNOLD, of Messrs. Arnold, Constable Co., New York.

JAMES M. CONSTABLE, of Messrs. Arnold, Constable & Co., New York.

LUCIUS HOPKINS, of Messrs. Hopkins, Dwight Trowbridge, New York.

EDWIN L. TROWBRIDGE, of Messrs. Hopkins Dwight & Trowbridge, New York.

LEBBEUS CHAPMAN, Jr. 33 Wall st.

JAMES F. KELSEY, Havana, Ills.

Winslow, Lanier & Co.,

NO. 27 PINE STREET,

Offer for sale, and recommend as a SAFE HOME INVESTMENT, and the cheapest New-England Security in the market, the

First Mortgage Bonds

OF THE

CONNECTICUT WESTERN

RAILROAD COMPANY,

Coupon or Registered, and by the Legislature of Connecticut made free of all State Tax—Seven per Cent. interest, payable January and July in New York. They have thirty years to run. The subscribed Capital Stock of the Company is $1,620,000, all of which, except $45,000, has been paid in cash. Of this, $750,000 has been subscribed and paid by the City of Hartford. The mortgage is made in trust to the Treasurer of the State. The Bonds are registered in the office of the Controller of the State, and countersigned by him, and by the terms of the Charter can only be delivered by him to the Company in the proportion of $2,000 bonds for $3,000 cash previously expended in the construction of the road.

The road extends from Hartford, where it connects with the whole New-England system of railroads, westerly to Millerton, on the New York State line, where it connects with the Harlem Road, north and south: with the Dutchess and Columbia to Fishkill, now completed; with the Poughkeepsie and Eastern to Poughkeepsie, to be finished in July, and with the Connecticut and Rondout Road, soon to be built, opening direct connection with the coal supplies of the Pennsylvania Coal Company and the Delaware and Hudson Canal Company. A wide field for business is opened by its numerous railroad and river connections in supplying the country with coal, lumber, grain, cattle and breadstuffs from the west, and returning iron, lime, marble and the manufacturing products of the many thrifty towns along its line.

The grading is complete, a part of the iron purchased, and track-laying will commence as soon as the condition of the bed will permit.

The character of the Managers, among whom are Hon. Wm. H. Barnum, Ex-Gov. Holley, Geo. M. Bartholomew, Esq., and James Goodwin, Esq., is a guarantee that the enterprise will be carried through in a substantial and economical manner.

The price of the Bonds is NINETY per cent. and accrued interest.

MR. BOUTWELL AND THE FOREIGN BANKERS.

There is little reason for the disappointment that has been expressed in some quarters as to the delay of the European bankers in responding to the proposals for Mr. Boutwell's new loan. We have frequently suggested the probability that in presence of the demand for capital which would be developed with the close of the war, any new financial negotiation from this country would be slow in attracting attention. The German and French governments are of course expected to require considerable funds to meet their immediate requirements for disbursement, and the position of the Bank of England has awakened some solicitude, especially as rumors have been put in circulation that a second advance in the rate of discount was imminent. The increase in the stock of bullion in that institution indicates, however, that its authorities have been adopting prudential expedients to provide beforehand against the drain of gold, and that they have ceased to depend, as heretofore, on the Bank of France and other sources to check the temporary outflow of the precious metals. It so happens that at this moment there are several other loans besides our own which have just appeared in the London market. One of them is that of Brazil, which being small will doubtless be successful. Another less popular is from Russia. The amount is only 60 millions of dollars, but it has stirred up a discussion as to the attitude of the Czar during the late war. The Emperor Frederic William positively affirmed in his dispatch to the Czar that Russia had prevented the war from spreading. The London *Morning Post* and other authorities explained this by saying that just before the war a secret treaty was signed between Russia and Germany, by which it was agreed, that if the French were successful in the first campaign, Russia should interfere. If Austria made any military demonstration, the Czar was to march an army to the frontier, and in the event of any European Power joining France Russia was to help Prussia. In return for these stipulations Prussia engaged to give moral support to Russia in her Black Sea projects, and especially in her attempts to neutralize the concessions induced by the Crimean war, and to shake herself free from the fetters imposed by the treaty of 1856. The existence of such an understanding has long been suspected. But that it was the subject of a treaty is officially denied by the Russian Government. The denial is supported by *Le Nord*, a well-known journal at Brussels, which is usually well informed on Russian topics. In that paper we find a letter from St. Petersburg, which affirms that it was hostility to Russia which induced the victorious Germans to demand from France the cession of Alsace and Lorraine. This writer goes on to argue that as long as Germany can hold the impenetrable Vosges frontier, and the great quadrilateral made by the four fortified centres—Metz, Thionville, Strasburg and Belfort—she will be protected in her rear against any hostile movements on the part of France, and will then be able without fear to pursue any designs against Russia in an easterly direction. There may be something in these apprehensions, and on them were perhaps founded the unconfirmed reports last Thursday that Prussia was willing to give up Alsace and Lorraine for a pecuniary consideration. The favorable conclusion of the Black Sea conference has not wholly set these questions at rest. They form an interesting chapter in the history of the war, and no doubt we shall hear more of them hereafter.

Another point raised in regard to this Russian loan, is the unsatisfactory state of the finances of that government. It has been pointed out that ever since 1832 every year has brought a deficit, and that the public debt has been steadily increasing year by year till it has reached the aggregate of 690 millions of roubles, or 600 millions of dollars. Besides this, the forced circulation of irredeemable paper has reached the aggregate of 656 millions; while the expenditure of the army alone consumes from 90 to 100 millions of dollars, and to meet the constantly recurring

Digitized by Google

deficit the paper money circulation has more than doubled in the past ten years.

It is not improbable, however, that all these questions which are agitating the financial magnates of Europe will soon be adjusted. And if the prospects of Mr. Boutwell's negotiation in Amsterdam, London or Frankfort are likely to be embarrassed it will not be from any such causes. The new bonds are not yet printed, but he has the plates ready. In accordance with the law each bond states that the loan is redeemable "in coin of the standard value of the United States, on July 14th, 1870, with interest in such coin payable quarterly, both the principal and the interest to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority."

EUROPEAN ARMIES AND THEIR COST.

For several years past the armies of Europe on a peace footing have withdrawn three millions of men from productive labor and have annually cost440 millions of dollars. It has been predicted by some persons of political sagacity that the last quarter of the nineteenth century like the first will be devoted to war. The explosion of the long pent-up ambition and rivalry of France and Prussia for the place of leader in the politics of the old world, has, however, disclosed two things which may help to administer an antidote to the threatening war mania. First, the destructive appliances of modern military science are so enormously augmented that wars hereafter are likely to be short and terrific in their losses. Never in the previous history of the world have so many men been slain in war as in the three months between the first shot at Saarbrück on the 2d of August and the final capitulation of Metz on the 28th of October. Secondly, with the present facilities for moving large masses of men any country at war is liable to be overrun in a few weeks by concentrated hosts of invaders, who may destroy in a single campaign the wealth accumulated in centuries. The devastation and suffering of France will be for all time a warning of the punishment modern civilization visits upon any people who go to battle for an idea, and seize the terrible scourge of war at the bidding of revenge, ambition, glory or conquest. Up to this time the excuse for the large armaments of the European Powers has always been that Napoleon kept up such large military forces "for the protection, security and power of France," that no neighboring nation could afford to disarm. The armament of the French Emperor was a standing menace to Europe, and he bears much of the blame for the prodigious armies of disciplined troops, the existence of which is certainly discreditable to this age of liberty, progress, scientific philanthrophy, and boasted intelligence.

As France is disabled and prostrate, and finds herself under such heavy bonds to refrain from war and to be at peace, it might seem as if the chief reason for such vast armies would be disposed of. England, however, does not appear to cherish such peaceful prognostications. And the tone of newspaper discussions in Belgium, Russia, Germany, and even France itself, is far from reassuring. In this state of doubt the following table of the magnitude and the cost of the armies of the several European powers will be of interest. The figures are drawn from official reports nearest to the beginning of the year 1870:

TABLE OF THE STRENGTH AND COST OF EUROPEAN ARMIES.

	Annual expenditure.	Number of Men.—Peace.	Number of Men.—War.	Cost per Soldier.
Prussia, forced service	$50,963,130	319,358	977,262	$169
Switzerland do do	481,595	97,313	350,000	2
Norway do do	1,102,615	47,714	112,225	184
Denmark do do	2,359,535	53,350	68,900	108
France, conscription by lot	77,277,000	404,192	758,627	186
Russia do do	89,853,340	892,648	1,135,973	...
Austria do do	37,257,250	278,470	838,700	134
S. Germany do do	23,290,600	83,818	147,625	...
Belgium, forced service	7,000,000	38,000	98,770	194
Greece do do	1,440,160	8,457	31,300	170
Italy do do	32,810,000	199,557	445,509	164
Netherlands do do	6,255,000	61,062	.....	102
Portugal do do	4,102,870	18,185	.....	226
Spain do do	19,833,560	151,668	200,000	217
Sweden do do	2,646,670	144,313	.....	84
Turkey do do	17,500,000	148,680	170,376	118
England, voluntary enlistment	70,000,000	115,807 / *192,327	..... / 431,779	394 / ...

* New organization.

From this table it will be seen that there are three ways by which in the old world armies are raised: by enlistment, by conscription and by national armament. Enlistment stimulated by bounties or otherwise, was formally general in Europe. It still survives only in England and in the United States. England has just remodelled her army, but she has left the principle of enlistment undisturbed. The other changes, however, amount to a complete revolution. The aristocratic organization of the army has been destroyed by abolishing the sale of commissions. Thirty-seven millions of dollars are the cost of this single change. How it will work depends of course on the other means used to selec officers possessing courage, honor, education and ability to command. The aggregate of the new army consists of 431,779 men of whom the Artillery are 68,600; the Cavalry, 26,952; the Engineers and Infantry, 79,410. The standing army is thus 192,327. To this aggregate the volunteers add 130,386; and the organized Reserves complete the total of 431,779. The military system is to be reconstructed; the country is divided into military districts, the field artillery is to be improved and the repeating rifles are to be the arm of the infantry. Heretofore the army has been less regarded and England has relied for her protection from foreign enemies upon her navy alone. The navy is now a front line of defense, and a more formidable army than England has ever previously had is to be placed behind it.

Prior to the recent changes the army of England was therefore small. In conformity with the individualism and impatience of restraint which for centuries have characterized the turbulent inhabitants of Great Britain, military service has always been voluntary. Forced service can not be resorted to to fill up its regiments however great the crisis. For home service alone can militia duty be compelled. The law allowing compulsory levies has been rarely put in force, and has slumbered for more than half a century. During the troubles of 1847 the organizing of the national armament or militia was contemplated, but the idea was given up as unpopular and useless. In the navy, however, which is the grand defensive bulwark of England, forced service has always been legal in time of war under the sanction of a law passed in 1379; and incidentally recognized in many later acts of Parliament. While the navy has always been regarded with indulgence and pride by the English; a standing army has been treated with suspicion and fear as a probable instrument of arbitrary power. The famous Bill of Rights of 1690 declared that "the raising or keeping a standing army in time of peace, unless with the consent of Parliament is against law." This fundamental principle of the British Constitution is guarded as sacred and the army is only continued from year to year. And for its support two distinct laws have to be passed by Parliament, either of which if defeated would disband the army. The first is the supply bill, and the second the mutiny bill, which is necessary to military discipline. Without this annual law the soldier would be liable merely to the civil tribunals, and would be amenable to no other laws than the rest of the citizens. Last year the British army cost £14,093,500, or about one-fifth of the whole revenue of the Government. The army expenses average for each soldier about £100 a year, including all extraordinary expenses. The net cost of each British soldier is about 394 dollars, or about twice as much as in any other

Digitized by Google

army in Europe. The ordinary cost per man, under the new organization now in progress, will probably be lessened eventually, but for the first year or two the extraordinary expenses of the changes making will be of necessity large.

The second method of filling the ranks of an army is by conscription. France claims to have discovered this effective weapon of military ambition. Napoleon laid down the axiom that every million inhabitants yields by conscription 7,000 to 8,000 conscripts a year. The French law was originated in 1793 by the National Assembly. The new Republic seemed at its last gasp. Money to pay hired troops not being at hand, the system of hiring was given up, The mass of the citizens were to take the place of the old professional veterans. The patriotism of regenerated France was appealed to and the example of Rome was cited, whose armies were raised by means of the *conscriptio* and the *legio*—all citizens capable of bearing arms being enrolled, and a certain portion being chosen for actual service in the field. Gradually the French conscription was perfected in two articles, first that all men between 20 and 25 capable of fighting should be enrolled, and secondly, that the Government call for so many soldiers every year, the individuals being chosen by lot. This system gave to the consummate generalship of the first Consul a million of men, and notwithstanding the bloody wars and frightful slaughter of the following years, it put Napoleon at the head of 1,200,000 men when he set out on this fatal campaign, which ended at Moscow, broke his power, and changed the destinies of Europe.

The army of France was reorganized in 1868, and was classed into three divisions—the active army of 404,192 men, the army of Reserve, 200,000, and the National Guard Mobile, 390,000 men. This law fixes the service in the active army at five years, at the expiration of which the soldier enters the Reserve for four years more. Men who have not been in the active army serve four years in the Reserve and five years in the National Guard Mobile. There are thus two different careers open to a soldier. He may begin in the active army or he may begin in the Reserve. Which of these two services each man shall adopt is settled by lot. If a man be drawn for the reserve he is not allowed to get a substitute; but if for the active army he may escape military service by a fine charged to him as the price of a substitute, but seldom spent for that purpose of late years. Hence one of the numerous sources of the defective numbers and general inefficiency in the French army which made it when badly handled and badly supplied, outnumbered and out-generalled, an unequal match for the victorious Germans in its most obstinate and hard-fought combats. The military organization of France is about to be changed, and conscription seems likely to be abandoned for a method more like that of Prussia.

This we referred to above as the third system of raising soldiers—that of national armament. This system was forced on Prussia by Napoleon after the battle of Jena and the treaty of Tilsit. It was agreed that Prussia should never keep more than 42,000 men under arms. This stipulation was intended to annihilate the power which Frederick I. had built up by his victories won by enlisted troops against overwhelming Austrian, French and Russian armies. General Scharnhorst, the Von Moltke of that day, devised a subtle scheme for converting the whole Prussian nation into soldiers without breaking the letter of the treaty. He kept up the army of 42,000 men always in camp, but he made a well-contrived organization for renewing this number constantly. He kept each man in camp just long enough to give him a good military training and sent him home again, replacing him with a fresh recruit. Thus two objects were gained of the highest possible military value. First the skeletons of the various regiments were always kept up so that raw and less experienced men were always flanked by veterans, and each citizen not only had his place in the army organization, but was drilled and disciplined to its duties. Secondly. The army was capable of swift mobilisation; and in 1813, after four years' drill, its prowess was triumphantly exhibited in driving Napoleon out of Germany. This system was modified in 1813 and reformed in 1861. The law is now that every man not disabled by health or want of physical aptitude shall receive military instruction and enter the army for a certain number of years. There are some exemptions from military service, but substitution is prohibited. Personal service is imperative, and every Prussian is enrolled as a soldier as soon as he has completed his twentieth year. His service lasts seven years—from the age of 20 to 23 in the regular army and from 23 to 27 in the army of reserve. For nine years more he enters the "Landwehr," and is liable to frequent drills and to forced service in the regular army in time of war. From 36 till the age of 50 the Prussian serves in the "Landsturm," which is only called on for home service. Thus every man is a soldier, with a few exceptions in favor of the nobility, the clergy, and a few other orders of the people. The aristocratic constitution of the army is kept up in various methods, among others by an arrangement that a certain amount of education and fortune shall allow a man who can buy his own equipment and pass a slight examination to serve one year in the regular army instead of three years. With few exceptions, then, the whole male population of Prussia is trained to arms, organized in permanent bodies, and is ready for defensive warfare within the country till the age of 50, and for offensive or defensive warfare in the mobilized army from the age of 20 to that of 36. How such an organization as this must exhaust Prussia, and how it will work when applied in Southern Germany, where it is new, offers one of those difficult and doubtful problems which are destined to put German statesmanship to a severer test than any with which it has had to deal since the title of Emperor of Germany was resigned by Francis II. and the Empire was finally dissolved on the 12th of July, 1806. The army of Germany is one of the least expensive in Europe. It is settled on the basis that the sum of 225 thalers is to be allowed for every soldier on active service.

These then are the three methods of armament in use in Europe: 1. That of enlistment with which we are best acquainted is disused everywhere else but in England, where it will probably long survive for reasons which we have suggested above. 2. The method of conscription which, with various modifications, is in force in France, Prussia, Austria, Belgium, Greece, Italy, Netherlands, Portugal, Spain, Sweden, Turkey. Till their incorporation with the German Empire conscription was also established in the South German States. 3. The system of forced general service in the army has been copied from Prussia by Switzerland as well as by Norway and Sweden, and prospectively by Republican France. Switzerland has, however, from her small resources, no standing army properly so called, and her military expenses are less than those of any other country in Europe.

RAILROAD EARNINGS IN FEBRUARY AND FROM JANUARY 1 TO MARCH 1.

The reports of February traffic, obtained from the several railroad companies which make public their earnings, show various results, and exhibit no uniform movement, either on the side of increase or decrease, as compared with the same

Digitized by Google

month of 1870. The roads, indeed, are so differently located, and liable to have their earnings affected by such different causes, that a general movement, either upward or downward, is now seldom noticed in the duller months of the year, when there is no heavy transportation of cereals or other produce, and local traffic, together with the through business rendered necessary by the absolute demands of trade, constitute the whole business.

Among the old roads, Chicago and Alton, Marietta and Cincinnati, Michigan Central, Ohio and Mississippi, and Toledo Wabash and Western show a fair increase in earnings ranging from $23,266 to $113,538, as shown below; while on the other side, Illinois Central shows a decrease of $96,373, and Milwaukee and St. Paul $55,367. Central Pacific shows an increase of $86,909, and Union Pacific a decrease of $104,370 in gross earnings, though a decrease also in expenses and a consequent increase in net receipts of $87,285. It will be observed that the Marietta and Cincinnati and Ohio and Mississippi roads are among those which show an improvement in earnings, a fact which is worth noticing, since it is probably due in part to the completion of the bridge over the Ohio river at Parkersburg. The increase in the receipts of these roads should be still more marked after the change to narrow gauge has been effected in the Ohio and Mississippi, although the full benefit of that change will not be apparent in the reports of gross receipts, but should be felt also in a large decrease of expenses.

For the month of March earnings may be affected to some extent by the lower tariff on through freights which has just been adopted by the New York Central and Hudson River Railway, the Erie and the Pennsylvania Central lines to the more important western points are as follows:

FREIGHT LIST.

Per cwt. for first-class goods, including dry goods, boots and shoes and general merchandise, from New York, West:

	New rate.	Former rate.
To Chicago, Ill	$1 00	$1 50
Cairo, Ill	1 29	1 92
Louisville, Ky	1 14	1 66
Nashville, Tenn	1 43	1 82
Memphis, Tenn	1 68	2 07
Cincinnati, Ohio	93	1 38
Cleveland, Ohio	66	98
Toledo, Ohio	78	1 15
Sandusky, Ohio	73	1 08
Detroit, Mich	71	1 06
Grand Rapids, Mich	1 21	1 50
Kalamazoo, Mich	1 18	1 50
Kansas City, Mo	1 84	2 44
St. Louis, Mo	1 29	1 89
St. Joseph's, Mo	1 89	2 49
Keokuk, Iowa	1 34	1 94
Milwaukee, Wis	1 00	1 50

The rates by steamer by way of Buffalo to Lake Michigan ports also show a considerable reduction in prices.

The earnings in February upon twelve of the principal roads were as follows:

RAILROAD EARNINGS IN FEBRUARY, 1871.

	1871.	1870.	Increase.	Decrease.
Central Pacific	$481,085	$394,176	$86,909	$.....
Chicago & Alton	340,301	316,036	24,265	.....
Cleveland, Col., Cin. & Indianapolis	266,789	226,897	39,892	.....
Illinois Central	565,415	661,788	.....	96,373
Marietta & Cincinnati	126,224	98,275	27,949	.....

For the two months of the year which have now elapsed, earnings generally show much the same results as in February, the same roads showing balances on the side of decrease. There seems every prospect, however, that as the year goes on the business done upon the old established lines will be equal to that of last year; upon the new roads, an increase, of course, is to be expected. Upon the basis of last year's traffic a paying business may be anticipated where roads are managed with economy. The steady progress of railroad traffic for several years past has been such as to give every encouragement to parties pecuniarly interested in this property, whenever ability is shown in the management; on the other hand, the desire on the part of officers to extend their lines by leasing or constructing new roads and branches has often been carried so far, as to saddle upon good roads a large amount of heavy expenses without any adequate remuneration.

DEBT AND FINANCES OF LOUISIANA.

The present public debt of this Commonwealth represents the value of such public improvements as the people desired and the State had not ready money to pay for, and it was contracted for the purposes, mainly, of improving the Mississippi levee, for building railroads, for perfecting the drainage system, and for other public works. The State is rich in natural resources, and the commerce of New Orleans constitutes a strictly business source of large wealth, the taxes on which furnish the State a handsome revenue of themselves. The course pursued in regard to the payment of the public obligations has been such as to reflect credit on the good faith, financial soundness and integrity of the Commonwealth, despite the fact that the laws for raising the revenue are among the most imperfect of any in our country. The alteration of these laws, however, has been urgently recommended by the financial officers, and there has been propounded a scheme for codifying them, which, if adopted, will, it is believed, render the Louisiana revenue laws specific, easy, and economical in operation.

The recent condition of the finances shows a large absolute increase of indebtedness, although this increase is not very large when viewed relatively to the resources of the State. During the year 1870 bonds to the aggregate of $6,214,000 were issued in the sums and for the purposes thus specified: January 3, $80,000 in favor of Boeuf and Crocodile Navigation Company (mature January 3, 1890): March 1, $3,000,000 in favor of work done or to be done on the levees of the State (mature March 1, 1875); January 1, $134,000 for payment of indebtedness to J. P. Kennedy (payable January 1, 1890); May 1, $3,000,000 to provide for the payment or funding of the floating debt of the State, by the issue and sale or exchange of State bonds issued to defray expenses of building levees.

The fiscal year closed November 30, 1870. On that day the total State debt of Louisiana amounted to $22,589,628 41, of which the following are the gross items: liabilities for property in banks, $4,838,933 33; debts proper in trust funds, $868,195 08; debts proper in bonds maturing and matured between the years 1867 and 1909, $16,848,685; certificates of indebtedness, issued under Act No. 5, of 1866, $33,815.

REVENUE AND TAXATION.

The revenue of Louisiana is collected by the "Parish," and at the close of the last fiscal year there remained uncollected from the different parishes, and due betwen 1861 and 1870, taxes to the amount of $4,340,647 71. This sum includes State tax, mill tax and poll, interest and levee taxes.

The total taxable value of all the real and personal property in Louisiana is about $1,220,000,000. The State government rate per cent of taxation is 4 mills on the dollar. The total amount received into the Treasury during the past fiscal year, from all sources, was $7,498,440 95. Of this aggregate, $960,481 58 was the balance in the Treasury at the beginning of the year, and $703,380 55 were received as uncollected taxes, for the years between 1861 and 1869, inclusive, leaving the net amount raised by taxation during 1870, $5,834,578 72. The revenue is obtained from licenses and from taxation, applied to real, personal and chattel property, and to invested capital, and to monetary and incorporated institutions. The amount of interest to be paid on the bonded debt during the current year, will be $1,168,840. The total amount of the State government's expenditures (including general fund, interest, and all other accounts) during 1870, were $7,131,302 11. This amount was $367,138 84 less than the total receipts of the year; but it exceeded the strictly net income for the year by $1,296,723 39. This draft, however, on the resources of the State is not considered too heavy for them; and there is every reason to believe that the State of Louisiana will promptly discharge the principal and interest of its obligations as they mature.

Auditor Graham remarks in his annual report:

Our first and firmest resolve should be, to meet these special demands upon our resources, punctually as the same become due. To make provisions to this end, and for the necessary expenses of the Government, impose obligations upon us, paramount to all other claims upon our means, and especially to claims like these, a recognition of which brought upon us our present pecuniary embarrassments.

The rate of taxation for the year 1871, based upon the assessment of 1870, will be as follows: Four mills on each dollar, "for the purpose of supporting the government of the State, of paying the public debt, and of promoting the public interest thereof." 4

Two mills on each dollar, for the support of the free public schools of the State 2

Digitized by Google

Four and a half mills on each dollar, to provide for the payment of the interest to become due in 1871, upon all State bonds, except the interest on levee bonds, in compliance with section nine, act No. 68, extra session of 1870, and known as the "Interest Tax Fund."	4½
One and a half mills on the dollar, to meet the maturity of the coupons of interest, to fall due in 1871, for the benefit of the levee bonds, issued under act No. 115, of 1867, and known as the "Levee Tax Fund."	1½
Two and a half mills on the dollar, as provided for under act No. 32, of 1870, for the pay ment of interest and part of the principal of the bonds issued under said act, which bonds are payable in five years from the date of issue	2½
The whole forming an aggregate of fourteen and a half mills on each dollar	14½

This is a rate of taxation nearly twice as large as ever levied before. And when considered in connection with the taxes imposed on the people by our cities and parishes, should not be continued a moment longer than necessary. The only way to bring about their reduction at an early day is by the adoption of, and adherence to a rigid rule of economy, an avoidance of all unnecessary expenses, and a steady refusal to give the money or to lend the credit of the State in aid of private enterprises.

He also recommends that the expenses of keeping up the Levees should now be placed upon the riparian owners, as the $8,000,000 already spent by the State is enough to place them in as good condition as they were in 1860.

A recapitulation of the several items of Receipts and Expenditures for the fiscal year shows the following:

RECEIPTS.	
General fund	$1,481,218 86
Current school fund	548,045 88
Interest tax fund	688,178 15
Levee tax fund	283,110 59
Levee and drainage fund	5,807 16
Internal improvement fund	857 06
Free school fund	30,011 06
Redemption State debt fund	2,970 00
Special one per cent tax of 1868 for the redemption of the State debt	153,992 46
Seminary fund	90 00
Levee fund	2,013,069 40
Floating debt liquidation fund	1,430,608 75
Grand total of funds	$6,537,959 37

EXPENDITURES.	
General funds	$3,091,356 58
Current school fund	299,879 59
Interest tax fund	1,174,037 91
Levee tax fund	189,279 19
Levee and drainage fund	21,330 16
Free school fund	114,371 63
Levee fund	1,756,520 45
Redemption of State debt fund, under act No. 114, of 1868	391,801 93
Seminary fund	355 16
Redemption of State debt fund, under act No. 277, of 1853	11,703 99
Total expenditures, according to Auditor's books	$7,050,636 59

The official estimate of Expenditures for 1871 is $4,349,036.

DETAILED STATEMENT OF THE DEBT OF LOUISIANA, NOVEMBER 30, 1870.

Description.	Date of Authorizing Act.	Denom. or par Value.	Amount Outstanding.	*Rate per cent.	Principal when Due.
Purchase of grounds for Charity Hospital, Act Feb. 27,1852		$1,000	$80,000	5(a)	1872

Issued for the Free School Fund, and held by the State Treasurer	182 of 1857	1,000	529,000	6(b)	1897
Issued for the Seminary Fund, and held by the State Treasurer	182 of 1857	1,000	136,000	6(b)	1897
Issued to the Mississippi and Mexican Gulf Ship Canal Co. (Company to provide for the interest)	116 of 1869	1,000	474,000	7.30(a)	1899
Issued to the Louisiana State Penitentiary	55 of 1869	1,000	500,000	7(a)	1899
Issued to the North Louisiana & Texas RR Co. (Company to provide for the int'st)	108 of 1869	1,000	546,000	8(d)	1909
Issued to provide means for the payment of work done or to be done, on the levees of the State	32 of 1870	500	3,000,000	8(a)	1875
Issued for the relief of P. J. Kennedy	105 of 1870	1,000	134,000	8(b)	1890
Issued for the payment or funding of the floating debt of the State	69 of 1870	1,000	3,000,000	6(c)	1910
Bœuf and Crocodile Navigation Co	146 of 1869	1,000	80,000	8(b)	1890

(a) March 1 and Sept. 1. (b) Jan. 1 and July 1. (c) May 1 and Nov. 1. (d) April 1 and Oct. 1. (e) Various months.
* Interest payable in New York is paid at the Bank of America.

DEBT AND FINANCES OF TENNESSEE.

The debt of Tennessee was contracted principally for internal improvements, and by far the larger part for railroads; there is also a liability of the State on the old bank of Tennessee notes amounting to about $1,500,000. At the close of the last fiscal year, ending September 30th, 1870, the total debt of the State was stated at $38,589,802, as follows:

Bonds loaned railroad companies		$27,618,500
Interest funded to January 1, 1868		3,294,690
Bonds loaned to turnpike companies		608,000
Interest funded		102,060
Bonds loaned Agricultural Bureau		30,000
Interest funded		7,300
U. S. claim vs. Edgefield and Kentucky Railroad—assumed		130,804
" " M. L. and C. Railroad—assumed		380,756
		$33,097,011
Less bonds and past due coupons paid in		4,512,850
		$27,584,161
Estimated interest to January 1, 1871		3,716,355
State debt proper	$4,083,991	
Interest funded	735,553	
		4,819,544
Loan account Fourth National Bank, New York		113,717
		$36,233,678
Outstanding warrants, October 1, 1870	$606,123	
" issues Bank of Tennessee, estimated	1,500,000	
Unexpended appropriations, estimated	200,000	
		2,306,123
		$38,539,802
Estimated Resources.		
From railroads	$21,982,844	
" uncollected revenue	500,000	
" turnpikes	50,000	
		22,532,844
		$16,006,957

LIST AND AMOUNT OF BONDS ORIGINALLY ISSUED TO RAILROADS, AND INTEREST DUE ON THE SAME, TO JANUARY 1, 1871.

Name of Railroad.	Bonds loaned.	Funded Interest.	Interest due.	Total.
East Tennessee and Virginia	$2,199,000 00	$250,038 55	None.	$2,449,038 55
East Tennessee and Virginia —indorsed bonds	175,000 00			175,000 00
East Tennessee and Georgia	1,287,000 00	180,277 50	None.	1,467,277 50
East Tennessee and Georgia —indorsed bonds	101,000 00			101,000 00
Edgefield and Kentucky	1,075,500 00	231,812 00	366,492 16	1,673,804 26
Cincinnati, Cumberland Gap and Charleston	1,373,000 00	31,680 00	252,528 52	1,657,208 52
Knoxville and Kentucky	2,350,000 00	43,200 00	422,976 00	2,816,176 00
McMinnville and Manchester	764,000 00	87,360 00	240,218 00	1,091,578 00

Memphis and Charleston	1,679,000 00	185,387 45	119,960 64	1,984,348 09
Memphis and Ohio	1,993,000 00	403,110 00	71,883 30	2,467,993 30
Mississippi and Tennessee	395,000 00	22,800 00	12,412,50	430,212 50
Mobile and Ohio	1 296,000 00	388,800 00	50,508 00	1,735,308 00
Mississippi Central	1,124,000 00	75,180 00	35,975 40	1,235,155 40
Nashville and Chattanooga	395,000 00	None.	11,880 00	406,880 00
Nashville and Chattanooga—indorsed bonds	1,546,000 00	"		1,546,000 00
Nashville and Northwestern	3,222,000 00	392,850 00	926,279 41	4,541,129 41
Rogersville and Jefferson	385,000 00	38,160 00	108,853 20	532,013 20
Nashville and Decatur	2,112,000 00	353,176 00	237,821 10	2,702,997 10
Winchester and Alabama	1,289,0 0 00	143,259 00	358,277 70	1,790,536 70
Memphis and Little Rock—indorsed bonds	350,000 00	105,000 00	136,500 00	591,500 00

During the fiscal year the amount of $4,512,850 in bonds and coupons was paid into the State Treasury by solvent railroad companies to whom they had been loaned; these payments being authorized to be made in Tennessee bonds at par, by the act of January 20, 1870, which thus affords the companies an opportunity of extinguishing their indebtedness to the State upon which they have been paying full interest, in bonds, purchased by them at the current price of 65 or thereabout.

ASSETS.

The Comptroller estimates the assets of the State, consisting of its interest in railroads, to which credit has been loaned, as follows:

ESTIMATED RESOURCES.

Table showing the indebtednes of railroads to the State, and estimated value upon the same, as follows:

FIRST CLASS—SOLVENT ROADS WHICH PAY INTEREST.

Name of Railroad.	Estimated value.	Indebtedness.
Memphis and Charleston	Worth full value. $10,962,844	$1,984,348
Memphis and Ohio		2,467,993
Mississippi and Tennessee		430,212
Mobile and Ohio		1,735,308
Mississippi Central		1,235,155
Nashville and Chattanooga		406,880
Nashville and Decatur		2,702,997

SECOND CLASS—HAVE NOT PAID INTEREST BUT ARE SALABLE AT A SLIGHT REDUCTION.

Memphis, Clarksville and Louisville	$2,000,000	$2,953,795
Nashville and Northwestern	3,000,000	4,541,129
Edgefield and Kentucky	1,000,000	1,845,429
Tennessee and Pacific*	860,000	1,230,530

* This road has paid interest to July 1, 1870.

THIRD CLASS—ROADS OF DOUBTFUL VALUE.

Cincinnati, Cumberland Gap and Charleston	$900,000	$1,657,208
Knoxville and Kentucky	1,000,000	2,816,176
McMinnville and Manchester	500,000	1,091,578
Rogersville and Jefferson	250,000	532,013
Winchester and Alabama	900,000	1,790,536
Knoxville and Charleston	400,000	816,500
Evansville, Henderson and Nashville	100,000	236,000
East Tennessee and Western North Carolina	50,000	448,000
Southwestern—worth nothing	....	558,790
Mineral Home—funds in bank	40,000	109,000
Total	$21,982,844	

Since the close of the fiscal year at least $2,825,000 more, of the debt owing by the solvent roads has been paid, of which the Nashville and Decatur road paid over $2,700,000 extinguishing all its debt to the State.

The estimate of the Comptroller above given of the value of the State's interest in Railroads is considered by parties well informed upon the subject to be about fair; some of the roads would in all probability bring less than the amount assigned for them, but others are worth at the present time more than the Comptroller's estimate; allowing, however, a reasonable margin of $3,000,000 for the uncertainty, and there would still be about

Digitized by Google

$19,000,000 of these assets, which, if realized, would reduce the State debt to $19,539,802. It will be remembered that the interest of the State in these railroads was actually advertised to be sold on the 3d of November, 1870, but that the sale did not take place, on account of the peculiar character of the interest offered for sale, and the uncertainty as to the extent of the title which could be conveyed to the purchasers. The question is now before the courts of the State, and a decision is daily expected, which it is said will probably be in favor of the State and establish the right to sell her interest in the roads and convey an absolute title in the same way as any other owner or mortgagee.

REVENUE AND TAXATION.

The Comptroller furnishes the following statement of the assessed valuation and of the taxes collected in the fiscal years ending in 1869 and 1870:

	Valuation		Taxes Collected	
	1869.	1870.	1869.	1870.
East Tennessee	$45,342,139	$53,365,914	$335,223	$106,797
Middle Tennessee	93,635,353	112,348,948	636,540	224,703
West Tennessee	82,409,538	87,168,012	539,880	173,935
Total	$221,387,030	$252,882,874	$1,511,644	$505,437

The receipts and disbursements the last fiscal year were as follows:

There was paid into the Treasury, upon the warrants of the Comptroller, as follows:

From October 1, 1869, to June 1. 1870	$1,606,899 00
" June 1 to October 1, 1870	317,529 07
Making a total of	$1,924,428 07

The principal items of the foregoing amount were received from the following sources:

By whom paid.	From Oct. 1, 1869, to June 1, 1870.	From June 1 to Oct. 1 1870.
Tax collectors	$695,016	$161,417
County courts	409,098	76,420
Insurance companies	23,237	14,871
Tennessee National Bank	50,000	
Railroad interest	218,373	21,587
Loan account	165,000	
Total,	$1,606,899	$317,529

There was paid out of the Treasury upon warrants of the Comptroller as follows:

From October 1, 1869, to June 1, 1870	$1,171,180 33
" June 1 to October 1, 1870	163,849 89
Making a total of	$1,335,030 22

The above amount was paid out as follows:

For what purpose.	From Oct. 1, 1869, to June 1, 1870.	From June 1 to Oct. 1, 1870.
Lesislative expenses	$18.690	$58,519
Judicial salary	69,465	16,247
Hospital for Insane	31,593	7,616
State prosecutions	139,666	11,393
State Penitentiary	71,467	
State printing	38,814	7,603
Interest on State debt	20,960	
State Guards	113,305	142
Common schools	161,958	3,926
Lessees Penitentiary	132,200	
Fourth National Bank, New York	132,692	17,837
State Convention	27,204	58
Fourth National Bank, Nashville	15,160	50,320
Loan account	93,918	
	$1,171,186	$163,8.9

The State has been exceedingly embarrassed in her revenue account from several unfortunate but temporary causes. *First*—The rate of taxation has not been as high as it should have been to provide for ordinary expenses and to make any provision for the Interest on the debt; it has been twenty cents on the $100. *Second*—The assessments of property in different counties have been entirely unequal and in numerous cases far below value. *Third*—The obligation on the part of the State to accept the old Bank of Tennessee notes in payment of taxes has so reduced her available revenue that the Comptroller says the tax receipts of 1870 would fall short 66 per cent of paying the current expenses of the State Government. The old bank notes are sold by speculators to tax-payers who would otherwise pay in currency, and this is often done by collusion with the Collectors who share the profits. *Fourth*—There have been no adequate penalties for non-payment of taxes on real estate, so that taxes have often been evaded entirely. *Fifth*—Collectors have not been responsible men and have defrauded the State to a large amount, the delinquencies of Collectors, Clerks of Courts, &c., amounting Sept. 30 to the enormous sum of $1,283,115.

PRESENT FINANCIAL CONDITION.

The Comptroller urged very strongly upon the Legislature the necessity of passing laws to remedy the evils complained of, and some measures have been taken in pursuance of his suggestions. The State, as we have seen before, is taking the necessary steps to sell all her interest in Railroads. A second step of great importance was accomplished in passing the law raising the rate of taxation to 60 cents on the $100, and increasing also the rate on privileges, from which alone it is hoped that a revenue of $600,000 will be received. A similar tax of 6 mills is likewise imposed on the net earnings of railroads and other corporations. The same law contains stringent provisions for obtaining a correct and equitable assessed valuation of property, under which it is estimated that the amount returned will be increased from $252,882 in 1870 to nearly $400,000,000.

The taxes for schools heretofore levied by the State are now left to the counties, and we hear that they are generally levying fair taxes for this purpose, averaging from 2 to 3 mills.

Since the Comptroller's report $250,000 of the old bank bills have been destroyed by the Treasurer, and $250,000 more are now in his hands which will also soon be burned.

It is expected that a new funding bill will be passed in October, 1871, by the Legislature then convening, and provision made for resuming the payment of interest on the State debt Jan. 1, 1873, paying then the coupons for interest of the previous six months. The payment of current expenses for the State Government, and the clearing up of all floating liabilities including the $1,000,000 of old bank notes will be accomplished, it is said, by the revenue of 1871 under the new laws as noted above. By the present constitution of the State no new debt can be created except by a law submitted to the people and passed by a two-third vote. The Railroads to which the State had previously made promises of assistance were necessarily excepted from this provision; the additional loans or endorsements for such roads, however, will not probably amount to any considerable sum.

It will be seen from the foregoing review that the finances of Tennessee are apparently in a more hopeful condition than for some time past, and that the improvement is not more shown by the prospect of an important increase in revenue, than it is by *the spirit* which has been evinced by her Legislature and State officers in passing laws to secure greater economy in government, a higher rate of taxation, a fair assessment of property, and an ultimate provision for the payment of debts.

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS.

The following are the changes in the Redeeming Agents of National Banks since the 9th of March, 1871. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency.

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
Illinois— Kewanee	The First National Bank	The Third National Bank of Chicago, approved.
Ohio— Bellefontaine	The Bellefontaine National Bank	The Central National Bank of N. York, approved.

New National Banks.

The following are the only national banks organized during the week:

Official No.

1,801—The Commercial National Bank of Dubuque, Iowa. Authorized capital $100,000; paid in capital, $50,000. Rufus E. Groves, President; H. M. Kingman, Cashier. Authorized to commence business March 11, 1871.

1,802—The Manufacturers' National Bank of Racine, Wis. Authorized capital, $100,000; paid in capital, $50,000. Jerome I. Case, President; Henry J. Ullman, Cashier. Authorized to commence business March 16, 1871.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR HE WEEK.—The imports this week show a decrease in dry goods, and a slight increase in general merchandise. The total imports amount to 8,209,446 this week, against $9,845,436 last week, and $8,035,653 the previous week. The exports are $6,264,325 this week, against $4,469,192 last week, and $4,658,414 the previous week. The exports of cotton the past week were 15,659 bales, against 24,669 bales last week. The following are the imports at New York for week ending (for dry goods) March 10, and for the week ending (for general merchandise) March 11.

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
Dry goods	$2,031,293	$3,036,604	$3,343,213	$3,222,588
General merchandise	2,532,061	3,985,001	3,823,035	4,986,858
Total for the week	$4,563,354	$7,021,605	$7,166,248	$8,209,446
Previously reported	38,190,554	48,614,304	49,117,656	62,025,184
Since Jan. 1	$42,753,908	$55,635,909	$56,283,904	$70,234,630

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports, for the week ending March 7:

EXPORTS FROM NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
For the week	$2,574,845	$2,865,839	$3,902,429	$6,264,325
Previously reported	29,892,329	26,035,420	27,117,829	39,477,283
Since Jan. 1	$32,467,174	$28,901,259	$31,020,258	$45,741,608

The following will show the exports of specie from the port of New York for the week ending March 11, 1871:

March 6—Schr. Mary M., Baracoa—American Gold	$4,000	March 9—Schr. Ben Bolt, Jacmel—American Silver	$3,870
March 6—Schr. Abbie H. Brown, Baracoa: American gold	2,000	March 9—Str. Columbia, Havana—American Silver	960
American silver	2,000	American gold	2,051
March 7—Str. Cimbria, Hamburg—Foreign silver	75,000	March 11—Str. Rhein, Southampton—Foreign gold	2,090

Statistics of Commerce and Navigation.

Monthly Report No. 6, of the Bureau of Statistics, now in press, gives the statistics of our foreign trade during the month of December, 1870, and the calender year ended the same, compared with the corresponding periods of 1869. Mr. Edward Young, the Chief of the Bureau, furnishes the following synopsis:

Periods.	Imports.	Domestic exports, (specie values.)	For. exports.
Month ended December 31, 1870	$33,989,345	$15,569,092	$1,815,779
Month ended December 31, 1869	30,292,473	43,511,449	2,151,377
Twelve months ended Dec. 31, 1870	486,780,013	453,905,409	30,660,116
Twelve months ended Dec. 31, 1869	463,424,421	365,458,770	29,473,229

The proportions of the foregoing shipped in American and foreign vessels respectively during the calender year of 1870, were as follows:

	Imports.	Domestic exports, (mixed values).	For. exports.
American vessels	$151,912,833	$137,206,426	$14,459,983
Foreign vessels	331,867,130	319,742,083	16,200,133
CALENDER YEAR OF 1869..			
	Imports.	Domestic exports, (mixed values),	For. exports.
American vessels	$146,343,209	$160,910,815	$15,848,408
Foreign vessels	317,081,212	303,963,461	13,421,821

The proportions of the foreign trade for 1870, which consisted of merchandise and specie and bullion, respectively, are shown in the following table:

	Imports.	Domestic exports. (specie values.)	Foreign exports.
Merchandise	$461,115,087	$387,812,678	$15,905,708
Specie and bullion	25,664,931	66,096,317	14,854,408
CALENDAR YEAR OF 1869.			
	Imports.	Domestic exports. (specie values.)	Foreign exports.
Merchandise	$438,535,694	$324,991 338	$12,964,655
Specie and bullion	24,898,427	40,467,417	16,318,574

The value of foreign commodities remaining in warehouse December 31, 1870, was $55,620,635, as compared with $51,763,413 in 1869.

It will be noticed that there is a marked improvement in the disproportion between imports and exports in the last as compared with the previous calendar year, the excess of imports in 1869 being $68,692,422, and in 1870 only $2,214,493. An examination of the above tables also shows that over 73 per cent of our entire foreign trade in 1869, and over 79 per cent in 1870, were carried in foreign vessels and vehicles.

The values of the principal commodities imported and exported during the calendar years 1870 and 1869 were as follows:

COMMODITIES.	VALUES. 1870.	1869.
Imports—Free of Duty		
Cochineal	$1,026,945	$927,946
Dyewoods, in sticks	625,666	1,699,384
Gold and silver coin and bullion	25,573,363	24,968,577
Guano	2,888,413	295,721
Horse hair	1,025,926	900,793
Indigo	1,503,667	1,668,192
Rags	3,254,035	3,154,552
Silk, raw	3,897,875	3,079,409

BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH, BANKERS,
No. 5 NASSAU STREET, NEW YORK, March 11, 1871.

THE CHESAPEAKE AND OHIO RAILROAD.

A NEW TRUNK LINE FROM THE SEA-BOARD TO THE WEST, is already completed and in operation from Richmond to the celebrated White Sulphur Springs, 227 miles, and there remain but 200 miles, now under construction, to complete it to the Western terminus on the Ohio River, 315 miles below Pittsburg, at the head of RELIABLE AND CONTINUOUS navigation.

The completed portion of the Road is doing a GOOD LOCAL BUSINESS, which will be enormously increased as it progresses and opens the immense mineral riches of Virginia and West Virginia, whose coal and iron are celebrated for their quality and abundance, and would alone enrich the means of communication which affords them access to the markets East and West.

The advantages of the Chesapeake and Ohio Railroad AS A GREAT EAST AND WEST THROUGH LINE for the transportation of the heavy freights (which constitute the principal part of the East and West through traffic), are numerous and important.

1. *A short route* between the Atlantic coast and the Great West.
2. *Low grades.*
3. *Light curves.*
4. *A Genial climate*, which admits of safe, economical, and rapid railroad operation throughout the year.
5. *East and West termini* at favorable points on tidewater and the Ohio River.
6. *A very large through and local traffic* awaiting its progress.
7. *A comparatively light capital and debt*, and consequently a light tax upon traffic for payment of interest and dividends.

All these conditions favor a cheap and economical working of the line, and will enable the Chesapeake and Ohio route to do a profitable East and West through business at rates which would not pay by the more difficult and costly lines, *and to control an enormous South-western through trade.*

We are now authorized to sell an additional amount of the FIRST MORTGAGE 6 PER CENT GOLD BONDS of the company, at the original price of 90 *and accrued interest.*

The Bonds are secured by a mortgage upon the entire road franchises and property of the company, WHICH NOW, IN COMPLETED ROAD AND WORK DONE, EXCEEDS THE ENTIRE AMOUNT OF THE MORTGAGE, and which, when completed, will be worth at least $30,000,000.

A Sinking Fund of $100,000 per annum is provided for their redemption.

They are issued as Coupon or Registered Bonds, and in denominations of

$100, $500 and $1,000.

Interest payable May and November, in the City of New York.

The superior advantages, valuable property and franchises, and able and honorable management of the Chesapeake & Ohio Rail road Company, render it one of the most substantial, reliable and trustworthy Corporations in the country, and commend its Securities to the unhesitating confidence of capitalists and investors.

Pamphlets, maps and full particulars furnished upon application.

FISK & HATCH, Bankers.

BANKING HOUSE OF HENRY CLEWS & CO., 32 WALL ST., N. Y.

Our business is the same as an incorporated bank.

Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed on all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make telegraphic transfers of money to any desired point, and transact every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upward on.

The Imperial Bank, and Messrs. Clews, Habicht & Co., London.

The Provincial Bank of Ireland, The National Bank of Scotland, and all their branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Government and other investment securities; also Gold and Exchange.

Advances made on approved collaterals and against Merchandise consigned to our care.

We make collections of Notes, Drafts, Coupons and Dividends with promptness on all points, and are fully prepared to offer banking facilities upon either currency or gold basis.

The Bankers' Gazette.

FRIDAY EVENING, March 17, 1871.

The Money Market.—There has been a slight tendency toward firmness in the rates for money, although it has not been sufficiently marked to warrant a change in the quotations of call loans. The tendency is, in fact, more in anticipation of an increased demand for money as the 1st of April approaches, than in any lack of loanable funds at the present time, as borrowers have had no difficulty in supplying their wants at 4@5 per cent, and balances have also, in some cases, been left with the large Government houses at 3 per cent, but this rate was exceptional. The bank returns of Saturday, 11th inst., were unfavorable to an easy market, and undoubtedly encouraged the idea that the supply of loanable funds at this centre may be materially diminished within the next few weeks. The banks showed an expansion in loans of $6,721,508, an increase in deposits of $4,865,010, a decrease in circulation of $5,211, a decrease in specie of $563,031, and a decrease in legal tenders of $973,884. The result of this statement was to leave the banks $2,751,864 weaker in their excess over the 25 per cent of reserve required by law, the whole of that excess being $15,420,147. A comparison of the statement with that of the same date in the last two years, as given below, shows that the loans and discounts are much larger than they were in either of those years, and that the specie line is lower than at this date in 1870 although legal tenders are about $4,000,000 higher. The comparison can not, upon the whole, be considered as favorable nor as warranting a long continuance of the present low rates for money, should the course of business be the same which it usually is at this season of the year. The influence of the Secretary of the Treasury is unquestionably regarded as of much importance, in estimating the probabilities of the future course of the market, as a reasonable degree of ease in money is almost essential to his funding operations, but it is possible that the extent to which Mr. Boutwell will attempt to control the course of money may be over estimated.

On time engagements the rates have been 6 per cent for thirty days and 7 per cent for sixty days, on approved collaterals, showing a perceptible improvement in this class of loans in favor of the lender, and indicating more decidedly than the rate on call loans, the prevailing ideas entertained by our bank officers in regard to the future course of money.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	Mar. 11, 1871.	Mar. 12, 1870.	Mar. 13, 1869.
Loans and discounts	$289,253,934	$268,140,693	$261,669,695
Specie	23,769,176	33,399,1 5	17,358,071
Circulation	31,675,051	33,835,729	34,690,445
Net deposits	229,924,5-4	209,831,225	182,892,458
Legal Tenders	57,015,834	53,302,004	49,639,625

The features of the market for Commercial Paper remain much the same as last reported, with quotations nominally unchanged, although there is not quite as ready a demand from banks and other heavy lenders as before noticed. No evidence of increased activity in business is yet seen in the amount of paper placed on the market, and the supply of first-class names offered continues to be much less than sufficient to meet the demand.

United States Bonds.—The market for Governments has been comparatively dull during most of the week, with prices steady, closing to-day at about the figures of last week.

At the opening there was a feeling of much hesitancy on account of the interest which was felt in observing the progress of the new loan, but since the curiosity of the market has been gratified upon that point there has been more business done, and to-day was the most active of any since our last report, with prices quite firm. An important feature was the purchase of bonds by the foreign bankers, who have taken advantage of the higher quotations abroad to buy bonds here and profit by the margin between London and New York.

Some progress is reported in the subscriptions to the new loan, which probably amount now to between $12,000,000 and $15,000,000, all in this country. No subscriptions abroad have yet been reported to our knowledge, and the loan has apparently been received without special enthusiasm in the foreign markets, where our old five per cents can be purchased at lower prices. It has been stated, but not on official authority, that Secretary Boutwell will next month adopt the course of paying off a certain amount of five-twenties in gold, and thus stimulate the price of bonds, and at the same time intimate to the banks that they will soon be obliged to substitute other bonds for the 5-20s, now on deposit at Washington, and thus hasten their action in buying new five per cents. At the treasury purchase of $2,000,000 on Wednesday, the bids amounted to $7,323,500, an amount so considerable as to temporarily depress the market.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, March 11.	Monday, March 13.	Tuesday, March 14.	Wednesd'y March 15.	Thursday, March 16.	Friday, March 17.

Railroad and Miscellaneous Stocks.—The market has been strong during most of the week on a pretty active business,

Digitized by Google

several of the prominent speculative stocks fluctuating to a considerable extent. To-day there was some heaviness in the market after the second call, led by Ohio and Mississippi and Lake Shore, the former selling down to 46⅝ and the latter to 98½. Subsequently there was a partial recovery in prices, with greater firmness at the close. It has been stated that the chief cause of the decline is to be found in the large sales made by parties who have heretofore been "bulls," and who are now selling to realize the advance which has already been obtained. Another report, which has less probability, however, states that a clique has been formed to make money stringent about the first of April for the usual purpose of depressing stocks. In regard to the New York Central and Hudson scrip, it is reported that the certificates are to be retired, and in their place a first mortgage six per cent gold bond issued; also, that the difference between the interest on the certificates and the new gold bonds, which is two per cent, to be added to the interest on the stock, making that pay ten per cent instead of eight, as now. Harlem stock took a sharp upward turn of five per cent on Monday, which was as rapidly lost the next day. Earnings of the several roads which make reports of their traffic were generally favorable for the months of January and February, as may be seen by the figures published on another page A reduction in freights to the West has just been made, amounting to about thirty-three per cent of the previous tariff, $1 per cwt. being the rate to Chicago against $1 50 before. This change will be most acceptable to merchants, and it is to be hoped that it may continue for some time. Erie stock has been weak upon the alleged financial embarrassment of the Company and the statement that its floating debt is $6,000,000.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

State and Railroad Bonds.—There has been much activity at times in the list of Southern State bonds, the new South Carolina's having been most active, with fluctuations between 64½ and 69, closing at 65¼. The large transactions in these bonds have been based upon the recent legislation in regard to funding, which had the effect of putting up the price to 69, from which point there was subsequently an important reaction. Intelligence from several of the other Southern States is also of much importance in regard to financial legislation. In Virginia it is reported that the new bill which provides for funding the outstanding debt to July 1, 1871, and the resumption of interest payment on the first of January, 1872, is likely to be passed at the present session.

In regard to Georgia bonds an erroneous impression as to the amount of the State debt has been given by the report of the treasurer, but the financial agents in this city state that only $2,000,000 of bonds have been issued since January 1, 1870, making the debt of the State now $7,514,500; the railroad endorsements up to date amount to $5,923,000, as stated in a telegram from the Governor yesterday, and these figures are worthy of especial notice on account of the rumors which have been circulated that these endorsements reached a very much larger sum.

In Tennessee the question of selling the State's interest in railroads is still before the Courts, and it is expected that a decision will be made in a few days which will enable the State officers to dispose of that interest by public sale. The legislation in these States within the past few months has been of much importance to holders of their securities, and has generally been of such a character as to encourage the expectation that all liabilities will be provided for, and that no idea of repudiation is entertained for a moment.

In railroad bonds the Pacifics have been, as usual, the chief feature. An attempt was made early in the week to depress these securities, on the rumor that the question of the roads getting pay from the Government for one half their transportation was not considered settled, but would be brought up again at the next session of Congress; the rumor, however, was soon contradicted by a telegram from the Secretary of the Treasury, and the bonds subsequently advanced, closing to-day as follows: 1st Mortgage, 83¼@84; Land Grants, 76½@76¾; and Incomes, 69½@70. Central Pacifics have been firm, closing at 95¾@96.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

	Saturday, March 11.	Monday, March 13.	Tuesday, March 14.	Wednesd'y, March 15.	Thursday, March 16.	Friday, March 17.

The Gold Market.—The market has been dull and steady throughout most of the week, closing to-day after some activity at 111⅛. One of the principal features was the sale on Tuesday of three or four millions by a Cuban speculator, who had been holding for a rise during some time past; the sales depressed the price temporarily to 111¼, a comparatively small decline for so large an amount pressed on a dull market. The shipments of specie during the week will amount to about $1,600,000, of which only $275,000 will go out to-morrow, and this amount being less than was expected from the considerable shipments of Wednesday, and from the high rates of exchange, had the effect of depressing the market. The higher quotations of our securities in London also tended in the same direction.

The customs demand is large, amounting to $3,016,000 for the past six days.

There seems to be a fair "short" interest as indicated by the rates for carrying which have ranged from 4 to "flat," and to-day from "flat" to 1, 1¼, 2, 2½ and 3 per cent., and 2 and 3 per cent. ex Clearing House.

At the Treasury sale of $1,000,000 on Thursday the bids amounted to $1,942,500.

The following table will show the course of the gold premium each day of the week past:

	Quotations—Open-ing.	Low-est.	High-est.	Clos-ing.	Total Clearings.	Balances—Gold.	Currency.
Saturday, Mar. 11	111⅜	111⅜	111⅝	111⅝	$35,668,000	$1,518,926	$1,710,610

The following are the quotations in gold for foreign and American coin:

American gold (old coinage) 4 p. c. premium.			American silver (new)	97	@ 97¾
Sovereigns	$4 86	@ $4 90	Dimes and half dimes	96	@ 97
Napoleons	3 86	@ 3 90	Five francs	95	@ 96
German X thalers	7 75	@ 7 90	Francs	19	@ 19¼
Prussian X thalers	7 95	@ 8 40	English silver	4 75	@ 4 85
X guilders	3 90	@ 4 00	Prussian thalers	70	@ 71
Spanish doubloons	16 40	@ 16 60	Specie thalers	1 04	@ 1 06
Patriot doubloons	15 50	@ 15 65	Mexican dollars	1 03½	@ 1 03¾
American silver (old coinage) 1@2 p.c. premium.			Spanish dollars	2@3 p.c. premium.	
			South American dollars	par.	

Foreign Exchange.—For 60 days bankers sterling the outside quotation has reached 110 per cent, less a commission of 1-16, but this rate was rather exceptional and 108½ has been the regular price for the past three days. While rates have been nominally maintained, it has still been noticed that to-day there was a little better supply of bills offering by some houses, which was attributed to the abundance of cotton bills at the South, produced by free exports of cotton; and also to purchases of bonds for export, which have been made by the German bankers to a limited extent this week. Rates have now reached just about specie shipping point, and some houses who do not insure their gold have found a slight profit in shipping. The high rates of exchange which have now ruled steadily since the first of the year are generally believed to arise from the lack of bond shipments, which have been insignificant compared with previous years; in fact, the bond movement has probably been nearly even, as it is well known that considerable amounts have at times been purchased abroad and sold here at a profit. Cotton bills are almost the entire source of supply, and these, under the low prices ruling for the great staple, are not sufficient to meet the trade demand and keep exchange down. In regard to the new Government loan, it does not seem to be anticipated that any disturbance in exchanges will be likely to result from it, as the foreign movement would, at best, probably consist chiefly in an exchange of the old bonds already held there for the new five per cents.

The cotton exports of the week amounts to 103,600 bales from all ports, producing about $6,440,000 in gold, against 94,807 bales the same week of 1870, producing then $8,549,000 in gold, with Middling Uplands at 22c. and gold at 112. Quotations are as follows:

	60 Days.	8 Days.

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3. The Table of Railroad, Canal and Other Stocks, on the next page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column *x=extra; s=stock or scrip.*

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q.—J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of United States and State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name.

Business of the New York Central and Hudson River R.R in 1870.—The annual statement of the traffic of the New York Central and of the Hudson River, branches respectively of the consolidated New York Central and Hudson River Railroad, as reported to the State Engineer, is as follows:

Statement of the number of tons of through and way freight and the earnings therefrom, and the number of through and way passengers and the earnings therefrom, transported over the New York Central Division of the New York Central and Hudson River Railroad, for the year ending Sept. 30, 1870:

Month.	Through freight Tons.	Through freight Amount.	Way freight Tons.	Way freight Amount.
October	133,498	$496,447 53	117,996	$469,404 24
November	115,869	471,247 26	131,179	518,989 64
December	99,448	472,979 59	113,896	374,300 56
January	91,834	475,755 95	78,975	275,796 42
February	104,926	515,688 15	75,836	264,462 55
March	118,423	508,367 64	108,979	348,964 31
April	135,610	569,947 48	119,497	387,361 19
May	138,495	578,230 89	120,172	342,591 25
June	148,648	494,863 44	135,106	289,595 40
July	132,636	401,937 02	105,506	244,079 57
August	162,989	470,218 25	115,851	290,303 71
September	164,696	587,240 53	130,754	331,377 35
Total	1,547,002	$6,018,423 73	1,323,247	$4,187,226 16

Month.	Through passengers Number.	Through passengers Amount.	Way passengers Number.	Way passengers Amount.

Indianapolis, Cincinnati & Lafayette.—The receivers of this road have reported terms of compromise entered into between themselves and the Whitewater Valley Company, looking to a cancellation of the lease of the latter road now held by the former. The agreement in substance is that the Indianapolis, Cincinnati & Lafayette Company shall convey all its rights, title and interest in the Whitewater Valley road to the same, agreeing to operate it, however, until May 1, 1871, at which time the road and all equipments will be turned over to the Whitewater Valley Company, as well as the net profits that may accrue.—*Railroad Gazette.*

Rome, Watertown and Ogdensburg Railroad.—The Company have made the following returns of their financial condition at the close of the year ending September 30, 1870, and of their operations during that year:

Capital stock, by charter	$3,000,000 00
" subscribed	2,997,800 00
" paid in	2,997,800 00
Funded debt	1,442,723 87
Floating debt	334 82
Total stock, bonds and debt existing	4,440,858 69
Graduation and masonry	$1,334,624 34
Bridges	83,804 04
Superstruction, including iron	1,422,135 63
Passenger and freight stations	147,537 34
Engine and car-houses, shops, machinery, &c	113,891 57
Land, land-damages and fences	245,351 46

Interest paid on funded debt	$124,544 46
Dividends on stock January and July, each 5 per cent	297,660 00
Carried to surplus fund	53,066 02

New Jersey Railroads.—The receipts of the united companies of New Jersey from passengers, mails, expresses, &c., for 1870 were $7,260,240 78; expenses of operating canals and roads during the same period, $4,549,185 60; balance, $2,711,955 18; interest, general expenses, taxes, sinking fund, &c., $1,486,488 30; net earnings, $1,224,566 88.

The United Companies are working upon a share capital, as follows:

Delaware and Raritan Canal		$4,999,600
Camden and Amboy Railroad		5,000,000
New Jersey Railroad and Transportation		6,250,000
Scrip—Joint Companies	$937,850	
" —New Jersey Railroad and Transportation	403,900	
" —Delaware and Raritan Canal	372	
		1,432,122
		$17,681,722

The share capital proper amounts to $16,249,600. We assume that the interest on scrip is provided for in the sum of $1,486,488 named above.

The funded debt of the companies amounts to $12,601,401, of which the joint companies (Camden and Amboy Railroad and Delaware and Raritan Canal) have outstanding $9,751,401, the New Jersey Railroad and Transportation Company $850,000, and the United Companies $2,000,000.

Jeffersonville, Madison and Indianapolis Railroad Co. Statement November 30, 1870:

GEORGE S. M'KIERNAN, Secretary.

Jeffersonville, Ind., Feb. 8, 1871.

Union Pacific Railroad.—The annual report of the Union Pacific Railway Company makes the following showing for 1870:

REVENUE—EARNINGS, 1870.

January 1 to June 30	$3,794,727 91
July 1 to December 31	3,830,549 20
Total	$7,625,277 11

EXPENSES.

January 1 to June 30	$2,740,472 27	
July 1 to December 31	1,936,942 51	
		$4,677,414 78
Net earnings		$2,947,862 29
Interest upon bonded debt, including 10 per cent income bonds (but exclusive of land grant bonds)		2,831,123 00
Leaving surplus		$116,739 33

Land Department—Bonds, 7 per cent. currency, $10,000,000; annual interest, $700,000. Land sales—292,900 acres: proceeds, $1,306,566; average price per acre, $4 46.

On account of these sales the company has received and redeemed land grant bonds to the amount of	$736,000 00
For the remainder the company hold land notes maturing in one, two or three years, with accruing interest	576,650 00
Total	$1,312,650 00

The condition of the land department may, therefore, be stated:

Bonds		$10,400,000
One year's interest thereon		728.000
Total		$11,128,000
Principal reduced by bonds redeemed	$736,000	
Land notes on hand	576,650	
		$1,312,650

Showing an absolute reduction, after providing an amount equal to the interest upon the entire debt in the land department, of $584,650.

The company is entitled, under the grants from government after deducting total lands pre-empted before passage of the act, to	12,080,000	acres.
From which deduct amount heretofore sold	292,883	"
Leaving on hand as an asset	11,787,117	"

The estimated business for 1871 is as follows:

Gross receipts	$9,000,000
Maintenance and operating expenses	4,500,000
Net receipts	$4,500,000

NET EARNINGS IN FEBRUARY, 1871.

The gross earnings of the Union Pacific Railroad for the month of February, 1870 and 1871, show that there was a decrease of $194,000. The following shows the *net earnings* during the same time, which show an increase:

Gross earnings in February, 1870	$500,139 42
Expenses	449,838 67
Net earnings	$50,300 75
Gross earnings in February, 1871	$305,769 00
Expenses	168,172 95
Net earnings	$137,596 05
	50,300 75
Increase net earnings for February, 1871	$87,295 30

Savannah & Charleston Railroad.—The earnings of this road for the years 1869 and 1870, were as follows:

	1869.	1870.
From freight	$29,643 21	$47,712 87
" passengers	17,594 60	87,096 18
" mails, &c	4,596 32	12,536 29
	$51,834 13	$147,345 29
Operating expenses	46,777 56	89,989 94
Net	$5,056 57	$57,355 35

The increase in earnings has been $95,511 16, with an increase in expenses of $43,212 38—making the increase in net earnings, $52,298 78. This road is 104 miles in length, extending from Savannah to Charleston. It was destroyed during the war, and only restored so as to be opened for business throughout its entire length in March, 1869. The cost of road is $2,238,292.

The whole debt of the Company is	$1,365,849 05
Of this amount there is already funded in 6 and 7 per cent bonds.	1,112,400 00
Unfunded after applying the available credits	$253,409 05

The Lake Superior Copper and Iron Interests.—The product of copper from the mines of Lake Superior for the year ending Dec. 1, 1870, has been in excess of that of any other year since mining operations were commenced. The mines in the Portage Lake district that have suspended or fallen off in their products, have been more than overbalanced by the enormous and steady yield of the Hecla and Calument, while the product of copper for the past year at the Quincy mine, if anything, is larger than that of the year previous, so that the diminution in yield at the Franklin, Pewabic, Huron, South Pewabic, Sheldon Columbia, Portage and Isle Royal will in no way affect the grand total of shipments for the last year from Portage Lake; but, on the contrary, the figures show that several hundred tons more of copper were shipped than there was for the year ending Dec. 1, 1869.

The product of copper for the year ending Dec. 1, 1870, in Keweenaw county is but a few tons less than it was the year previous. There has been a slight falling off in the product of copper in Ontonagon county as compared with the figures of last year. Below we give the total shipments of ingot copper and mineral from all the mines of Lake Superior for the past year:

Eagle Harbor,	Central Mine		860
"	Copper Falls Mine		491
"	Amygdaloid Mine		25
Ontonagon,	National		183
"	Minnesota		256
"	Ridge		155
"	Rockland		64
"	Evergreen Bluff		72
"	Caledonia		43
"	Flint Steel, Aztec, Victoria Mass., Adventure, &c		51

RECAPITULATION.

Ingot copper shipped from Portage Lake	7,456	1,502
Mineral shipped from Portage Lake	3,307	1,275
Mineral shipped from Eagle River	1,224	414
Mineral shipped from Eagle Harbor	1,376	....
Mineral shipped from Ontonagon	824	....
Total ingot copper and mineral	14,187	3,191

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, March 17, 1871.

A very large volume of trade is being done, and the markets for merchandize the past week have not been without speculative features which serve to give tone to business circles. Inland navigation in the Northern and Western States is practically reopened, and there is every reason to anticipate that the Erie Canal will be in a navigable condition twenty days earlier than last Spring. The great staples of the country continue to pass rapidly into the hands of shippers and consumers, and manufacturers are generally well employed.

Cotton has varied ½@¾c. per lb., and closed ¼@⅝c. advance; Low Middling Upland 14c. on the spot, and 13¾@14⅜c. for the next four months. Flour has been dull. Shipping extras close at $6 65@6 85. Wheat firm and active.; New Spring, $1 58@1 60. Corn firmer, closing active at 87½@88½c. for prime Western, mixed and yellow. Groceries have ruled dull, except for sugars, which have been active at higher prices, fair to good refining 8½@8⅞c.

Hides have been rather quiet at the late advance. Leather has become dull, and little has been done in skins. Tallow, however, has been active for export, at some advance, choice bringing as high as 9⅛c.

In provisions, the chief features of the week have been speculative movements in Pork and Lard. Mess Pork, which on Saturday last was sold down to $21 37½@21 50 for cash and early delivery, advanced to $22@22 25 on Wednesday, from which prices it has since receded, closing to-day at $21 62½@21 75, with Prime Mess nominal at $20. The movement in Lard was not so strong, and the close lower, at $12¾@12⅞ for Prime Western Steam on spot, and seller April. Bacon has declined to 10½@10¾c. for short and long clear. Beef has been dull and prices weak, a favorite brand of prime mess selling at $27 25. Butter has been weak, and cheese is not salable except at some decline; the promise of a very early Spring is the main cause of depression.

Tobacco has been irregular. Kentucky Leaf closes dull and weak with some reduction in prices. There was some business early in the week, but for three or four days nothing of moment has been done, buyers not even looking about the market to see what they could do. The sales of the week have been about 500 hhds. of which 150 to the home trade, the balance for export, mainly to the North of Europe. We quote Common to good new lugs 6@6¾c; low to medium leaf, 7@8½c. Old Tobacco is nominal. Seed Leaf has sold fairly at very satisfactory prices, including 157 cases new Connecticut, running lots, at 17@18c., (the quality being quite inferior this season), 800 cases Pennsylvania, new crop, at 23½@25c., (of which 200 cases re-sold at something above the higher price named; 79 cases new Ohio at 16c.; 50 cases good to prime old Connecticut wrappers at 52½@65c.; 200 cases Common and Medium ditto, in lots, 35@50c. Spanish Tobacco has been in good demand, owing in part to the poor qualities of the domestic Seed Leaf from the New England States; and the sales include 233 bales Yara, new crop, on private terms, and 500 bales Havana at 85@98c. currency, duty paid.

There has been nothing of moment done in metals. East India goods quiet except Calcutta Linseed, which has sold moderately at $2 10, gold, per 52 lbs. Naval Stores and Petroleum have been dull and drooping. Oils have been dull, except Linseed, which meets with a reasonable demand. Hops have become quiet. Hay has declined. Whiskey is lower. The demand for Clover Seed has subsided, and prices declined to 12@12¼c. Foreign fruits have been active for whole lots and the jobbing trade is brisk at steady prices.

There has been less doing in Wools the past week, but prices remain firm at the late improvement.

Freights at some decline in rates for weight have been more active in grain shipments; the business of to-day embraced wheat to Liverpool and Glasgow, by steam, at 5½d.; and Cotton to Liverpool, by steam, 5 16d.@⅜d.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles from the port of NewYork since January 1, 1871, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show *total values*, including the value of all other articles besides those mentioned in the table.

ARTICLES.	Great Britain.	France.	Holland & Belg.	Germany.	Other N. Europe.	Spain.	Other S. Europe.	China & Japan.	Australia.	Br. N. A. Colonies.	Cuba.	Hayti.	Other W. Indies.	Mexico.	British Guiana.	Brazil.	Other S. American.	All oth. Ports.	Total this week.	Total since January 1, 1871.	Same time 1870.

COTTON.

FRIDAY, P. M., March 17, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening March 17. From the figures thus obtained it appears that the total receipts for the seven days have reached 102,484 bales against 136,533 bales last week, 126,935 bales the previous week, and 136,661 bales three weeks since, making the total receipts since the first of September, 1870, 3,153,517 bales against 2,303,872 bales for the same period of 1869–70, showing an increase since September 1 this year of 849,645 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	46,600	19,289	Florida bales.	327	297
Mobile	6,945	3,660	North Carolina	1,007	893
Charleston	6,070	2,640	Virginia	8,936	2,410
Savannah	10,173	6,478			
Texas	10,138	5,337	Total receipts	102,484	44,666
Tennessee, &c	12,288	5,362	Increase this year	57,618	....

The exports for the week ending this evening reach a total of 103,600 bales, of which 66,325 were to Great Britain, 666 France and 36,609 to rest of the Continent, while the stocks as made up this evening, are now 644,882 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Week ending M'ch 17.	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans	21,893	18,640	40,033	42,566	292,528	216,732
Mobile	2,959	2,289	5,198	8,424	60,777	69,982
Charleston	5,748	....	5,748	4,507	21,240	20,695
Savannah	10,173	8,377	13,570	8,425	70,803	60,589
Texas	7,893	2,306	10,242	12,634	54,439	35,158
New York	19,599	4,773	24,272	17,551	110,000	69,000
Other ports	....	5,897	5,897	700	32,000	28,000
Total	66,325	37,776	103,600	94,807	644,882	499,197
Total since Sept. 1	1,845,519	457,008	2,070,327	1402,940	....	....

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 8,793 bales, while the stocks to-night are 145,685 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to March 10, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1. 1870.	1869.	EXPORTED SINCE SEPT. 1 TO— Great Britain	France	Other Foreign	Total.	Northern Ports.	Stock.

The improvement which was established towards the close of last week not only continued this week, but the upward movement progressed quite regularly until yesterday, when Middling Uplands closed at 15¼c. and Ordinary at 11¼c.; this advance was engineered under the influence of the increased business and advance at Liverpool, stimulated somewhat by the smaller receipts at our ports. Holders were less free in their offerings, although purchasers were able to find all the cotton they wanted at the ruling quotations. The principal inquiry has been on the part of shippers; spinners doing something without, however, displaying any particular anxiety to operate, supplying simply present wants. To-day, with the receipts footing up rather more than anticipated and the advices from Liverpool less assuring, the feeling here became less favorable and with little doing prices have declined ¼c. on the lower grades and ⅛c. on Low Middling and grades above, Middling Uplands, closing at 15⅛c., and Low Middling at 14c. For forward delivery the business has been large and the fluctuations greater. As prices advanced parties having contracts out, began to desire to cover them under the fear that an extra demand for the continent springing up might leave them short. This feeling helped the advance till on Thursday Low Middlings for April sold at 14⅛c.; for June, 14 3-16; for July, 14 5-16; for August and September, 14½. But to-day prices were off ⅝c. for April and May, closing for March, 14c.; for April, 13⅞c.; for May, 13¾c.; for June, 13¼c.; for July, 14c., and for August, 14⅛c. The total sales of this description for the week have been 104,500 bales. For immediate delivery the total sales foot up this week 21,444 bales, including 801 bales to arrive, of which 2,974 bales were taken by spinners, 799 bales on speculation, 15,665 bales for export, and 2,006 bales in transit. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	11½@....	11¾@....	11¾@....	11¾@....
Good Ordinary	12⅝@....	12⅞@....	13 @....	13⅛@....
Low Middling	14 @....	14⅛@....	14⅛@....	14⅛@....
Middling	15¼@....	15⅜@....	15⅜@....	15⅜@....
Good Middling	16⅝@....	16⅝@....	16⅝@....	17 @....

Below we give the total sales of cotton and price of *Uplands* at this market each day of the past week:

	Total sales.	Ordinary.	Good Ordinary.	Low Middling.	Middling
Saturday	1,901	11¾@....	12¾@....	13⅝@....	14⅜@...
Monday	4,411	11¾@....	12⅝@....	13⅝@....	14⅜@ ..
Tuesday	2,062	11¾@....	12⅝@....	13⅝@....	14⅜@....
Wednesday	4,945	11¾@....	12⅝@....	13⅝@....	15 @....
Thursday	5,633	11¾@....	12⅝@....	14⅜@....	15⅜@....
Friday	2,492	11¾@....	12⅝@....	14 @....	15⅜@....

For forward delivery the sales (including .... free on board) have reached during the week 104,500 bales (all low middling or on the basis of low middling), and the following is a statement of the sales and prices:

For March. bales.	cts.	bales.	cts.	For June. bales.	cts.	For August. bales.	cts.
600	13¾	6,600	13¾	600	13⅝	200	13⅝

WEATHER REPORTS BY TELEGRAPH.—Our telegrams to-night report warm, dry weather all the week at Charleston and Augusta; at Montgomery the same, except last night it rained; at Macon it has rained one day, at Columbus, Galveston and Nashville, two days, and at Savannah one day the early part of the week; while at Memphis it has rained three days, and the balance of the week has been cloudy. Our correspondent at Memphis states that the "high water" has interrupted the free arrival of cotton at that port. The thermometer at [illegible] averaged 65; at Montgomery, 60; at Macon, 66; at [illegible], 64; at Columbus, 65; at Memphis, 61, and at Gal[illegible], 62.

Digitized by Google

FRANCE AND THE COTTON TAX.—The cable dispatches received this week to the effect that the new French Government is about to lay a tax on cotton is so unwise that it would appear to be impossible; nothing could operate more unfavorably to France and more favorably to Germany. In fact such a tax might be styled an easy way to repel Alsace and Lorraine and unite them permanently to Prussia, cutting off the export trade of France in cotton cloths and building up that of Germany. The French nation has lost its army, its money, and its lands by the war, but we cannot think it has lost its common sense.

PROSPECTS.—With a crop this year of four million bales and over it may be of interest to be reminded, before completing our planting for another season, at what point we are likely to begin the next crop year. This is the more important as some appear to think that the price at which next year's crop is to be marketed (if it reaches 4,000,000 bales) will not be so low as we have, in previous reports, indicated.

As to consumption we must remember that Great Britain is now running at about its present maximum capacity, and it would take several months to increase to any considerable extent the number of its spindles. Low prices for cotton and paying prices for goods will, without doubt, gradually enlarge its manufacturing power, but this enlargement must necessarily be of slow growth. According to the best authorities, Great Britain is now consuming five thousand bales per week more than the average in 1869–70, and we would therefore (allowing for any increased manufacturing power) place her increased takings for the year, as a maximum, at 325,000 bales more than last year. As to the continent, we cannot, in view of the disorganized state of labor and of the manufacturing districts of France and Germany, count on any considerable increase, while our own consumption, by reason of our want of water the early part of the season, will not be much, if any, in excess of 1869–70. Allowing then the largest possible increase for the continent and this country the remainder of the season, we see that 450,000 bales is probably the very utmost the spindles of the world can use during this crop year more than during the previous year.

As to the prospects of supply from other countries they all appear to be quite favorable, the only doubt that there will be a large increase brought to market from these sources arising out of the question whether the low prices will not check the movement. Cotton, in excess of last season, has been raised almost everywhere. Egypt is fulfilling her early promises of an enlarged yield. India had a considerable surplus left over from last crop, and is harvesting a better one. Brazil and other minor sources are not from present appearances likely to make any change in their contribution to the total supply, while China has raised so much herself she will want much less than heretofore from India. That these are facts is now admitted on all sides. There is considerable doubt, however, when, under the influence of present prices, the India cotton will come to market. But we think it is becoming evident, even if there is delay in the movement from Bombay, which is very likely, that still the world's supply from all sources other than America will at least equal last year's supply.

The conclusion from these facts would appear to be that the balance of our present crop can probably be marketed at about the prices now ruling, with perhaps some little improvement in the early summer months, unless during the later spring and early summer months the promises for the next yield should be equal to the last; but with another planting like the last we must be willing to accept lower prices.

EXPORTS.—The exports this week are somewhat less than during previous weeks, but are still on a liberal scale, and are likely to continue so for a time at least. It will be seen that the direction of the shipments is changing somewhat, the Continent now taking a larger supply and Liverpool less. Last week the movement to France opened again by two shipments from New Orleans, and this week we have 666 bales to Havana from New York.

GUNNY BAGS, BAGGING, &C.—The market for cloth has been more active for both present and future delivery and prices tend upward. The sales here and in Boston are 7,000 rolls, mostly for future delivery at 20c. cash and 21c. time; 100 bales deliverable in Boston, June 1, at 19½c. and 300 bales here at 20c. 30 days. Bags also have moved more freely and are held with greater firmness at an advance. Sales are 200 bales to arrive per "Mount Washington" at 10½c. gold in bond; 250 bales per "Tennyson;" 100 bales per "Olive;" 850 bales the particulars of which are not given, all at 10⅝c. gold in bond; 40 bales at 16c. gold, and 50 bales at 16½c. gold, duty paid. Manila Hemp has been quiet, quoted nominally at 9¾@10c. gold; the only sale reported being 1,000 bales in Boston on private terms. Jute has ruled quiet, but is held at 5⅛@5¼c. with a sale of 300 bales on private terms. Jute Butts have also been quiet, but are held very confidently. We note the sale in Boston of 300 bales at 4c. currency and in this market 600 bales at 4¼c. currency, 30 days time, and 60 days adding interest.

SHIPMENTS OF COTTON FROM ALEXANDRIA.—The following statement shows the total shipments of cotton from Alexandria for a series of years ending Sept. 30 of each pear:

Year ending Sept. 30,	Shipments to Great Britain.	Shipments to France and Spain	Shipments to Austria, &c.	Total.
1869–70	177,631	26,356	26,734	230,721
1868–69	184 303	36,043	25,203	245,549
1867–68	177,421	32,407	19,964	229,792
1866–67	180,149	29,425	17,974	227,558
1865–66	179,500	25,154	8,440	213,094
1864–65	326,011	64,385	14,015	404,411

EXPORTS FROM CALCUTTA.—Exports from Calcutta for a series of years have been as follows:

Exported from 1st Jan. to 31st Dec...	1865.	1866.	1867.	1868.	1869.
	223,977	412,310	390,051	263,321	202,232

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	Week ending Mar. 17, 1871. Receipts.	Shipments.	Stock.	Week ending Mar. 17, 1870. Receipts.	Shipments.	Stock.
Augusta	2,459	2,195	22,039	1,227	516	22,969
Columbus*	557	1,170	9,815	332	354	12,647
Macon	504	1,585	9,976	474	1,235	15,178
Montgomery	992	941	8,114	178	170	11,468
Selma	865	1,083	6,000	348	966	5,882
Memphis	9,124	16,073	36,970	4,380	8,829	22,839
Nashville	1,593	1,542	7,836	769	552	5,916
	16,094	24,589	110,750	7,708	12,622	96,899

* A count of stock at Columbus to-night discloses the fact that there were 1,800 bales less of stock than the running count called for.

These totals show that the interior stocks have decreased during the week 11,477 bales (being now 3,851 bales more than for the same period of last year), while the aggregate receipts are 8,386 bales more, and the shipments 11,967 bales more than for the corresponding period of 1870.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons:

	1871.	1870.
Stock in Liverpool.....bales.	804,000	295,000
Stock in London	76,340	69,380
Stock in Glasgow	350	460
Stock in Havre	41,329	65,330
Stock in Marseilles	4,600	6,800
Stock in Bremen	2,750	7,500
Stock rest of Continent	25,000	35,000
Afloat for Great Britain (American)	332,000	320,000
Afloat for France (American and Brazil)	3,846	59,816
Total Indian Cotton afloat for Europe	167,000	129,734
Stock in United States ports	644,882	499,197
Stock in inland towns	100,750	96,899
Total	2,202,847	1,585,116

These figures indicate an *increase* in the cotton in sight to-night of 617,731 bales compared with the same date of 1870.

The exports of cotton this week from New York show a decrease since last week, the total reaching 15,659 bales, against 24,669 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

Trade Report.—The market for goods and yarns at Manchester is quiet and firm.

BREADSTUFFS.

FRIDAY P. M., March 17, 1871.

The markets for flour and grain the past week have been only moderately active, and the fluctuations in prices slight, closing with the tone somewhat depressed.

Flour arrived more freely early in the week, and this had the effect of weakening prices, especially for shipping extras and lower grades, for which the demand has been light. The finer grades of flour from Spring Wheat declined materially, but all grades made from Winter Wheats have remained firm, and have become, in fact, somewhat scarce. Flours between $7 and $7 75 have been taken pretty freely for the West Indies. Toward the close, receipts again fell off, and although the demand for shipping extras did not improve, they ruled more steady. Some fair lines could have been placed at $6 65, but few offered below $6 75. Southern flours continue scarce. Rye Flour and Corn Meal have been very strong.

Wheat has slightly advanced. Very little is coming forward by rail, and the quantity at hand is experiencing a rapid reduction. Nevertheless, in view of the early reopening of inland navigation, and the probability that the Erie Canal will be open twenty days earlier than last Spring, holders have shown a disposition to meet the demand. Millers have bought freely, and shippers, favored by a decline in ocean freights, have been able to execute some orders, taking new Spring at $1 58@$1 60, with some old at $1 49 and Red and Amber Winter at $1 60@$1 71, the latter price for choice new, at which the market was quiet on to-day's exchange.

Corn has met with a brisk export demand, with a good local trade; and as receipts have been small, an advance in prices has taken place, partly attributable to a decline in ocean freights. Yesterday there were free sales at 88@89c. for Western Mixed and 90@91c. for Yellow; but to-day, under a variety of influences, there was some decline, the sales being mainly at 87½@88c. for prime Mixed, afloat, including parcels to arrive at the lower figure, and 88½c. for Western Yellow.

Rye and Barley have been dull, and prices are so unsettled that our quotations must be regarded as wholly nominal.

Oats were strengthened early in the week, by some out-of-town demand, but the close is weak, boat-loads of prime Ohio selling to-day at 69c. in store.

The following are the closing quotations:

Flour—		Wheat, Spring, bush	$1 45@1 60
Superfine	$ bbl. $6 00@ 6 50	Red Winter	1 57@ 1 62
Extra State	6 70@ 6 90	Amber do	1 65@ 1 71
Extra Western, common to good	6 60@ 6 90	White	1 65@ 1 85
Extra and double extra Western & St. Louis	7 00@ 9 25	White California	....@ 1 80
Southern shipp'g extras	6 85@ 7 25	Corn, Western Mix'd	86@ 88
Southern, trade and family	7 50@ 9 25	Yellow, new	88@ 89
California	....@	White	88@ 93
Rye Flour, super & extra	5 85@ 6 45	Rye	1 12@ 1 20
Corn Meal	3 90@ 4 60	Oats	67@ 71
		Barley	95@ 1 18
		Malt	1 00@ 1 20
		Peas, Canada	1 15@ 1 35

The movement in breadstuffs at this market has been as follows:

GROCERIES.

FRIDAY EVENING, March 17, 1871.

The Spring trade has not yet commenced to show a volume of much magnitude, and the reports for the week contain a record of a comparatively small amount of business. Importers and holders of goods, however, appear to feel much confidence, and consider the prospect as encouraging. Inland navigation is opening much earlier than usual, the cost of transportation both by water and rail is gradually being reduced, and large amounts of domestic products wintered over will soon be seeking the seaboard for which imported goods in the usual order of things must be returned, and groceries among the first, especially as values now are undoubtedly low, and though likely to prove in sufficient supply for ordinary outlets, there is no great excess in the accumulations. The disposition, therefore, is to offer moderately and insist upon former rates. The passage of the bill by the House of Representatives, abolishing the import duty on Tea and Coffee, it is thought will prove to be a mere political movement, and not likely concurred in by the Senate. Awaiting the issue, however, operators are disposed to move with greater caution.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black....	7,763 pkgs.	Laguayra ..	932 bags.	Sugar, Brazil.	.... bags.
Green.....	8,156 pkgs.	Other.....	1,153 bags.	Manila, &c..	.... bags.
Japan.....	2,143 pkgs.	Sugar, Cuba..	1,947 boxes.	M'las'es, Cuba	5,892 hhds.
Various.....	1,700 pkgs.	Cuba.....	8,013*hhds.	Porto Rico.	99*hhds.
Coffee, Rio....	11,080 bags.	Porto Rico	4*hhds.	Demerara..	....*hhds.
Java	5,395 mats.	Other.....	697 hhds.	Other.....	118*hhds.
Maracaibo..	1,201 bags.				

*Hhds. include bbls. and tcs. reduced

Imports this week at this port have included 5,000 bags Rio, and 5,407 bags of other kinds of coffee; with fair receipts of sugar and molasses, including 623 bbls. of New Orleans molasses. The arrivals of tea have been large, embracing six cargoes, making 1,440,413 lbs. of black; 1,395,414 lbs. of green, and 30,005 lbs. of Japan.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at d ate.		Imports at leading ports since January 1.	
	1871.	1870.	1871.	1870.

TEA.

There has been very little business doing in this market outside a fair distribution in lines, and the position really shows few features of interest. Buyers have already on hand a pretty good supply, and knowing that there is enough stock now here in the hands of importers to render additional purchases, either as to quantity or assortment, a comparatively easy matter, there is no inclination to come into market, until consumers are more plenty and the jobbing business shows greater life. In the prevailing condition of the market values naturally are somewhat slack, but there is no serious decline, nor do holders seem inclined to grant any, feeling confient that a little patience will bring matters in better shape as the spring trade gradually sets in. Taking off the duty by the House of Representatives will not be concurred in by higher house it is thought, but in view of the possibility of such a law being passed operators generally are cautious, buyers fearful of loss and holders of goods in bond hopeful of gain. Sales of 3,500 pkgs Green, and 3,300 Oolong.

Imports this week have included 429,538 lbs. of Black per "Espiegle," from Foo Chow; 382,281 do. do. per "Marathon," from Hong Kong; 580,603 do. do. per "McGilvery," from Amoy; 47,991 do. do., and 732,595 do. Greens per "Montana," from Shanghae; 654,859 do. do. and 25,885 do. Japans per "Argonan," from Shanghae; and 7,960 do. Greens and 4,120 do. Japans per "Cleta," from Whampoa.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871.....	5,605,894	8,683,556	3,304,152	17,593,602
1870.....	6,329,009	4,152,962	1,076,281	11,558,272

The indirect importations, including receipts by P. M. Steamers via Aspinwall, have been 7,908 pkgs. since January 1, against 12,864 last year.

COFFEE.

The movement has been even less than last week, and in a general way a decidedly dull tone has been a ruling feature of the market. The large jobbers, as a rule, hold a very fair supply, from which they are enabled to meet the wants of their present small attendance of customers without much difficulty, while the entire trade find the distributive call so light at present, and wholesale values so high, that they are disposed to postpone operations until the latest possible moment, in hopes that something may turn up to give them an advantage, though sellers claim that instead of conccssions they will soon be enabled to successfully insist upon a further advance. No one has entertained an idea that the bill to do away with import duties will become a law during the present session of Congress; but as such a thing is possible, all likely to be affected await a decision with some little interest, as the effect of the act would be to cheapen goods duty paid and increase the value of lots in bond. On Brazils holders have remained very strong in their terms, with some entirely withdrawing samples, more encouraging advices from the point of production, and an absolute loss on many parcels at ruling rates acting as a stimulating influence. Business certainly has been quite dull, and the stock and assortment have increased somewhat, but the accumulation is far from large, and, with prospective small additions to the accumulation, every confidence is felt in the maintainance of present values, and as a rule an advance is predicted. For East and West India descriptions there has been a very quiet market, buyers in most cases taking nothing except through actual necessity, but there is no loss of strength, and bids on a basis of full former figures was the only inducement for sellers to enter into negotiations. We note 2,924 bags Rio, 2,200 bags Santos, 150 bags Maracaibo, 720 bags Costa Rica; and shipped from first hands to Europe, 3,085 bags St. Domingo. Sales at Baltimore of 6,884 bags Rio.

Imports this week have included 5,000 bags of Rio per "Eigil." Of other sorts the imports have included 1,256 bags of Jamaica per "Annie Tibbets;" 1,517 do. St. Domingo per "Oliver;" 2,118 do. per St. "Port-au-Prince," and 316 do. sundries.

The stock of Rio March 16, and the imports since Jan. 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobille.	Galveston.	Total.

* Includes mats, &c., reduced to bags. † Also, 30,231 mats.

SUGAR.

The market for Raws has varied somewhat during the week, but on the whole the improved tone noted in our last has become more general and with the exception of slightly slack feeling on one or two days, when the movement happened to be a little slow, the tendency was rather toward a higher range. Sellers have gained their advantage from smaller and better assorted receipts, a greater inclination to place current arrivals in store, and the increased wants of refiners who have run supplies pretty low in meeting the recent call for their production. It is also claimed by importers that they cannot lay sugars down here at present prices and secure a margin for profit, and this naturally adds to the firmness. Buyers have taken a considerable amount of stock off the market and all of it will probably go into early consumption, but they have not operated without caution, and few purchases were made beyond known wants, as hopes are entertained that the new crop will soon again move into market with enough freedom to cause a re-action. On the recent decline the depression was less decided on clayed sugars than on Muscovado, and now the upward turn is most marked on the latter, indeed some operators claim that the advance is merely the working up of the low grades to their proportionate difference with the previously better supported upper qualities. Refined further advanced and sold freely, but buyers having filled their largest orders the business became a little more moderate, though without any decided reaction in values, and at the close the feeling is again rather in sellers' favor. The sales of Raw embrace 7,850 hhds. Cuba; 750 hhds. Porto Rico; 500 hhds. Demerara; 485 hhds. Martinique; 240 hhds. New Orleans; 4,965 boxes Havana; 32,932 bags Manila, and 781 hhds. Melado.

Imports at New York, and stock in first hands, Mar. 16, were as follows:

	Cuba, bxs.	Cuba, *hhds.	P. Rico, *hhds.	Other *hhds.	Brazil, bags.	Manila, &c, bags.	Melado hhds.

MOLASSES.

In the way of generally interesting features the market for foreign goods is almost entirely bare, business still showing a comparatively small aggregate and prices remaining much the same as last week with a more or less nominal tone, especially on the old crop. Distillers are very small operators, refiners though working somewhat more freely and occasionally calling for a cargo still have enough stock from direct importation to make them feel a little independent, and the trade have taken less than their usual average. The majority of holders seem rather inclined to offer their supplies to the full extent of the outlet and accept easy terms though there is no undue pressure to realize on any grade. Domestic of strictly prime and choice quality continues firm, but the bulk of the stock is undesirable and owners appear to want to get rid of it at almost any price. Sugar House Molasses is less active, and offered at about 2c. decline from former figures. Sales of 1,750 hhds. Cuba Muscovado, mostly old crop and part to arrive coastwise; 1,070 hhds. Cuba Clayed; 250 hhds. Porto Rico; 100 hhds. English Island, etc., in small lots; about 100 pkgs. new crop St. Croix; and 1,025 bbls. New Orleans.

The receipts at New York, and stock in first hands, Mar. 16, were as follows:

	Cuba, *hhds.	P. Rico, *hhds.	Demerara, *hhds.	Other *hhds	N. O. bbls

*Including tierces and barrels reduced to hhds.

SPICES.

The movement of invoices still amounts to almost nothing and the wholesale market is extremely dull. There is a fair call for jobbing lots, but even here business has a slow tone and buyers evidently are not inclined to take more goods than they can handle to immediate advantage. Holders, however, with all the stocks well under control and nothing of magnitude expected to arrive, are unwilling to give up any advantage and aside from the usual occasional shading on small odd lots about former prices are current, Nutmegs, Mace and Pepper showing the greatest strength.

FRUITS, &c.

The market has been very quiet since the date of our last, formal purchases of the trade having been sufficient to supply their wants for the present. Layer Raisins have been easier, owing to a pressure to sell, and prices declined to $2 75, but close again at $2 80. Turkish Prunes are quiet, but held pretty confidently at former prices. Currants are dull, but no noticeable decline can be noted. Sardines are held more confidently than at the date of our last, but move slowly and generally in small lots. Almonds have been fairly active for Languedoc to arrive at 10½c gold, with free sales, but at the close are held at 11c gold and 19c currency, and are rather quiet. Brazil nuts are lower. Dates are in fair demand.

The supply of Foreign Green fruit from the Medditerranean is large and from one to three cargoes are disposed of daily at auction, and considering the large supply prices are well maintained; to-day some 12,000 boxes were sold. Messina Oranges brought $2 15@4 05 per box, Lemons $3 75@3 95; the Palermo brought $1 35@3 75 per box for Oranges and $3 80@4 00 for Lemons. The supply of West India is rather light and these retain former prices. Oranges sell at $13 00 per bbl. Baracoa Cocoanuts, $40@45 per thousand; Bananas $1 75@2 50 per bunch and Carthagena Cocoanuts, $65 per thousand.

The market for Domestic Dried has ruled quiet for state Apples, which have been in full supply, prices, however, are without change. Southern have met with a small demand and ruled steady. Blackberries have sbown a further movement; all to be had at 12½@13c for prime have been bought up; they are now held at higher prices. Peaches, both pared and unpared, are merely nominal, as they are very few in market. Other kinds are firm and sell readily. Peanuts continue to be held with much firmness, the bulk of the stock is in the hands of one or two parties and a further advance in prices is looked for. Pecans are scarce, about all the stock to be had has been bought within the Past few weeks, by parties anticipating a rise in prices.

Domestic Green is dull for both Apples and Cranberries, unless for the very choicest, for which former prices are obtainable.

ADVICES FROM PRODUCING MARKETS.

Tea.—The following shows the quantity of Tea afloat for the United States at latest dates (not including San Francisco), and which has not yet arrived:

Rio Coffee.—Messrs. Wright & Co.'s telegram, dated Rio de Janeiro, February 23, 1871, states: Sales of Coffee for United States since the 6th inst., 72,000 bags; shipments, 69,000 bags; loading, 35,000 bags; stock at date, 73,000 bags. Exchange, 24½d.

Cuba Sugar.—HAVANA, March 10.—The market has remained on the whole in about the same condition noticed at the date of our last, buyers having continued to offer lower prices, whilst few holders are disposed to sell at less than 10@10¾ rs per arrobe No 12, common train, according to condition of the staple. Very special lots still bring a fraction more than the outside figure, owing to their scarcity and demand. The cable advices from the United States and Europe have continued unfavorable for our sugar market, although yesterday a small recovery in New York for Muscovado has been reported, and shippers to those quarters have shown less disposition to operate than last week; therefore, the demand prevailing is almost exclusively for bright special classes for Spain and the Mediterranean, the production of which is unusually small this year and held by most holders at extravagent figures. The sales which have been reported during the week amount to about 10,000 boxes of all kinds, against 8,500 boxes last week.

Shipments this week from Havana and Matanzas have been as follows:

To	Boxes.	Hhds.
New York	4,856	1,484
Boston	638	675
Baltimore	716	649
New Orleans	1,138	730
Total export of the week to all countries	21,547	26,336

The general movement at both ports has been as follows:

	Rec'ts this week Boxes.	Rec'ts this week Hhds.	Exports since January 1. To U. S. Boxes.	To U. S. Hhds.	To all Ports. Boxes.	To all Ports. Hhds.	Stock at date. Boxes.	Stock at date. Hhds.

New Orleans Molasses.—The supplies are mostly poor in quality and nearly all Fermenting. Good Molasses is scarce, and the market is bare or nearly so of prime and choice not Fermenting. Poor Molasses is neglected, while good is in request. The receipts on Wednesday and Thursday were mostly sold at 15@27c. per gallon for inferior Fermenting; 30@40c. for Good; 42½@47½c. for prime slightly Fermenting; 52@57c. for strictly prime not Fermenting. There is no Choice here. Yesterday the demand was fair, and the supplies were mostly sold at full previous prices.

THE DRY GOODS TRADE.

FRIDAY, P. M., March 17, 1871.

There has been a better jobbing trade doing during the past week, though the demand has undoubtedly been lessened by the unpleasant weather of the last few days. There are a large number of buyers in the market already, and more are arriving daily, but the weather has prevented them from canvassing the market to any extent. The Southern trade is relatively better than that from the West, though there are more Western buyers in the market toward the close of the week. The jobbers in that section have been endeavoring for several seasons past, to get control of the jobbing trade in their respective localities, and have apparently succeeded in a measure, as it is a noticeable fact that the full package sales to the West are increasing every season, while there is also some falling off in the trade in this market with Western retailers. The better class of trade still visits this market, and will doubtless continue doing so, as the advantages to be gained here, on purchases of any considerable amounts, are sufficiently great to make it an object for this class of buyers to come directly here. To small dealers, however, the nearest market generally offers the greatest inducements, and it is these buyers who are yearly appearing here in smaller numbers. Their individual purchases are small, but the aggregate is considerable, and jobbers here will find it worth their while to make some exertion to retain it.

The retail trade here and in other cities, is improving somewhat, and retailers' stocks are becoming broken. The weather since Tuesday has been unfavorable for an active retail trade, but the demand is still good for this season of the year, and dealers are anticipating a satisfactory season.

DOMESTIC COTTON GOODS.—The demand for cotton goods has been fair in a general way, but the trade improves slowly and is still below the expectations of dealers. There was some weakness apparent in several lines, early in the week, but we think the market rather steadier toward the close.] The increase in the production, since the heavy rains of a few weeks ago, has been heavy, and stocks are accumulating in first-hands. This naturally has a tendency to weaken the market, and certain lines which were advanced not long since, will doubtless experience a decline. Whether or not this will be general it is difficult to state, as the matter rests entirely with agents, and it is decidedly difficult to ascertain what they intend doing. A few makes of medium and low grades brown and bleached goods have already been reduced by jobbers, and it is said that agents generally would make extra discounts to purchasers of large lots. The print market is unsettled, and the demand remains comparatively light. There was a decline of ⅛c. to-day in several brands of standard, and corresponding reduction is looked for in other brands within a few days.

DOMESTIC WOOLEN GOODS.—There is a very good trade doing in all woolen fabrics, and the market is well sustained. The production of light weight fabrics has about ceased, and the stock in first hands is unusually light. Few goods will be carried over into next season, and the market is thought to be in an eminently healthy condition, with all classes of dealers. Cloths sell well in light weights, but the demand for heavy goods is even less than is usual at this period of the year. This is due, however, to the fact that prices are very stiff, as dealers purchasing so early in the season as this, have generally been able to obtain a concession from the quoted prices, which holders are not disposed to grant in the present condition of the market. Cassimeres are in fair demand, at full prices. Shawls are quiet in first hands, at the moment, as the demand from retailers has not been sufficiently heavy as yet to break jobbers' stocks.

FOREIGN GOODS.—There is a moderate improvement in the jobbing movement from day to day, and the sales of all seasonable fabrics are in more satisfactory amounts. Dress goods sell freely, and dealers are looking forward to an active trade throughout this month and April. Linens are quiet in first hands, but are selling more freely with jobbers, though the movements are in limited amounts. Shawls are in fair demand, but the war greatly reduced the number of skilled operatives, and it is difficult now to obtain full assortments of perfectly finished goods. Silks are in fair demand at full prices.

The exports of dry goods for the past week, and since January 1, 1871, and the total for the same time in several previous years are shown in the following table:

	FROM NEW YORK.				FROM BOSTON
	Domestics.		Dry Goods.		Domestics.

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of leading Jobbers:

BROWN SHEETINGS AND SHIRTINGS are in fair demand, but the sales are light for this period of the season, and stocks are accumulating in agent's hands. Amoskeag A 36 12¼, do B 36 12, Atlantic A 36 13, do D 36 11, do 36 H 12½, Appleton A 36 13, Augusta 36 11½, do 30 10, Bedford R 30 8½, Boott O 34 10½, Commonwealth O 27 8, Grafton A 27 8, Great Falls M 36 11 do S 33 10, Indian Head 36 13, do 30 10½, Indian Orchard, A 40 13, do C 36 11, 11½ Laconia O 39, 12 do B 37 11, Lawrence A 36 11, Lyman C 36 11, do E 36 12½, Medford 36 12, Nashua fine O 33 11, do R 36 13, do E 40 14½ Newmarket A 36 11, Pacific extra 36 12½, do L 36 11½, Pepperell 7-4 22½, do 8-4 25, do 9-4 27½, do 10-4 32½, do 11-4, 37½, Pepperell E fine 39 13, do R 36 12, Pocasset F 30 8½, Saranac fine O 33 11, do R 36 13, Stark A 36 12½, Swift, River 36 9, Tiger 27 8.

BLEACHED SHEETINGS AND SHIRTINGS sell moderately, but the demand is chiefly for small lots to supply current wants, and the list of quotations is less firmly maintained. Amoskeag 46 16½, do 42 15, do A 36 15, American A 36 12½, Androscoggin L 36 16 Arkwright WT 36 13, Ballou & Son 36 13, Bartletts 36 14½, do 33 13½, Bates XX 36 17@18, Blackstone AA 36 14, Boott B 36 13½, do O 30 11, do R 28 9, Clarks 36 17½, Dwight D 40 18, Ellerton 10-4 45, Forestdale 36 15, Fruit of the Loom 36 15—16 Globe 27 7, Gold Medal 36 13, Great Falls Q 36 16 Hill's Semp. Idem 36 15, Hope 36 13, James 36 15, Lonsdale 36 15½, Masonville 36 15½@16, Newmarket C 36 12½, New York Mills 36 21 Pepperell 6-4 22½, do 10-4 37½, Tuscarora XX 36 18@19, Utica 5-4 25 do 6-4 38, do 9-4 47 do 10-4 52½, Waltham X 33 11, do 42 15½ do 6-4 22½, do 8-4 27½, do 9-4 32½, do 10-4 37½ Wamsutta 36 20.

PRINTING CLOTHS are a trifle more active at lower prices, the current quotation for 64x64s being 6½c. for goods on the spot.

PRINTS are quiet, the sales being of small lots to supply immediate wants. The market is not very firm and there has been a decline in some makes. American 10, Albion solid 11, Allens 10½, do pinks 11½, purples 11½, Arnold 8½, Atlantic 6, Dunnell's 10½, Hamilton 10½ London mourning 10, Mallory 11½, Manchester 10, Merrimac D 11, do W pink and purple 13½, do W fancy 12½, Oriental 10, Pacific 11, Richmond's 10½, Simpson Mourning 10½, Sprague's pink 11½, do blue and White 11, do shirtings 10, Wamsutta 7½.

CHECKS.—Caledonia 70 23, do 50 22½, do 12 26½, do 10 21, do 8 17, do 11 22, do 15 27½, Cumberland 13, Jos Greers, 55 15½, do 65 18, Kennebeck 20, Lanark, No. 2, 9½, Medford 13, Mech's No. A 1 29.

DENIMS.—Amoskeag 26, Bedford 14½, Beaver Cr. AA 20, Columbian heavy 24, Haymaker Bro. 14, Manchester 20, Otis AXA 22½, do BB 20.

STEEL PENS,
Manufactured by the Original Inventor of Steel Pens.
THE CELEBRATED durability and perfection of action of these Pens are owing to a peculiar process of Carbonizing, and to the great care taken in their manufacture by the most skilled and experienced workmen in Europe.
They are a nearer approximation to the real SWAN QUILL than anything hitherto invented.
For sale by Dealers generally.

THE Commercial AND Financial Chronicle

HUNT'S MERCHANTS' MAGAZINE,

A Weekly Newspaper,

REPRESENTING THE INDUSTRIAL AND COMMERCIAL INTERESTS OF THE UNITED STATES.

VOL. 12. NEW YORK, MARCH 25, 1871. NO. 300

Advertisements.

Advertisements will be inserted at the following r ices per line for each insertion :

ordered less than 4 times	20 cents per line.
times or more	16 "
"	14 "
"	12 "
"	10 "
"	8 "

If the advertisement occupies one column or upwards, a discount of 15 per cent on these rates will be allowed.

Space is measured in agate type, 14 lines to the inch.

Advertisements will have a favorable place when rst put in, but no promise of continuous insertion in he best place can be given, as all advertisers must have equal opportunities.

Advantages.

1. The CHRONICLE has much the largest circulation of any financial publication issued.

. Its circulation extends to business men in BOTH the FINANCIAL and COMMERCIAL branches, and also to a very numerous class of retired merchants, moneyed men and investors, who are not engaged in regular business.

3. It is preserved on file by subscribers, and thus possesses a great advantage for advertisers, over those publications which are habitually thrown aside after perusal.

Financial.

Elizabethtown & Paducah Railroad Company

OF KENTUCKY.

FIRST MORTGAGE

Eight Per Cent. Convertible Bonds.

This road, connecting the important points of Louisville and Paducah, is 185 miles long, and passes through a rich agricultural and mineral section of the State of Kentucky. The traffic will be abundantly remunerative.

Sixty miles of this road are already in successful operation, and it is expected that the line will be opened to Greenville, 93 miles, in July next. The western end of the line, (on which a considerable amount has bee expended) will be pushed vigorously to completion. The Company have in good and BONA FIDE stock subscriptions amounting to

$3,095,000

of which the city of Louisville subscribed

$1,000,000.

These Bonds are the only lien upon the property and franchises of the Company, and as an additional safeguard to purchasers are deposited with the UNITED STATES TRUST COMPANY OF NEW YORK which will pay over the proceeds to the Railroad Company only in the ratio of construction.

The management is in the hands of most responsible and favorably known citizens of Kentucky, with the guaranty of their able and faithful direction, and with the large amount of stock subscribed these Bonds form a very safe and desirable investment.

The coupons are payable on the first days of March and September at the Bank of America, New York.

The Bonds are now offered at the low price of 87½ cents and accrued interest, and we with confidence recommend them to investors as a thoroughly safe security.

SAFE INVESTMENT.

The attention of Capitalists is called to the

FIRST MORTGAGE

SEVEN PER CENT BONDS

OF THE

PEORIA, PEKIN & JACKSONVILLE RAILROAD COMPANY,

Issued in sums of $500 and $1,000, redeemable July 1st 1894, with coupons for semi-annual interest, payable on the first days of January and July, in the City of New York, and secured by a Mortgage for $1,000,000 upon the Railroad, its franchises and all equipment, on the well protected basis of about $12,000 per mile.

This Road, with its 88 miles of main, and over 8 miles of side track, is completed and in successful operation between the cities of Peoria and Jacksonville, in the state of Illinois. At Peoria, the third city in the state in respect to business and population, it intersects four prominent Railroads, with connections for Chicago, Rock Island and other points North, East and West but having its principal connection with that of the Chicago, Rock Island and Pacific Company. At Jacksonville it connects with three Roads forming, with the Jacksonville Division of the Chicago and Alton Road, the shortest line between Peoria and St. Louis.

Its rental receipts from other Roads, whose trains pass over less than ten miles of its track, are $40,000 per annum, being more than one half of the amount of the annual interest on its First Mortgage Bonds, otherwise amply provided for by its existing business.

A portion of the $1,000,000 of First Mortgage Bonds, aforesaid, the high character of which for investment will be observed, are now offered for sale by

W. T. HATCH & SON, Bankers,

34 WALL STREET, N.Y.

The Directors of the Company are as follows

JOHN ALLEN (President), of Saybrook, Conn., late of Hopkins, Allen & Co., New York.

RICHARD ARNOLD, of Messrs. Arnold, Constable Co., New York.

JAMES M. CONSTABLE, of Messrs. Arnold, Constable & Co., New York.

LUCIUS HOPKINS, of Messrs. Hopkins, Dwight Trowbridge, New York.

EDWIN L. TROWBRIDGE, of Messrs. Hopkins Dwight & Trowbridge, New York.

LEBBEUS CHAPMAN, Jr. 33 Wall st.

JAMES F. KELSEY, Havana, Ills.

TREASURY DEPARTMENT,
STATE OF ARKANSAS,
LITTLE ROCK, March 1, 1871.

THE SEMI-ANNUAL INTEREST, due April 1, 1871, on Arkansas State Seven Per Cent bonds, will be paid on and after that date, at the UNION TRUST COMPANY, No. 73 Broadway, New York.

HENRY PAGE,
State Treasurer.

KANSAS PACIFIC Railway Company

7 PER CENT GOLD BONDS,

(Denver Extension)

WANTED, for the Sinking Fund,

$20,000

Of the above named Bonds, issue of June 20th, 1869, will be purchased of the lowest bidder. Sealed proposals, naming prices "flat," for the above $20,000, or any part thereof, are requested, and will be opened March 20th, at 11 o'clock, at my office in St. Louis.

ADOLPHUS MEIER,
Trustee.

THE TREASURY GOLD SALES.

The news from Paris yesterday tended to increase the incertitude and hesitancy of the movements in Wall Street, developed by the recent unauthorized report that Mr. Boutwell has determined to adopt a new financial policy, which will unsettle the money market, put down gold, and cause a rise in government bonds. What this policy might be, was variously reported. The most common report is, that he will sell at once about one-third of the 80 millions of gold, which is in the Treasury, the property of the government. The premium will thus, it is argued, decline. An immediate purchase of five-twenties is to follow, and is expected to cause them to advance. The success of the new loan is by this two-fold manœuvre to be assured, for the obstacles will be removed which now make the ten-forties and the five-twenties more attractive to investors than the new fives. The rumor is wholly without confirmation, and its discredit ought to have been secured by the fact that such a piece of financial strategy would be suicidal. It would be equally injurious to Mr. Boutwell's popularity, and to his prospects for completing his proposed negotiations. The sudden and violent forces which it would evoke for the alternate rise and fall of gold and foreign exchange would unsettle values, awaken general distrust and inflict severe losses on our commerce and trade. If the gold premium is to be violently put down, it will be apt to recoil as violently, and Mr. Boutwell's power over the market is limited by his available coin surplus, which is the product of taxation, and ought to be sold for as high a price as it is worth in the market, rather than to be used as a means of depressing values and throwing business into confusion. In May, 1866, this expedient of controlling the gold premium was tried for the last time; for its failure prevented Mr. McCulloch from ever venturing upon a repetition of such a costly and futile experiment. If the success of the funding scheme can be gained by no other means, the people will elect to wait until a more auspicious time.

It awakens some surprise that the five-twenties should have declined since the new loan was announced. But stability is one of the elements of financial strength. The general effect on public confidence is always unfavorable for a time when there is any unsettling of loans or any reorganization and expensive refunding of outstanding bonds. These movements are, however, only temporary. And they have been in part due to the injudicious rumors put forth that the five-twenties may, if not refunded, be paid in greenbacks at maturity. As our currency is rapidly advancing to par, greenbacks may soon be worth their face in coin. If hereafter, when the five-twenties shall be paid off, the greenbacks are at par, who will be injured if the five-twenties should be paid in greenbacks? And if our currency is not at par then, the law of 1866 forbids payment otherwise than in coin. And this law, which was the first act of Congress signed by President Grant, cannot be repealed. Congress has no power over it, as it forms a part of the contract between the Government and its creditors, and to this contract the public faith is pledged. The discussion of such a question, however, at this moment, is unfortunate, and has had in the sensitive condition of the public mind an unhappy tendency to disorganize and discourage the movements of the money market.

This is the more pronounced because of the approaching drain of currency and of deposits for the first of April. This is the period of one of those periodic depletions of the money market which, under our inelastic currency system, seldom fail to cause trouble. These drains occur quarterly in England. Here they are more irregular; but in each case they originate in the necessity for making heavy payments at certain seasons in the country. The pecuniary settlements of April are not very large, and the currency they attract from this centre returns in a fortnight or three weeks. After this we have no similar movement of any importance till the fall. About the month of October the grain crop requires to be moved, and the currency thus withdrawn from us does not usually find its way back till

Digitized by Google

December. In this month the pork crop makes its claim for funds which do not return till February. Meanwhile the cotton crop demands its quota of money from us in November, December and January, and the funds seldom return till April and May. When the influx of these funds is early the April drain usually fails to produce much inconvenience. It was, however, with a view to avoid increasing the trouble from this April drain that Mr. Hulburd has called for his quarterly report from the banks to be made up for last Saturday.

Another reason why Mr. Boutwell's rumored new policy has caused disquiet, is the dubious position of our foreign exchange market in face of possible demands from our transatlantic creditors. This is a contingency to which, as a debtor nation, we are of necessity exposed, in presence of extraordinary financial movements in Europe. How far any apprehensions thus arising may be verified is uncertain. Hence Mr. Boutwell will, it is hoped, lose no time in reassuring the public mind as to what he intends to do in regard to the selling of gold.

The coin reserve in the Treasury has functions to perform of the very highest concern to the public credit, to the validity of greenbacks, to the government securities, and to the whole currency and credit system of the country. If any new policy is to be adopted in the management of the coin balance, therefore the people wish to be warned of it in time.

IMMIGRATION.

One of the most fruitful sources of the rapid material progress of this country has long been recognized in the increasing tide of immigration, which has, during the last half century, brought no less than seven millions and a half of emigrants of kindred races, who have left their foreign homes, attracted by the certainty that with honest labor they could better their condition by settling permanently among us. It is impossible to compute in money the amount these immigrants have added to the national wealth. But those who are curious in such matters have made estimates, founded on the capitalized value of unskilled labor as represented by the price of slaves before the war. As free labor is certainly worth more than forced labor, and as one-tenth of the immigrants are workmen of more or less skill, it has been argued that on a fair capitalization of earnings, the average value added by each immigrant landing on our shores must be at least 500 dollars. Taking this low average as a basis, it appears that the immigration movement adds every year to the national wealth a value averaging 190 million of dollars, and that since 1848 the immigration has swelled the resources of the country by 3,000 millions of dollars, or more than the aggregate of the national debt, with the debts of the various States and municipalities combined. This aspect of the immigration movement is suggestive, but of course such calculations are conjectural, and offer but one of the multitude of elements for estimating the value of an orderly, law-abiding, skilful and ingenious population, pouring itself yearly into a popular government like ours, whose rich lands invite settlers, and whose unrivalled climate, vast resources and free institutions, stimulate and give full scope to inventive, genius and industrial energy. The influx of a million laborious, good citizens added to a progressive civilization like ours, diffuses energy throughout the whole body politic, and gives a new efficiency to all the productive forces of the country. For modern economical science finds that to enlarge and concentrate population, gives one of the essential conditions for the more complete division of labor, and for the enlargement and combination of those stupendous forces which increase with such rapidity the wealth of nations. Well directed immigration then does not merely add a fixed capital of so many dead millions of dollars to our national resources, but it confers on the country advantages of far higher worth in enlarging the organization of labor and accelerating the movements of that productive machinery which is a permanent creator of new sources of material prosperity. The following table shows the extent of the immigration movement during the past fifty-one years. By the courtesy of Mr. Young, of the Statistical Bureau at Washington, we are enabled to present the figures to our readers in advance of their official publication.

It has been anticipated that the financial troubles in France consequent on the ravages of war and the burdens of new taxation will cause a large emigration this way. Heretofore the emigration movement from France has been rather sluggish. The aggregate of French emigrants was only 3,586 last year, and 4,118 in 1869. These were fair average years, the numbers rising to 6,885 in 1866.

The French aggregate of emigration for 51 years was 245,812, against 100,372 from Prussia, 2,268,111 from the rest of Germany, and 3,857,793 from Great Britain and Ireland. In the census of 1860 it appeared that of the 27 millions of white population, 4,131,812 were of foreign birth. Of these the Germans numbered 1,301,136, the Irish 1,611,304, the English 477,445, the Scots 108,518, and the other Europeans 307,288. Of British Americans there were 249,970.

One of the most interesting aspects of immigration is the steady flow with which this efflux of the surplus population sets this way in preference to Australia or other parts of this continent. The preference was temporarily checked by the war, but soon set in again with new force. This will be evident from the subjoined table. The figures are derived chiefly from the English official returns, and differ but little from our figures. They give the number of native and foreign emigrants who embarked from Great Britain during the 55 years from 1815 to the end of 1869 at 6,756,697. Of this total 4,276,597 came to this country, while 1,356,476 went to British North America, 971,358 to Australia and New Zealand, and 152,266 to other parts. The subjoined table shows the number and destination of emigrants from the various British ports. A comparison of the figures with those of the previous table will show that a considerable minority of these emigrants were not English subjects:

	Total.	Total emigrants to Australia.	Total emigr'ts to British N. America.	Total emigrants to U. States.	British emigrants to U. S.
1855	176,807	52,309	17,966	103,414	97,199
1856	176,554	44,584	16,378	111,837	97,007
1857	212,875	61,248	21,001	126,905	112,840
1858	113,972	39,295	9,704	59,716	55,829
1859	120,432	31,013	6,689	70,303	61,379
1860	128,469	24,302	9,786	87,500	78,374
1861	91,170	23,738	12,707	49,764	43,472
1862	121,214	41,843	15,529	58,706	47,990
1863	223,758	53,054	18,083	146,813	122,799
1864	206,900	40,942	12,721	147,042	116,951
1865	209,801	37,283	17,211	147,258	112,287
1866	204,882	24,097	13,255	161,000	131,620
1867	195,958	14,466	15,503	159,275	125,520
1868	196,321	12,809	21,062	155,532	107,582
1869	258,027	14,901	33,891	203,001	147,716

It would much increase the value of Mr. Young's tables of immigrants if he could give us their destinations as well as their nativities. Hitherto there has been little attempt to direct the stream of new immigrants into any special section of the country. Of late, however, several schemes have been projected for this purpose. One of them was lately before Congress, and failed because it was supposed to be in the interest of land agents in certain regions, and contemplated the offering of special facilities for certain routes and destinations, and a discrimination against very eligible parts of the country. These allegations were never proved, we believe; and the bill will doubtless be brought up again in Congress next winter. Another movement of a more private character has regard to the French emigrants, of whom a large number it is supposed will desire to leave Alsace and Lorraine and some of the agricultural and vine-growing districts which have suffered by the war. Georgia, Virginia, North Carolina and some other States have been spoken of as the direction which this new organisation wishes to give to the French emigration. The manufacturing population, however, will probably prefer to emigrate, if at all, to the Northern or Middle States, and as for the farmers and viniculturists, if they could only overcome their love of home, there are several of our Pacific States in which thousands of acres of the finest vine lands await industrious, frugal citizens to enter in and possess them. California, for example, has an area almost as great as the whole of the French territory. Its climate, for more than a century, has proved its adaptation to the culture of the vine. Its foothills rival in soil and equal in extent the best wine regions of France. In Europe one good full crop, safely harvested in five years, is said to be a fair average, but very rarely has the crop been a failure in California. "Nowhere," says a practical vine-grower of much experience from Continental Europe, "nowhere in France, the Netherlands, Rhenish Prussia, Spain, Italy, or any other country, can be found vines more noble and generous than in the young State on the Pacific. Nor has she ever been equalled in the amount of her vintage per acre, or the annual certainty of her crop." We have been assured that there is no exaggeration here. But in any case this part of our territory is so worthy to attract the stream of expected emigration from France, that we shall not be surprised if before long the far-sighted, shrewd, successful managers of some of the Pacific Railroads should take steps to promote a movement which would introduce a new stimulus, and give a more intelligent and useful direction to the emigration not only from France, but from other European countries.

DEBT AND FINANCES OF GEORGIA.

In 1860 the debt of Georgia was $2,670,750, and the principal was not materially increased from these figures till the year 1866. In that year it was increased by $134,000 issued to the Atlantic and Gulf Railroad; $1,500,000 issued for repairs and equipments of the Western and Atlantic Railroad owned by the State; $100,000 in substitution of a similar amount of bonds authorized the previous year; $600,000 for the payment of the United States Land tax appropriation to Georgia; and $830,550 for the renewal of past due bonds, and the funding of coupons. These bonds were secured by a mortgage on the Western and Atlantic Railroad. The total debt, therefore, on October 15, 1866, was $5,706,500. On the first of January, 1870, the total debt was $6,014,500, showing a very small increase from the figures of 1866 as given above.

During the year 1870 there was some increase of the direct indebtedness of the State by the issue of 7 per cent gold bonds, and a larger amount of contingent liability, by the endorsement of railroad bonds authorized by special acts of the last Legislature. It is somewhat difficult to obtain full and satisfactory information in regard to the financial affairs of the State on account of the open hostility which prevails between the Treasurer and the Governor. The report of the former for the year ending Dec. 31, 1870, is so manifestly a prejudiced document, as not to be fully relied upon; while on the other hand, it is undoubtedly true that the Legislature has not been governed by a spirit of economy and has authorized a very large amount of railroad endorsements, although upon terms which may not involve the State to any considerable amount. The facts at the present time seem to be mainly as follows: That only $2,000,000 of bonds have been issued since January 1, 1870, and these under the act of September 15, 1870, which authorized the issue of seven per cent gold bonds for the payment of bonds due or to become due and for other purposes, &c.; $500,000 of which have been used for retiring other bonds, thus making the actual increase only $1,500,000, and the total debt at present $7,514,500; this is according to the statement of Messrs. Henry Clews & Co., the bankers in New York who have acted as financial agents of the State and negotiated the new bonds. In addition to this amount of direct indebtedness a special act of the Legislature authorizes the State to issue its own bonds to the extent of $8,000 per mile to the Brunswick and Albany Railroad in exchange for the second mortgage bonds of the road, at the rate of $10,000 per mile, thus leaving the State a margin of twenty per cent on the exchange. The whole amount of this issue, when the road is completed, will be $1,880,000.

RAILROAD ENDORSEMENTS.

During the session of 1870 a large number of special acts were passed, granting the aid of the State, in the shape of endorsements, to particular railroads by name, the several roads and the amount of endorsement granted to each, being stated in the Treasurer's report as follows:

NAME OF RAILROAD.	AMOUNT OF STATE AID.
Albany and Columbus Railroad	$12,000 per mile.
Albany, Mobile and New Orleans Railroad	12,000 do
Americus and Florence Railroad	12,000 do
Americus and Hawkinsville Railroad	12,000 do
Americus and Isabella Railroad	12,000 do
Athens and Clayton Railroad	15,000 do
Atlanta and Blue Ridge Railroad	15,000 do
Atlanta and Lookout Railroad	15,000 per 8 miles.
Augusta and Hartwell Railroad	15,000 per mile.
Brunswick and Albany Railroad	8,000 additional per mile
Camilla and Cuthbert Railroad	12,000 per mile.
Chattahoochee Railroad	12,000 do
Columbus and Atlanta Air-Line Railroad	12,000 do
Dalton and Morganton Railroad	15,000 do
Fort Valley and Hawkinsville Railroad	12,000 do
Georgia Seabord and Northwestern Railroad	12,000 do
Grand Trunk Railroad	12,000 do
Great Southern Railroad	12,000 do
Griffin, Monticello and Madison Railroad	15,000 do
Lookout Mountain Railroad	15,000 do

Digitized by Google

NAME OF RAILROAD.	AMOUNT OF STATE AID.
Macon and Brunswick Railroad	3,000 additional per mile
Marietta, Canton and Elijay Railway	15,000 per mile.
McDonough Western Railroad	12,000 do
Memphis Branch Railroad	15,000 do
Newman and Americus Railroad	12,000 do
North and South Railroad	12,000 do
North Georgia and North Carolina Railroad	12,000 do
Ocmulgee and North Georgia Railroad	15,000 do
Polk State Quarry Railroad	15,000 do
Savannah, Griffin and North Alabama Railroad	12,000 do
South Georgia and Florida Railroad	12,000 do
St. Mary's and Western Railroad	15,000 do

The following endorsements had been previously authorized:

Brunswick and Albany Railroad	$15,000 per mile.
Macon and Augusta Railroad	10,000 do
Georgia Air-Line Railroad	12,000 do
Macon and Brunswick Railroad	12,000 do

If the full amount of endorsements here authorized were made, and upon the the full length of all roads named, the Treasurer states the whole amount would be about $30,000,000. The fact is, however, that the State aid was granted upon such terms that only a limited number of the companies have accepted the indorsements; the financial agents state that many roads to which State aid is granted have voluntarily surrendered the privilege since, while the State grants aid only to the extent, in some instances, of $10,000 to $12,000 per mile, thus restricting the first mortgage issue, and companies find it to their advantage to increase the amount of their first mortgage to $20,000 per mile, and surrender the State guarantee to enable them to do so.

In a telegram to Messrs. Clews & Co., dated March 16, the Governor states that the total railroad endorsements to date amount to $5,923,000; of which $400,000 were made by Governor Jenkins; $2,723,000 by Governor Bullock, prior to October 25, 1870, and certified by the Secretary of the Executive Department; $1,500,000 by the Treasurer, and $1,300,000 by Governor Bullock since October 25, 1870, and certified by the Secretary of State. The Governor states:

"All these roads pay their interest promptly except the Alabama and Chattanooga Road—the January interest upon which was paid by the State. No other roads except those in rapid process of construction and nearly completed have made or are likely to make application for State endorsement. No company is authorized under our laws to have State endorsement for more than one-half the actual cost of the road, and the endorsement cannot be made until the road is completed in ten (10) or twenty (20) mile sections."

The following law passed in 1870, and approved September 30, contains some terms and limitations in regard to railroad endorsements:

SECTION 1. The General Assembly enacts as follows: That from and after the passage of this act, that neither his Excellency the Governor, nor any other officer of this State, shall indorse the guaranty of the State upon the bonds of any railroad to which this or any other Legislature of this State has loaned the credit of the State, until an amount equal to the amount of bonds for which the guaranty or indorsement of the State is applied for, has in good faith been first invested, and actually paid in and expended by the owners or stockholders of the road, upon the bonds which the indorsement or guaranty is asked; and the Governor shall in every case require satisfactory evidence that such investment has been made.

SECTION 2. Be it further enacted, That in the event any interest that has accrued upon any bonds of any railroad company, indorsed by the State in pursuance of any law of this State, shall not be paid when said interest becomes due, it shall be the duty of the Governor, upon information of such default by any person to whom such interest may be due, to provide in such manner as he may deem most to the interest of the State for the payment of, and to pay said interest; and it shall be his duty to seize and take possession of all the property of said railroad company and apply the earnings of the road to the extinguishment of said unpaid interest, and he may at his discretion sell the road so in default, and its equipments and other property belonging to said company, or any portion thereof, at public sale, in such manner and at such time as in his judgment may best subserve the interest of the State.

SECTION 3. Be it further enacted, That all laws and parts of laws militating against this act are hereby repealed.

WESTERN AND ATLANTIC RAILROAD.

The Western and Atlantic Railroad, the property of the State, has been leased to a highly responsible company, with abundant security, for a term of twenty years, at the rate of $25,000 per month or $300,000 per year, the road to be returned to the State at the end of that period in as good condition as when leased.

REVENUE AND TAXATION.

The assessed valuation of all property in the State, exclusive of corporations, is stated by the Treasurer at $200,000,000, which would produce on a tax of 4 mills $800,000, and this with the amount received from poll tax, corporation tax, &c., say $75,000, and $300,000 income from the Western and Atlantic Railroad, would make a total revenue of $1,175,000, out of which $500,000 ought to be sufficient to pay the ordinary State Government expenses, leaving $675,000 balance to meet the interest on the debt, amounting now to about $526,000 annually, exclusive of any interest on endorsed railroad bonds. The receipts and disbursements of the year ending Dec. 31, 1870, are given by the Treasurer as follows: Receipts, $1,635,767 57; Disbursements, $1,470,021 02; Cash on hand, Jan. 1, 1871, to balance, $165,744 55.

CONCLUSION.

The State of Georgia was known previous to the war as the Empire State of the South, and exceeded all the others in the amount of her manufacturing interest, railroads and the general development of her internal resources. The property of the State is unquestionably abundant to furnish means for meeting all her positive liabilities by a reasonably moderate tax, and even should default be made by railroads whose bonds have been endorsed, the lien which the State holds upon those roads should be adequate when foreclosed to reimburse the State for all advances made by her.

DEBT AND FINANCES OF VIRGINIA.

The debt of Virginia was chiefly contracted for internal improvements, and a limited portion of it also for banks. At the close of the war the debt amounted to about $41,000,000, including interest accrued to that date, against which liabilities, the State held assets of the nominal value of $22,700,000, a considerable part of which amount was in stocks and bonds having practically no value. Previous to the war the financial standing of Virginia was very high and her credit excellent, as her debt, though large, had been well managed, and every liability for principal and interest had been faithfully and promptly met.

Since the war the State has also been much more fortunate than most of the other Southern States, as her debt has not been increased except by the accumulation of unpaid interest, and a provision of the State Constitution now prohibits the increase of debt except by a law to be submitted to a vote of the people. On the first of January, 1871, the debt, according to the Auditor's report, amounted to $47,390,839. The assets of the State at the same time, either available, or which will in all probability be available in a few years for the reduction of State debt, amounted to about $13,000,000—assuming that the value of these assets had not materially changed since March, 1870, when an official statement of them was made—thus making the actual liabilities of the State on the first of January, 1871, about $34,000,000.

DEBT JANUARY 1, 1871.

The total amount of the debt, including interest, on the first of January 1871, was $47,390,839 96. In this, the stocks and bonds of the State held by the Board of the Literary Fund, amounting to $1,543,669 95, are not included, nor certain State bonds surrendered by railroad companies in exchange for a like amount of their stock held by the State, amounting altogether to about $840,000. The statement is as follows:

Debts issued under acts prior to the 17th of April, 1861	$31,938,144 59
Interest due and unpaid thereon	5,312,185 43
Debt issued and that may be issued under the act of March the 2d, 1866, authorizing the funding of interest	7,692,310 38
Interest due and unpaid thereon	2,018,208 59
Debt on old James River Company stock	95,000 00
Interest due and unpaid thereon	19,800 00
Debt on James River and Kanawha Company bonds	201,130 97
Interest due and unpaid thereon	114,060 97
Amount of principal and interest on the 1st of January, 1871	$47,390,839 96

ASSETS.

The Governor, in his message of March 8, 1870, after reviewing in detail the various assets held by the State, amounting nominally to $33,963,276, remarks as follows:

"From this brief review of the assets and securities held by the State, it will be observed that $2,612,776 37 are considered of equal or greater value than State bonds at present quotations, consisting of the following items, viz:

Bonds Alexandria, Loudoun and Hampshire Railroad Company	$50,862 40
Bonds Chesapeake and Ohio Railroad Company, with interest, and including use of Blue Ridge Railroad	460,147 94
Bonds of Norfolk and Petersbur Railroad Co., with interest	141,271 82
Bonds Orange, Alexandria and Manassas Railroad Company, with interest	276,207 89
Bonds Richmond and Danville Railroad Company, with interest	658,987 02
Stock Richmond, Fredericksburg and Potomac Railroad Company	275,200 00
Amount to be realized from claim vs. Chesapeake and Ohio Canal Company, less expenses, and claim vs. Selden, Withers & Co.	750,000 00
	$2,612,776 37

"It will also be observed that of the assets, $10,048,267 91, it is hoped in a few years will be equal in value to State bonds, and will be available for the redemption of the State debt, as follows:

Stock Chesapeake and Ohio Railroad Company	$2,013,987 50
Stock Norfolk and Petersburg Railroad Company	1,199,970 00
Stock Orange, Alexandria and Manassas Railroad Company	874,000 00
Stock Richmond and Danville Railroad Company	1,188,598 50
Stock Richmond and Petersburg Railroad Company	385,600 00
Stock South Side Railroad Company	803,500 00
Stock Virginia and Tennessee Railroad Company	2,300,000 00
Stock Marietta and Cincinnati Railroad Company	202,611 91
Bonds South Side Railroad Company, including interest	1,080,000 00
	$10,048,267 91

Deducting the amount of solvent assets which are immediately available for the redemption of the State debt, viz: $2,612,776 37, together with those which it is hoped and believed will become available for that purpose in a few years, viz: $10,048,267 91, from the gross amount of assets first above mentioned, leaves a balance of $21,302,233 62, which is not now and probably never will become of much value to the State. But, in addition to this large amount, the State has lost, abandoned, or surrendered and released $9,739,092 88, which, added to the amount above stated as comparatively value less, makes the enormous sum of $31,041,326 50, or nearly the amount of the old State debt."

Subsequent events have been such as to confirm the views here expressed, and it seems probable from the action recently taken by several prominent railroad companies for the purchase of their stock held by the State and the payment for the same in Virginia bonds at par, that the amount ultimately realized from the assets above named will fully equal the sum estimated by the Governor, viz.: $12,661,043.

SETTLEMENT WITH WEST VIRGINIA.

The State of West Virginia has never yet assumed any portion of the debt of the old State, although her constitution provides that an adjustment of the same should be made. We understand that Commissioners have now been appointed by both States and it is to be hoped that an amicable settlement will be made of the question in controversy between them. Should the Commissioners ultimately fail to agree, resort may be had to the Supreme Court of the United States.

FUNDING THE DEBT AND PAYMENT OF INTEREST.

Governor Walker has repeatedly urged upon the Legislature the necessity of funding the whole debt and commencing the payment of interest at the earliest day practicable. In accordance with his suggestions a funding bill has been introduced and is now pending in the Virginia Legislature which will probably be passed at the present session. The general provisions of this bill are: 1. That the holders of all bonds, stocks, &c., of the State, except the five per cent. dollar bonds and what are known as sterling bonds, may fund two-thirds of the amount of the same, together with two-thirds of the interest due or to become due to July 1, 1871, in six per cent. coupon, or registered bonds payable thirty-four years after date, or at the pleasure of the State after ten

Digitized by Google

years, the interest to be paid semi-annually, the first coupon January 1, 1872. The five per cent. dollar bonds may be funded in a like manner but to bear only five per cent. interest. 2. That for the remaining one-third of the debt a certificate of indebtedness shall be issued, bearing interest, and when a settlement of the debt shall be made with West Virginia, all these certificates not assumed by the latter, shall be exchanged for bonds of Virginia of the same tenor as those above mentioned, and the interest due to that date shall be paid in cash. It is thought by those best informed on the subject that this bill as here given, or with some modifications, will become a law at the present session.

REVENUE VALUATION AND TAXATION.

The Auditor of the State has prepared a statement showing the value of real and personal property subject to taxation in the State, the estimated amount that will be raised by taxation from licenses and all other sources, upon the basis of the Tax Bill of 1870, together with an estimate of the amount that will be required for the support of the Government for the next fiscal year, and the amount that will be required to pay the interest on the public debt for one year, from which we make the following extracts:

Value of real estate, founded on the recent assessment, with estimates for the counties of Goochland, Madison, Northumberland and Roanoke, from which there have been no returns.	$276,023,366 62
Value of personal property	85,387,600 00
Basis of taxation for 1871.	$361,410,966 62
Looking to prompt payments by the collectors of the taxes of 1871, there will be received into the treasury within the fiscal year ending September 30, 1871, from all sources	$1,726,487 00
Amount remaining in the treasury on October 1, 1870	130,661 33
Total	$1,857,148 33
Estimated expenses of the Government for fiscal year ending September 30, 1871	1,232,000 00
Total	$625,148 33
Estimated receipts from taxes on lands and property for 1871, assumed at 50c. on the $100	852,937 00
Estimated balance in the treasury for State purposes on October 1, 1871, subject to such additional appropriations, as have been or may be made by the Legislature at its present session	$1,478,135 33
After adding to and deducting from this amount, the amounts that will be probably received and disbursed during the first quarter of the fiscal year, commencing on the first of October, 1871, the approximate estimate of the balance which will be in the treasury on the first day of January, 1872, subject to the warrant of the Auditor of Public Accounts, is	1,548,881 33

If resumption of interest payment should be commenced January 1, 1872, for the six months preceding, the coupons then due would amount to about $1,400,000.

RECEIPTS AND DISBURSEMENTS FOR LAST YEAR.

The receipts and disbursements in the fiscal year ending September 30, 1870, were: Receipts, $1,636,943; Disbursements, $1,504,931. These receipts were still under the old valuation and laws, and the effect of the new system of taxation put in force at the last session can not here be seen. The new assessment of real property has only recently been completed.

CONCLUSION.

From this review of the State finances, it would appear that there is no Southern State in which the prospect of an ultimate settlement of all liabilities, both principal and interest, is better than in Virginia.

An illustrious exception, compared with other States, is seen here, in regard to the non-increase of debt since he war, a feature which will inspire great confidence in her creditors that the spirit of the legislature and people is one of integrity, and that they intend to pay as soon as a better organization of their Government will enable them to collect the required revenue.

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS.

The following are the changes in the Redeeming Agents of National Banks since the 16th of March, 1871. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency.

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
Indiana—Indianapolis	The Merchants' National Bank	The National Park Bank of New York, approved in addition to the Merchants' National Bank of Cincinnati, Ohio.
Kentucky—Lexington	The Fayette Nat'l Bank	The First National Bank of Cincinnati, Ohio, approved in addition to the Importers' and Traders' National Bank of New York.
Connecticut—Rockville	The First National Bank	The Ninth National Bank of the City of New York, approved in place of the Nation'l Park Bank of New York.
Illinois—Vandalia	The Farmers' and Merchants' Nat'l Bank	The Ocean National Bank of New York and the Manufacturers' Nat'l Bank of Chicago, approved.

New National Banks.

The following are the only national banks organized during the week:

The First National Bank of Paris, Mo. David H. Moss, President; John S. Conyers, Cashier. Authorized capital, $100,000; paid in capital, $50,000. Authorized to commence business March 20, 1871.

The National Bank of Chester, S. C. John J. McLure, President; J. L. Harris, Cashier. Authorized capital, $50,000; paid in capital, $50,000. Authorized to commence business March 22, 1871.

NOTE.—By Act of Congress approved February 18, 1871, the Farmers' National Bank of Fort Edward, N. Y., was authorized to change its location to North Granville, N. Y., and its title to The North Granville National Bank, N. Y., and a certificate that the changes contemplated by the law have been effected was issued from this office under date of the 21st inst.

[From our own correspondent.]

LONDON, Saturday, March 11.

There has been an interesting debate in the House of Commons that met on the question of the National Debt. It was brought on by Mr. Candlish, the member for Sunderland, by calling attention to the expediency of making early provision in the estimates for reducing the debt annually not less than £10,000,000. During the last 40 years he argued, we have literally done nothing in the way of paying off the debt. On the accession of William the Fourth in 1830, it amounted to £784,000,000; on the accession of the present sovereign, to £787,000,000, and it was now £801,000,000. Between 1832 and 1868, the debt had apparently been increased by £27,000,000, but if the discharge of certain terminable annuities were taken into account, the debt would be about the same as it was 36 years ago. It was further contended that we were able to carry out what our fathers had accomplished. Between 1815 and 1820, our fathers paid for interest £31,500,000 and as principal £5,100,000—making a total of £36,600,000. Between 1820 and 1830 the average annual payment was £29,440,000 as interest and £4,300,000 as principal—making a total of £33,740,000 per annum. Yet in 1870 we only paid for interest and on account of terminable annuities £27,000,000 and as principal £4,000,000. Now, while we had been thus diminishing our payments on account of the National Debt, the population of the country had been increasing. Our population was 18,000,000 in 1811, 21,000,000 in 1821, 24,000,000 in 1831, 27,000,000 in 1841, 29,000,000 in 1861, and last year it was estimated at 30,830,000. During all this period the wealth of the nation had likewise gone on increasing. According to estimates made by Professor Levi the wealth of the country in 1811 was £2,100,000,000, or £116 per head of the population; in 1841, £4,000,000,000, or £150 per head; in 1861, £6,000,000,000, or £206 per head; and in 1870, £7,000,000,000, or £230 per head. With increase of capital we had become richer relatively to our debt and it had become less relatively to our means. In 1801 our debt was 26 per cent. of our capital; in 1841 it was 19 per cent.; in 1861, 13½ per cent.; and now, our capital being 7,000 millions and our debt 800 millions, it was only 11 per cent. of our capital. Relatively to the population our debt in 1821 was £39 10s. per head; in 1831, £32 10s.; in 1870, £25 10s. As our property had increased our annual income had increased from £14 7s. per head in 1801 to £23 per head in 1870; and now our total income in one year was very nearly equal to our National Debt. Of course, as we had got richer we had been living better; and this was shown by the increased consumption per head of sugar, tea, tobacco and wine, which might be regarded as luxuries rather than necessaries. Simultaneously, we had been diminishing our contributions to the National debt. For interest alone we paid per head, in 1821, 20s.; in 1831, 23s.; and in 1870, 17s. 6d. While the amount of interest paid had been diminishing, and while our means had been increasing, we had been reducing taxation, which was from 1811 to 1821, £3 14s. per head, and in 1870 £2 5s. per head, being now, he believed, under £2 per head. The proportions of annual income which we paid for interest had been, in 1801, 8¾ per cent; in 1841, 6¼ per cent, and in 1870, 3.85 per cent. Five per cent of our income, or 1¼ per cent less than we paid for interest alone in 1841, would realize £35,000,000 a year, and that would be sufficient to pay off the debt in forty years.

Digitized by Google

This proposal was seconded by Sir John Lubbock, who observed that most European nations had immensely increased their debts during the last fifty years. Thus, North Germany in 1815 owed £100,000,000, in 1870, £150,000,000; France in 1815 owed £70,000,000, in 1870, £518,000,000; Austria in 1815 owed £99,000,000, in 1870, £300,000,000; Russia in 1815 owed £80,000,000, in 1870, £300,000,000; Spain in 1815 owed £100,000,000, in 1870, 225,000,000; Italy in 1815 owed £50,000,000, in 1870, £257,000,000, and the United States in 1815 owed £25,000,000, and in 1870 £477,000,000; making a total of £524,000,000 in 1815 and £2,227,000,000 in 1870; and if they included other countries the grand total, according to Mr. Dudley Baxter, was no less than £3,845,000,000 in 1870, against £1,530,000,000 in 1815, showing an increase of no less than £2,300,000,000, of which the great part had been incurred during the last twenty years. He was in favor of insolated taxation, and argued that a wealthy country like this ought not to be satisfied with accidental surpluses for the reduction of its debt. Several other members addressed the House, when the Chancellor of the Exchequer rose and said if he ventured to criticise the speech of the honorable member for Sunderland, he should say that he felt more certain of the general conclusion at which he arrived than he did of many of the premisses by which he supported it, for he did not place the most implicit confidence in all those estimates by which he calculated to a million the income and property of the country. He disputed some of the figures and estimates which had been furnished to the House. He ventured to point out that the time of the peace (1815) our debt, instead of being £800,000,000 was nearly £900,000,000. Since that time we have added £80,000,000 to it—£20,000,000 for the emancipation of the slaves, £30,000,000 for the Crimean war, £10,000,000 for the Irish loan, and £19,000,000 for the Abyssinian war. The funded debt is now £738,000,000, and the unfunded £4,000,000. The terminable annuities, estimated at 11 years' purchase, amount to £50,000,000, making a total of £793,000,000. It follows, therefore, that since the close of the war, and adding the £80,000,000 referred to, the debt has been reduced from £980,000,000 to £793,000,000, or to the extent of nearly £200,000,000. It is not fair, therefore, to accuse those who have gone before us of having done nothing for the reduction of the debt. In the course of this financial year also we have paid off nearly £6,000,000. Mr. Lowe, however, agreed with Mr. Candlish and Sir John Lubbock on the expediency of reducing the debt, but when the hon. member for Sunderland stated that it was the duty of the Government to place £10,000,000 a year on the estimates for that purpose, he stopped short of the difficult task of demonstrating how that amount was to be raised. Nor was he much moved by the example of America. It was certainly not the duty of the Finance Minister of this country to indulge in criticisms on the finance of our neighbors, but he ventured to submit to those who are struck with the boldness and vigor of American finances that it may be a question whether it would not have been wiser for the Americans first to restore the metallic basis, and then endeavor to lower the interest on the debt. Mr. Lowe concluded by observing that—

My hon. friend said, also, we lost the opportunity—if I understood him—of showing that energy that would be displayed by having a Parliamentary fight over the question every session. That, sir, is quite true; but I am quite sure that he is too good a political economist not to know that energy is not a good thing in itself, but only good when you cannot get a good thing without it. So, my hon. friend the member for Sunderland also thought we might lose the moral effect of a great effort and noble spectacle in paying off all our debts. No doubt it is a very fine thing to give a great moral spectacle. When people get into distress and misery they have the opportunity of showing a great moral spectacle, and the results no doubt are great. But, for my own part, I prefer giving no such spectacle, simply because the calamities which give the opportunity of developing those high qualities do not exist. I shall continue to think we do not unwisely by paying off our debt in a moderate way by terminable annuities. The truth is, that of all economical and financial authorities the worst are those who, ignoring the existence of any alternative, strive to make out a splendid case for themselves; but it appears to me that the right management of financial affairs consists not in this adoption of a certain particular theory or view, but of that sort of tolerant moderation that tries to accommodate them all, carrying none to any excess or violent extremes. I am, therefore, in moderation, for the reduction of taxes; I am, in moderation, for the reduction of debt. The problem of the reduction of debt is really this—how to get into the hands of the Government a large quantity of stock which they can cancel and pay off. That may be done in various ways, and if my hon. friend the member for Sunderland content with the discussion he has raised, will give me his confidence for about six weeks longer, I will undertake to show him, when the proper time arrives, that I have had the opportunity of making some slight impression on the debt of the country.

The prospectus of the United States loan has been advertised this week. Messrs. Baring Brothers, Clews, Habicht & Co., Jay Cooke, McCulloch & Co., J. S. Morgan & Co., Morton, Rose & Co., and Messrs. Rothschild, are authorized to receive subscriptions. The introduction of this loan is considered to be quite premature. The quotation is 1⅛ to 1¼ discount.

Messrs. Rothschild & Son have introduced this week the new Russian loan of £12,000,000. The price of issue is 81¼, and the bonds will bear interest at the rate of 5 per cent per annum. There has been a great deal of excitement in the Stock Exchange in connection with this loan, and the first operation on the appearance of it was a wholesale destruction of the prospectuses. Any attempt to deal in the scrip proved fruitless, and so greatly was the loan discouraged that the impression became general that that it would be withdrawn. The contractors, however, have not adopted that course, and it is now probable that the subscription list will remain open until the date fixed in the prospectus. The cank of all this indigestion is traceable, as a matter of course, to the act of Russia in withdrawing from an important clause in the Treaty of Paris, without submitting the grievance under which she alleged she suffered to the co-signataries. The loan, however, is offered at the principal German markets, and will, in all probability, be fully subscribed.

The money market has been quieter, and the rates of discount are somewhat easier. Both for short and long, dated bills, the quotations are rather lower. The following are the present rates of money:

	1870. Per cent.	1871. Per cent.		1870. Per cent.	1871. Per cent.
Bank minimum	3 @...	3 @ ..	4 months' ba'k bills	3 @	@3½
Open-market rates:			6 months' ba'k bills	3½@3½	⅛@¼
30 and 60 days' bills	2½@3	2½@...	4 and 6 trade bills..	3½@4½	@4½
3 months bills	3 @3½	3 @...			

The rates of interest allowed on the joint stock banks and discount houses for depesits are as under:

	1870.	1871.
Joint stock banks	2	2
Discount houses at call	2	2
Discount houses with 7 days' notice	2½	1½
Discount houses with 14 days' notice	2½	2½

Annexed is a return showing the present position of the Bank of England, the bank rate of discount, the price of consols, the average quotation for English wheat, the price of middling upland cotton, and of No. 40 mule yarn, fair second quality, compared with the four previous years:

	1867. £	1868. £	1869. £	1870. £	1871. £
Circulation, including bank post bills	22,551,798	23,671,613	23,636,569	22,710,678	23,862,149

The cotton trade is dull, and prices have further declined. The market for cotton yarn and cotton goods is also heavy.

The trade for wheat and other cereals is very quiet, but cattle-feeding stuffs are firm in value.

The following figures show the imports and exports of cereal produce into and from the United Kingdom during last week,

Digitized by Google

and since the commencement of the season, compared with the corresponding periods in 1869–'70:

FOR THE WEEK ENDING MARCH 4.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show an increase in dry goods, and a considerable decrease in general merchandise. The total imports amount to 7,383,892 this week, against $8,209,446 last week, and $9,845,436 the previous week. The exports are $5,123,187 this week, against $6,264,325 last week, and $4,469,192 the previous week. The exports of cotton the past week were 25,931 bales, against 15,659 bales last week. The following are the imports at New York for week ending (for dry goods) March 17, and for the week ending (for general merchandise) March 18.

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

St. Paul and Sioux City.—The business during 1870, was:

Gross earnings	$367,842 67
Gross expenses	197,721 33
Net earnings	$170,221 34
Cost of repairs	98,805 56

The lands deeded to this Company for constructed road 697,704 87-100 acres. A large part is remote from settlements, and contiguous to United States land. In 1870 the Company offered to sell at $2 75 per acre. There have been sold to date 97,494.99 acres, at an average of $5 67 per acre.

Received for sales	$552,926 50
Paid down	173,017 91
Credit from 1 to 7 years at 7 per cent	379,907 81
Received on installments since sales	73,784 82
Expenses of Land Department	63,821 40

All net receipts from lands have been expended in construction.

Northern Pacific.—The Northern Pacific Railroad bridge across the Mississippi River at Brainerd, Minn., is finished and the first passenger train, containing officers of the road, passed over the structure. This completes the Northern Pacific 113 miles west from Lake Superior. The grade is finished nearly to Red River, 150 miles further, and at the present rate of progress, trains will run to Red River before September next.

Sale of the Morris Canal.—TRENTON, March 21.—The Morris Canal Company has leased its works and franchises to the Lehigh Valley Railroad Company for a term of 999 years, at a rate of 10 per cent. to the preferred and 4 to the common stockholders.

A committee was appointed to complete the negotiations, and prepare a lease to be submitted to the stockholders at their meeting on April 2.

—A special meeting of the stockholders of the New York and Harlem Railroad Company, for the purpose of acting upon the proposed increase of the capital stock, by the amount of $2,000,000, will be held at their office in this city, on April 11th, next.

Union Pacific Land Bonds.—The action of Congress in revoking the decision of the Secretary of the Treasury in reference to withholding one-half of the Government bills for transportation, due the Pacific Railroads, has naturally placed the companies in a much better financial position. The Union Pacific Securities are being more critically examined and their real advantages for investment at present rates, more fully inquired into. That the attitude of the Secretary of the Treasury should have had a depressing effect, was inevitable, but now that Congress has revoked that judgment, there is no further cause of apprehension, on this scale. The Union Pacific Land Grant Bonds are among the most attractive securities now offered, on account of the great interest which attaches to the road as a National enterprise, and the security furnished by the lands of the Company upon which the bonds are issued. These bonds are now being received by the Company at par and interest, in exchange for their lands and many actual settlers are adoping this mode of negotiation. This proffered exchange evinces the Company's confidence in their rapid appreciation, and they claim that they should and will soon rule at 90 in the market, from the fact that they pay an interest of 8 per cent. per annum on that figure, while the stability and safety of the securities are deemed unquestioned. The cost of mail and other transportation to the Government, prior to the opening of this road to the Pacific coast, was three-quarters of a million dollars per month. This enormous expenditure has been diminished by the Pacific roads so that not less than fifty thousand dollars per week is now being saved to the tax paying people of the nation. Such facts as these, furnished from the records at Washington, evince both the value and necessity of their successful progress and development.

BANKING AND FINANCIAL.

BANKING HOUSE OF HENRY CLEWS & Co., 32 WALL ST., N. Y.

Our business is the same as an incorporated bank.

Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed on all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make telegraphic transfers of money to any desired point, and transact every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upward on.

The Imperial Bank, and Messrs. Clews, Habicht & Co., London.

The Provincial Bank of Ireland, The National Bank of Scotland, and all their branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Government and other investment securities; also Gold and Exchange.

Advances made on approved collaterals and against Merchandise consigned to our care.

We make collections of Notes, Drafts, Coupons and Dividends with promptness on all points, and are fully prepared to offer banking facilities upon either currency or gold basis.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH, BANKERS,
No. 5 NASSAU STREET, NEW YORK, March 21, 1871.

THE FIRST MORTGAGE SIX PER CENT. GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY—of which about $6,000,000 have already been marketed—are secured upon an East and West Trunk Line of Road 427 miles in length, the greater part of which (227 miles) is in earning operation, and the remainder rapidly building. When completed it will establish a short, economical, and favorite route between tide-water navigation and the chief railroad and river cities of the West.

Besides the immense volume of through traffic between the East and West which this road can command by its unapproachable advantages in distance, grades, fuel, and unfailing navigable connections, this road must convey enormous quantities of the superior splint, cannal, and bituminous coals of the Kanawha Valley and the iron ores of Virginia and West Virginia, which are in demand at both ends of the line.

The value of the property, the certainty of a large and profitable business, the established reputation and credit of the Company, and its able and honorable management, give to these securities an assurance of superior value and safety.

They may be had in *Coupon* or *Registered* form, and in denominations of

$1,000, $500 and $100.

We have prepared pamphlets, showing the agricultural, mineral and manufacturing advantages of the adjacent territory, and the traffic, facilities, and financial prospects of the Road, which will be furnished on application.

FISK & HATCH, Financial Agents.

THE NEW LOAN.

ACTS OF CONGRESS AUTHORIZING THE REFUNDING OF THE NATIONAL DEBT.

An Act to Authorize the Refunding of the National Debt.

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That the Secretary of the Treasury is hereby authorized to issue, in a sum or sums not exceeding in the aggregate two hundred million dollars, coupon or registered bonds of the United States, in such form as he may prescribe, and of denominations of fifty dollars, or some multiple of that sum, redeemable in coin of the present standard value, at the pleasure of the United States, after ten years from the date of their issue, and bearing interest, payable semi-annually in such coin, at the rate of five per centum per annum; also a sum or sums not exceeding in the aggregate three hundred million dollars of like bonds, the same in all respects, but payable at the pleasure of the United States, after fifteen years from the date of their issue, and bearing interest at the rate of four and a half per cent per annum; also a sum or sums not exceeding in the aggregate one thousand million dollars of like bonds, the same in all respects, but payable at the pleasure of the United States, after thirty years from the date of their issue, and bearing interest at the rate of four per cent per annum; all of which said several classes of bonds and the interest thereon shall be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State municipal, or local authority; and the said bonds shall have set forth and expressed upon their face the above specified conditions, and shall, with their coupons, be made payable at the Treasury of the United States. But nothing in this act, or in any other law now in force, shall be construed to authorize any increase whatever of the bonded debt of the United States.

SEC. 2. *And be it further enacted*, That the Secretary of the Treasury is hereby authorized to sell and dispose of any of the bonds issued under this act, at not less than their par value for coin, and to apply the proceeds thereof to the redemption of any of the bonds of the United States outstanding, and known as five-twenty bonds, at their par value, or he may exchange the same for such five-twenty bonds, par for par; but the bonds hereby authorized shall be used for no other purpose whatsoever. And a sum not exceeding one-half of one per cent of the bonds herein authorized is hereby appropriated to pay the expense of preparing, issuing, advertising, and disposing of the same.

SEC. 3. *And be it further enacted*, That the payment of any of the bonds hereby authorized after the expiration of the said several terms of ten, fifteen, and thirty years, shall be made in amounts to be determined from time to time by the Secretary of the Treasury, at his discretion, the bonds so to be paid to be distinguished and described by the dates and numbers, beginning for each successive payment with the bonds of each class last dated and numbered, of the time of which intended payment or redemption the Secretary of the Treasury shall give public notice, and the interest on the particular bonds so selected at any time to be paid shall cease at the expiration of three months from the date of such notice.

SEC. 4. *And be it further enacted*, That the Secretary of the Treasury is hereby authorized, with any coin in the Treasury of the United States which he may lawfully apply to such purpose, or which may be derived from the sale of any of the bonds, the issue of which is provided for in this act, to pay at par and cancel any of the six per cent bonds of the United States of the kind known as five-twenty bonds, which have become or shall hereafter become redeemable by the terms of their issue. But the particular bonds so to be paid and cancel[l]ed shall in all cases be indicated and specified by class, date, and number in the orde[r] of their numbers and issue, beginning with the first numbered and issued, in public notice to be given by the Secretary of the Treasury, and in three months after the date of such public notice the interest on the bonds so selected and advertised to be paid shall cease.

SEC. 5. *And be it further enacted*, That the Secretary of the Treasury is hereby authorized, at any time within two years from the passage of this act, to receive gold coin of the United States on deposit for not less than thirty days, in sums of not less than one hundred dollars, with the Treasurer or any Assistant Treasurer of the United States authorized by the Secretary of the Treasury to receive the same, who shall issue therefor certificates of deposit, made in such form as the Secretary of the Treasury shall prescribe, and said certificates of deposit shall bear interest at a rate not exceeding two and a half per cent per annum; and any amount of gold coin so deposited may be withdrawn from deposit at any time after thirty days from the date of deposit, and after ten days' notice, and on the return of said certificates: *Provided*, That the interest on all such deposits shall cease and determine at the pleasure of the Secretary of the Treasury. And not less than twenty-five per cent of the coin deposited for or represented by said certificates of deposits shall be retained in the Treasury, for the payment of said certificates; and the excess beyond twenty-five per cent may be applied, at the discretion of the Secretary of the Treasury, to the payment or redemption of such outstanding bonds of the United States, heretofore issued and known as the five-twenty

Digitized by Google

bonds, as he may designate under the provisions of the fourth section of this act; and any certificates of deposit issued as aforesaid, may be received at par with the interest accrued thereon, in payment for any bonds authorized to be issued by this act.

SEC. 6. *And be it further enacted*, That the United States bonds purchased and now held in the Treasury in accordance with the provisions relating to the sinking fund, of section five of the act entitled "An act to authorize the issue of United States notes, and for the redemption or funding thereof, and for funding the floating debt of the United States," approved February twenty-fifth, eighteen hundred and sixty-two, and all other United States bonds which have been purchased by the Secretary of the Treasury with surplus funds in the Treasury, and now held in the Treasury of the United States, sh ll be cancel[l]ed and destroyed, a detailed record of such bonds so cancelled and destroyed, to be first made in the books of the Treasury Department. Any bonds hereafter applied to said sinking fund, and all other United States bonds redeemed or paid hereafter by the United States, shall also in like manner be record d, cancel[l]ed, and destroyed, and the amount of the bonds of each class that have been cancel[l]ed and destroyed, shall be deducted respectively from the amount of each class of the outstanding debt of the United States. In addition to other amounts that may be applied to the redemption or payment of the public debt, an amount equal to the interest on all bonds belonging to the aforesaid sinking fund shall be applied, as the Secretary of the Treasury shall from time to time direct, to the payment of the public debt as provided for in section five of the act aforesaid. And the amo nt so to be applied is hereby appropriated annually for that purpose, out of the receipts for duties on imported goods.

Approved July 14, 1870.

An Act to amend an act entitled "An act to Authorize the Refunding of the National Debt."

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the amount of bonds authorized by the act approved July fourteen, eighteen hundred and seventy, entitled "An act to authorize the refunding of the national debt," to be issued bearing five per centum interest per annum, be, and the same is, increased to five hundred millions of dollars, and the interest of any portion of the bonds issued under said act, or this act, may, at the discretion of the Secretary of the Treasury, be made payable quarter-yearly: *Provided, however*, That this act shall not be construed to authorize any increase of the total amount of bonds provided for by the act to which this act is an amendment.

Approved January 20, 1871.

PUBLIC CREDIT ACT OF 1869.

Be it enacted, &c., That in order to remove any doubt as to the purpose of the Government to discharge all just obligations to the public creditors, and to settle conflicting questions and interpretations of the law by virtue of which such obligations have been contracted, it is hereby provided and declared that the faith of the United St tes is solemnly pledged to the payment in coin or its equivalent of all the obligations of the United States not bearing interest, known as United States notes, and of all the interest-bearing obligations, except in cases where the law authorizing the issue of any such obligations has expressly provided that the same may be paid in lawful money or in other currency than gold and silver; but none of the said interest-bearing obligations not already due shall be redeemed or paid before maturity, unless at such time as United States notes shall be convertible into coin at the option of the holder, or unless at such time as bonds of the United States bearing a lower rate of interest than the bonds to be redeemed can be sold at par in coin; and the United States also solemnly pledges its faith to make provision at the earliest practical period for the redemption of the United States notes in coin.

JAMES G. BLAINE,
Speaker of the House of Representatives.
SCHUYLER COLFAX,
Vice-President of the United States and President of the Senate.

Approved March 18, 1869. U. S. GRANT.

UNION PACIFIC LAND-GRANT BONDS.

OFFICE OF MORTON, BLISS & CO., BANKERS,
NEW YORK, March 20, 1871.

The undersigned offer for sale the balance of the Land-Grant Bonds of the Union Pacific Railroad Company. The road has been in operation about twenty months. It is completed in all respects, and its earnings have averaged $8,000,000 per annum. These bonds bear 7 per cent interest, coupons payable April and October.

They are receivable at par in payment for the Company's lands.

The following summary of the financial condition of the Company is from the address of Colonel Thomas A. Scott to the stockholders, upon his accepting the presidency, at the annual meeting in Boston, March 8:

"Land Department.—Bonds, 7 per cent currency, $10,400,000.

"Land Sales.—292,900 acres; proceeds, $1,306,566; average price per acre $4 46.

On account of these sales the company has received and redeemed land-grant bonds to the extent of	$736,000
For the remainder the Company holds land-notes maturing in one, two and three years with accruing interest	576,650
Total	$1,312,650

"The condition of the land department may, therefore, be stated thus:

Bonds	$10,400,000
Principal reduced by bonds redeemed	$736,000
Land Notes on hand	576,650
Showing an absolute reduction	$1,312,650
The Company is entitled, under the grants from Government, after deducting total lands preempted before passage of the act to	12,080,000 acres.
From which deduct the amount heretofore sold	292,883 acres.
Leaving on hand as an asset	11,787,117 acres.

—which at an average value of two dollars per acre, being twenty per cent below the minimum Government price for adjoining lands owned by it, should yield the gross sum of $23,574,234, so much thereof as may be required to be applied to the payment on redemption of the land-grant bonds, and the balance to go into the Treasury. The average land sales amount to about $75,000 per month.

From present indications it would seem reasonable to estimate the gross receipts of the coming year at a minimum of	$9,000,000
With a cost of maintaining and operating the line on this increased earning of not exceeding say	4,500,000
Leaving as net receipts to be applied to interest and dividend, exclusive of the operations of the land department	4,500,000

"The operations of the line for the first twenty months of its existence as a completed road show net earnings sufficient to meet the interest upon its entire bonded debt.

"This result cannot but be deemed, by all practically versed in the history of new railway lines, as indicating a successful future. The yearly increase of traffic, costing but little additional to transport, and therefore yielding a large percentage of net revenue, must soon give a value to your property not sadly appreciated at present.

MORTON, BLISS & CO., No. 30 Broad street.

The Bankers' Gazette.

FRIDAY EVENING, March 24, 1871.

The Money Market.—The principal business of the week has been done at 4@5 per cent., with some exceptions at 6 on Thursday. The tendency towards firmer rates on call loans, noticed in our last report, being followed by an unfavorable bank statement on Saturday, 18th inst, was further developed this week, and on Thursday the outside rate was quoted at 6 per cent. as stated above, although large amounts were loaned in the afternoon at 4 per cent. To-day there was again a perceptibly easier feeling, with an abundant supply of money at 4 per cent. on government collateral and 5 per cent. on miscellaneous. The increased firmness in the market has been rather in the tone than in any real lack of funds, and has been produced by a cautious feeling arising from the reports which have been circulated of attempts to lock up money again about the first of April, and by the anticipation that the customary demand for money at the opening of Spring business might produce some tightness in the market, since the banks are already well expanded in their loans and discounts. The call made by the Comptroller of the Currency for the statement of the national banks, showing their condition at the close of business on the 18th inst., has removed one element of uncertainty, and will enable the banks to use their funds freely.

For the purposes of stock operations the demand has hardly been equal to that of the two previous weeks, as the general stock market has not been as active, and the large transactions have been chiefly limited to a few specialties. Some of the largest operators have also made time contracts extending over thirty or sixty days, to provide against the possibilities of stringent money. Time loans have been made at 6 per cent. for thirty days and 7 per cent. for sixty days on approved collateral; the banks, however, are generally averse to making time engagements.

The bank statement of Saturday last showed a material decrease in the legal-tender reserve, and an increase in liabilities; the loans also were increased $3,223,010, the other changes being as follows: Specie, $1,105,431 decrease, circulation $49,856 decrease, deposits $1,021,059 increase, and legal tenders $1,422,239 decrease. The net result of this statement showed the banks to be $2,770,471 weaker in their excess over the 25 per cent legal requirement, the whole of that excess being $12,649,676.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	Mar. 18, 1871.	Mar. 19, 1870.	Mar. 20, 1869.
Loans and discounts	$292,576,401	$270,003,682	$273,098,302
Specie	32,663,745	32,014,747	15,213,206
Circulation	31,605,215	35,692,563	34,711,310

Legal Tenders	55,623,645	52,771,420	50,774,854

For first-class commercial paper the demand has continued good, and rates are not quotably changed, although the tendency has been towards firmer prices. Banks are not as ready purchasers as they were a few weeks ago, on account of the several influences bearing upon the money market, as noticed above; they are not disposed to discount paper lower than 7 per cent, and as the best names can be negotiated with outside parties at 6@6½, the bulk of transactions have been with the latter.

United States Bonds.—Government securities have been dull, as a general rule, throughout the week, and 5-20s of 1867 close to-day at 110½, against 111 last week; 10-40s at 108½, against 109. There has been very little speculative interest in the market, and the attention of dealers has been largely occupied in discussing the prospects of the new loan, and the probable operations of Mr. Boutwell in regard to the purchase of bonds and sale of gold in April. Subscriptions to the loan may now perhaps amount to $25,000,000, but it has been rumored, and is believed by many of our leading bankers, that Secretary Boutwell will take extraordinary measures to stimulate subscriptions in April, either by selling a very large amount of gold, and purchasing a like amount of bonds, or by giving notice of the redemption of a certain amount of 5-20s in gold, at the expiration of three months. The probable amount of these transactions on the part of the Secretary have been variously estimated, some parties placing their figures as high as $100,000,000, but without any apparent basis for their suppositions; indeed the whole discussion in regard to the April programme of the government, although it has been the engrossing theme of the market, appears to have been carried on without any definite intimation of the course which will actually be pursued. It is stated, with much show of probability, that there is a party largely interested in bonds and short of gold, who are endeavoring to get Mr. Boutwell to carry out the plan indicated above, and which they are now deeply interested in, and urge upon the Secretary that such a course is the one most clearly prompted by patriotic motives. It is quite possible, however, that Mr. Boutwell may disappoint those who have been speculating upon his probable action, by not pursuing any of the several courses which have been laid out for him.

In regard to paying off 5-20's in gold, it has been claimed that the public credit act of March 18, 1869, would prevent that from being done until greenbacks are at par in gold, or until the new loan can be negotiated at par in gold; the text of the act is as follows: "But none of the said interest bearing obligations not already due shall be redeemed or paid before maturity, unless at such time as United States notes shall be convertible into coin at the option of the holder, or unless at such time as bonds of the

Digitized by Google

United States bearing a lower rate of interest than the bonds to be redeemed can be sold at par in coin." How far the action of the Secretary will be impeded by this law, it does not appear, and the subject will be of greater interest when his plans for April have been announced.

Much criticism has been made by some of the leading bankers in London, upon the manner in which the loan was placed upon the foreign markets, and from the comments of experienced financiers both at home and abroad, there seems to be reason for thinking that too little attention has, from the first, been given to the business details for introducing the bonds, as these details require to be arranged with the utmost care and forethought, even in case of the most attractive loans. At the Treasury purchase of $2,000,000 on Wednesday, bids amounted to $8,004,900, and had a depressing effect upon prices.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

Railroad and Miscellaneous Stocks.—The Stock market has, upon the whole, been less active with the heavier transactions generally limited to specialties. Prices have, with a few exceptions, been well maintained and in some cases largely advanced, the most conspicuous rise being noticed in Northwest Common and St. Paul Common, the former closing to-day at 85¼ and the latter at 60¾. The principal weakness among the speculative stocks was shown in Union Pacific, which closed to-day at 23½; Ohio and Mississippi has also been weak and closed at 46½, a reaction from the high prices to which the stock has recently been run up on its prospective value as the connecting line between Cincinnati and St. Louis, for several of the prominent routes between the seaboard and the former city.

Stocks are now held in large blocks by the cliques which were formed early in the year to advance prices, and will probably be unloaded gradually upon the market as the stock can be taken by outsiders without depressing prices. It is said that a considerable amount of stock from the country has already been thrown upon the street, which has been taken by the combinations to prevent any break in prices. A feature of this week's business has been the increased demand for the dividend paying shares, the Northwest stocks being bow considered as belonging to this class, and also Milwaukee and St. Paul Preferred. Coal stocks have been very firm and more active. Express stocks and the miscellaneous list comparatively dull with a downward tendency.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week.

State and Railroad Bonds.—Southern State bonds have been tolerably active at prices generally well maintained. Virginias have advanced, the new bonds touching 70¾ and the old bonds 68½, with some reaction afterwards. The funding bill before the Virginia Legislature has passed one house, and is confidently expected to pass the other house and become a law within a few days. South Carolina bonds have declined on the reports of political disturbances in the State. North Carolinas special tax are also lower. Pacific Railroad bonds have been a trifle less firm, without any apparent cause, and close as follows: Central Pacifics 95⅝@95¾; Union Pacifics 83@83½; Land Grants 74½@75; Incomes 68½@69. The gross earnings of the Union Pacific in February were $373,924, and net income $136,457. The Central Pacific gross earnings were about $495,000.

The Stock Exchange Committee has this week admitted to the call the bonds of the Nashville and Decatur Railroad, and the securities of the Atlantic and Pacific Railroad.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

The Gold Market.—The general tone of the gold market has been "bearish," and the speculative interest on that side has been considerably increased. The chief topic of discussion in the market has been the probable action of Government in regard to its sales of gold in April, and under the impression that Mr. Boutwell may throw a very large amount upon the market, the short interest above referred to has been created. Less important influences have also had a certain effect, as for instance the increase of bullion in the Bank of England, the disturbed condition of affairs in France depressing the prospects of the French loan, and the slightly easier rates of exchange here for to-morrow's steamer. On the other hand, the large demand for customs and the prospect of further exports, together with the short interest, have been the chief supports of the market.

It is possible that if the Treasury programme for April should be materially different from what it is expected to be by the parties operating for a decline, the effect produced might be a sharp upward turn, as the "shorts" would come in as purchasers to cover their contracts. Shipments this week will probably be about $650,000, of which $450,000 will probably be shipped to-morrow. At the Treasury sale of $2,000,000 on Thursday the bids amounted to $5,960,000. Customs receipts for the week amount to $3,838,000.

The following table will show the course of the gold premium each day of the week past:

	Quotations. Opening.	Lowest.	Highest.	Closing.	Total Clearings.	Balances. Gold.	Currency.
Saturday, Mar. 18....	111	111	111¼	111¼	$35,763,000	$1,811,855	$2 033 491

American filver (old coinage)	1@3 p.c. premium.	Spanish dollars	2@3 p.c.premium.
		South American dollars	par.

Foreign Exchange.—Rates have fluctuated slightly during the week, and close about the same as last Friday. During the first few days there was much firmness shown, and all the leading drawers were on Tuesday asking 110 less the usual commission; since that, however, rates have been easier, and best bankers 60 day sterling was quoted to-day at 109⅞, and short sight 110¼.

There has been a comparatively small business, as the high rates have the usual effect of checking such purchases as can be postponed till a future day. The bankers most intimately connected with the South report a smaller amount of cotton exchange making in that section during the past few days, and anticipate no supply of cotton bills sufficient to make rates easier. The shipments of specie have not been very large, and will probably not exceed $600,000 for the week, including the shipments of to-morrow.

Exports of cotton from all ports amount to 97,032 bales, producing $6,040,242 in gold, against 72,562 bales in the same week of 1870 producing then $6,397,065 gold, with Middling Uplands at 23c., and gold at 112.

Quotations are as follows:
